HEALTH SCIENCES B.S., WITH SOCIAL AND BEHAVIORAL HEALTH SCIENCES CONCENTRATION

TOTAL DEGREE HOURS: 120

Plans of Study
This Bachelor of Science in Health Sciences is designed for those interested in health science, the health care industry, and the allied health professions. The degree has a flexible curriculum so students may choose an area of specialization to suit their career interests. Career choices after graduation include working in health-related nonprofit organizations, governmental and community agencies, medical records, patient education, geriatric care settings, diagnostic laboratories, hospitals, the pharmaceutical industry, medical and wellness facilities, and businesses. Students graduating with this degree may enter the workforce or continue their education in a variety of fields that might include advanced degree programs in Health Management, Physical or Occupational Therapy, Physician Assistant, Health Administration, Healthcare Informatics, Communication Disorders and Social Work, to name a few. This degree has greater flexibility and students may have more exposure to social science, business, and humanities courses than the more natural science- and mathematics-intensive degrees sometimes required for some health-based professional schools.

UNIVERSITY ADMISSIONS
Admission to the University is based on the University's Undergraduate Admission Requirements that may be found by clicking on the following urls:
- Freshman: https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx
- Transfer: https://www.usf.edu/admissions/transfer/admission-information/index.aspx
- International: https://www.usf.edu/admissions/international/admission-information/index.aspx

GRADUATION REQUIREMENTS
Satisfactory completion of the following requirements:
- General Education Program (36 credit hours), including State Core General Education, State Computation and State Communication;
- Minimum of 120 unduplicated credit hours;
- A minimum adjusted grade point average (GPA) of 2.0 on all coursework taken at USF and an overall 2.0 GPA average on all college-level coursework;
- Major and college requirements in a chosen degree program;
- Nine credit hours of coursework taken during the summer term(s) (if entered USF with less than 60 credit hours);
- Registration and successful completion of at least thirty (30) of the last sixty (60) credit hours;
- 42 credit hours of upper-level coursework;
- Civics Literacy;
- Foreign language admissions coursework.

STATE MANDATED COMMON COURSE PREREQUISITES
Students wishing to transfer to USF should complete an A.A. degree at a Florida College System institution. Some courses required for the major may also meet General Education requirements thereby transferring maximum hours to the university.

If a student wishes to transfer without an A.A. degree and has fewer than 60 semester hours of acceptable credit, the student must meet the university's entering freshman requirements including ACT or SAT test scores, GPA, and course requirements.

Transfer students are also required to comply with the immunization, foreign language, and continuous enrollment policies of the university.

Students should complete the following prerequisite courses at the lower level prior to entering the university. If these courses are not taken at a Florida College System institution, they must be completed before the degree is granted.
REQUIRED COURSES: (12 CREDIT HOURS)

MAJOR CORE COURSES: 2 COURSES; 6 CREDIT HOURS

- HSC 2000 - Introduction to Health Professions Credit(s): 3
- CLT 3040 - Scientific and Medical Terminology Credit(s): 3

OTHER REQUIRED COURSES: (6 CREDIT HOURS)

ETHICS COURSE: 1 COURSE; 3 CREDIT HOURS

Choose one from the following list:

- CLP 4620 - Ethics in Psychology and Health Credit(s): 3
- PHI 3633 - Biomedical Ethics Credit(s): 3
- PHI 3636 - Professional Ethics Credit(s): 3

OUTSIDE THE MAJOR COURSE: 1 COURSE; 3 CREDIT HOURS

Choose one from the following list:

- ACG 2021 - Principles of Financial Accounting Credit(s): 3
- ECO 2023 - Economic Principles (Microeconomics) Credit(s): 3
- ANT 2511 - Biological Anthropology Credit(s): 3
- ANT 2410 - Cultural Anthropology Credit(s): 3
- COM 2000 - Introduction to Communication Credit(s): 3
- COM 2130 - Communication Skills for Health Professionals Credit(s): 3
- GEY 2000 - Introduction to Aging Sciences Credit(s): 3
- SYG 2000 - Introduction to Sociology Credit(s): 3

MAJOR CONCENTRATION ELECTIVES: (30 CREDIT HOURS)

Students complete a Health Sciences program of study and one of five concentrations in: Aging Health Studies, Biological Health Sciences, Health Information Technology, Health Care Administration, Social and Behavioral Health Sciences.

Students choose 30 credit hours in one (1) concentration or 15 credit hours each in two (2) concentrations.
SOCIAL AND BEHAVIORAL HEALTH SCIENCES CONCENTRATION: 10 COURSES; 30 CREDIT HOURS

Select 10 courses (30 credit hours) from the following list of courses:

- CLP 4143 - Abnormal Psychology Credit(s): 3
- COM 4020 - Communicating Illness, Grief, and Loss Credit(s): 3
- COM 4021 - Family Communication and the End of Life Credit(s): 3
- COM 4022 - Health Communication Credit(s): 3
- COM 4225 - Global & Cultural Issues in Health Communication Credit(s): 3
- COM 4702 - Communication, Language, and Mental Illness Credit(s): 3
- HSC 4172 - Women's Health: A Public Health Perspective Credit(s): 3
- HSC 4211 - Health, Behavior and Society Credit(s): 3
- HSC 4579 - Foundations of Maternal and Child Health Credit(s): 3
- HSC 4631 - Critical Issues in Public Health Credit(s): 3
- HSC 4933 - Special Topics in Public Health Credit(s): 1-3
- LIS 4776 - Health Information Technology Credit(s): 3
- LIS 4930 - Selected Topics in Information Studies Credit(s): 3
- MHS 4022 - Adult Psychopathology in the Community Credit(s): 3
- MHS 4452 - Co-Occurring Disorders Credit(s): 3
- MHS 4490 - Behavioral Healthcare Issues for Children Credit(s): 3
- PAD 4930 - Selected Topics in Public Administration and Public Policy Credit(s): 3
- PHI 4930 - Selected Topics Credit(s): 1-3
- SOP 4330 - Social Psychology of HIV/AIDS Credit(s): 3
- SOW 3102 - Human Behavior and the Social Environment II Credit(s): 3
- SOW 3203 - Introduction to Social Work Credit(s): 3
- SOW 3210 - The American Social Welfare System Credit(s): 3
- SPC 4930 - Selected Topics Credit(s): 1-3
- SYO 4400 - Medical Sociology Credit(s): 3
- WST 4320 - Politics and Issues in Women's Health Credit(s): 3

MENTAL HEALTH CLUSTER

These courses for students interested in Mental Health professions.

Note: Special Topics courses are chosen in advance of registration, in coordination with an academic advisor.

- MHS 3411 - Multidisciplinary Behavioral Healthcare Services Credit(s): 3
- MHS 4002 - Behavioral Health Systems Delivery Credit(s): 3
- MHS 4408 - Exemplary Practices in Behavioral Healthcare Treatment Credit(s): 3
- MHS 4703 - Legal, Ethical and Professional Issues in BHC Credit(s): 3
- MHS 4931 - Selected Topics Credit(s): 1-3
SUBSTANCE ABUSE CLUSTER

These courses are for students interested in Substance Abuse Counseling and Treatment professions.

Note: Special Topics courses are chosen in advance of registration, in coordination with an academic advisor.

- MHS 3411 - Multidisciplinary Behavioral Healthcare Services **Credit(s): 3**
- MHS 4408 - Exemplary Practices in Behavioral Healthcare Treatment **Credit(s): 3**
- MHS 4703 - Legal, Ethical and Professional Issues in BHC **Credit(s): 3**
- MHS 4931 - Selected Topics **Credit(s): 1-3**
- PSB 3444 - Drugs and Behavior **Credit(s): 3**

HEALTH SCIENCES B.S. - ADDITIONAL INFORMATION

GPA REQUIREMENTS

A minimum adjusted grade point average (GPA) of 2.0 on all coursework taken at USF and an overall 2.0 GPA average on all college-level coursework.

GRADING REQUIREMENTS

Unless stated otherwise, a grade of "C-" is the minimum acceptable grade.

RESIDENCY REQUIREMENT

Students in the College of Public Health are expected to complete a minimum of 50% of their major and/or minor coursework in residence at USF.

RESEARCH OPPORTUNITIES

A maximum of 4 credits of Undergraduate Research (IDS 4910) may be applied to the major with a maximum of 1 credit taken per semester.

Undergraduate students in any degree program are able to participate in undergraduate research. Several options exist to show mentored undergraduate research activity on a student’s official transcript. Those who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 4914 course. This course will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research is able to assist with further inquiries.

Plans of Study

CERTIFIED GLOBAL PATHWAY PROGRAM

USF offers the first Bachelor's in Public Health housed in its accredited College of Public Health in Florida. The Bachelor of Science in Public Health provides the student-centered courses required for entry-level public health jobs found in government agencies, health corporations, community non-profit organizations and healthcare facilities.

UNIVERSITY ADMISSIONS

Admission to the University is based on the University's Undergraduate Admission Requirements that may be found by clicking on the following urls:

- Freshman: [https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx](https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx)
- Transfer: [https://www.usf.edu/admissions/transfer/admission-information/index.aspx](https://www.usf.edu/admissions/transfer/admission-information/index.aspx)
- International: [https://www.usf.edu/admissions/international/admission-information/index.aspx](https://www.usf.edu/admissions/international/admission-information/index.aspx)

STATE MANDATED COMMON COURSE PREREQUISITES

Students desiring to transfer to USF should complete an A.A. degree at a Florida College System institution. If students transfer with fewer than 60 semester hours of acceptable credit, the students must meet the University’s entering freshman requirements including ACT or SAT test scores, GPA, and course requirements. Transfer students are also required to comply with the immunization, foreign language, and continuous enrollment policies of the university.

NOTE: The University of South Florida B.S. in Public Health does not require any common prerequisites.

HSC 4537 - Medical Terminology Credit(s): 3

Specialization Electives (12 Credit Hours)

USF offers a Bachelor of Science in Public Health with an option to choose a specialization based on their major electives in the following areas. Students may choose (but are not required) an area of specialization and take 12 credit hours from that chosen area.

**Nutrition**

HSC 4573 - Foundations of Food Safety Credit(s): 3
HUN 3126 - Food and Culture Credit(s): 3
HUN 3272 - Sports Nutrition Credit(s): 3
HUN 3296 - Nutrition and Disease Credit(s): 3

**Infection Control**

HSC 4504 - Foundations of Public Health Immunology Credit(s): 3
HSC 4573 - Foundations of Food Safety Credit(s): 3
PHC 4031 - Emerging Infectious Diseases Credit(s): 3
PHC 4032 - Foundations of Infection Control Credit(s): 3

**Health Education**

PHC 4141 - Intervention Program Planning and Management Credit(s): 3
PHC 4501 - Health Education Theory and Behavior Credit(s): 3
PHC 4582 - Health Education Methods and Strategies Credit(s): 3

Select one course from the following list:

HSC 4172 - Women's Health: A Public Health Perspective Credit(s): 3
HSC 4579 - Foundations of Maternal and Child Health Credit(s): 3

**Environmental and Occupational Health**

HSC 3503 - Principles of Toxicology Credit(s): 3
HSC 4213 - Environmental and Occupational Risk Analysis Credit(s): 3
HSC 4430 - Occupational Health and Safety Credit(s): 3
PHC 3320 - Environmental Health Science Credit(s): 3
Global Health

PHC 4188 - Public Health Emergencies in Large Populations **Credit(s): 3**
PHC 4234 - Public and Private Continuity Planning for Emergencies **Credit(s): 3**
PHC 4250 - Crisis Leadership in Disasters **Credit(s): 3**
PHC 4375 - Community Participation in Homeland Security **Credit(s): 3**
PHC 4376 - Disaster by Design: Exercise Development for Homeland Security Professionals **Credit(s): 3**

LOWER-LEVEL PUBLIC HEALTH ELECTIVES

(Choose up to 2 courses)

The following lower-level courses are not required for the major, but may be taken and applied toward the total degree hours requirement (120 hours).

HSC 2017 - Careers in Public Health **Credit(s): 3**
HSC 2100 - Contemporary Health Science **Credit(s): 3**
HSC 2130 - Sex, Health, and Decision-Making **Credit(s): 3**
HUN 2201 - Nutrition **Credit(s): 3**
PHC 2100 - Introduction to Public Health **Credit(s): 3**

GPA REQUIREMENTS

Maintain a major GPA of 2.0 in USF coursework.

GRADING REQUIREMENT

None of the coursework taken in the student's major may be taken as an S/U grade, unless S/U is the only grading option. Coursework fulfilling the State Communication Requirement (formerly known as Gordon Rule Writing) and State Computation Requirement (formerly known as Gordon Rule Math) and General Education requirements may not be taken as S/U.

The Audit option is available only during the first 5 days of classes.

Grades of D+ or lower are not acceptable in the major.

RESIDENCY REQUIREMENT

Students in the College of Public Health are expected to complete a minimum of 50% of their major and/or minor coursework in residence at USF.

RESEARCH OPPORTUNITIES

Undergraduate students in any degree program are able to participate in undergraduate research. Several options exist to show mentored undergraduate research activity on a student's official transcript. Those who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 4914 course. This course will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research is able to assist with further inquiries.

OTHER INFORMATION

Students completing the B.S. in Public Health will be able to:

- Identify and articulate the core functions of public health.
- Explain the basic principles of epidemiology.
- Assess social and behavioral interventions to improve health of populations.
- Identify the impact of the environment and communicable diseases on health.
EXPLAIN THE ROLE THAT PUBLIC HEALTH PLAYS IN DISASTER PREVENTION AND MANAGEMENT AND EVALUATE PUBLIC POLICY ISSUES WITH RESPECT TO ACCESS, QUALITY AND COST WHEN UNDERSTANDING HEALTH DISPARITIES WITHIN VULNERABLE POPULATIONS.

EXHIBIT CRITICAL THINKING AND ANALYTICAL ABILITIES, INCLUDING THE CAPACITIES TO ENGAGE IN INDUCTIVE AND DEDUCTIVE THINKING AND QUANTITATIVE REASON, AND TO CONSTRUCT SOUND ARGUMENTS.

IDENTIFY TOPICS PERTAINING TO PUBLIC HEALTH RESEARCH.

GENERATE RESEARCH QUESTIONS, ANALYZE AND PRESENT DATA, AND INTERPRET AND DISCUSS FINDINGS.

DEMONSTRATE AWARENESS ABOUT CURRENT PUBLIC HEALTH TOPICS INCLUDING AN ANALYSIS OF THE SOCIETAL ATTITUDES THAT GENERATE DIFFERENCES ON CURRENT PUBLIC HEALTH TOPICS.

COMMUNICATE USING EFFECTIVE ORAL SKILLS.

DEMONSTRATE AN ABILITY TO CONTRIBUTE EFFECTIVELY TO GROUP DISCUSSIONS AND PRESENTATIONS.

APPLY EFFECTIVE PUBLIC SPEAKING SKILLS DURING CLASSROOM PRESENTATIONS.

DEVELOP EFFECTIVE WRITTEN PRESENTATIONS.

DEMONSTRATE THE USE OF INFORMATION LITERACY SKILLS SUCH AS LOCATING AND EVALUATING PERTINENT PUBLIC HEALTH INFORMATION.

DEMONSTRATE THE ABILITY TO USE LIBRARY RESOURCES AND SCIENTIFIC DATABASES.

EXHIBIT PROPER REFERENCING SECONDARY MATERIALS IN APA FORMAT.

Email: UG-PublicHealthAdvising@usf.edu
Phone: (813) 974-4633
The goal of the general Public Health minor is to introduce students to the field of public health. Public health professionals seek to prevent disease and promote health and well-being among communities. This is important for human and environmental health. This minor provides students with a range of courses designed to understand important public health concepts such as epidemiology, health disparities, social determinants of health, and health policy. And, students can tailor the minor by selecting a course that most interests them and prepares them for their future career aspirations.

(813) 974-3367
afrotc@usf.edu
https://www.usf.edu/undergrad/air-force-rotc/

Here at USF, we are Detachment 158 of the Air Force Reserve Officer Training Corps (AFROTC) – Home of the "Flying Bulls." The AFROTC curriculum we offer includes 16 credit hours of instruction by active duty Air Force officers. A cadet who successfully completes the AFROTC program and a Bachelor's degree will earn an Air Force commission and enter active duty in the United States Air Force as a Second Lieutenant. AFROTC is offered in a variety of three-to-five year programs and cadets must be enrolled full-time; i.e., carry at least 12 credit hours each fall and spring semester. In addition to their academic work, AFROTC cadets are also required to take a 2-hour non-credit leadership laboratory (LLAB) each semester. Cadets wear Air Force uniforms during LLAB, plan and execute leadership training, and learn Air Force customs and courtesies. Furthermore, AFROTC cadets must attend two physical training sessions on Tuesdays and Thursdays of each week to prepare them to successfully complete the Air Force Physical Fitness Assessment each semester. Physical training sessions are an hour long and begin at 5:45am.

AFROTC scholarships may be available for eligible cadets who meet highly competitive nationwide criteria established by AFROTC Headquarters. The scholarships may pay all tuition, fees, books, and a $300 - $500 per month tax-free stipend. For more information about scholarship criteria, contact us or visit www.afrotc.com for the most current scholarship information. An AFROTC scholarship is not required to enter or even complete the AFROTC program.

Students may join AFROTC at the beginning of the fall or spring semester. To get more information about our program or to start the process of becoming an AFROTC cadet, please contact our Air Force ROTC Office at USF via afrotc@usf.edu or phone 813-974-3367 or visit us in person on the 4th floor of the CWY Building, located just north of the USF Campus Recreation Center GPS 12303 USF Genshaft Drive.

The program is divided into two categories. The General Military Course (GMC) consists of first and second year cadets. The Professional Officer Course (POC) is made up of the third and fourth year cadets. To enter the POC, a cadet must complete Field Training during the summer between second and third year. Field Training is intensive military leadership evaluation and training conducted at Maxwell Air Force Base AL.

General Military Course (GMC)

The GMC consists of four one-hour courses offered in the fall and spring only. Each semester you are in GMC must include a two-hour LLAB and physical fitness sessions twice weekly. It is possible to take these 1-hour courses simultaneously to compress the GMC period from 2 years to 1 ½, or even 1 year. However, the 2-year program is the preferred approach. During GMC, cadets are introduced to the structure and core values of the U.S. Air Force as well as its storied history. Unless you are a scholarship cadet and in your second year of the program, you have no military obligation whatsoever and can leave at any time while in GMC. The program is designed like this so you can see if a career as an Air Force officer is right for you.

GMC Courses:

AFR 1101  (Fall) – Heritage and Values of the United States Air Force Part 1 (1 credit)
AFR 1120  (Spring) – Heritage and Values of the United States Air Force Part 2 (1 credit)
AFR 2130  (Fall) – Team and Leadership Fundamentals Part I (1 credit)
AFR 2140  (Spring) – Team and Leadership Fundamentals Part 2 (1 credit)
Field Training (FT)

Prior to entering the Professional Officer Course, cadets must successfully complete Field Training (FT) at Maxwell Air Force Base, Montgomery, Alabama which will test their leadership potential. Earning a FT slot is competitive and selection is based on several performance criteria such as GPA, standardized test scores, and Physical Fitness Assessment scores.

Professional Officer Course (POC)

The POC consists of four semesters of three-hour courses offered only in the fall and spring. Each semester you are in POC must include a two-hour LLAB and physical fitness sessions twice weekly. Unlike GMC, the POC cannot be compressed and requires 2 years to complete. POC cadets learn and apply leadership and time management principles and are responsible for the design and execution of all cadet activities. Active duty officers are available full-time to guide and mentor POC cadets to ensure they provide quality training for all the cadets in the program. POC cadets conduct the leadership seminars and manage the cadet corps. To develop POC cadets and prepare them to enter active duty, emphasis is placed on small group discussions and presentations on topics such as management, communication skills and national defense policy. As a POC cadet, you sign an Air Force Reserve contract. This entitles you to a monthly stipend of $300 to $500 during the academic year whether or not you receive an AFROTC scholarship.

POC Courses:

- AFR 3220 (Fall) – Leading People and Effective Communication Part 1 (3 credits)
- AFR 3231 (Spring) – Leading People and Effective Communication Part 2 (3 credits)
- AFR 4201 (Fall) – National Security Affairs and Preparation for Active Duty Part 1 (3 credits)
- AFR 4211 (Spring) – National Security Affairs and Preparation for Active Duty Part 2 (3 credits)

Both GMC and POC cadets must also enroll in AFR 2001 (Fall/Spring) – AFROTC Leadership Lab (0 credit – S/U grade only)

Just like physical training, all Air Force ROTC cadets must participate in LLAB every semester. LLAB is a cadet-run course that provides excellent opportunities to develop your leadership and followership skills. Our goal in AFROTC is to develop leaders for the Air Force, so LLAB is an essential piece of your development as a future Air Force officer.

Furnished Items

The Air Force ROTC detachment provides all required items free of charge that you’ll need in the program to include a variety of uniforms and all AFR course material.

Air Force Careers

In addition to pilot careers, there are a multitude of USAF career options for officer candidates. To assist cadets in selecting an Air Force career, we bring in active duty officers from various career fields each semester to talk with our cadets. We also visit nearby military bases and coordinate orientation flights in actual USAF aircraft. With this background, cadets can make an informed decision on the career path that interest them most. Competition for flying careers occur in the first year of the POC. The selection for non-flying careers occurs at the beginning of the second year in POC.
ROTC PROGRAMS

UNIVERSITY OF SOUTH FLORIDA 2021-2022 UNDERGRADUATE CATALOG

Military Science - Army ROTC

C.W. Bill Young Hall (CWX) 405
(813) 974-4065
usoff@usf.edu
https://www.goarmy.com/rotc/schools/university-of-south-florida.html

The Department of Military Science for Army Reserve Officers Training Corps (AROTC) was established to select and prepare students to serve as officers in the Regular and Reserve components of the United States Army. The curriculum is designed to develop students' leadership potential and improve students' planning, organizational, and managerial skills.

Army ROTC training is divided into two phases: the first two years constitute the Basic Course; the last two the Advanced Course. The Department offers both a four- and a two-year program, each leading to a commission as a Second Lieutenant in the United States Army. The four-year program requires completion of the Basic Course, a five-week field training course, and the Advanced Course. Students with prior active military service or previous training at military schools may be exempt from some or all of the Basic Course. Students with questions concerning the various options should contact the Professor of Military Science for more information. Enrollment is open to qualified students at all levels, including graduate students. Offerings are published each semester.

Army ROTC training provides scholarships, pay, free uniforms and textbooks for scholarship and/or contracted Cadets. Scholarships are awarded on a competitive basis in all academic majors. The scholarship pays full tuition or room and board, books, lab and mandatory fees, and certain other academic expenses.

Additional Skills Training

Airborne School, Air Assault School, and the Northern Warfare School are available to both Basic and Advanced Course students during semester breaks. Additional skills training is also available during the academic year to include first aid, rappelling, orienteering, etc.

Basic Course

The Basic Course consists of four semesters of classroom instruction of one and a half hour each week and a leadership lab. Students incur no military commitment by participating in the Basic Course. In lieu of attending the basic course classroom instruction, a student may attend the four-week Leadership Training Course at Fort Knox, Kentucky during the summer of the student's sophomore year.

Advanced Course

The Advanced Course consists of four semesters of classroom instruction of three hours each week, leadership lab, physical fitness and field training exercises, and a five-week training phase at Leadership Development and Assessment Course. Students registering for the Advanced Course must have met all requirements for Basic Course completion. The Advanced Course is designed to prepare the student who desires to be a Professional Army Officer for duty in the Active Army, Reserve or National Guard. Additional training is available to selected Cadets at both US based and overseas active Army units.

Job Opportunities

The newly commissioned Officer can be guaranteed Reserve or National Guard duty, or compete for an Active Duty commission. Prior to commissioning, the student may request to serve in a number of career fields to include aviation, infantry, armor, engineering, medical, law enforcement, logistics, and personnel administration.

Requirements for an ROTC Commission

Students who desire to earn a commission as a Second Lieutenant in the United States Army must meet the following requirements: four semesters of the ROTC Advanced Course, successful completion of the Professional Military Education Courses (written communication skills, computer literacy, and military history), attendance at Leadership Development and Assessment Course, maintain and graduate with a minimum of a 2.0 GPA, successful completion of the Army Physical Fitness Test, compliance with the Army height and weight standards, and other requirements of the United States Army.
The Naval Science Program at the University of South Florida is administered by the Naval Reserve Officers Training Corps (NROTC) Unit. This program affords selected men and women the opportunity to receive instruction in Navy- and Marine Corps-specific courses which, in conjunction with the baccalaureate degree, will qualify them for a commission in the United States Navy or Marine Corps. Students enrolled in the university who are physically and mentally qualified are eligible to apply for the NROTC program. As naval officers, USF NROTC graduates become eligible for varied careers, serving in aviation squadrons, on surface ships, on submarines in the nuclear power program, at naval installations all over the world, or in the numerous sub-specialties as an officer of the Marines Corps. With the consent of the Professor of Naval Science, any student, although not enrolled in the NROTC program, is eligible for enrollment in naval science courses. The USF NROTC unit offers participation through three programs: (1) the Navy-Marine Corps Scholarship Program, (2) the Navy-Marine Corps College Program, and (3) the Three-/Two-Year NROTC Scholarship Program.

The Navy-Marine Corps Four-Year Scholarship Program

The NROTC National Scholarship Program is open to young men and women of all races, creeds, and national origins who are United States citizens. Students are selected on their own merit to become officers in the United States Navy and Marine Corps. Scholarship students are appointed Midshipmen, U.S. Navy Reserve. The Navy pays for tuition, fees, textbooks, uniforms, and a monthly subsistence allowance of up to $400.00 for four years. Scholarship students are normally selected through national competition during their senior year in high school. Although it is not a requirement, a student in the NROTC Scholarship Program is encouraged to pursue a major in engineering, mathematics, chemistry, or physics to meet the technological requirements of the Navy. Other fields of study for a major leading to a Baccalaureate degree are permitted, with the approval of the Professor of Naval Science. Regardless of the major, every Navy scholarship student must complete one year of physics and one year of calculus.

Students must complete certain Navy- and Marine Corps-specific courses and complete a program of courses as prescribed by the Professor of Naval Science. Upon graduation, and successful completion of the naval science curriculum, the midshipman will receive a commission as Ensign in the U.S. Navy or Second Lieutenant in the U.S. Marine Corps and serve on active duty for a minimum of five years.

The Navy-Marine Corps College Program

The NROTC College Program is designed to train and educate well-qualified young men and women for commissioning. Students in the College Program compete for three- or two-year scholarships which must be earned prior to commencement of a student's junior year. The Navy or Marine Corps pays for uniforms and naval science textbooks for freshmen and sophomores. Each student is eligible to apply for a two- or three-year scholarship through the NROTC unit based on past academic performance, potential, physical fitness, and advisor evaluations. This scholarship covers tuition, fees, books and a stipend akin to the four-year scholarship. Other students may receive Advanced Standing which only provides a stipend. Those students who do not obtain a scholarship or Advanced Standing by their junior year will be dropped from the program. A college program midshipman only acquires a military service obligation after entering the advanced courses at the beginning of the junior year.

Although there are no restrictions on the major college program students may pursue, it is highly recommended that they pursue a course of study similar to that of scholarship students. Students must complete certain Navy- and Marine Corps-specific courses and complete a program of courses as prescribed by the Professor of Naval Science. Students, upon graduation and successful completion of the naval science curriculum, receive a commission as an Ensign in the U.S. Navy or a Second Lieutenant in the U.S. Marine Corps and serve on active duty for a minimum of three years.
Three-Year/Two-Year NROTC Scholarship Program

The three-year/two-year scholarship program is offered for students commencing their second or third year of college. Applications must be submitted by May 31st during the freshman or sophomore year. Qualifications for acceptance to this program include demonstrated ability to excel in a math, physical science, or engineering major.

Regardless of the major, every scholarship student must complete one year of calculus-based physics and one year of calculus. Students must complete certain Navy- and Marine Corps-specific courses and complete a program of courses as prescribed by the Professor of Naval Science. Upon graduation, and successful completion of the naval science curriculum, the midshipman will receive a commission as an Ensign in the U.S. Navy or a Second Lieutenant in the U.S. Marine Corps and serve on active duty for a minimum of five years.

Summer Training

NROTC scholarship students are required to complete several weeks of training during each summer recess, including the summer before they enter college. NROTC College Program students do not qualify for summer training, except for the summer before they enter college.

The summer before all NROTC students begin college, they will spend approximately three weeks at New Student Indoctrination (NSI) at Naval Station Great Lakes, outside of Chicago, IL. NSI is designed to standardize basic militarization and provide uniform training not available on campus. The training is being accomplished on the same base and in the same facilities that train every enlisted Sailor. NSI provides basic training in five warfighting competencies – Fire Fighting, Damage Control, Seamanship, Watchstanding and Small Arms Handling and Marksmanship – to begin creating basically trained, smartly disciplined, tough and courageous future Navy and Marine Corps Officers.

During the next summer training period, each scholarship student will receive instruction in aviation training, marine combat training, surface warfare indoctrination, and submarine indoctrination in either Norfolk, Virginia, or San Diego, California. The third summer training period occurs aboard operational ships of the U.S. Fleet. During the final summer training period, candidates for the U.S. Navy will perform training aboard operational ships, submarines, or aviation squadrons, shadowing a junior officer. Outstanding midshipmen also have the opportunity to cruise with allied navies through the Midshipman Foreign Exchange Program. During the final summer training period, candidates for U.S. Marine Corps commissions will complete Officer Candidates School (OCS) at the U.S. Marine Corps Base, Quantico, Virginia. OCS is a six-week training program designed to prepare midshipmen for commissioning by providing basic military instruction and physical training. An evaluation of midshipmen is made to ensure that they possess the leadership, academic, and physical qualifications required for appointment.

Transportation costs to and from the training sites, subsistence, quarters, and training pay is provided to every participating student.

Specified University Courses

In addition to satisfying requirements for a Baccalaureate degree, students must satisfactorily complete the following four-year curriculum guide, including required naval science courses and specified university courses.

All students: NSC 1110 – Introduction to Naval Science (generally taken as a freshman)

All students: NSC 2231 – Principles of Naval Management I (generally taken as a sophomore)

Navy options only: NSC 2121 – Naval Ships Systems I (generally taken as a junior)

Navy options only: NSC 3214C – Navigation/Naval Operations II (generally taken as a senior)

Marine options only: NSC 3225 – Fundamentals of Maneuver Warfare (generally taken as a sophomore of junior, depending on offerings)
Courses offered in the spring:
All students: NSC 1140 – Seapower and Maritime Affairs (generally taken as a freshman)

Navy options only: NSC 2212C – Navigation/Naval Operations I (generally taken as a sophomore)

Marine options only: NSC 2220 – Evolution of Warfare (generally taken as a sophomore or junior, depending on offerings)

Navy options only: NSC 3123 – Naval Ships Systems II (generally taken as a junior)

All students: NSC 4232 – Principles of Naval Management II (generally taken as a senior)

Courses required every fall and spring semester:
All students: NSC 1101L – 001 – Naval Science Laboratory

Marine options only: NSC 1101L – 002 – Naval Science Laboratory (Semper Fi)

Navy options only: NSC 1101L – 003 – Naval Science Laboratory (Blue and Gold)

Depending on a student's program (e.g., Navy, Marine Corps, scholarship, college program), they will also be required to take non-naval science courses. Examples include courses in calculus, physics, English, military history or national security policy, and world cultures or regional studies.

Furnished Items
All uniforms, textbooks, and equipment needed by the student for naval science courses are furnished by the Navy and Marine Corps.

Use of Navy Science Courses as University Electives
Academic departments within the university may, according to their own policies, accept naval science courses as electives to fulfill requirements in their academic program.
The Joint Military Leadership Center (JMLC)

4202 E. Fowler Avenue, SVC 2002
Tampa, FL 33612
(813) 974-4051
https://www.usf.edu/undergrad/jmlc/index.aspx

Consistent with the mission of the University of South Florida, a global, research university, The Joint Military Leadership Center focuses on preparing future commissioned officers to lead in a joint, multi-national environment through providing and maintaining a unique, state of the art, joint training facility for ROTC; sponsorship of joint activities; and promotion of joint planning and inter-service cooperation.

Programs

The Joint Military Leadership Center develops and implements educational programs to enhance the quality of the ROTC curriculum. Students will gain a better understanding and appreciation for the capabilities, limitations and culture of each military service and the challenges and value of joint operations. These programs include:

- Sponsorship of relevant speakers from the Department of Defense, the Armed Services, Unified Combatant Commands, and the Senior National Representatives of the Coalition at U.S. Central Command.

- An ROTC Living Learning Community (LLC) established in the university's Housing and Residential Education Department. See https://www.usf.edu/housing/residential-learning/llc-interest/rotc.aspx.

- Student visits to MacDill Air Force Base and Unified Combatant Commands - U.S Central Command (USCENTCOM) and U.S. Special Operations Command (USSOCOM).

- Promotion of cross-cultural competence and study of foreign languages and cultures.

For ROTC Curriculum Programs, please see Undergraduate Studies Curriculum Programs

To schedule an advising appointment:

- Prospective or current students with an active UID can schedule an appointment online: https://usf.appiancloud.com/suite/sites/archivum/page/archivum/report/daQEig

- Prospective students who have not yet applied or students who are inactive (e.g., dismissed or not enrolled for three (3) consecutive terms) should contact the appropriate advising location in their intended major: https://www.usf.edu/undergrad/students/advising.aspx

About the College

The College of The Arts is the creative center of the University of South Florida's Tampa campus and offers programs to prepare students for careers in architecture, community design, art, art history, music, theatre, and dance. The St. Petersburg campus offers the Graphic Arts program. USF is not only the starting point of a career in the arts, but Tampa Bay is also a perfect place to become part of the arts community.

At USF, we provide our students with hands-on experiences and real-world opportunities for exhibitions, performances and practice within our own university gallery spaces, museum and performance halls. Students also participate in design, research, performance and exhibition projects across the Tampa Bay community. We proudly feature our students, faculty and guest artists in more than 250 stage productions, concerts, exhibitions and lectures each year. Many of these are free and open to the public.

Research is how the College of The Arts provides resources to help students and the community benefit from the work and discovery at this university. Research in the Arts expands the practice of our students, faculty and community of artists through interdisciplinary work, global explorations of perspectives and local community engagement. The three research units of the College of The Arts – the Institute for Research in Art, the Center for Music Education Research and the Florida Center for Community Design and Research – exemplify the interdisciplinary significance of the arts. Through these research units, our students are exposed to various contemporary works that become incorporated into their curriculum and expand their own creative practices.

Mission, Vision, Values

Mission

The mission of the University of South Florida’s College of The Arts is to conduct scholarly and creative research and to challenge and inspire students to make significant contributions in the arts. At USF, we provide a learning environment that is engaged locally and nationally in contemporary issues and initiatives.

Vision

Our college aspires to achieve national and international recognition as a distinguished center for study, creation, and research (in architecture and community environmental design, publishing of prints and sculpture multiples, visual arts, graphic arts, dance, music, theatre, and contemporary exhibitions). We provide an innovative and exciting environment to prepare the next generation of architects, artists, designers, educators, scholars, and audiences for these disciplines. The Arts at USF supports and promotes creative research (including history and theory), performance, and production in these disciplines while continuing to engage the Tampa Bay community by enriching the cultural landscape and advancing sustainable practices.
Values

Our college values the role and function the arts have — both historically and in the present — as a means of discovery, expression, and reflection on our human experience and the world in which we live.

More specifically we value:

- Innovative approaches to teaching that fosters critical thinking, creative problem solving and effective communication
- Rigorous preparation in the foundations of one's discipline as a point of departure for creative development and scholarship
- Significant scholarly and creative research
- The diverse perspectives of faculty, guest artists/lecturers/scholars, and students
- Active involvement in the local, national, and international discipline-based dialog
- Interdisciplinary and collaborative opportunities — locally, nationally, and internationally
- Community engagement and partnerships
- Production and presentation of distinctive contemporary work
- Collegial participation of faculty, staff, and students in efforts of the schools, college, and university

Accreditation

School of Architecture & Community Design
The USF School of Architecture & Community Design is accredited by the National Architectural Accrediting Board: For additional information about NAAB, visit their website at http://www.naab.org

School of Art & Art History
The USF School of Art & Art History is accredited by the National Association of Schools of Art and Design: For additional information about NASAD, visit their website at http://www.nasad.arts-accredit.org

School of Music
The USF School of Music is accredited by the National Association of Schools of Music: For additional information about NASM, visit their website at http://www.nasm.arts-accredit.org

School of Theatre & Dance
The Theatre Program is accredited by the National Association of Schools of Theatre: For additional information about NAST, visit their website at https://nast.arts-accredit.org/

The Dance Program is accredited by the National Association of Schools of Dance: For additional information about NASD visit their website at http://www.nasd.arts-accredit.org

Contemporary Art Museum
The USF Contemporary Art Museum is accredited by American Alliance of Museums: For additional information about AAM, visit their website at https://www.aam-us.org/
College-Level Requirements

Admission Requirements

To apply for academic programs in the College of The Arts, you must first be accepted to the University of South Florida. Once you meet USF requirements (https://www.usf.edu/admissions/), you can apply to your program of interest. Some programs require an audition or portfolio submission. Check individual requirements for your program of interest before applying.

Step 1: Apply for admission to the University of South Florida https://secure.vzcollegeapp.com/usf/

Step 2: Apply for admission to the College of The Arts' schools, please see Program-Specific Requirements.

General Requirements for Bachelor Degree Programs within the College of The Arts

All Bachelor degree programs require 120 credit hours with the exception of the Bachelor of Science degree in Music Education, which requires 134 credit hours.

Students admitted to the College of The Arts with transfer credits, or former students returning with credits dating ten or more years prior to admission (or readmission), will have those credits reviewed by the College and department/school and may be required to take specified competency tests in their major area.

A maximum number of ROTC credits totaling no more than the maximum allowed in the Free Elective Area for each major may be counted toward all degrees.

A maximum of four credit hours of elective Physical Education credits taken at USF may be counted as general elective credit.

Students must satisfactorily meet the State Communication Requirement and State Computation Requirement.

Students applying for a B.A. degree must demonstrate competency in a foreign language as described under Foreign Language Competency Policy of this catalog.

For degree programs, see requirements listed under each School.

Beginning Fall semester 2012, students must successfully complete a minimum of 50 percent of the courses required for their major on their specific home campus within USF. A student must also earn 30 of the last 60 hours of credits in residence at USF. However, any course work to be taken and any credits to be earned outside of the university must have prior approval from the appropriate school and the college in order to apply these credits toward graduation.

Waiver of prerequisite coursework totaling no more than 12 credit hours in the major or College requirements is possible by demonstration of competence. Unless credit is awarded by approved official tests, i.e., AP, CLEP, the credit hours must be made up according to school or college recommendations. A faculty committee conducts waiver reviews. Specific questions concerning program requirements for all degrees in the College or other related problems should be directed to the College of The Arts.

College Policy for Academic Progress

The following criteria will serve as the bases for disenrollment from a major in the College of The Arts:

Grade point average below 2.0 in the major.

Recommendation by major applied (studio) art, graphic arts, dance, music or theatre faculty with approval of respective school director.

The school may recommend probationary status (rather than disenrollment) for one semester when academic progress is not maintained.
Directed Studies Contracts

All Directed Studies and other variable credit courses in the College of The Arts require contracts between students and instructors describing the work to be undertaken by the student and specifying the credit hours. These contracts are to be completed in quadruplicate and appropriately signed. It is the student's responsibility to obtain the necessary signatures and make the required distribution of all copies. Important: the student must have his/her signed copy of a contract at the time of registration.

Permission Procedures

Admission into some courses is possible only by consent of instructor (CI), consent of chairperson (CC), consent of advisor, or by audition or portfolio review. When such special permission is required, it will be the student's responsibility to obtain any required permission prior to registration.

Program-Specific Requirements

School of Architecture & Community Design
https://www.usf.edu/arts/architecture/

Bachelor degrees are not awarded through the School of Architecture & Community Design. However, you can enroll in the Pre-Architecture program as an undergraduate. Once you have completed those courses, you are able to enroll in the Master degree programs.

School of Art & Art History
https://www.usf.edu/arts/art/apply/index.aspx

The School of Art & Art History offers Bachelor degrees in both Studio Art and Art History. No additional materials are required for admission to the undergraduate BA and BFA in Studio Art, or BA in Art History.

Graphic Arts B.F.A.
https://www.usfsp.edu/vva/applying

The B.F.A. Degree in Graphic Arts on the St. Petersburg campus is a limited access, upper-level program of study. Students are accepted in the Spring and begin the program as a cohort in the Fall semester. Admission into the B.F.A. program is contingent upon the student having a 3.25 or higher major GPA, which must be maintained after admission for the degree to be awarded. Student competency will be evaluated individually and is based upon criteria such as GPA, writing skill, and a portfolio of work indicative of: (1) concept, execution and presentation of studio artwork, (2) conceptual understanding of art and design standards, (3) applications of art and design concepts, (4) examples of drawing methods and materials, and (5) historical knowledge of art and design as evidenced by previous assignments in visual problem solving.

School of Music
http://music.arts.usf.edu/

The School of Music provides a variety of areas of study for undergraduate programs. This includes brass, acoustic and electronic composition, jazz studies, music education, percussion, piano, strings, voice, and woodwinds. An instrument and/or voice audition is required for admission to all degree programs and concentrations.

School of Theatre & Dance
http://theatreanddance.arts.usf.edu/

The School of Theatre & Dance offers undergraduate degrees only. Auditions are required for admission to the Dance programs. Theatre auditions only take place for upper-level performance coursework but are not required for admission.
Graduation Requirements
You must apply for graduation during your last semester of coursework and meet with your advisor to confirm your eligibility to graduate. The general university requirements for graduation are as follows:

- 120 credit hours or more, with cumulative 2.0 GPA.
- At least a 2.0 GPA in all USF courses.
- Complete at least 42 credit hours of upper division work.
- Complete State Communication and Computation requirements and USF Enhanced General Education courses.
- Complete Summer Enrollment requirements.
- Complete program requirements.

You may need to complete specific College of The Arts requirements.

Instructions for submitting your USF Graduation Application are available on the Office of Registrar's website at https://www.usf.edu/registrar/services/graduation.aspx. Remember to keep up with deadlines when applying for graduation and registering for commencement. These dates are different each semester, so check the Office of the Registrar's website regularly.

For information about The Art's Graduation Celebration, see https://www.usf.edu/arts/advising/graduation-celebration.aspx.

Other Information - Interdisciplinary Study
There is no formal interdisciplinary arts degree offered in the College of The Arts. However, it is possible for a student to pursue such a program of study in the College by utilizing general electives allowed in the major program. A student may also choose a double undergraduate major in two units or arts disciplines within the College of The Arts as a means of interdisciplinary study. See the major advisor in the programs of particular interest.

Baccalaureate-Level Degree Programs

Global Pathways
https://www.usf.edu/gcp/students/index.aspx

A Global Pathway is an undergraduate major or degree program that has significant global content. Global Pathways provide students with the opportunity to practice and apply global competencies through the major or degree program. The following programs are designated as Global Pathway Programs:

- Music Education
  http://music.arts.usf.edu/content/go/music-education/

- Theatre
  http://theatreanddance.arts.usf.edu/content/go/theatre/

Bachelor of Arts

Art History
https://www.usf.edu/arts/art/apply/index.aspx

Our B.A. program develops skills in critical looking, thinking and writing, and is excellent preparation for students interested in pursuing graduate studies in art history or considering a museum profession or other work in today's professional art world.
Dance
http://theatreanddance.arts.usf.edu/content/templates/?z=11&a=98

The focus of this degree is to enable the student to combine dance with another area of interest and encourage the development of an individualized program of study through the selection of general education requirements as well as a focused selection of elective courses.

Music Studies
http://music.arts.usf.edu/content/templates/?a=1511&z=153

The Bachelor of Arts in Music Studies is a non-professional degree for students who wish to supplement other interests with music study. This program is ideal as part of a double major with a field outside of music. Requirements include approximately 50 hours in music with emphasis choices in performance, composition, history and theory. An instrument and/or vocal audition is required for admission to this degree program.

Studio Art
https://www.usf.edu/arts/art/index.aspx

The B.A. in Studio Art is a 120 credit hour degree that is designed to develop the student's consciousness of aesthetic and ideological aspects of art and its relationship to life. The degree also assists students in the realization of personal ideas, art making skills and imagery. The B.A. is oriented toward a general and broad immersion in the field. Studio courses are supplemented with studies in art history, foreign language and an abundance of electives both within the School of Art and Art History and throughout the campus.

Theatre
http://theatreanddance.arts.usf.edu/content/templates/?a=84&z=10

Through its curriculum and production program, students have the opportunity to prepare for a professional career in the theatre or to continue their studies at the graduate level. Our exclusively undergraduate program boasts intensive studies in the disciplines of performance, design and theatre arts as well as a close working relationship with our nationally and internationally recognized faculty.

Bachelor of Fine Arts

Dance
http://theatreanddance.arts.usf.edu/content/templates/?z=11&a=92

The BFA in Dance Performance offers professional preparation, which includes extensive study in Studio Technique, Choreographic Studies and Dance Theory. The focus of this degree is the development of dancers who will enter the professional world of dance/arts as performers and choreographers.

Graphic Arts (GRAP)
https://www.usfsp.edu/vva/about/

The Graphic Arts degree offers students a sequence of rigorous courses that balance critical thinking and pragmatic experience, complemented by the enriched experience of the liberal arts environment of the St. Petersburg campus.

At USF, Graphic Arts students have the option of a concentration in illustration or graphic design. This program guides students in building the imagination, aesthetic sensitivity, and powers of critical thought required to succeed as visual communicators. The curriculum emphasizes expertise in image development, typography, print and screen-based graphics, and interactive design. The program prepares students for the rigor of professional design practice through an internship program, courses in production, and portfolio development. Additionally, students design, organize and promote an exhibition of their final senior project.
Studio Art
https://www.usf.edu/arts/art/academics/mfa/

The BFA in Studio Art is a 120 credit hour degree that is the initial professional degree in the field. As such, it has a concentrated focus on the development of art making skills combined with conceptual and critical thinking. The degree is designed to develop the student's consciousness of aesthetic and ideological aspects of art and its relationship to life. Studio studies and experiences are of prime importance in the preparation of BFA students for professional lives in the visual arts.

Bachelor of Music

Music Performance
http://music.arts.usf.edu/content/templates/?a=1511&z=153

The Bachelor of Music is a professional degree for students who wish to pursue a career in music. Students interested in a BM can choose between three areas of concentration: acoustic and electronic composition, jazz studies and performance. This program requires 120 credit hours that includes intense private study on their principle instrument and participation in ensembles. An instrument and/or vocal audition is required for admission to this degree program.

Bachelor of Science

Music Education
http://music.arts.usf.edu/content/templates/?a=1511&z=153

The Bachelor of Science degree in Music Education is a professional degree for students who are interested in teaching music in K-12 schools in the ever-changing music classrooms of the 21st century. This program is an intense study of music and education courses that provide students with state certification upon graduation. In addition to private study on their principle instrument and participation in ensembles, students complete music theory, history and literature sequences, and take a variety of music education courses. An instrument and/or vocal audition is required for admission to this degree program.

Minors

Art
The School of Art & Art History offers two concentrations for the Minor in Art: Studio and Art History.

Dance

The Dance Minor is designed to provide students with a scope of experiences in dance, which includes studio technique, creative studio studies and dance theory. The student seeking a Dance Minor should arrange to meet with the academic advisor in dance.

Theatre
http://theatreanddance.arts.usf.edu/content/templates/?a=86&z=10

The Theatre minor is structured to give students an overview of drama and theatre, in terms of history, performance, and criticism. The curriculum involves the student in both the practical and theoretical aspects of the theatre process.
Concentrations

A concentration is any organized set of courses that is offered as part of a major and enhances or complements the degree program to be awarded in a manner that leads to specific educational or occupational goals, and/or from different disciplines that provide an interdisciplinary focus.

Certificates

Advanced Dance Studies
This certificate is designed for students who possess a strong background in dance technique (ballet/modern). It is meant for individuals who would like to heighten their studies in dance and earn advanced level training.

Art History
https://www.usf.edu/arts/art/academics/minors-and-certificates/
The Certificate in Art History is designed for undergraduate students majoring in another field who also seek a concentration in art history. This certificate constitutes a sequence of five art history courses (15 credit hours) that provides students with a broad introduction to the field of art history.

Dance Medicine and Science
This certificate is designed for students who are degree-seeking (any major) OR non-degree seeking and who possess a strong interest in exploring the field of dance medicine/science. This certificate program will give students a basic understanding of issues pertaining to the wellness of dancers such as: typical injury and misalignment patterns, injury prevention and treatment, injury risk factors, effective conditioning, muscular analysis of dance movement, and current topics in dance medicine/science research.
Visualization and Design

The Certificate in Visualization and Design provides theoretical studies and hands-on practice for all majors interested in the creative design of visual communication. Outcomes include building a portfolio from a variety of visual media and prepares those who complete the certificate for fields (depending on course selections) ranging from media designers, to animators, to research and product designers, to graphic/data developers.

Undergraduate Advising Information

USF College of The Arts
Office of Student Services & Advising
4202 East Fowler Ave, FAH 120
Tampa, FL 33620
(813) 974-3660
https://www.usf.edu/arts/advising/contact.aspx

Student Services & Advising offers academic support to prospective and current students in the USF College of The Arts. This includes the School of Architecture & Community Design, School of Art & Art History, School of Music and School of Theatre & Dance.

The Student Services & Advising Office assists prospective and current students with individualized academic planning. A few services provided include academic advisement, career guidance, and opportunities to engage with the College of The Arts community. Our academic advisors meet with students one-on-one to help each student map a path to graduation with opportunities for growth and knowledge during their time at USF.

To schedule an advising appointment:

Prospective or current students with an active UID can schedule an appointment online:

Prospective students who have not yet applied or students who are inactive (e.g., dismissed or not enrolled for 3 consecutive terms) should contact the appropriate advising location in their intended major:
https://www.usf.edu/undergrad/students/advising.aspx
SCHOOL OF ART AND ART HISTORY
ART HISTORY B.A.

TOTAL DEGREE HOURS: 120

The curriculum in Art History reflects the belief that a traditional liberal arts program, supplemented by travel, is the best preparation for students who wish to teach the history of art at the college level or work in museums and galleries. Students will not specialize in a particular area such as Renaissance or Modern, but will acquire a general knowledge of the history of art. All Art History majors are required to take at least one 4000-level non-Western Art History course. Courses in areas such as history, philosophy, and literature are recommended as electives, both as supplement to undergraduate courses in art history and as a background for future graduate work. Art History majors are required to take courses in studio art as a means of better understanding what is involved in the art making process. It is important that students make every effort to travel to major museums in this country and, if possible, abroad.

UNIVERSITY ADMISSIONS - COLLEGE OF THE ARTS

Admission to the University is based on the University's Undergraduate Admission Requirements that may be found by clicking on the following URLs:

- Freshman: https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx
- Transfer: https://www.usf.edu/admissions/transfer/admission-information/index.aspx
- International: https://www.usf.edu/admissions/international/admission-information/index.aspx

STATE MANDATED COMMON COURSE PREREQUISITES

Students wishing to transfer to USF should complete an A.A. degree at a Florida College System institution. Some courses required for the major may also meet General Education requirements thereby transferring maximum hours to the university.

If a student wishes to transfer without an A.A. degree and has fewer than 60 semester hours of acceptable credit, the student must meet the university's entering freshman requirements including ACT or SAT test scores, GPA, and course requirements.

Transfer students are also required to comply with the immunization, foreign language, and continuous enrollment policies of the university.

Students should complete the following prerequisite courses at the lower level prior to entering the university. If these courses are not taken at a Florida College System institution, they must be completed before the degree is granted.

Unless stated otherwise, a grade of C is the minimum acceptable grade in prerequisite courses.

ART X201 Design I or ART X202C Design II or ART X203 Design II or ART X205 Art - 3 credit hours
ART X300 Drawing I or ART X301 Drawing II or ART X310C Intermediate Drawing - 3 credit hours
ARH X050 History of Visual Arts I - 3 credit hours
ARH X051 History of Visual Arts II - 3 credit hours
XXX X000-X999 9 credit hours (Competency requirement of a single foreign language)

FOR ALL MAJORS: Students are strongly encouraged to select required lower division electives that will enhance their general education coursework and that will support their intended baccalaureate degree program. Students should consult with an academic advisor in their major degree area.
### TOTAL MAJOR HOURS: 42

### MAJOR CORE (42 CREDIT HOURS)

#### ART PREPARATION (12 CREDIT HOURS)

*History of Visual Arts I and II must be used to satisfy the General Education Historical Perspectives requirement if the student is to remain within 120 hours for the degree.*

PLUS (3 CREDIT HOURS)

Extended Studies required of all majors - London Middlesex Program, Paris Program, Public Art Museum Internships, Community Art, Artists Internship/Apprenticeships, Art History Apprenticeships.

ART 4940 satisfies the TGEH - High Impact Practice requirement.

ART 4940 - Art and Art History Internship Credit(s): 3

Note: ART 4940 satisfies the TGEH - High Impact Practice requirement.

GPA REQUIREMENTS

Students must earn a C or better in major coursework.

GRADING REQUIREMENT

All coursework in The School of Art & Art History must have a grade of "C" or better to satisfy program requirements.

RESIDENCY REQUIREMENT

In accordance with the policies of the University of South Florida, a minimum of 50 percent (50%) of a candidate's credits in the major must be completed with the School of Art and Art History.

OTHER PROGRAM INFORMATION

All Students earning a BA degree in Art History must complete the Foreign Language Exit Requirement.

Students are encouraged to take additional credits in Art History critical studies courses and Art History survey courses.

RESEARCH OPPORTUNITIES

All undergraduate students in any degree program can participate in undergraduate research. There are a number of options to receive academic credit for a mentored research experience and to have the experience show on the official transcript. Students who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 2912, IDS 4914 or IDH 4910 courses. These courses will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research will assist students in understanding the various course options.

BACHELOR'S/MASTER'S PATHWAYS

Students majoring in Art History have the option to pursue one of the following Bachelor's/Master's Pathways:

Art History B.A. to Art History M.A.

For more information, see the Graduate Catalog.

ADVISING INFORMATION

Contact Maureen Slossen at maureens@usf.edu.
4 YEAR PLAN OF STUDY - ART HISTORY B.A.

NOTES:
- SCIV - Civics Literacy needs to be completed prior to graduation. For more information, see https://www.usf.edu/undergrad/students/civics-literacy.aspx or talk with your academic advisor.
- Items that are critical are marked with a ✩ and are included in the plan for a student to stay on track.

Potential Entry Level Job Titles:
Research Assistant

Potential Entry Level Salary Range:
$20,000 - $45,000

NOTES:
- ART 2201C - Concepts and Practices I can count towards TGEC - Creative Thinking Requirement
- ARH 2050 - History of Visual Arts I can count towards TGEI - Information and Data Literacy Requirement
- ARH 2051 - History of Visual Arts II can count towards TGED - Human & Cultural Diversity Requirement
- ART 4940 - Art and Art History Internship counts towards TGEH - High Impact Practice Requirement

Total Credit Hours: 15
GRAPHIC ARTS B.F.A, WITH GRAPHIC DESIGN CONCENTRATION

TOTAL DEGREE HOURS: 120

The Graphic Arts degree offers students a sequence of rigorous courses that balance critical thinking and pragmatic experience, complemented by the enriched experience of the liberal arts environment of the University of South Florida.

Graphic artists develop the images that give voice to the world around us. Using their raw materials - the ability to think, draw, write, speak and design - students learn the skills to solve specific visual problems. The study of typography, design concepts, and digital technology develops an understanding of the tradition, practice, and process of graphic design.

This program guides students in building the imagination, aesthetic sensitivity, and powers of critical thought required to succeed as visual communicators. The curriculum emphasizes expertise in image development, typography, print and screen-based graphics, and interactive design. The program prepares students for the rigor of professional design practice through an internship program, courses in production, and portfolio development. Additionally, students design, organize and promote an exhibition of their final senior project.

LIMITED ACCESS

The Graphic Arts B.F.A. program requires a portfolio submission, along with completion of the State Mandated Common Course Prerequisites. Completion of each common prerequisite with a minimum grade of C- is required, along with a 3.25 GPA. An overall 2.5 GPA is another requirement for admission into the program.

UNIVERSITY ADMISSIONS - COLLEGE OF THE ARTS

Admission to the University is based on the University's Undergraduate Admission Requirements that may be found by clicking on the following URLs:

- Freshman: [https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx](https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx)
- Transfer: [https://www.usf.edu/admissions/transfer/admission-information/index.aspx](https://www.usf.edu/admissions/transfer/admission-information/index.aspx)
- International: [https://www.usf.edu/admissions/international/admission-information/index.aspx](https://www.usf.edu/admissions/international/admission-information/index.aspx)

GRADUATION REQUIREMENTS

3.25 Major GPA required for graduation. All major specific coursework must be C- or higher to count in the major.

STATE MANDATED COMMON COURSE PREREQUISITES

Students wishing to transfer to USF should complete the A.A. degree at the community college. Some courses required for the major may also meet General Education Requirements thereby transferring maximum hours to the university. If students transfer with fewer than 60 semester hours of acceptable credit, the students must meet the university's entering freshman requirements including ACT or SAT test scores, GPA, and course requirements.

Transfer students should be aware that by university regulation they are obligated to establish academic residency by completing the equivalent of one academic year (30 semester hours) in "on-campus" courses.

All undergraduate transfer students electing Graphic Arts as their major will be required, moreover, to take a minimum of 30 credit hours in major coursework at the University of South Florida.

The transfer student should also be aware of the immunization, foreign language, and continuous enrollment policies of the university.

```
ART X300 – 3 credit hours
ART X201 – 3 credit hours
DIG X000 or ART X602 or GRA X143C or ART X600 – 3 credit hours
ARH X053 or ARH X051 or ARH XXXX – 3 credit hours
ART X301 or ART X203 or PGY X101 or ART X330C or PGY X401 – 3 credit hours
GRA X111 or GRA X190 – 3 credit hours
```
Completion of each common prerequisite with a minimum grade of C- is required, along with a 3.25 GPA.

FOR ALL MAJORS: Students are strongly encouraged to select required lower division electives that will enhance their general education coursework and that will support their intended baccalaureate degree program. Students should consult with an academic advisor in their major degree area.

MAJOR REQUIREMENTS (69 CREDIT HOURS)

MAJOR FOUNDATION (REQUIRED) COURSES (8 COURSES; 24 CREDIT HOURS)

Students are required to take the Major Foundation Courses prior to registering for upper-level major coursework.

Note: Students transferring from a Florida College System institution may have fulfilled some or all of these requirements through the State Mandated Common Course Prerequisites.

- ARH 2050 - History of Visual Arts I Credit(s): 3
- ARH 2051 - History of Visual Arts II Credit(s): 3
- ART 2345 - Intermediate Drawing for Graphic Arts Credit(s): 3
- ART 2203C - Concepts and Practices II Credit(s): 3

- ART 2301C - Beginning Drawing Credit(s): 3
- ART 2400C - Beginning Printmaking Credit(s): 3
- ART 2500C - Beginning Painting Credit(s): 3
- or
- ART 2430 - Silkscreen Credit(s): 3

MAJOR CORE (9 COURSES; 27 CREDIT HOURS)

- ARH 4724 - History of Graphic Design Credit(s): 3
- GRA 3118 - Design Signs and Symbols Credit(s): 3
- GRA 3193 - Graphic Design I Credit(s): 3
- GRA 3202 - Advanced Typography Credit(s): 3
- GRA 4547L - Advanced Graphic Design Credit(s): 3
- GRA 4930C - Graphic Design Senior Studio Credit(s): 3
- GRA 4953 - Senior Project: Research Credit(s): 3
- GRA 4955C - Senior Project: Portfolio Credit(s): 3
- ARH 4XXX (4000 level Art History) Credit(s): 3

GRAPHIC DESIGN CONCENTRATION REQUIREMENTS (18 CREDIT HOURS)

CONCENTRATION CORE COURSES (9 CREDIT HOURS)

All students in the Graphic Design Concentration must complete the following:

- GRA 4522 - Graphic Interface Credit(s): 3
- GRA 4833 - Motion Graphics Credit(s): 3
- ART 4940 - Art and Art History Internship Credit(s): 3
CONCENTRATION ELECTIVES (9 CREDIT HOURS)

Choose 9 credit hours from the following list of courses:

- ART 4930 - Selected Topics In Art Credit(s): 1-3
- Any 4000-level ARH (maximum 3 credits)
- ART 3403C - Intermediate Printmaking Credit(s): 3
- ART 3465 - Digital Printmaking Credit(s): 3
- GRA 4119 - Packaging Design Credit(s): 3
- GRA 4128 - Book Design Credit(s): 3
- GRA 4137 - Advanced Web Design Credit(s): 3
- GRA 4179 - Social Design Credit(s): 3
- GRA 4423 - Business of Graphic Design Credit(s): 3
- GRA 4880 - Advanced Illustration Credit(s): 3

GRAPHIC ARTS B.F.A. - ADDITIONAL INFORMATION

GPA REQUIREMENTS

Best attempted grade calculated in major GPA.
- Minimum GPA of 2.5.
- Minimum Major GPA of 3.25.
- All Studio Art, Art History, and Graphic Art coursework must maintain 3.25 GPA.

GRADING REQUIREMENTS

A grade of C- or better is required for all major-specific and common prerequisite coursework.

OTHER PROGRAM INFORMATION

Ten piece portfolio submission is required during the spring semester of student's second year.
Students are expected to have all prerequisite coursework completed prior to admission into the program.
Portfolio evaluation is subject to Department review.
Students are required to take the Major Foundation courses prior to registering for upper-level major coursework.
After the annual portfolio review, if the student is not accepted into the Graphic Arts program, they have the following options:
- Reapply the following year after refining their drafting skills and exploring more conceptual aspects to their work; or
- Explore the following majors: B.F.A in Studio Art; B.A. in Studio Art; or B.A. in Art History.
  If the student wishes to reapply, they should meet with Amanda Timmers Bonvallet, Graphic Arts Advisor:
  - Location: St. Petersburg campus, Davis Hall (DAV) Room 134
  - Email: Amanda Timmers Bonvallet: atimmers@usf.edu
  - Phone: 727-873-4004
  If they wish to transfer to the other degrees mentioned they should contact Rachel Lynch, Studio Art & Art History Advisor:
  - Location: Tampa campus, FAH 120
  - Email: Rachel Lynch: rhedrick@usf.edu
  - Phone: 813-974-3660

RESEARCH OPPORTUNITIES
Undergraduate students in any degree program are able to participate in undergraduate research. Several options exist to show mentored undergraduate research activity on a student's official transcript. Those who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 4914 course. This course will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research is able to assist with further inquiries.

**INTERNSHIP OPPORTUNITIES**

ART 4940 - Art and Art History Internship is the internship course students are required to take within their concentration.

**ADVISING INFORMATION**

Location: St. Petersburg campus, Davis Hall (DAV) room 134  
Contact person: Amanda Timmers Bonvallet  
Email: atimmers@usf.edu  
Phone: 727-873-4004

**4 YEAR PLAN OF STUDY - GRAPHIC ARTS B.F.A.**

**NOTES:**

SCIV - Civics Literacy needs to be completed prior to graduation. For more information, see [https://www.usf.edu/undergrad/students/civics-literacy.aspx](https://www.usf.edu/undergrad/students/civics-literacy.aspx) or talk with your academic advisor.  
Items that are critical are marked with a ✴️ and are included in the plan for a student to stay on track.

**Potential Entry Level Job Titles:**  
Production Artist  
Graphic Designer  
Freelance Illustrator

**Potential Entry Level Salary**  
Range: $35,000 - $50,000

**YEAR 1**

**Semester 1 (FALL)**

ENC 1101 - Composition I Credit(s): 3  
SGEM - General Education Core Mathematics Credit(s): 3 (Suggest MGF 1106 or MGF 1107)  
✴️ ART 2201C - Concepts and Practices I Credit(s): 3  
✴️ ART 2344 - Beginning Drawing for Graphic Arts Credit(s): 3  
✴️ ARH 205X to satisfy TGEI - Information and Data Literacy requirement Credit(s): 3  
(Recommend ARH 2050 which also satisfies required prerequisite)

**Total Credit Hours: 15**

Total Credit Hours: 12
GRAPIC ARTS B.F.A, WITH ILLUSTRATION CONCENTRATION

TOTAL DEGREE HOURS: 120

The Graphic Arts degree offers students a sequence of rigorous courses that balance critical thinking and pragmatic experience, complemented by the enriched experience of the liberal arts environment of the University of South Florida.

Graphic artists develop the images that give voice to the world around us. Using their raw materials - the ability to think, draw, write, speak and design - students learn the skills to solve specific visual problems. The study of typography, design concepts, and digital technology develops an understanding of the tradition, practice, and process of graphic design.

This program guides students in building the imagination, aesthetic sensitivity, and powers of critical thought required to succeed as visual communicators. The curriculum emphasizes expertise in image development, typography, print and screen-based graphics, and interactive design. The program prepares students for the rigor of professional design practice through an internship program, courses in production, and portfolio development. Additionally, students design, organize and promote an exhibition of their final senior project.

LIMITED ACCESS

The Graphic Arts B.F.A. program requires a portfolio submission, along with completion of the State Mandated Common Course Prerequisites. Completion of each common prerequisite with a minimum grade of C- is required, along with a 3.25 GPA. An overall 2.5 GPA is another requirement for admission into the program.

UNIVERSITY ADMISSIONS - COLLEGE OF THE ARTS

Admission to the University is based on the University's Undergraduate Admission Requirements that may be found by clicking on the following URLs:

  Freshman: [https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx](https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx)
  Transfer: [https://www.usf.edu/admissions/transfer/admission-information/index.aspx](https://www.usf.edu/admissions/transfer/admission-information/index.aspx)
  International: [https://www.usf.edu/admissions/international/admission-information/index.aspx](https://www.usf.edu/admissions/international/admission-information/index.aspx)

Graduation Requirements

3.25 Major GPA required for graduation. All major specific coursework must be C- or higher to count in the major.

STATE MANDATED COMMON COURSE PREREQUISITES

Students wishing to transfer to USF should complete the A.A. degree at the community college. Some courses required for the major may also meet General Education Requirements thereby transferring maximum hours to the university. If students transfer with fewer than 60 semester hours of acceptable credit, the students must meet the university's entering freshman requirements including ACT or SAT test scores, GPA, and course requirements.

Transfer students should be aware that by university regulation they are obligated to establish academic residency by completing the equivalent of one academic year (30 semester hours) in "on-campus" courses.

All undergraduate transfer students electing Graphic Arts as their major will be required, moreover, to take a minimum of 30 credit hours in major coursework at the University of South Florida.

The transfer student should also be aware of the immunization, foreign language, and continuous enrollment policies of the university.

- ART X300 – 3 credit hours
- ART X201 – 3 credit hours
- DIG X000 or ART X602 or GRA X143C or ART X600 – 3 credit hours
- ARH X053 or ARH X051 or ARH XXXX – 3 credit hours
- ART X301 or ART X203 or PGY X101 or ART X330C or PGY X401 – 3 credit hours
- GRA X111 or GRA X190 – 3 credit hours
Completion of each common prerequisite with a minimum grade of C- is required, along with a 3.25 GPA.

FOR ALL MAJORS: Students are strongly encouraged to select required lower division electives that will enhance their general education coursework and that will support their intended baccalaureate degree program. Students should consult with an academic advisor in their major degree area.

MAJOR REQUIREMENTS (69 CREDIT HOURS)

MAJOR FOUNDATION (REQUIRED) COURSES (8 COURSES; 24 CREDIT HOURS)

Students are required to take the Major Foundation Courses prior to registering for upper-level major coursework.

Note: Students transferring from a Florida College System institution may have fulfilled some or all of these requirements through the State Mandated Common Course Prerequisites.

- ARH 2050 - History of Visual Arts I  
  Credit(s): 3
- ARH 2051 - History of Visual Arts II  
  Credit(s): 3
- ART 2345 - Intermediate Drawing for Graphic Arts

  Credit(s): 3
- ARH 4XXX (4000 level Art History)  
  Credit(s): 3

ILLUSTRATION CONCENTRATION REQUIREMENTS (18 CREDIT HOURS)

All students in the Illustration Concentration must complete the following:

CONCENTRATION CORE COURSES (12 CREDIT HOURS)

- GRA 4880 - Advanced Illustration  
  Credit(s): 3
  Repeated 3 times with variable titles (9 total credits)

PRINTMAKING COURSE (3 CREDITS)

Choose one course from the following Printmaking courses (3 credit hours):

- ART 3403C - Intermediate Printmaking  
  Credit(s): 3
- ART 3465 - Digital Printmaking  
  Credit(s): 3

CONCENTRATION ELECTIVES (6 CREDIT HOURS)

Choose 6 credit hours from the following list of courses:

- Any 4000-level ARH (maximum 3 credits may be applied)
ART 4930 - Selected Topics In Art Credit(s): 1-3
GRA 4119 - Packaging Design Credit(s): 3
GRA 4128 - Book Design Credit(s): 3
GRA 4179 - Social Design Credit(s): 3
GRA 4423 - Business of Graphic Design Credit(s): 3
GRA 4522 - Graphic Interface Credit(s): 3
GRA 4833 - Motion Graphics Credit(s): 3
GRA 4940 - Graphic Design: Internship Credit(s): 2

GRAPHIC ARTS B.F.A. - ADDITIONAL INFORMATION

GPA REQUIREMENTS

Best attempted grade calculated in major GPA.
Minimum GPA of 2.5.
Minimum Major GPA of 3.25.
All Studio Art, Art History, and Graphic Art coursework must maintain 3.25 GPA.

GRADING REQUIREMENTS

A grade of C- or better is required for all major-specific and common prerequisite coursework.

OTHER PROGRAM INFORMATION

Ten piece portfolio submission is required during the spring semester of student's second year.
Students are expected to have all prerequisite coursework completed prior to admission into the program.
Portfolio evaluation is subject to Department review.
Students are required to take the Major Foundation courses prior to registering for upper-level major coursework.
After the annual portfolio review, if the student is not accepted into the Graphic Arts program, they have the following options:
- Reapply the following year after refining their drafting skills and exploring more conceptual aspects to their work; or
- Explore the following majors: B.F.A in Studio Art; B.A. in Studio Art; or B.A. in Art History.
  If the student wishes to reapply, they should meet with Amanda Timmers Bonvallet, Graphic Arts Advisor:
  Location: St. Petersburg campus, Davis Hall (DAV) Room 134
  Email: Amanda Timmers Bonvallet: atimmers@usf.edu
  Phone: 727-873-4004
  If they wish to transfer to the other degrees mentioned they should contact Rachel Lynch, Studio Art & Art History Advisor:
  Location: Tampa campus, FAH 120
  Email: Rachel Lynch: rhedrick@usf.edu
  Phone: 813-974-3660

RESEARCH OPPORTUNITIES

Undergraduate students in any degree program are able to participate in undergraduate research. Several options exist to show mentored undergraduate research activity on a student's official transcript. Those who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 4914 course. This course will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research is able to assist with further inquiries.
INTERNSHIP OPPORTUNITIES

ART 4940 - Art and Art History Internship is the internship course students are required to take within their concentration.

ADVISING INFORMATION

Location: St. Petersburg campus, Davis Hall (DAV) room 134
Contact person: Amanda Timmers Bonvallet

Total Credit Hours: 12
STUDIO ART B.A.

TOTAL DEGREE HOURS: 120

This degree is designed to develop the student's consciousness of aesthetic and ideological aspects of art and its relationship to life. The degree also assists students in the realization of personal ideas, art making skills and imagery. The BA is oriented toward a general and broad immersion in the field. Studio courses are supplemented with studies in art history, foreign language and an abundance of electives both within the School of Art and Art History and throughout the campus. While the BA in Studio Art is not usually the preferred preparation for moving on to the Master of Fine Arts degree, it is quite appropriate for seeking other advanced degrees, especially in the Liberal Arts or other similar programs.

UNIVERSITY ADMISSIONS - COLLEGE OF THE ARTS

Admission to the University is based on the University's Undergraduate Admission Requirements that may be found by clicking on the following URLs:

   Freshman: https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx
   Transfer: https://www.usf.edu/admissions/transfer/admission-information/index.aspx
   International: https://www.usf.edu/admissions/international/admission-information/index.aspx

STATE MANDATED COMMON COURSE PREREQUISITES

Students wishing to transfer to USF should complete an A.A. degree at a Florida College System institution. Some courses required for the major may also meet General Education requirements thereby transferring maximum hours to the university.

If a student wishes to transfer without an A.A. degree and has fewer than 60 semester hours of acceptable credit, the student must meet the university's entering freshman requirements including ACT or SAT test scores, GPA, and course requirements.

Transfer students are also required to comply with the immunization, foreign language, and continuous enrollment policies of the university.

Students should complete the following prerequisite courses at the lower level prior to entering the university. If these courses are not taken at a Florida College System institution, they must be completed before the degree is granted.

Unless stated otherwise, a grade of C is the minimum acceptable grade in prerequisite courses.

Note: It is recommended that transfer students complete both Design I and Design II prior to transfer. If a student does not complete Design I and Design II prior to transfer they should wait and enroll in ART 2201C - Concepts and Practices I and ART 2203C - Concepts and Practices II at USF.

   ART X201 Design I - 3 credit hours
   Select an option that does not duplicate another course taken:
      ART X202C Design II, Lower (2-D) - 3 credit hours
      ART X203 Design II, Lower (3-D) - 3 credit hours
      ART X710C Beginning Sculpture - 3 credit hours
      ART X203C - Concepts and Practices II - 3 credit hours
   ART X300C Drawing I, Lower - 3 credit hours
   Select an option that does not duplicate another course taken:
      ART X301 Drawing II - 3 credit hours
      ART X205 Art - 3 credit hours
      ART X310C Intermediate Drawing, Upper - 3 credit hours
      ART X305C Perceptual Drawing - 3 credit hours
      ART X330C Life Drawing I, Lower - 3 credit hours
      ART X200C Three Dimensional Design - 1-3 credit hours
ART X353C Drawing Studio - 3 credit hours
ART X301C Drawing I - 3 credit hours
ART X312C Drawing III, Upper
ART X500C Beginning Painting - 3 credit hours
ARH X050 History of the Visual Arts I - 3 credit hours
ARH X051 History of the Visual Arts II - 3 credit hours
Select two courses below that do not duplicate others taken:
ART X000-X999 - 3 credit hours
ART X000-X999 - 3 credit hours

Do not duplicate courses as you make choices. When given the option for alternative course selection, pick a course that you have not previously taken.

All courses except ARHX050 and ARHX051 require a "C" or higher.

TOTAL MAJOR HOURS: 57

MAJOR CORE (57 CREDIT HOURS)

1. Art Preparation (18 Credit Hours)

*History of Visual Arts I can be used to satisfy TGEI - Information and Data Literacy & History of Visual Arts II can be used to satisfy TGED - Human & Cultural Diversity under the Enhanced General Education system.

**Concepts and Practices I can be used to satisfy the TGEC - Creative Thinking requirement under the Enhanced General Education requirement system.

All studio courses, other than those designated as core or beginning studios, require the completion of the following core courses: ART 2201C or equivalent, ART 2203C or equivalent, ARH 2050 or ARH 2051, and ART 2301C or equivalent and ART 3310C or equivalent.

ARH 2050 - History of Visual Arts I Credit(s): 3
ARH 2051 - History of Visual Arts II Credit(s): 3 *
ART 2201C - Concepts and Practices I Credit(s): 3 **
ART 2203C - Concepts and Practices II Credit(s): 3 **
ART 2301C - Beginning Drawing Credit(s): 3
ART 3310C - Intermediate Drawing Credit(s): 3
or
DIG 3119C - Digital Drawing Credit(s): 3

2. Beginning Studio Workshops (12 Credit Hours)

2000 Level 2-D Studio (ART 2XXX or PGY 2XXX)
2000 Level 3-D Studio (ART 2XXX)
2000 Level Studio (ART 2XXX or PGY 2XXX)
2000 Level Studio (ART 2XXX or PGY 2XXX)

These courses may not be repeated. These courses are prerequisites to the intermediate-level Studio Courses. Students must take at least one two-dimensional and one three-dimensional studio course.
3. Intermediate Studio Workshops (12 Credit Hours)

3000 Level Studio (ART 3XXX or PGY 3XXX or DIG 3XXX)
3000 Level Studio (ART 3XXX or PGY 3XXX or DIG 3XXX)
3000 Level Studio (ART 3XXX or PGY 3XXX or DIG 3XXX)
3000 Level Studio (ART 3XXX or PGY 3XXX or DIG 3XXX)

4. Intermediate or Advanced Level Major Elective (3 Credit Hours)

ART 3XXX or PGY 3XXX or DIG 3XXX or ART 4XXX or PGY 4XXX

5. Art History (9 Credit Hours)

**ARH 4450 is required of all majors.

***ARH 4930 Art History: Selected Topics & ARH 4890 Paris Art History may be taken for degree credit only by approval of the academic advisor for the School of Art and Art History.

ARH 4450 - Twentieth Century Art Credit(s): 3 **
ARH 4XXX
ARH 4XXX

6. Additional Requirements (3 Credit Hours)

Students are encouraged to take additional credits in the Studio Workshops and Theme Studio Courses to fulfill art electives.

All Students earning a B.A. degree in Studio Art or Art History must complete the Foreign Language Exit Requirement.

ART 4940 - Art and Art History Internship Credit(s): 3

GPA REQUIREMENTS

Students must earn a C or better in major coursework.

GRADING REQUIREMENT

All coursework in the School of Art & Art History must have a grade of C or better to satisfy program requirements.

RESIDENCY REQUIREMENT

A minimum of 50 percent of the total hours required for a degree from the School of Art and Art History must be completed in The School of Art and Art History Tampa campus.

FOREIGN LANGUAGE REQUIREMENT

Any student seeking a B.A. in Studio Art must satisfy the Foreign Language Exit requirement (FLEX).
RESEARCH OPPORTUNITIES

Undergraduate students in any degree program are able to participate in undergraduate research. Several options exist to show mentored undergraduate research activity on a student's official transcript. Those who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 4914 course. This course will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research is able to assist with further inquiries.

ADVISING INFORMATION

- Upper Level Elective Credit(s): 3

Total Credit Hours: 15

STUDIO ART B.F.A.
The B.F.A. program in Studio Art will expose the student to many possibilities in the art-making process. The areas of emphasis in art media are animation, painting, drawing, printmaking, photography, sculpture, ceramics, and video. These options provide access to a comprehensive program of study in art. Students can develop their conceptual and technical skills in a particular art discipline or decide to investigate a specific subject through the use of numerous media and "mixed" forms of art.

UNIVERSITY ADMISSIONS

Admission to the University is based on the University's Undergraduate Admission Requirements that may be found by clicking on the following URLs:

**Freshman:** [https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx](https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx)

**Transfer:** [https://www.usf.edu/admissions/transfer/admission-information/index.aspx](https://www.usf.edu/admissions/transfer/admission-information/index.aspx)

**International:** [https://www.usf.edu/admissions/international/admission-information/index.aspx](https://www.usf.edu/admissions/international/admission-information/index.aspx)

STATE MANDATED COMMON COURSE PREREQUISITES

Students wishing to transfer to USF should complete an A.A. degree at a Florida College System institution. Some courses required for the major may also meet General Education requirements thereby transferring maximum hours to the university.

If a student wishes to transfer without an A.A. degree and has fewer than 60 semester hours of acceptable credit, the student must meet the university's entering freshman requirements including ACT or SAT test scores, GPA, and course requirements.

Transfer students are also required to comply with the immunization, foreign language, and continuous enrollment policies of the university.

Students should complete the following prerequisite courses at the lower level prior to entering the university. If these courses are not taken at a Florida College System institution, they must be completed before the degree is granted.

Unless stated otherwise, a grade of C is the minimum acceptable grade in prerequisite courses.

Note: It is recommended that transfer students complete both Design I and Design II prior to transfer. If a student does not complete Design I and Design II prior to transfer they should wait and enroll in ART 2201C - Concepts and Practices I and ART 2203C - Concepts and Practices II (Concepts and Practices II) at USF.

- ART X202C Design II, Lower (2-D) or ART X203 Design II, Lower (3D) or ART 2701C Beginning Sculpture or ART X203C Concepts and Practices II - 3 credit hours
- ART X300C Drawing I, Lower - 3 credit hours
- ARH X050 History of the Visual Arts I - 3 credit hours
- ARH X051 History of Visual Arts II - 3 credit hours

Select an option that does not duplicate another course taken:

- ART X330C Life Drawing I, Lower - 3 credit hours
- ART X205 Art - 3 credit hours
- ART X310C Intermediate Drawing - 3 credit hours
- ART X301C Drawing I - 3 credit hours
- ART X305C Perceptual Drawing - 3 credit hours
- ART X330C Life Drawing I Lower - 3 credit hours
- ART X301C Drawing I - 3 credit hours
- ART X200C Three Dimensional Design - 1-3 credit hours
- ART X353C Drawing Studio - 3 credit hours
- ART X312C Drawing III, Upper
- ART X500C Beginning Painting - 3 credit hours
- ART X500 Painting 1, Lower - 3 credit hours
Do not duplicate courses as you make choices. When given the option for alternative course selection, pick a course that you have not previously taken.

All courses except ARHX050 and ARHX051 require a "C" or higher.

TOTAL MAJOR HOURS: 79

MAJOR CORE (79 CREDIT HOURS)

1. Art Foundations (18 Credit Hours):

   ARH 2050 - History of Visual Arts I  Credit(s): 3 *
   ARH 2051 - History of Visual Arts II  Credit(s): 3 *
   ART 2201C - Concepts and Practices I  Credit(s): 3 **
   ART 2203C - Concepts and Practices II  Credit(s): 3 **
   ART 2301C - Beginning Drawing  Credit(s): 3
   ART 3310C - Intermediate Drawing  Credit(s): 3
   or
   DIG 3119C - Digital Drawing  Credit(s): 3

Notes:

*History of Visual Arts I and II can be used to satisfy TGEI - Information and Data Literacy & History of Visual Arts II can be used to satisfy TGED - Human & Cultural Diversity under the Enhanced General Education system.

**Concepts and Practices I can be used to satisfy the TGEC - Creative Thinking requirement under the Enhanced General Education system.

2. 2000 Level Studio (12 Credit Hours):

   2000 Level 2-D Studio (ART 2XXX or PGY 2XXX)
   2000 Level 3-D Studio (ART 2XXX)
   2000 Level Specialization (ART 2XXX or PGY 2XXX)
   2000 Level Elective Studio (ART 2XXX or PGY 2XXX)

These courses may not be repeated. These course are prerequisites to the intermediate-level Studio Courses. Students must take at least one two-dimensional and one three-dimensional beginning studio course.

Note: ART 3612C - Beginning Video, Animation and Digital Arts also counts towards this requirement.

3. 3000 Level Studio (18 Credit Hours):

   3000 Level Specialization (ART 3XXX or PGY 3XXX or DIG 3XXX)
   3000 Level Specialization (ART 3XXX or PGY 3XXX or DIG 3XXX)
   3000 Level Specialization (ART 3XXX or PGY 3XXX or DIG 3XXX)
   3000 Level Specialization (ART 3XXX or PGY 3XXX or DIG 3XXX)
   3000 Level Non-Specialization (ART 3XXX or PGY 3XXX or DIG 3XXX)
   3000 Level Elective Studio (ART 3XXX or PGY 3XXX or DIG 3XXX)
4. 4000 Level Studio Specialization* (6 Credit Hours):

4000 Level Specialization (ART 4XXX or PGY 4XXX)
4000 Level Specialization (ART 4XXX or PGY 4XXX)

*Note: Advanced Studios in Specialization must be taken sequentially and may not be completed during the same term.

5. Intermediate or Advanced Level Major Elective (6 Credit Hours):

ART 3XXX or PGY 3XXX or DIG 3XXX or ART 4XXX or PGY 4XXX

6. Art History (9 Credit Hours):

ARH 4450 - Twentieth Century Art Credit(s): 3
ARH 4475C - Contemporary Issues in Art Credit(s): 3 *
4000 Level Period Art History

Notes:

*ARH 4450 Twentieth Century is a prerequisite for ARH 4475C Contemporary Issues in Art.

ARH 4930 Art History: Selected Topics & ARH 4890 Paris Art History may be taken for degree credit only by approval of the academic advisor for the School of Art and Art History.

7. Additional Requirements (10 Credit Hours):

ART 3939 - The Real World Credit(s): 1
ART 4940 - Art and Art History Internship Credit(s): 3 *
ART 4970C - Senior Thesis Credit(s): 4 **

Notes:

*ART 4940 satisfies the TGEH - High Impact Practice requirement.

**Must be taken with the second Advanced Studio in the student's specialization.

***ART 2201C Technology Essentials for Artists is a prerequisite for ART 3939 Real World.

All studio courses--other than those designated as core or beginning studios--require the completion of the following core courses: ART 2201C or equivalent, ART 2203C or equivalent, ARH 2050 or ARH 2051, ART 2301C or equivalent, and ART 3310C or equivalent.

GPA REQUIREMENTS

Students must have an overall 3.25 GPA, and must earn a C or better in major coursework.

GRADING REQUIREMENT

The minimum acceptable grade for major courses in the School of Art and Art History is a "C" grade.
RESIDENCY REQUIREMENT

A minimum of 50 percent of the total hours required for a degree from the School of Art and Art History must be completed at USF.

FOREIGN LANGUAGE REQUIREMENT

If a student has satisfied the FLENT (Foreign Language Entrance) requirement of two years of a single foreign language, there is no further foreign language required for the B.F.A. in Studio Art. If a student has not satisfied the FLENT requirement, he or she must satisfy the FLEX (Foreign Language Exit) requirement of two terms of a single foreign language at the college level or test out of the requirement.

RESEARCH OPPORTUNITIES

Undergraduate students in any degree program are able to participate in undergraduate research. Several options exist to show mentored undergraduate research activity on a student’s official transcript. Those who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 4914 course. This course will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research is able to assist with further inquiries.

OTHER INFORMATION

The USF School of Art & Art History hosts fully equipped studios in all of these disciplines.

The B.F.A. program in Graphic Arts is a limited access program and offered only at the St. Petersburg campus. (Juniors and Seniors only)

Transfer credit from other institutions is accepted on the basis of a transcript evaluation. The School of Art & Art History accepts transfer credit from all Florida programs that are part of the "common course prerequisites."

Total Credit Hours: 15
ART HISTORY MINOR

The minor in art history consists of 15 credit hours. Students pursuing this minor may study art history from a variety of areas, including but not limited to Greek Art, Roman Art, Ancient Egyptian and Near Eastern Art, Renaissance Art, Islamic Art, and Twentieth Century Art. As a writing discipline, the Minor in Art History develops the student’s critical analysis and communication skills.

MINOR REQUIREMENTS

A minimum of 15 credit hours is required for the minor in art history, in the following distribution.

• A maximum of three credit hours in ARH 4800 - Critical Studies in Art History and ARH 4930 - Art History: Selected Topics can be applied to the minor.

TOTAL MINOR CREDIT HOURS: 15

MINOR CORE CREDIT HOURS: 15

I. ART HISTORY FOUNDATIONS (6 HOURS)

ARH 2050 - History of Visual Arts I Credit(s): 3
ARH 2051 - History of Visual Arts II Credit(s): 3

II. SPECIALIZED ART HISTORY STUDY (9 HOURS)

Three (3) 4000-level courses in Art History (3 hours each) from the following list:

ARH 4115 - Ancient Egyptian and Near Eastern Art Credit(s): 3
ARH 4130 - Greek Art Credit(s): 3
ARH 4151 - Roman Art Credit(s): 3
ARH 4170 - Greek and Roman Art Credit(s): 3
ARH 4200 - Medieval Art Credit(s): 3
ARH 4301 - Renaissance Art Credit(s): 3
ARH 4310 - Early Italian Renaissance Credit(s): 3
ARH 4312 - Late Italian Renaissance Credit(s): 3
ARH 4333 - Northern Renaissance Art Credit(s): 3
ARH 4350 - Baroque and Rococo Art Credit(s): 3
ARH 4430 - Nineteenth Century Art Credit(s): 3
ARH 4450 - Twentieth Century Art Credit(s): 3
ARH 4475C - Contemporary Issues in Art Credit(s): 3
ARH 4530 - Asian Art Credit(s): 3
ARH 4571 - Themes in Islamic Art and Architecture Credit(s): 3
ARH 4800 - Critical Studies in Art History Credit(s): 3
ARH 4890 - Paris Art History Credit(s): 3
ARH 4930 - Art History: Selected Topics Credit(s): 1-3

GPA REQUIREMENTS

A minimum overall GPA of 2.0 is required for the minor.

GRADING REQUIREMENTS

Students must earn a "C" or better in their minor coursework.
Studio Art majors (BA/BFA) and Graphic Arts majors may apply Art History courses required for their program toward an Art History minor. Per University guidelines, these students "must complete a minimum of 6 credits and two courses exclusive to the minor that will not count toward the student's major or other minors. These credits/courses must be completed at USF and must be upper level courses." Interested students in these programs should consult with their advisor to clarify expectations before declaring an Art History minor.

ADVISING INFORMATION

Contact Maureen Slossen at maureens@usf.edu.
ART STUDIO MINOR

The Minor in Art Studio at the University of South Florida is designed to provide students with a scope of experiences in art. The program consists of 24 credit hours of study that strengthens your critical thinking and visual communication skills, enhancing your ability to solve problems creatively.

MINOR REQUIREMENTS (24 CREDIT HOURS)

A minimum of 24 credit hours is required for the minor in Art Studio, in the following distribution:

**ART AREA PREPARATION (15 CREDIT HOURS)**

**ART STUDIO (9 CREDIT HOURS)**

- Beginning Studio Workshop (two courses)
- Intermediate Studio Workshops (one course)

Students have the opportunity for studio experience in a variety of areas: Animation & Digital Modeling, Ceramics, Drawing, Painting, Photography, Printmaking, Sculpture & Extended Media, and Video.

**GPA REQUIREMENTS**

A minimum overall GPA of 2.0 is required for the minor.

**GRADING REQUIREMENTS**

Students must earn a "C" or better in their minor coursework.

**ADVISING INFORMATION**

Contact Rachel Lynch at hedrick@usf.edu.
ART HISTORY CERTIFICATE

TOTAL CERTIFICATE HOURS: 15

The Certificate in Art History is designed for undergraduate students majoring in another field who also seek a concentration in art history. This certificate constitutes a sequence of five art history courses (15 credit hours) that provides students with a broad introduction to the field of art history.

CERTIFICATE CORE (6 CREDIT HOURS)

VISUALIZATION AND DESIGN CERTIFICATE

TOTAL CERTIFICATE HOURS: 18

The Certificate in Visualization and Design provides theoretical studies and hands-on practice for all majors interested in the creative design of visual communication. Outcomes include building a portfolio from a variety of visual media and prepares those who complete the certificate for fields (depending on course selections) ranging from media designers, to animators, to research and product designers, to graphic/data developers.

CERTIFICATE CORE (6 CREDIT HOURS)

Required courses (6 credit hours):
- ART 2201C - Concepts and Practices I Credit(s): 3
- VIC 3001 - Visual Literacy Credit(s): 3

CERTIFICATE ELECTIVES (12 CREDIT HOURS)

ART ELECTIVES (6 CREDIT HOURS)

Select two courses:
- ART 2301C - Beginning Drawing Credit(s): 3
- ART 3612C - Beginning Video, Animation and Digital Arts Credit(s): 3
- ART 3613C - Live Action Filmmaking Credit(s): 3
- ART 3616C - Computer Animation Credit(s): 3
- PGY 2401C - Beginning Photography Credit(s): 3
- PGY 3410C - Intermediate Photography Credit(s): 3

MASS COMMUNICATION ELECTIVES (6 CREDIT HOURS)

Select two courses:
- ADV 2214 - Graphic Programs in Mass Communications Credit(s): 3
- ADV 4710 - Portfolio Building Credit(s): 3
- JOU 4212 - Magazine Design and Production Credit(s): 3
- MMC 4936 - Selected Topics in Mass Communications Studies Credit(s): 1-3 *
- Graphics in Visual Communication
- Visualization of Big Data
- Visual Analytics
- PGY 3610C - Photojournalism I Credit(s): 3
- PUR 4101 - Public Relations Design and Production Credit(s): 3
- VIC 3400C - Visual Design for Globalized Media Credit(s): 3
- VIC 3943 - Visual Communication Internship Credit(s): 1-3

OTHER PROGRAM INFORMATION

Undergraduate, degree-seeking students must get pre-approval from Kevin Hawley (kevinhawley@usf.edu) for any MMC 4936 topic not listed above in Certificate Electives that they intend to utilize toward the certificate.

This certificate is offered for degree-seeking students only.
SCHOOL OF MUSIC
MUSIC EDUCATION B.S.

TOTAL DEGREE HOURS: 120

CERTIFIED GLOBAL PATHWAY PROGRAM

The Bachelor of Science (B.S.) in Music Education is designed to prepare students as practitioners in the field. Practical experience is the underlying value in all courses and field experiences. Students receive direct experience with music education philosophies, theories, and practices through coursework and laboratory settings, as well as the K-12 schools at all stages in the program. Students’ progress towards a robust, semester-long, student-teaching experience and participate in experimental and professional opportunities offered by formal and informal undergraduate and graduate symposia and contemporary consortia. This degree program challenges and prepares students to not only embrace the traditions of music education in the schools, but also to incorporate new potentials for the future.

This program has been certified as a Global Pathway. Global Pathway programs have significant global content and align with the goals of USF’s Quality Enhancement Plan, the Global Citizens Project. Students in Global Pathway programs are well positioned to earn the Global Citizen Award and become eligible to apply for a study abroad scholarship offered by the Global Citizens Project.

UNIVERSITY ADMISSIONS - COLLEGE OF THE ARTS

Admission to the University is based on the University's Undergraduate Admission Requirements that may be found by clicking on the following URLs:

- **Freshman**: [https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx](https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx)
- **Transfer**: [https://www.usf.edu/admissions/transfer/admission-information/index.aspx](https://www.usf.edu/admissions/transfer/admission-information/index.aspx)
- **International**: [https://www.usf.edu/admissions/international/admission-information/index.aspx](https://www.usf.edu/admissions/international/admission-information/index.aspx)

STATE MANDATED COMMON COURSE PREREQUISITES

National Accreditation Requirement: Music program national accreditation requires minimum semesters of exposure in specified coursework.

Student Focus Requirement: This is defined as courses under one of the specified prefixes that constantly maintain the digit 1 or 2 (depending upon which course) while allowing 0-9 to replace each "X." The prefix varies depending upon the student's focus (i.e., Brass, Strings, Woodwinds, etc.) Two examples of possible courses for MVBx011 are MVB1011 or MVB1311. Two examples for MVWXX2X are MVW2223 and MVW2222.

In order to take advanced coursework in the music education program, students must present evidence that they have attained an average of B for three aural theory courses (MUT 1241, MUT 1242, MUT 2246) and have maintained an overall USF GPA of 3.0. These standards are prerequisites for MUE 3424, MUE 3425, MUE 4311, MUE 4331, MUE 4332, MUE 4936, and MUE 4940. Evidence can be in the form of either an updated USF transcript or a current degree audit report. This information must be presented to the academic advisor before the end of the drop/add week in order to enroll in any of these seven music education courses.

- **EDF X005 Introduction to Education and Field Experience or MUE X040 Foundations of Music Education (K-12)** - 3 credit hours
- **MUT X111 Music Theory I or MUT X121 Music Theory I-Integrated** - 3 credit hours
- **MUT X112 Music Theory II or MUT X122 Music Theory II-Integrated** - 3 credit hours
- **MUT X116 Music Theory III or MUT X126 Music Theory III-Integrated** - 3-4 credit hours
- **MUT X117 Music Theory IV or MUT X127 Music Theory IV-Integrated** - 3 credit hours

**Piano Proficiency Requirement** - Repeat the course work for 4 semesters

- **MVK X111* Keyboard Skills I** - 2 credit hours
- **MVK X112* Class Instruction - Freshman - Keyboard** - 1 credit hour
- **MVK X121* Keyboard Skills III** - 2 credit hours
- **MVK X122* Keyboard Skills IV** - 2 credit hours
National Accreditation & Student Focus Requirement - Repeat the course work for 2 semesters

MVW XX2X Applied Music Woodwinds or MVV XX2X Applied Music Voice or MVP XX2X Applied Music:
   Percussion or MVS XX2X Applied Music: Strings or MVB XX2X Applied Music: Brasses or MVH XX2X
   Historical Instruments or MVJ XX2X Applied Music: Jazz or MVK XX2X Applied Music: Keyboard or MVO
   XX2X Applied Music: Other - 2 credit hours

National Accreditation Requirement - Repeat the course work for 4 semesters

MUN X000-X999 Music Ensembles - 4 credit hours

Requirement

MUT X241 Aural Theory I - 1 credit hour
MUT X242 Aural Theory II - 1 credit hour
MUT X246 Aural Theory III - 1 credit hour
MUT X247 Aural Theory IV - 1 credit hour

or

MUT X221 1st YR Sight Singing I - 1 credit hour
MUT X222 1st YR Sight Singing II - 1 credit hour
MUT X226 1st YR Sight Singing III - 1 credit hour
MUT X227 1st YR Sight Singing IV - 1 credit hour

or

MUT X271 ET, SS & KBD Harmony I - 1 credit hour
MUT X272 ET, SS & KBD Harmony II - 1 credit hour
MUT X276 ET, SS & KBD Harmony III - 1 credit hour
MUT X277 ET, SS & KBD Harmony IV - 1 credit hour

* USF accepts competency test credits for this course (Secondary Piano Proficiency by examination).

TOTAL MAJOR HOURS: 84

MAJOR CORE (84 CREDIT HOURS)

MUSIC COURSES (49 CREDIT HOURS)

MUS 2010 - Recital Attendance Credit(s): 0 Attendance at minimum seven (7) programs per semester for five semesters. Must be registered each semester.

MUSIC THEORY (9 CREDIT HOURS)

MUT 1111 - Music Theory I Credit(s): 3
MUT 1112 - Music Theory II Credit(s): 3
MUT 2116 - Music Theory III Credit(s): 3

AURAL THEORY (3 CREDIT HOURS)

MUT 1241 - Aural Theory I Credit(s): 1
MUT 1242 - Aural Theory II Credit(s): 1
MUT 2246 - Aural Theory III Credit(s): 1
KEYBOARD SKILLS (4 CREDIT HOURS)

MUE 1111 - Keyboard Skills for Music Educators I Credit(s): 2
MUE 1121 - Keyboard Skills for Music Educators II Credit(s): 2

CONDUCTING (4 CREDIT HOURS)

MUG 3104 - Basic Conducting Credit(s): 2
MUG 3108 - Advanced Conducting Credit(s): 2

MUSIC HISTORY (11 CREDIT HOURS)

MUS 4930 - Selected Topics In Music Credit(s): 1-3 Global Music Pedagogy
MUH 3300 - Music History/Medieval and Renaissance Credit(s): 2
MUH 3301 - Music History/Baroque and Classic Credit(s): 3
MUH 3302 - Music History/Romantic and 20th Century Credit(s): 3

APPLIED PRINCIPAL (STUDIO) (12 CREDIT HOURS)

(2 terms each level)
MVx 131X, 232X, 333X (culminating in junior recital)
MUN 3XXX Major Ensemble (concurrent registration with studio) (6 credit hours)
Upper division voice principals may take up to one semester of opera as a major ensemble.

PROFESSIONAL EDUCATION COURSES (6 CREDIT HOURS)

TSL 4324 - ESOL Competencies and Strategies Credit(s): 1-3
RED 4333 - Content Area Reading Credit(s): 3

MUSIC EDUCATION (29 CREDIT HOURS)

MUE 2090 - Foundations of Music Education Credit(s): 3
MUE 3421 - Choral Techniques Credit(s): 1
MUE 3422 - Wind Techniques Credit(s): 1 (taken twice - one brass/one woodwind)
MUE 3423 - String Techniques Credit(s): 1
MUE 3475 - Percussion Techniques Credit(s): 1

or
MUN 3443 - Percussion Ensemble Credit(s): 1
MUE 3414 - Creative Performance Chamber Ensemble Credit(s): 1
MUE 3415 - Creative Performance Chamber Ensemble II Credit(s): 1
MUE 3424 - Progressive Music Education Methods I Credit(s): 3
MUE 3425 - Progressive Music Education Methods II Credit(s): 3
MUS 4930 - Selected Topics In Music Credit(s): 1-3 General Music Pedagogy
MUE 4311 - General Music Methods Credit(s): 3 (includes pre-internship)
MUE 4331 - Choral Methods Credit(s): 3 (includes pre-internship)

or
MUE 4332 - Instrumental Methods Credit(s): 3 (includes pre-internship)
MUE 4936 - Senior Seminar in Music Education Credit(s): 1 (taken with Internship)
MUE 4940 - Internship: Music Education Credit(s): 3-11 (3-11 credit hours; 3 hours apply to HIP requirement)
GPA REQUIREMENTS

The GPA in both specialization courses (music) and professional education courses (music education and education) must be 2.5 in order to graduate.

GRADING REQUIREMENTS

The minimum acceptable grade for music, music education, education, and State Communication Requirement and State Computation Requirement courses is "C-.”

Aural theory courses must have an average grade of "B."

All music education courses must be completed with a C- or better. No "S" grades.

RESIDENCY REQUIREMENT

Students must have 50% of major taken at USF.

OTHER PROGRAM INFORMATION

The FTCE (Florida Teacher Certification Exam), which includes the GKT (General Knowledge Test), the PEd (Professional Education Exam), and the SAE (Subject Area Examination in Music) must be taken before entering the internship and successfully completed for the degree and for Florida teacher certification. A copy of the GKT results must be given by the student to the Music Advisor immediately upon receipt.

The Florida Teacher Certification Exam (FTCE)

The exam includes the General Knowledge Test (GKT), the Professional Education Exam (PEd), and the Subject Area Exam (SAE in Music). The GKT is taken separately. However, the PEd and the SAE can be taken together. Observe deadline notes below!

If you are interning in the Fall semester, you must submit all passing scores of the required General Knowledge Test to the Music Advisor no later than 5:00 pm on the Friday after the preceding Spring commencement date in order to be guaranteed certification for degree completion.

If you are interning in the Spring semester, you must submit all passing scores of the required General Knowledge Test to the Music Advisor no later than 5:00 pm on the Friday after the preceding Summer commencement date in order to be guaranteed certification for degree completion.

Warning: Failure to adhere to the guidelines above will result in your inability to intern during the semester for which you have applied.

Copies of passing scores of the Professional Education Exam and the Subject Area Exam must be submitted to the Music Advisor. These scores must be submitted no later than 5:00 pm on the Friday following the graduation ceremony during the semester in which you are interning.

JUNIOR RECITAL FOR BS DEGREE IN MUSIC EDUCATION: A public recital will be given during the student's last year of applied music study. The student should have achieved junior classification as defined by the university and should be enrolled at the 3000 level in applied music. A recital performed at another institution will not satisfy graduation requirements for USF. The recital must be performed on the USF campus and the student must be enrolled in the studio of a USF faculty member during the term of said recital. Exceptions may be made by the Director of the School of Music when deemed appropriate.

A RECITAL APPROVAL FORM MUST BE COMPLETED FOLLOWING ALL RECITALS AND PLACED IN EACH MUSIC STUDENT'S ADVISING FOLDER IN ORDER FOR DEGREE CERTIFICATION PROCEDURES TO BE COMPLETED.

OTHER REQUIREMENTS

An application to change from pre-Music Education (MPE) to Music Education (MUE) is necessary for the major to be official. This is available through the Music Advisor's website and should be submitted when MUE 2090, the General Knowledge Test (GKT), and the Aural Theory courses have been completed.
RESEARCH OPPORTUNITIES

Undergraduate students in any degree program are able to participate in undergraduate research. Several options exist to show mentored undergraduate research activity on a student's official transcript. Those who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 4914 course. This course will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research is able to assist with further inquiries.

MUSIC PERFORMANCE B.M., WITH ACOUSTIC & ELECTRONIC COMPOSITION
CONCENTRATION

TOTAL DEGREE HOURS: 120

The Music Performance degree is a degree for students who wish to pursue a career in music. Students interested in a B.M. degree may choose between concentrations in: Performance, Composition, Jazz Studies and Acoustic and Electronic Music. This degree program requires 120 credit hours of study that include private study on the student's principle instrument and participation in ensembles. Additionally, students complete music theory, history and literature sequences, and take additional coursework in their chosen concentration. Graduates from BM programs at USF find themselves in very competitive positions for graduate study and musical careers. Admission into the BM in music degree requires an audition on your major instrument.

UNIVERSITY ADMISSIONS - COLLEGE OF THE ARTS

Admission to the University is based on the University's Undergraduate Admission Requirements that may be found by clicking on the following URLs:

Freshman: [https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx](https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx)

Transfer: [https://www.usf.edu/admissions/transfer/admission-information/index.aspx](https://www.usf.edu/admissions/transfer/admission-information/index.aspx)

International: [https://www.usf.edu/admissions/international/admission-information/index.aspx](https://www.usf.edu/admissions/international/admission-information/index.aspx)

STATE MANDATED COMMON COURSE PREREQUISITES

Students wishing to transfer to USF should complete an A.A. degree at a Florida College System institution. Some courses required for the major may also meet General Education requirements thereby transferring maximum hours to the university.

If a student wishes to transfer without an A.A. degree and has fewer than 60 semester hours of acceptable credit, the student must meet the university's entering freshman requirements including ACT or SAT test scores, GPA, and course requirements.

Transfer students are also required to comply with the immunization, foreign language, and continuous enrollment policies of the university.

Students should complete the following prerequisite courses at the lower level prior to entering the university. If these courses are not taken at a Florida College System institution, they must be completed before the degree is granted.

National Accreditation Requirement: Music program national accreditation requires minimum semesters of exposure in specified coursework.

Student Focus Requirement: This is defined as courses under one of the specified prefixes that constantly maintain the digit 1 or 2 (depending upon which course) while allowing 0-9 to replace each "X." The prefix varies depending upon the student's focus (i.e., Brass, Strings, Woodwinds, etc.) Two examples of possible courses for MVB X011 are MVB 1011 or MVB 1311. Two examples for MVW XX2X are MVW 2223 and MVW 2222.

- MUT X111 Music Theory 1 or MUT X121 Music Theory I-Integrated - 3 credit hours
- MUT X112 Music Theory II or MUT X122 Music Theory II-Integrated - 3 credit hours
- MUT X116 Music Theory III or MUT X126 Music Theory III-Integrated - 3-4 credit hours
- MUT X127 Music Theory IV-Integrated or MUT X117 Music Theory IV - 3 credit hours

Piano Proficiency Requirement - Repeat the course work for 4 semesters.

- MVK X111* Keyboard Skills 1 - 2 credit hours
- MVK X112* Class Instruction - Freshman - Keyboard - 1 credit hour
- MVK X121* Keyboard Skills III - 2 credit hours
- MVK X122* Keyboard Skills IV - 2 credit hours

* USF accepts competency test credits (Secondary Piano Proficiency by examination).

National Accreditation & Student Focus Requirement - Repeat the course work for 2 semesters.
MVJ XX1X Applied Music: Jazz - 2 credit hours
MVK XX1X Applied Music: Keyboard - 2 credit hours
MVO XX1X Applied Music: Other - 2 credit hours
MVP XX1X Applied Music: Percussion - 2 credit hours
MVS XX1X Applied Music: Strings - 2 credit hours
MVV XX1X Applied Music: Voice - 2 credit hours
MVW XX1X Applied Music: Woodwinds - 2 credit hours
MVH XX1X Historical Instruments - 2 credit hours
MVB XX1X Applied Music: Brasses - 2 credit hours

National Accreditation Requirement - Repeat the course work for 4 semesters.

MUN X000-X999 Music Ensembles - 4 credit hours

Requirement

MUT X272 ET, SS & KBD Harmony I - 1 credit hour
MUT X276 ET, SS & KBD Harmony II - 1 credit hour

or

MUT X241 Aural Theory I - 1 credit hour
MUT X242 Aural Theory II - 1 credit hour
MUT X246 Aural Theory III - 1 credit hour
MUT X247 Aural Theory IV - 1 credit hour

REQUIRED SUPPORTING COURSES FOR THE MAJOR (0 CREDIT HOURS)

The following courses are prerequisite and supporting courses for this major. They are required for the major, but are not counted in the total hours for this major. The degree will not be awarded if these courses have not been taken by the end of the student's final semester.

All B.M. degree students must register and pass MUS 2010 for six semesters. A passing grade requires a minimum of seven recorded attendances at School of Music concert/recital events each semester.

MUS 2010 - Recital Attendance Credit(s): 0

MAJOR REQUIREMENTS FOR THE B.M. DEGREE

JUNIOR RECITAL FOR BA AND BM DEGREES: A public recital (must be shared with another junior recital) will be given during the student's junior year. The student should have achieved junior classification as defined by the university and should be enrolled at the 3000 level in applied music, which would normally occur during a student's third year of study. Credit may be granted to transfer students for junior recitals completed at other institutions. This recital should have been completed during the student's junior year at that institution and a request for recognition of that recital should be made in writing to the applied division coordinator. No studio teacher is under any obligation to accept these transfer recitals.

SENIOR RECITAL FOR BM DEGREE: A public recital will be given during a student's senior year. The student should have achieved senior classification as defined by the university and should be enrolled at the 4000 level in applied music, which would normally occur during a student's fourth year of study. A senior recital performed at another institution will not satisfy graduation requirements for USF. The recital must be performed on the USF campus and the student must be enrolled in the studio of a USF faculty member during the term of said recital unless written permission to deviate from this policy is obtained from the School of Music Director.
A RECITAL APPROVAL FORM MUST BE COMPLETED FOLLOWING ALL RECITALS AND PLACED IN EACH MUSIC STUDENT'S ADVISING FOLDER IN ORDER FOR DEGREE CERTIFICATION PROCEDURES TO BE COMPLETED.

ACOUSTIC & ELECTRONIC COMPOSITION CONCENTRATION

- MVK 2121 - Keyboard Skills III Credit(s): 2
- MVK 2122 - Keyboard Skills IV Credit(s): 2
- Other Music courses
SENIOR RECITAL REQUIREMENT

The second semester of the senior year is the only semester in the composition sequence that does not require the student to be in a composition class. Instead, students are required to register for Senior Recital (2 credits), which will have a scheduled meeting time (1 hour a week) and syllabus. This meeting time will be student-directed, but one or more composition faculty will be available to help answer questions at the students' request.

The Senior Recital Requirement consists of the following:

- Portfolio Presentation (30 percent of final grade)
- Recital (30 percent of final grade)
- Participation in the Senior Project Concert (15 percent of final grade)
- Senior Presentation in Composition Seminar (12 percent of final grade)
- Composers Orchestra composition (13 percent of final grade)
- Continued participation in Composition Seminar and Notation Emporium

PORTFOLIO

Portfolios must be presented in final form by Monday, 5:00 PM, the last week of classes. Students will consult with faculty throughout the semester on assembling and fine-tuning the material. Faculty will review the portfolio by the time of final jury (final exam week). The portfolio will consist of the following:

- A digital archive of all of the student's acoustic and electronic projects created over the 8-semester MUC sequence (this can be presented on the web or in physical copy, e.g. DVD, flash drive, etc.)
- A database of performances, performers, etc. (hard copy)
- 3 to 5 scores individually bound and professionally presented (at least one of these scores needs to be for both acoustic instruments and electronic media)
- A curriculum vitae (hard copy)
- A 300-word artist's statement (hard copy)

RECITAL

Seniors are responsible for scheduling, preparing for and presenting a 60-minute concert of their music during their final semester. This recital must take place during the semester that the student is registered for Senior Recital, and it is recommended to be before week 15 to allow time for preparing the video for the portfolio. It is expected to be professionally produced in one of the USF SOM halls, most likely in the Barness Recital Hall. The programming must include works for acoustic instruments, electronic media and work that combines the two. The recital will be assessed on quality of preparation, presentation and professional effectiveness (publicity, draw, archiving, etc.).

SENIOR PROJECT CONCERT

Senior composition majors who are registered for Senior Recital will collaborate on and present a concert during the same semester. It will feature music and performances by the seniors primarily, but can involve other performers as well. Unlike the solo senior recital concert, it is required that this concert be off campus. Students have a scheduled meeting time that they can use each week for this purpose. This concert will be assessed on quality of preparation, presentation and professional effectiveness (publicity, draw, archiving, etc.).

SENIOR PRESENTATION IN COMPOSITION SEMINAR

Each senior will give 30-50 minute presentation on their music and issues surrounding it. This can be as a preview to their senior recital. Presentations must be scheduled by week 4, and no presentation will be scheduled after week 14. The presentation will be assessed on content as well as professionalism of presentation.

COMPOSERS' ORCHESTRA COMPOSITION

Each senior will be required to compose and program a piece written especially for the Composers' Orchestra, an ad-hoc group of performing composition majors assembled for this purpose. The performance may take place in the Senior Recital or Senior Project concert, but it needs to be performed by week 15 at the latest. This final score and recording will be provided with the portfolio in addition to the 3-5 scores of other work.
COMPOSITION SEMINAR AND NOTATION EMPORIUM

Seniors in their final semester are expected to participate in the weekly seminar and emporium. Attendance is required and excessive absences or late arrivals can affect the Senior Recital final grade. (See attendance policy)

*The Recital Approval form (available on music advisor’s door) must be completed and returned to the advisor.

MUSIC PERFORMANCE B.M. - ADDITIONAL INFORMATION

GPA REQUIREMENTS

Students must have an overall GPA of 2.0.

GRADING REQUIREMENT

All music majors and minors must earn at least a C- in every music course required for their degree program. Music education students must earn at least C- in all required music, music education, and education courses. Music courses resulting in grades of D or F must be repeated with subsequent registrations. Sequel courses may not be taken until prerequisites are satisfied with appropriate grades or waivers.

RESEARCH OPPORTUNITIES

Undergraduate students in any degree program are able to participate in undergraduate research. Several options exist to show mentored undergraduate research activity on a student's official transcript. Those who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 4914 course. This course will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research is able to assist with further inquiries.

ADVISING INFORMATION

MUSIC PERFORMANCE B.M., WITH JAZZ STUDIES CONCENTRATION

TOTAL DEGREE HOURS: 120

The Music Performance degree is a degree for students who wish to pursue a career in music. Students interested in a B.M. degree may choose between concentrations in: Performance, Composition, Jazz Studies and Acoustic and Electronic Music. This degree program requires 120 credit hours of study that include private study on the student's principle instrument and participation in ensembles. Additionally, students complete music theory, history and literature sequences, and take additional coursework in their chosen concentration. Graduates from BM programs at USF find themselves in very competitive positions for graduate study and musical careers. Admission into the BM in music degree requires an audition on your major instrument.

UNIVERSITY ADMISSIONS - COLLEGE OF THE ARTS

Admission to the University is based on the University's Undergraduate Admission Requirements that may be found by clicking on the following URLs:

Freshman: [https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx](https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx)

Transfer: [https://www.usf.edu/admissions/transfer/admission-information/index.aspx](https://www.usf.edu/admissions/transfer/admission-information/index.aspx)

International: [https://www.usf.edu/admissions/international/admission-information/index.aspx](https://www.usf.edu/admissions/international/admission-information/index.aspx)

STATE MANDATED COMMON COURSE PREREQUISITES

Students wishing to transfer to USF should complete an A.A. degree at a Florida College System institution. Some courses required for the major may also meet General Education requirements thereby transferring maximum hours to the university.

If a student wishes to transfer without an A.A. degree and has fewer than 60 semester hours of acceptable credit, the student must meet the university's entering freshman requirements including ACT or SAT test scores, GPA, and course requirements.

Transfer students are also required to comply with the immunization, foreign language, and continuous enrollment policies of the university.

Students should complete the following prerequisite courses at the lower level prior to entering the university. If these courses are not taken at a Florida College System institution, they must be completed before the degree is granted.

National Accreditation Requirement: Music program national accreditation requires minimum semesters of exposure in specified coursework.

Student Focus Requirement: This is defined as courses under one of the specified prefixes that constantly maintain the digit 1 or 2 (depending upon which course) while allowing 0-9 to replace each "X." The prefix varies depending upon the student's focus (i.e., Brass, Strings, Woodwinds, etc.) Two examples of possible courses for MVB X011 are MUT X111 or MUT X1311. Two examples for MVW X12X are MUT X117 or MUT X1117.

- MUT X111 Music Theory 1 or MUT X121 Music Theory I - Integrated - 3 credit hours
- MUT X112 Music Theory II or MUT X122 Music Theory II - Integrated - 3 credit hours
- MUT X116 Music Theory III or MUT X126 Music Theory III - Integrated - 3-4 credit hours
- MUT X127 Music Theory IV - Integrated or MUT X117 Music Theory IV - 3 credit hours

Piano Proficiency Requirement - Repeat the course work for 4 semesters.

- MVK X111* Keyboard Skills 1 - 2 credit hours
- MVK X112* Class Instruction - Freshman - Keyboard - 1 credit hour
- MVK X121* Keyboard Skills III - 2 credit hours
- MVK X122* Keyboard Skills IV - 2 credit hours

* USF accepts competency test credits (Secondary Piano Proficiency by examination).
National Accreditation & Student Focus Requirement - Repeat the course work for 2 semesters.

- MVJ XX1X Applied Music: Jazz - 2 credit hours
- MVK XX1X Applied Music: Keyboard - 2 credit hours

- MUT X247 Aural Theory IV - 1 credit hour

**REQUIRED SUPPORTING COURSES FOR THE MAJOR (0 CREDIT HOURS)**

The following courses are prerequisite and supporting courses for this major. They are required for the major, but are not counted in the total hours for this major. The degree will not be awarded if these courses have not been taken by the end of the student's final semester.

All B.M. degree students must register and pass MUS 2010 for six semesters. A passing grade requires a minimum of seven recorded attendances at School of Music concert/recital events each semester.

- MUS 2010 - Recital Attendance Credit(s): 0

**MAJOR REQUIREMENTS FOR THE B.M. DEGREE**

**JUNIOR RECITAL FOR BA AND BM DEGREES:** A public recital (must be shared with another junior recital) will be given during the student's junior year. The student should have achieved junior classification as defined by the university and should be enrolled at the 3000 level in applied music, which would normally occur during a student's third year of study. Credit may be granted to transfer students for junior recitals completed at other institutions. This recital should have been completed during the student's junior year at that institution and a request for recognition of that recital should be made in writing to the applied division coordinator. No studio teacher is under any obligation to accept these transfer recitals.
SENIOR RECITAL FOR BM DEGREE: A public recital will be given during a student's senior year. The student should have achieved senior classification as defined by the university and should be enrolled at the 4000 level in applied music, which would normally occur during a student's fourth year of study. A senior recital performed at another institution will not satisfy graduation requirements for USF. The recital must be performed on the USF campus and the student must be enrolled in the studio of a USF faculty member during the term of said recital unless written permission to deviate from this policy is obtained from the School of Music Director.

A RECITAL APPROVAL FORM MUST BE COMPLETED FOLLOWING ALL RECITALS AND PLACED IN EACH MUSIC STUDENT'S ADVISING FOLDER IN ORDER FOR DEGREE CERTIFICATION PROCEDURES TO BE COMPLETED.

CONCENTRATION ELECTIVES (2 CREDIT HOURS)

MVJ 2110 - Jazz Keyboard Skills Credit(s): 2 (2 credit hours). May be satisfied by proficiency test or by course.

MUSIC PERFORMANCE B.M. - ADDITIONAL INFORMATION

GPA REQUIREMENTS

Students must have an overall GPA of 2.0.

GRADING REQUIREMENT

All music majors and minors must earn at least a C- in every music course required for their degree program. Music education students must earn at least C- in all required music, music education, and education courses. Music courses resulting in grades of D or F must be repeated with subsequent registrations. Sequel courses may not be taken until prerequisites are satisfied with appropriate grades or waivers.

RESEARCH OPPORTUNITIES

Undergraduate students in any degree program are able to participate in undergraduate research. Several options exist to show mentored undergraduate research activity on a student's official transcript. Those who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 4914 course. This course will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research is able to assist with further inquiries.

ADVISING INFORMATION

MUSIC PERFORMANCE B.M., WITH PERFORMANCE CONCENTRATION

TOTAL DEGREE HOURS: 120

The Music Performance degree is a degree for students who wish to pursue a career in music. Students interested in a B.M. degree may choose between concentrations in: Performance, Composition, Jazz Studies and Acoustic and Electronic Music. This degree program requires 120 credit hours of study that include private study on the student's principle instrument and participation in ensembles. Additionally, students complete music theory, history and literature sequences, and take additional coursework in their chosen concentration. Graduates from BM programs at USF find themselves in very competitive positions for graduate study and musical careers. Admission into the BM in music degree requires an audition on your major instrument.

UNIVERSITY ADMISSIONS - COLLEGE OF THE ARTS

Admission to the University is based on the University's Undergraduate Admission Requirements that may be found by clicking on the following URLs:

Freshman: https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx

Transfer: https://www.usf.edu/admissions/transfer/admission-information/index.aspx

International: https://www.usf.edu/admissions/international/admission-information/index.aspx

STATE MANDATED COMMON COURSE PREREQUISITES

Students wishing to transfer to USF should complete an A.A. degree at a Florida College System institution. Some courses required for the major may also meet General Education requirements thereby transferring maximum hours to the university.

If a student wishes to transfer without an A.A. degree and has fewer than 60 semester hours of acceptable credit, the student must meet the university's entering freshman requirements including ACT or SAT test scores, GPA, and course requirements.

Transfer students are also required to comply with the immunization, foreign language, and continuous enrollment policies of the university.

Students should complete the following prerequisite courses at the lower level prior to entering the university. If these courses are not taken at a Florida College System institution, they must be completed before the degree is granted.

National Accreditation Requirement: Music program national accreditation requires minimum semesters of exposure in specified coursework.

Student Focus Requirement: This is defined as courses under one of the specified prefixes that constantly maintain the digit 1 or 2 (depending upon which course) while allowing 0-9 to replace each "X." The prefix varies depending upon the student's focus (i.e., Brass, Strings, Woodwinds, etc.) Two examples of possible courses for MVB X011 are MVB 1011 or MVB 1311. Two examples for MVW XX2X are MVW 2223 and MVW 2222.

- MUT X111 Music Theory 1 or MUT X121 Music Theory I-Integrated - 3 credit hours
- MUT X112 Music Theory II or MUT X122 Music Theory II-Integrated - 3 credit hours
- MUT X116 Music Theory III or MUT X126 Music Theory III-Integrated - 3-4 credit hours
- MUT X127 Music Theory IV-Integrated or MUT X117 Music Theory IV - 3 credit hours

Piano Proficiency Requirement: - Repeat the course work for 4 semesters.

- MVK X111* Keyboard Skills 1 - 2 credit hours
- MVK X112* Class Instruction - Freshman - Keyboard - 1 credit hour
- MVK X121* Keyboard Skills III - 2 credit hours
- MVK X122* Keyboard Skills IV - 2 credit hours

* USF accepts competency test credits (Secondary Piano Proficiency by examination).
National Accreditation & Student Focus Requirement - Repeat the course work for 2 semesters.

- MVJ XX1X Applied Music: Jazz - 2 credit hours
- MVK XX1X Applied Music: Keyboard - 2 credit hours
- MVO XX1X Applied Music: Other - 2 credit hours
- MVP XX1X Applied Music: Percussion - 2 credit hours
- MVS XX1X Applied Music: Strings - 2 credit hours
- MVV XX1X Applied Music: Voice - 2 credit hours
- MVW XX1X Applied Music: Woodwinds - 2 credit hours
- MVH XX1X Historical Instruments - 2 credit hours
- MVB XX1X Applied Music: Brasses - 2 credit hours

National Accreditation Requirement - Repeat the course work for 4 semesters.

- MUN X000-X999 Music Ensembles - 4 credit hours

Requirement

- MUT X272 ET, SS & KBD Harmony I - 1 credit hour
- MUT X276 ET, SS & KBD Harmony II - 1 credit hour
- MUT X277 ET, SS & KBD Harmony IV - 3 credit hour
- MUT X271 ET, SS & KBD Harmony I - 1 credit hour

or

- MUT X221 1st YR Sight Singing I - 1 credit hour
- MUT X222 1st YR Sight Singing II - 1 credit hour
- MUT X226 1st YR Sight Singing I - 1 credit hour
- MUT X227 1st YR Sight Singing IV - 1 credit hour

or

- MUT X241 Aural Theory I - 1 credit hour
- MUT X242 Aural Theory II - 1 credit hour
- MUT X246 Aural Theory III - 1 credit hour
- MUT X247 Aural Theory IV - 1 credit hour

REQUIRED SUPPORTING COURSES FOR THE MAJOR (0 CREDIT HOURS)

The following courses are prerequisite and supporting courses for this major. They are required for the major, but are not counted in the total hours for this major. The degree will not be awarded if these courses have not been taken by the end of the student's final semester.

All B.M. degree students must register and pass MUS 2010 for six semesters. A passing grade requires a minimum of seven recorded attendances at School of Music concert/recital events each semester.

MUS 2010 - Recital Attendance Credit(s): 0

MAJOR REQUIREMENTS FOR THE B.M. DEGREE

JUNIOR RECITAL FOR BA AND BM DEGREES: A public recital (must be shared with another junior recital) will be given during the student's junior year. The student should have achieved junior classification as defined by the university and should be enrolled at the 3000 level in applied music, which would normally occur during a student's third year of study. Credit may be granted to transfer students for junior recitals completed at other institutions. This recital should have been completed during the student's junior year at that institution and a request for recognition of that recital should be made in writing to the applied division coordinator. No studio teacher is under any obligation to accept these transfer recitals.
SENIOR RECITAL FOR BM DEGREE: A public recital will be given during a student's senior year. The student should have achieved senior classification as defined by the university and should be enrolled at the 4000 level in applied music, which would normally occur during a student's fourth year of study. A senior recital performed at another institution will not satisfy graduation requirements for USF. The recital must be performed on the USF campus and the student must be enrolled in the studio of a USF faculty member during the term of said recital unless written permission to deviate from this policy is obtained from the School of Music Director.

A RECITAL APPROVAL FORM MUST BE COMPLETED FOLLOWING ALL RECITALS AND PLACED IN EACH MUSIC STUDENT'S ADVISING FOLDER IN ORDER FOR DEGREE CERTIFICATION PROCEDURES TO BE COMPLETED.

PERFORMANCE CONCENTRATION

TOTAL CONCENTRATION HOURS: 48-61

CONCENTRATION CORE (45 CREDIT HOURS)

MUSIC THEORY (22 CREDIT HOURS)

- MUT 1111 - Music Theory I Credit(s): 3
- MUT 1112 - Music Theory II Credit(s): 3
- MUT 1241 - Aural Theory I Credit(s): 1
- MUT 1242 - Aural Theory II Credit(s): 1
- MUT 2116 - Music Theory III Credit(s): 3
- MUT 2117 - Music Theory IV Credit(s): 3
- MUT 2246 - Aural Theory III Credit(s): 1

RECITAL ATTENDANCE (0 CREDIT HOURS)

- MUS 2010 - Recital Attendance Credit(s): 0

MAJOR ENSEMBLE (12 CREDIT HOURS)

Performance Majors – 8 credit hours
Composition – 4 credit hours

All students enrolled in Applied Music for three (3) or two (2) credit hours are required to enroll in a Major Ensemble appropriate to their performing medium. A list of approved major ensembles is provided on the Music advising website.

CONCENTRATION ELECTIVES (3-16 CREDIT HOURS)

0-13 credit hours of music electives.
MUSIC HISTORY ELECTIVE (3 CREDIT HOURS)

Choose one:

- MUH 4058 - Intercultural Music in the Twentieth Century Credit(s): 3
- MUH 4801 - History of Jazz Credit(s): 3

OTHER REQUIREMENTS

Voice performance majors must enroll in MUS 2201 for a total of 3 credits as part of their Music Electives.
Voice performance majors are required to be competent at the beginning level of French, German, and Italian languages in addition to taking foreign language diction classes offered in the School of Music. Proficiency tests are administered by the Department of World Language Education. If needed, courses 1120 (4 credit hours) and 1120L (lab for 1 credit hour) in each language may be taken in the College of Arts and Sciences for up to 15 credit hours to meet the foreign language proficiency requirement.
Upper division BM voice performance majors may take up to two semesters of opera as a major ensemble.
Students who elect to take applied music beyond their minimal degree requirements will have the option of enrolling in either choral ensembles or in opera.
Performance majors in piano are required to enroll in MVK 4640 for 4 credits as a part of the Music Electives.
The following requirements for the piano pedagogy emphasis are to be taken as a part of the Music Electives:
- MVK 4640 - Piano Pedagogy I
- MVK 4641 - Piano Pedagogy II

MUSIC PERFORMANCE B.M. - ADDITIONAL INFORMATION

GPA REQUIREMENTS

Students must have an overall GPA of 2.0.

GRADING REQUIREMENT

All music majors and minors must earn at least a C- in every music course required for their degree program. Music education students must earn at least C- in all required music, music education, and education courses. Music courses resulting in grades of D or F must be repeated with subsequent registrations. Sequel courses may not be taken until prerequisites are satisfied with appropriate grades or waivers.

RESEARCH OPPORTUNITIES

Undergraduate students in any degree program are able to participate in undergraduate research. Several options exist to show mentored undergraduate research activity on a student’s official transcript. Those who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 4914 course. This course will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research is able to assist with further inquiries.

MUSIC STUDIES B.A.

TOTAL DEGREE HOURS: 120

The B.A. degree in Music Studies is part of the Provost's Scholars Program (PSP). This is a program in which qualified students who enter USF directly from high school with 18 or more credits will be offered the opportunity to complete their undergraduate education in 3 years. Each selected student will be provided preferred registration privileges so that critical courses are not closed when they register. They will be given summer scholarships if they need to take summer classes and will be given scholarships to help them participate in study abroad programs. PSP students will live in the Honors College Living/Learning Community year 1. Students will be offered the assistance of faculty or off campus mentors, depending upon career goals and will be encouraged to use the fourth year for graduate study here at USF. Participants will not need to take larger academic loads and can take advantage of all that USF has to offer.

UNIVERSITY ADMISSIONS - COLLEGE OF THE ARTS

Admission to the University is based on the University's Undergraduate Admission Requirements that may be found by clicking on the following URLs:

- Freshman: [https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx](https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx)
- Transfer: [https://www.usf.edu/admissions/transfer/admission-information/index.aspx](https://www.usf.edu/admissions/transfer/admission-information/index.aspx)
- International: [https://www.usf.edu/admissions/international/admission-information/index.aspx](https://www.usf.edu/admissions/international/admission-information/index.aspx)

STATE MANDATED COMMON COURSE PREREQUISITES

Students wishing to transfer to USF should complete an A.A. degree at a Florida College System institution. Some courses required for the major may also meet General Education requirements thereby transferring maximum hours to the university.

If a student wishes to transfer without an A.A. degree and has fewer than 60 semester hours of acceptable credit, the student must meet the university's entering freshman requirements including ACT or SAT test scores, GPA, and course requirements.

Transfer students are also required to comply with the immunization, foreign language, and continuous enrollment policies of the university.

Students should complete the following prerequisite courses at the lower level prior to entering the university. If these courses are not taken at a Florida College System institution, they must be completed before the degree is granted.

Unless stated otherwise, a grade of C- is the minimum acceptable grade in prerequisite courses.

- MUT X111 or MUT X121 - 3 credit hours
- MUT X112 or MUT X122 - 3 credit hours
- MUT X116 or MUT X126 - 3 credit hours
- MUT X117 or MUT X127 - 3 credit hours

Select from the following options for 4 credits:

- (MUT X241 and MUT X242 and X246 and MUT X247) - 1 credit each for 4 total credit hours
- (MUT X221 and MUT X222 and X226 and X227) - 1 credit each for 4 total credit hours
- (MUT X271 and X272 and X276 and X277) - 1 credit each for 4 total credit hours

Take 4 semesters of the following coursework: *
- MUN XXXX (4 credit hours)

Take 2 semesters of the following coursework: *
- MVX XX1X (2-4 credit hours)

Take 2 semesters of the following coursework: *
- MVX XX2X (2-4 credit hours)

Repeat these courses up to 4 semesters in order to gain piano proficiency: ***
- (MVK X111 and MVK X112 and MVK X121 and MVK X122)
COLLEGE OF THE ARTS
UNIVERSITY OF SOUTH FLORIDA 2021-2022 UNDERGRADUATE CATALOG

FOR ALL MAJORS: Students are strongly encouraged to select required lower division electives that will enhance their general education coursework and that will support their intended baccalaureate degree program. Students should consult with an academic advisor in their major degree area.

* Music program national accreditation requires minimum semesters of exposure in specified coursework.

** DEFINITIONS: MVxXX1X and MVxXX2X are defined as courses under one of the specified prefixes that constantly maintain the digit 1 or 2 (depending upon which course) while allowing 0-9 to replace each "X." The prefix varies depending upon the student's focus (i.e., Brass, Strings, Woodwinds, etc.) Prefix areas to choose from are MVB, MVH, MVJ, MVK, MVO, MVP, MVS, MVV, and MVW. Two examples of possible courses are MVB1011 or MVP1311. Examples for MVxXX2X are MVW2223 and MVK2222.

*** Or Secondary Piano Proficiency by examination.

REQUIRED SUPPORTING COURSES FOR THE MAJOR (0 CREDIT HOURS)
The following courses are prerequisite and supporting courses for this major. They are required for the major, but are not counted in the total hours for this major. The degree will not be awarded if these courses have not been taken by the end of the student's final semester.

MUS 2010 - Recital Attendance Credit(s): 0
All B.A. students in Music Studies must register and pass MUS 2010 for four semesters. A minimum of seven attendances must be recorded at School of Music concert/recital events each semester.

TOTAL MAJOR HOURS: 46

MAJOR CORE (38 CREDIT HOURS)

MUSIC CORE

ACADEMIC COURSES (20 CREDIT HOURS)

MUSIC THEORY

[Diagnostic Test administered at first class meeting]

MUT 1111 - Music Theory I Credit(s): 3
MUT 1112 - Music Theory II Credit(s): 3
MUT 2116 - Music Theory III Credit(s): 3 *

AURAL THEORY

MUT 1241 - Aural Theory I Credit(s): 1
MUT 1242 - Aural Theory II Credit(s): 1
MUT 2246 - Aural Theory III Credit(s): 1 *

JAZZ THEORY *

MUT 2641 - Jazz Theory and Improvisation I Credit(s): 2 may substitute for MUT 2116 and MUT 2246
MUT 2642 - Jazz Theory and Improvisation II Credit(s): 2 may substitute for MUT 2116 and MUT 2246
MUSIC HISTORY

MUH 3300 - Music History/Medieval and Renaissance Credit(s): 2

Choose 2 of the following 3 courses:

MUH 3301 - Music History/Baroque and Classic Credit(s): 3
MUH 3302 - Music History/Romantic and 20th Century Credit(s): 3
MUH 4801 - History of Jazz Credit(s): 3 [recommended for jazz students]

APPLIED COURSES (12 CREDIT HOURS)

Applied Major (Studio)

MVX 131X, 232X [2 terms--each level]

Major Ensemble

MUN 3XXX [concurrent registration with studio is required]

Recital Attendance

MUS 2010 - Recital Attendance Credit(s): 0 ["S/U" grade only]

Music Emphasis (6 Credit Hours)

Choose only one:

ACADEMIC STUDIES

[cannot share courses used for Music Electives]

Choose two (2) of the following:

MUC 2301 - Introduction To Electronic Music Credit(s): 3
MUH 2020 - The History of Blues and Rock Credit(s): 3
MUH 2051 - Folk and Traditional Music of World Cultures Credit(s): 3
MUH 3016 - Survey of Jazz Credit(s): 3
MUL 3011 - Western Art Music in Your Life Credit(s): 3
MUH 4058 - Intercultural Music in the Twentieth Century Credit(s): 3
MUT 2117 - Music Theory IV Credit(s): 3

or

MUT 2247 - Aural Theory IV Credit(s): 1
MUT 4421 - Eighteenth Century Practice Credit(s): 3
MUT 4571 - Twentieth Century Practice Credit(s): 3

APPLIED STUDIES

Completion of Junior Level (MVX 333X) & Junior Recital
Two additional terms of major ensemble

MAJOR ELECTIVES (8 CREDIT HOURS)

Electives: Music credits beyond those required may be used as program electives.

Keyboard Skills - Piano proficiency at Level 2 required by testing or course(s).
Other music courses which are not used for Music Emphasis.
MUT 3353/MUT 3354 and MUT 3663/MUT 3664 are recommended for jazz students.

GPA REQUIREMENT
Students must maintain an overall 2.0 GPA.

**GRADING REQUIREMENTS**

C- is the minimum acceptable grade for music courses.

**OTHER PROGRAM INFORMATION**

**JUNIOR RECITAL FOR BA AND BM DEGREES:** A public recital (must be shared with another junior recital) will be given during the student's junior year. The student should have achieved junior classification as defined by the university and should be enrolled at the 3000 level in applied music, which would normally occur during a student's third year of study. Credit may be granted to transfer students for junior recitals completed at other institutions. This recital should have been completed during the student's junior year at that institution and a request for recognition of that recital should be made in writing to the applied division coordinator. No studio teacher is under any obligation to accept these transfer recitals.

A **RECITAL APPROVAL FORM MUST BE COMPLETED FOLLOWING ALL RECITALS AND PLACED IN EACH MUSIC STUDENT'S ADVISING FOLDER IN ORDER FOR DEGREE CERTIFICATION PROCEDURES TO BE COMPLETED.**

**RESEARCH OPPORTUNITIES**

Undergraduate students in any degree program are able to participate in undergraduate research. Several options exist to show mentored undergraduate research activity on a student's official transcript. Those who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 4914 course. This course will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research is able to assist with further inquiries.

**OTHER INFORMATION**

**Revocation of Awards**

Scholarship awards may be revoked if students

- Fail to maintain full-time status (12 credit hours)
- Fail to maintain required GPA
- Fail to participate in appropriate ensembles (as determined by applied teachers and ensemble directors)
- Switch major area of study outside of music
- Fail to perform satisfactorily in applied lessons or major ensemble(s)
- Fail to maintain satisfactory progress in academic studies in music

Repayment of award will be sought from any student who drops out of school, drops out of ensemble/applied music participation, or fails to maintain 12 credit hours during a semester in which they have received an award.

**ADVISING INFORMATION**

For advising, please contact Corey Carpenter at coreyc1@usf.edu.

**4 YEAR PLAN OF STUDY - MUSIC STUDIES B.A.**

**NOTES:**

SCIV - Civics Literacy needs to be completed prior to graduation. For more information, see [https://www.usf.edu/undergrad/students/civics-literacy.aspx](https://www.usf.edu/undergrad/students/civics-literacy.aspx) or talk with your academic advisor.

Items that are critical are marked with a ✳️ and are included in the plan for a student to stay on track.
Potential Entry Level Job Titles:
- Studio Teaching
- Commercial Music Production, Sales, and/or Management
- Accompanist
- Composer
- Ensemble Performer
- Solo Performer

Potential Entry Level Salary Range:

DANCE B.A., WITH DANCE STUDIES CONCENTRATION

TOTAL DEGREE HOURS: 120

The focus of this degree is to enable the student to combine dance with another area of interest and encourage the development of an individualized program of study through the selection of general education requirements as well as a focused selection of elective courses. The selection of electives should be designed to provide each student with the maximum value of a liberal arts education within a focused area of study. A student with additional interest in another field (e.g., African Studies, Anthropology, Communications, Education, Health Science, History, Psychology, Religious Studies, Theatre, Women's Studies, etc.) should complete a focused study in that area along with the core of study in dance. Each student is required to develop a final independent project incorporating dance with his or her focused study. Dance students must continue to take at least one technique course each semester. At the end of the third semester, the faculty will determine if appropriate progression has been made for continuation in the B.A. Dance major.

LIMITED ACCESS

THIS MAJOR HAS ADDITIONAL ADMISSIONS REQUIREMENTS AS LISTED IN THIS SECTION.

The B.A. in Dance is a limited access program and is designed to provide students with a comprehensive core of study in Studio Technique, Choreographic Studies, and Dance Studies.

UNIVERSITY ADMISSIONS - COLLEGE OF THE ARTS

Admission to the University is based on the University's Undergraduate Admission Requirements that may be found by clicking on the following URLs:

- Freshman: https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx
- Transfer: https://www.usf.edu/admissions/transfer/admission-information/index.aspx
- International: https://www.usf.edu/admissions/international/admission-information/index.aspx

STATE MANDATED COMMON COURSE PREREQUISITES

Students wishing to transfer to USF should complete an A.A. degree at a Florida College System institution. Some courses required for the major may also meet General Education requirements thereby transferring maximum hours to the university.

If a student wishes to transfer without an A.A. degree and has fewer than 60 semester hours of acceptable credit, the student must meet the university's entering freshman requirements including ACT or SAT test scores, GPA, and course requirements.

Transfer students are also required to comply with the immunization, foreign language, and continuous enrollment policies of the university.

Students should complete the following prerequisite courses at the lower level prior to entering the university. If these courses are not taken at a Florida College System institution, they must be completed before the degree is granted.

Unless stated otherwise, a grade of C is the minimum acceptable grade in prerequisite courses.

Although credit or elective credit toward the major will be given for these courses, placement in upper-level technique classes will continue to be based on individual proficiency. Other technique courses in other styles of dance may be accepted toward the major on a case-by-case basis at the discretion of the university. Transfer dance credits must be evaluated by faculty and dance advisor at time of entrance.

- DAN X610 Music and Dance (two course sequence) - 3 credit hours
- TPA X200 or TPA X223 or TPA X232 - 3 credit hours
- DAA X200-X209* - 3 credit hours
- DAA X100-X109** - 3 credit hours

Please Note: Although credit toward the major will be given for these courses, placement in upper level technique classes will continue to be based on individual student proficiency.
Please Note: Other technique courses (i.e., in other styles of dance) may be accepted toward the major on a case-by-case basis at the discretion of the University.

*Up to 10 credit hours of any lower-level Ballet Technique courses within the X200-X209 taxonomy.

**Up to 10 credit hours of any lower level-Modern Technique courses within the X100-X109 taxonomy.

MAJOR REQUIREMENTS

MAJOR REQUIREMENTS FOR THE B.A. DEGREE:

Critiques

All students will be evaluated periodically by the faculty and critiqued each semester and will participate in progress conferences with the faculty.

If a student evidences deficiency in some area or in continuing progress toward the degree, the student may be placed on probation within the Dance program.

Failure to make satisfactory progress after being placed on probation shall constitute grounds for program recommendation to drop and discontinue the major.

Additional Standards

In addition to meeting the specific requirements and standards discussed above, the student and advisor will periodically evaluate the student's general progress. Students are required to meet with the Academic Advisor in Dance each semester. An unsatisfactory rating in one or more of the following areas could place the student on probation. A student on probation is given a specific amount of time to achieve a satisfactory rating before being dropped from the major program. The criteria include:

- Appropriate academic progress.
- Adequate technical skills and adaptability.
- B average in major studio classes.
- Physical conditioning that includes: nutrition, flexibility, strength, and healthful weight management necessary to facilitate safe technical and artistic expression.
- Class probation and program probation require review, i.e., reinstatement in good standing or recommendation to drop major.

DANCE STUDIES CONCENTRATION

TOTAL CONCENTRATION HOURS: 64-74

CONCENTRATION CORE (55-65 CREDIT HOURS)

STUDIO TECHNIQUE (19-29 CREDIT HOURS)

DAA 2204 - Ballet I Credit(s): 2
DAA 2104 - Modern Dance I Credit(s): 2
DAA 3108 - Modern Dance II Credit(s): 1-3
DAA 3214 - Ballet II Credit(s): 1-3
DAA 3109 - Modern Dance III Credit(s): 1-3
or
DAA 3209 - Ballet III Credit(s): 1-3
DAA 3395 - World Dance Topics Credit(s): 1
CREATIVE STUDIO STUDIES (12 CREDIT HOURS)

DAA 3624 - Dance Improvisation Credit(s): 2
DAA 3614 - Choreography I Credit(s): 2
DAA 3615 - Choreography II Credit(s): 2
DAA 4616 - Choreography III Credit(s): 2
DAA 4617 - Choreography IV Credit(s): 2
DAA 3686 - Junior Performance Project Credit(s): 1
DAA 4687 - Performance Credit(s): 1-2

DANCE STUDIES (24 CREDIT HOURS)

DAN 2160 - Entry Seminar Credit(s): 2
DAN 2100 - Understanding the Dance Experience Credit(s): 3
DAN 3584 - Technical Theatre in Dance Credit(s): 2
DAN 3714 - Dance Kinesiology Credit(s): 3
DAN 4134 - Ballet History Credit(s): 3
DAN 4135 - 20th Century Dance History Credit(s): 3
DAN 4162 - Research in Dance I Credit(s): 3
DAN 4163 - Research in Dance II Credit(s): 2
DAN 4180 - Dance Senior Seminar Credit(s): 2
DAN 4906 - Directed Study Credit(s): 1-5 Independent Research Project

CONCENTRATION ELECTIVES (9 CREDIT HOURS)

Students choose 9 credit hours of focused electives in the other area of interest in consultation with the advisor.

DANCE B.A. - ADDITIONAL INFORMATION

GPA REQUIREMENTS

Students must maintain a 2.0 overall GPA.

GRADING REQUIREMENTS

A student must receive a C grade or better in required prerequisite courses and major course for Dance majors. Should a student fail to do so, the course(s) in which the student receives D or F grades must be repeated and a C grade or better earned.

RESEARCH OPPORTUNITIES

Note: Students in the B.A. take two Research courses as part of their degree program and complete an independent research project.

Undergraduate students in any degree program are able to participate in undergraduate research. Several options exist to show mentored undergraduate research activity on a student's official transcript. Those who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 4914 course. This course will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research is able to assist with further inquiries.

ACCREDITATION INFORMATION

The Dance Program is accredited by the National Association of Schools of Dance (NASD).
Students must meet with the advisor for the School of Theatre and Dance each semester. Please contact Nadine Niforos at nniforos@usf.edu.

Other Elective Credit(s): 4
DAA 3395 - World Dance Topics Credit(s): 1

Total Credit Hours: 14
DANCE B.F.A., WITH BALLET CONCENTRATION

TOTAL HOURS: 120

The B.F.A. in Dance (Ballet or Modern concentrations) offers professional preparation, which includes extensive study in Studio Technique, Choreographic Studies, and Dance Studies. The focus of this degree is the development of dancers who will enter the professional world of dance/arts as performers and choreographers. Beyond the expectations for continuing opportunities for performance, students selecting the B.F.A. will develop and present solo and group senior choreographic projects.

LIMITED ACCESS

This major has additional admissions requirements as listed in this section.

The B.F.A. is a limited access program. Students must participate in a selective admissions procedure. At the end of their third semester, students will be assessed by Dance faculty to determine eligibility. Dancers must continue to take technique courses throughout their degree program.

UNIVERSITY ADMISSIONS - COLLEGE OF THE ARTS

Admission to the University is based on the University's Undergraduate Admission Requirements that may be found by clicking on the following URLs:

- Freshman: https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx
- Transfer: https://www.usf.edu/admissions/transfer/admission-information/index.aspx
- International: https://www.usf.edu/admissions/international/admission-information/index.aspx

STATE MANDATED COMMON COURSE PREREQUISITES

Students wishing to transfer to USF should complete an A.A. degree at a Florida College System institution. Some courses required for the major may also meet General Education requirements thereby transferring maximum hours to the university.

If a student wishes to transfer without an A.A. degree and has fewer than 60 semester hours of acceptable credit, the student must meet the university's entering freshman requirements including ACT or SAT test scores, GPA, and course requirements.

Transfer students are also required to comply with the immunization, foreign language, and continuous enrollment policies of the university.

Students should complete the following prerequisite courses at the lower level prior to entering the university. If these courses are not taken at a Florida College System institution, they must be completed before the degree is granted.

Unless stated otherwise, a grade of C is the minimum acceptable grade in prerequisite courses.

Although credit or elective credit toward the major will be given for these courses, placement in upper-level technique classes will continue to be based on individual proficiency. Other technique courses in other styles of dance may be accepted toward the major on a case-by-case basis, at the discretion of the University. Transfer dance credits must be evaluated by faculty and the Dance advisor at time of entrance.

Any 24 credit hours from the following 30 hours will be accepted toward the major:

- DAA X610 - 2 credit hours
- DAA X611 - 2 credit hours
- DAA X680* - 1 credit hour
- DAA X681* - 1 credit hour
- DAA X200-X209** - 8 credit hours
- DAA X100-X109*** - 8 credit hours
- DAN X610 Music and Dance (Two course sequence) or DAN X600 (single course) - 3 credit hours
- DAN X611 - 3 credit hours
Please Note: Although credit toward the major will be given for these, placement in upper level technique classes will continue to be based on individual student proficiency.

*Or any lower level Repertory course in the X400-X499 series up to 4 credit hours.

**Up to 8 credit hours of any lower-level Ballet Technique courses within the X200-X209 taxonomy.

***Up to 8 credit hours of any lower-level Modern Technique courses within the X100-X109 taxonomy.

CONCENTRATION ELECTIVES (1-15 CREDIT HOURS)

Dance Electives: 1-15

DANCE B.F.A. - ADDITIONAL INFORMATION

GPA REQUIREMENTS

Students must maintain a 2.0 overall GPA.

GRADING REQUIREMENTS

A grade of C- is the minimum acceptable grade for each major course.

RESEARCH OPPORTUNITIES

Undergraduate students in any degree program are able to participate in undergraduate research. Several options exist to show mentored undergraduate research activity on a student's official transcript. Those who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 4914 course. This course will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research is able to assist with further inquiries.

ACCREDITATION INFORMATION

The Dance Program is accredited by the National Association of Schools of Dance (NASD).

ADVISING INFORMATION

Students must meet with the advisor for the School of Theatre and Dance each semester. Please contact Nadine Niforos at nniforos@usf.edu.

4 YEAR PLAN OF STUDY - DANCE B.F.A., WITH BALLET CONCENTRATION

NOTES:

SCIV - Civics Literacy needs to be completed prior to graduation. For more information, see https://www.usf.edu/undergrad/students/civics-literacy.aspx or talk with your academic advisor.

Items that are critical are marked with a ✴️ and are included in the plan for a student to stay on track.

Potential Entry Level Job Titles:

Performer
Choreographer
Art, Drama, and Music Teacher

Potential Entry Level Salary Range:

$20,000 - $40,000
## YEAR 1

### SEMESTER 1 (FALL)

- **ENC 1101** - Composition I **Credit(s): 3**
- **SGEM** - General Education Core Mathematics **Credit(s): 3**
- ✳️ **DAN 2160** - Entry Seminar **Credit(s): 2**

DANCE B.F.A., WITH MODERN DANCE CONCENTRATION

TOTAL HOURS: 120

The B.F.A. in Dance (Ballet or Modern concentrations) offers professional preparation, which includes extensive study in Studio Technique, Choreographic Studies, and Dance Studies. The focus of this degree is the development of dancers who will enter the professional world of dance/arts as performers and choreographers. Beyond the expectations for continuing opportunities for performance, students selecting the B.F.A. will develop and present solo and group senior choreographic projects.

LIMITED ACCESS

THIS MAJOR HAS ADDITIONAL ADMISSIONS REQUIREMENTS AS LISTED IN THIS SECTION.

The B.F.A. is a limited access program. Students must participate in a selective admissions procedure. At the end of their third semester, students will be assessed by Dance faculty to determine eligibility. Dancers must continue to take technique courses throughout their degree program.

UNIVERSITY ADMISSIONS - COLLEGE OF THE ARTS

Admission to the University is based on the University's Undergraduate Admission Requirements that may be found by clicking on the following URLs:

- Freshman: https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx
- Transfer: https://www.usf.edu/admissions/transfer/admission-information/index.aspx
- International: https://www.usf.edu/admissions/international/admission-information/index.aspx

STATE MANDATED COMMON COURSE PREREQUISITES

Students wishing to transfer to USF should complete an A.A. degree at a Florida College System institution. Some courses required for the major may also meet General Education requirements thereby transferring maximum hours to the university.

If a student wishes to transfer without an A.A. degree and has fewer than 60 semester hours of acceptable credit, the student must meet the university's entering freshman requirements including ACT or SAT test scores, GPA, and course requirements.

Transfer students are also required to comply with the immunization, foreign language, and continuous enrollment policies of the university.

Students should complete the following prerequisite courses at the lower level prior to entering the university. If these courses are not taken at a Florida College System institution, they must be completed before the degree is granted.

Unless stated otherwise, a grade of C is the minimum acceptable grade in prerequisite courses.

Although credit or elective credit toward the major will be given for these courses, placement in upper-level technique classes will continue to be based on individual proficiency. Other technique courses in other styles of dance may be accepted toward the major on a case-by-case basis, at the discretion of the University. Transfer dance credits must be evaluated by faculty and the Dance advisor at time of entrance.

Any 24 credit hours from the following 30 hours will be accepted toward the major:

- DAA X610 - 2 credit hours
- DAA X611 - 2 credit hours
- DAA X680* - 1 credit hour
- DAA X681* - 1 credit hour
- DAA X200-X209** - 8 credit hours
- DAA X100-X109*** - 8 credit hours
- DAN X610 Music and Dance (Two course sequence) or DAN X600 (single course) - 3 credit hours
- DAN X611 - 3 credit hours
Please Note: Although credit toward the major will be given for these, placement in upper level technique classes will continue to be based on individual student proficiency.

*Or any lower level Repertory course in the X400-X499 series up to 4 credit hours.

**Up to 8 credit hours of any lower-level Ballet Technique courses within the X200-X209 taxonomy.

***Up to 8 credit hours of any lower-level Modern Technique courses within the X100-X109 taxonomy.

**MODERN DANCE CONCENTRATION**

CERTIFIED GLOBAL PATHWAY PROGRAM

Through its curriculum and production program, students have the opportunity to prepare for a professional career in the theatre or to continue their studies at the graduate level. Our exclusively undergraduate program boasts intensive studies in the disciplines of performance, design and theatre arts as well as a close working relationship with our nationally and internationally recognized faculty.

This program has been certified as a Global Pathway. Global Pathway programs have significant global content and align with the goals of USF’s Quality Enhancement Plan, the Global Citizens Project. Students in Global Pathway programs are well positioned to earn the Global Citizen Award and become eligible to apply for a study abroad scholarship offered by the Global Citizens Project.

UNIVERSITY ADMISSIONS - COLLEGE OF THE ARTS

Admission to the University is based on the University's Undergraduate Admission Requirements that may be found by clicking on the following URLs:

**Freshman**: [https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx](https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx)

**Transfer**: [https://www.usf.edu/admissions/transfer/admission-information/index.aspx](https://www.usf.edu/admissions/transfer/admission-information/index.aspx)

**International**: [https://www.usf.edu/admissions/international/admission-information/index.aspx](https://www.usf.edu/admissions/international/admission-information/index.aspx)

STATE MANDATED COMMON COURSE PREREQUISITES

Students wishing to transfer to USF should complete an A.A. degree at a Florida College System institution. Some courses required for the major may also meet General Education requirements thereby transferring maximum hours to the university.

If a student wishes to transfer without an A.A. degree and has fewer than 60 semester hours of acceptable credit, the student must meet the university’s entering freshman requirements including ACT or SAT test scores, GPA, and course requirements.

Transfer students are also required to comply with the immunization, foreign language, and continuous enrollment policies of the university.

Students should complete the following prerequisite courses at the lower level prior to entering the university. If these courses are not taken at a Florida College System institution, they must be completed before the degree is granted.

Unless stated otherwise, a grade of C is the minimum acceptable grade in prerequisite courses.
Students need not have completed a concentration of courses in theatre in order to consider a Theatre major at USF. However, admission to the upper-level Theatre Performance program is by audition and admission to the upper-level Design sequence is by portfolio review. If the student does not succeed in passing the audition or portfolio review certain Theatre program requirements may have to be repeated until successful completion of the audition or portfolio review can be achieved.

THE X000* - 3 credit hours
THE X305 or THE X300 - 3 credit hours
THE X925 - 1 credit hour
TPA X290 - 1 credit hour
TPA X200 or TPA X210 - 3 credit hours
TPP X190 or TPP X110 - 1-3 credit hours
THE X000-X999 or TPP X000-X999 - 3 credit hours
THE X000-X999 or TPP X000-X999 or TPP X000-X999 - 3 credit hours
THE X000-X999 or TPA X000-X999 or TPP X000-X999 - 3 credit hours
THE X000-X999 or TPA X000-X999 or TPP X000-X999 - 3 credit hours

*Any introductory course from THE X001-X035.

TOTAL MAJOR HOURS: 57

MAJOR CORE (33 CREDIT HOURS)

Students may choose one of three areas for the B.A. degree: Design and Technology, Performance, or Theatre Arts. Common to all is the following core, normally taken in the years indicated:

FIRST YEAR (14 CREDIT HOURS):

THE 2000 - Theater and Culture Credit(s): 3
THE 2023 - Entry Seminar: Theatre as an Art Form Credit(s): 1
TPA 2200 - Introduction to Technical Theatre I Credit(s): 3
TPA 2290L - Technical Theatre Lab I Credit(s): 1
TPA 3007C - Introduction to Entertainment Design Credit(s): 3
TPP 2110 - Acting I Credit(s): 3

SECOND YEAR (8 CREDIT HOURS):

THE 2305 - Script Analysis Credit(s): 3
THE 3110 - Theatre History I Credit(s): 3
or
THE 3111 - Theatre History II Credit(s): 3
and
TPA 2292 - Production Involvement I Credit(s): 1
TPP 2190 - Studio Theatre Performance I Credit(s): 1

THIRD YEAR (8 CREDIT HOURS):

TPA 4293 - Production Involvement II Credit(s): 1
TPP 4193 - Studio Theatre Performance II Credit(s): 1

Choose one Theatre History/Theory course from the following list:

THE 3110 - Theatre History I Credit(s): 3
THE 3111 - Theatre History II Credit(s): 3
THE 4264 - History of Costume Credit(s): 3
THE 4283 - Architecture And Decoration Credit(s): 3
THE 4574 - Sport as Performance Credit(s): 3
THE 4930 - Selected Topics In Theatre Credit(s): 1-3
Choose one Dramatic Literature course from the following list:

THE 4330 - Shakespeare for the Theatre Credit(s): 3
THE 4401 - American Drama Credit(s): 3
THE 4434 - Caribbean Theatre Credit(s): 3
THE 4480 - Drama-Special Topics Credit(s): 3

FOURTH YEAR (3 CREDIT HOURS):

THE 4562 - Contemporary Performance Theory Credit(s): 3

DESIGN AND TECHNOLOGY CONCENTRATION

TOTAL CONCENTRATION HOURS: 24

CONCENTRATION CORE (24 CREDIT HOURS)

TPA 3208 - Drafting and CAD I Credit(s): 3
TPA 4298 - Advanced Design Practicum Credit(s): 3
TPA 4993C - Portfolio Credit(s): 2

Choose 4 credits from:

TPA 4094C - Advanced Entertainment Design Credit(s): 4
TPA 4359C - Advanced Theatre Technology Credit(s): 4

Choose 6 credits from:

TPA 3223C - Technical Theatre: Lighting Credit(s): 3
TPA 3231C - Technical Theatre: Costume Construction Credit(s): 3
TPA 3289C - Technical Theatre I: Scenic Technology Credit(s): 3

Choose 6 credits from:

TPA 4011C - Design Studio: Scenic Design Credit(s): 3
TPA 4013C - Design Studio: Lighting Design Credit(s): 3
TPA 4045C - Design Studio: Costume Design Credit(s): 3

THEATRE B.A. - ADDITIONAL INFORMATION

GPA REQUIREMENTS

Students must maintain an overall GPA of 2.0.
GRADING REQUIREMENTS
A minimum grade of C (not a C-) is required in major courses.

AUDITION AND PORTFOLIO REVIEW
All students desiring admittance into the upper level acting courses must audition and those entering the upper level design sequence must present a portfolio. This normally occurs after the completion of the sophomore year.

RESIDENCY REQUIREMENT
A minimum of 20 credit hours in the major must be earned in residence.

RESEARCH OPPORTUNITIES
Undergraduate students in any degree program are able to participate in undergraduate research. Several options exist to show mentored undergraduate research activity on a student’s official transcript. Those who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 4914 course. This course will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research is able to assist with further inquiries.

OPTIONAL HONORS PROGRAM
The School Honors Program allows small select groups of upper-division students to work on special projects with faculty and guest artists for up to one year. The Honors Program is available to upper level majors who have a 3.5 GPA in the major and a 3.2 overall GPA and who have achieved a comparably high level of artistic or scholarly achievement. A 6-8 credit one-year sequence of courses is offered to students accepted into the Honors Program. The sequence progresses from a reading seminar to a guest artist practicum to a student thesis or project. With approval of director and instructor, the entire Honors sequence may substitute for one of the Theatre History/Literature requirements.

ACCREDITATION INFORMATION
USF is fully accredited by the National Association of Schools of Theatre (NAST).

OTHER INFORMATION
The School of Theatre & Dance believes in the ongoing influence of guest artists as choreographers, teachers for master classes, residencies and performers. The programs provide numerous opportunities to enhance the students’ artistic awareness of professional possibilities. Recent Artists-in-Residence have included Trisha Brown, Bill T. Jones, Doug Varone, and Jennifer Archibald.

Through its curriculum and production program, Theatre offers seriously interested students the opportunity to prepare within a liberal arts atmosphere for a professional career in the theatre or to continue their studies at the graduate level.

For over 30 years, our exclusively undergraduate program has prepared critically aware and skilled theatre practitioners. The school’s mission is to educate students in the art of theatre, to conduct original research, and to present challenging productions to the university and Tampa Bay communities.

Students may graduate with a broad-based theatre arts degree, or they may specialize in performance or design.

SPECIAL FEATURES
The endowed British International Theatre Program (BRIT) brings three or more professional artists from the UK to work with upper level students for up to 6-8 weeks each spring semester. The BRIT Program is available to advanced theatre students by audition. The program consists of master classes and/or production experience with selected guest artists from the U.K.
The John W. Holloway Endowed Chair in Dance and Theatre provides funds annually for guest artist residencies. The Holloway Program provides classes and production experiences with internationally renowned artists in design, directing, acting, writing, and musical theatre.

USF’s Theatre program has a formal student Exchange Program with Middlesex University in London, England. Guest artists have been working professionals from New York, San Francisco, Denver, Los Angeles, Munich, London, Tel Aviv.

**VISITING ARTISTS AND ARTIST-IN-RESIDENCE**

The Theatre program at USF actively promotes guest artists on campus. A representative list of artists includes Maria Aitken, Peter Barkworth, Bill Bryden, Daniel Chumley, Russel Craig, Matthew Francis, George Froscher, Christopher Fry, John and Lisel Gale, Patrick Garland, Ronald Harwood, Jeff Jones, Rachel Kavanaugh, Sam Mendes, Bob Moody, Eric Overmyer, Louise Page, Estelle Parsons, Olga Petrovna, Roni Pinkovitch, Denis Quilley, Gerlind Reinshagen, L. Kenneth Richardson, Lord Brian Rix, James Roose-Evans, Dorothy Tutin, Robert Wierzel, and Jose Yglesias. These and others have helped the School develop relationships with UMO, London’s West End, The Royal National Theatre, The Royal Shakespeare Company, The Actors’ Studio, Broadway, San Francisco Mime Troupe, Free Theatre of Munich, The Chichester Festival, The Edinburgh Festival, The Spoleto Festival, Yale Repertory Theatre, and Habimah Theatre in Israel.

**ADVISING INFORMATION**

Students must meet with the advisor for the School of Theatre and Dance each semester. Please contact Nadine Niforos at nniforos@usf.edu.
# 4 Year Plan of Study - Theatre B.A., with Design and Technology Concentration

**NOTES:**

- SCIV - Civics Literacy needs to be completed prior to graduation. For more information, see [https://www.usf.edu/undergrad/students/civics-literacy.aspx](https://www.usf.edu/undergrad/students/civics-literacy.aspx) or talk with your academic advisor.
- Items that are critical are marked with a ✴️ and are included in the plan for a student to stay on track.

**Potential Entry Level Job Titles:**
- Set & Exhibit Designers
- Sound Technician
- Art, Drama, and Music Teacher
- A/V Technician

**Potential Entry Level Salary Range:**
$20,000 - $40,000

THE 4401 - American Drama Credit(s): 3
THE 4434 - Caribbean Theatre Credit(s): 3
THE 4480 - Drama-Special Topics Credit(s): 3

FOURTH YEAR (3 CREDIT HOURS):

THE 4562 - Contemporary Performance Theory Credit(s): 3

PERFORMANCE CONCENTRATION

TOTAL CONCENTRATION HOURS: 24

CONCENTRATION CORE (15 CREDIT HOURS)

TPP 3790 - Voice for Actors Credit(s): 3
TPP 3155 - Acting II Credit(s): 3
TPP 4180 - Acting III Credit(s): 3
TPP 4920 - Special Topics in Performance Credit(s): 3
TPP 2500 - Movement for Actors Credit(s): 3

CONCENTRATION ELECTIVES (9 CREDIT HOURS)

In addition to the Concentration Core courses, students must take 9 hours of upper-level Performance Elective (TPP) courses (TPP 3XXX and TPP 4XXX).

THEATRE B.A. - ADDITIONAL INFORMATION

GPA REQUIREMENTS

Students must maintain an overall GPA of 2.0.

GRADING REQUIREMENTS

A minimum grade of C (not a C-) is required in major courses.

AUDITION AND PORTFOLIO REVIEW

All students desiring admittance into the upper level acting courses must audition and those entering the upper level design sequence must present a portfolio. This normally occurs after the completion of the sophomore year.

RESIDENCY REQUIREMENT

A minimum of 20 credit hours in the major must be earned in residence.

RESEARCH OPPORTUNITIES

Undergraduate students in any degree program are able to participate in undergraduate research. Several options exist to show mentored undergraduate research activity on a student's official transcript. Those who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 4914 course. This course will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research is able to assist with further inquiries.

OPTIONAL HONORS PROGRAM
The School Honors Program allows small select groups of upper-division students to work on special projects with faculty and guest artists for up to one year. The Honors Program is available to upper level majors who have a 3.5 GPA in the major and a 3.2 overall GPA and who have achieved a comparably high level of artistic or scholarly achievement. A 6-8 credit one-year sequence of courses is offered to students accepted into the Honors Program. The sequence progresses from a reading seminar to a guest artist practicum to a student thesis or project. With approval of director and instructor, the entire Honors sequence may substitute for one of the Theatre History/Literature requirements.

ACCREDITATION INFORMATION

USF is fully accredited by the National Association of Schools of Theatre (NAST).

OTHER INFORMATION

The School of Theatre & Dance believes in the ongoing influence of guest artists as choreographers, teachers for master classes, residencies and performers. The programs provide numerous opportunities to enhance the students' artistic awareness of professional possibilities. Recent Artists-in-Residence have included Trisha Brown, Bill T. Jones, Doug Varone, and Jennifer Archibald.

Through its curriculum and production program, Theatre offers seriously interested students the opportunity to prepare within a liberal arts atmosphere for a professional career in the theatre or to continue their studies at the graduate level.

For over 30 years, our exclusively undergraduate program has prepared critically aware and skilled theatre practitioners. The school's mission is to educate students in the art of theatre, to conduct original research, and to present challenging productions to the university and Tampa Bay communities.

Students may graduate with a broad-based theatre arts degree, or they may specialize in performance or design.

SPECIAL FEATURES

The endowed British International Theatre Program (BRIT) brings three or more professional artists from the UK to work with upper level students for up to 6-8 weeks each spring semester. The BRIT Program is available to advanced theatre students by audition. The program consists of master classes and/or production experience with selected guest artists from the U.K.

The John W. Holloway Endowed Chair in Dance and Theatre provides funds annually for guest artist residencies. The Holloway Program provides classes and production experiences with internationally renowned artists in design, directing, acting, writing, and musical theatre.

USF's Theatre program has a formal student Exchange Program with Middlesex University in London, England. Guest artists have been working professionals from New York, San Francisco, Denver, Los Angeles, Munich, London, Tel Aviv.
The Theatre program at USF actively promotes guest artists on campus. A representative list of artists includes Maria Aitken, Peter Barkworth, Bill Bryden, Daniel Chumley, Russel Craig, Matthew Francis, George Froscher, Christopher Fry, John and Lisel Gale, Patrick Garland, Ronald Harwood, Jeff Jones, Rachel Kavanaugh, Sam Mendes, Bob Moody, Eric Overmyer, Louise Page, Estelle Parsons, Olga Petrovna, Roni Pinkovitch, Denis Quilley, Gerlind Reinshagen, L. Kenneth Richardson, Lord Brian Rix, James Roose-Evans, Dorothy Tutin, Robert Wierzel, and Jose Yglesias. These and others have helped the School develop relationships with UMO, London's West End, The Royal National Theatre, The Royal Shakespeare Company, The Actors' Studio, Broadway, San Francisco Mime Troupe, Free Theatre of Munich, The Chichester Festival, The Edinburgh Festival, The Spoleto Festival, Yale Repertory Theatre, and Habimah Theatre in Israel.

ADVISING INFORMATION

Students must meet with the advisor for the School of Theatre and Dance each semester. Please contact Nadine Niforos at nniforos@usf.edu.

CERTIFIED GLOBAL PATHWAY PROGRAM

Through its curriculum and production program, students have the opportunity to prepare for a professional career in the theatre or to continue their studies at the graduate level. Our exclusively undergraduate program boasts intensive studies in the disciplines of performance, design and theatre arts as well as a close working relationship with our nationally and internationally recognized faculty.

This program has been certified as a Global Pathway. Global Pathway programs have significant global content and align with the goals of USF’s Quality Enhancement Plan, the Global Citizens Project. Students in Global Pathway programs are well positioned to earn the Global Citizen Award and become eligible to apply for a study abroad scholarship offered by the Global Citizens Project.

UNIVERSITY ADMISSIONS - COLLEGE OF THE ARTS

Admission to the University is based on the University's Undergraduate Admission Requirements that may be found by clicking on the following URLs:

Freshman: [https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx](https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx)

Transfer: [https://www.usf.edu/admissions/transfer/admission-information/index.aspx](https://www.usf.edu/admissions/transfer/admission-information/index.aspx)

International: [https://www.usf.edu/admissions/international/admission-information/index.aspx](https://www.usf.edu/admissions/international/admission-information/index.aspx)

STATE MANDATED COMMON COURSE PREREQUISITES

Students wishing to transfer to USF should complete an A.A. degree at a Florida College System institution. Some courses required for the major may also meet General Education requirements thereby transferring maximum hours to the university.

If a student wishes to transfer without an A.A. degree and has fewer than 60 semester hours of acceptable credit, the student must meet the university's entering freshman requirements including ACT or SAT test scores, GPA, and course requirements.

Transfer students are also required to comply with the immunization, foreign language, and continuous enrollment policies of the university.

Students should complete the following prerequisite courses at the lower level prior to entering the university. If these courses are not taken at a Florida College System institution, they must be completed before the degree is granted.

Unless stated otherwise, a grade of C is the minimum acceptable grade in prerequisite courses.

Students need not have completed a concentration of courses in theatre in order to consider a Theatre major at USF. However, admission to the upper-level Theatre Performance program is by audition and admission to the upper-level Design sequence is by portfolio review. If the student does not succeed in passing the audition or portfolio review certain Theatre program requirements may have to be repeated until successful completion of the audition or portfolio review can be achieved.

- THE X000* - 3 credit hours
- THE X305 or THE X300 - 3 credit hours
- THE X925 - 1 credit hour
- TPA X290 - 1 credit hour
- TPA X200 or TPA X210 - 3 credit hours
- TPP X190 or TPP X110 - 1-3 credit hours
- THE X000-X999 or TPA X000-X999 or TPP X000-X999 - 3 credit hours
- THE X000-X999 or TPA X000-X999 or TPP X000-X999 - 3 credit hours
- THE X000-X999 or TPA X000-X999 or TPP X000-X999 - 3 credit hours

*Any introductory course from THE X001-X035.
TOTAL MAJOR HOURS: 57

MAJOR CORE (33 CREDIT HOURS)

Students may choose one of three areas for the B.A. degree: Design and Technology, Performance, or Theatre Arts. Common to all is the following core, normally taken in the years indicated:

FIRST YEAR (14 CREDIT HOURS):

THE 2000 - Theater and Culture Credit(s): 3
THE 2023 - Entry Seminar: Theatre as an Art Form Credit(s): 1
TPA 2200 - Introduction to Technical Theatre I Credit(s): 3
TPA 2290L - Technical Theatre Lab I Credit(s): 1
TPA 3007C - Introduction to Entertainment Design Credit(s): 3
TPP 2110 - Acting I Credit(s): 3

SECOND YEAR (8 CREDIT HOURS):

THE 2305 - Script Analysis Credit(s): 3
THE 3110 - Theatre History I Credit(s): 3
or
THE 3111 - Theatre History II Credit(s): 3
and
TPA 2292 - Production Involvement I Credit(s): 1
TPP 2190 - Studio Theatre Performance I Credit(s): 1

THIRD YEAR (8 CREDIT HOURS):

TPA 4293 - Production Involvement II Credit(s): 1
TPP 4193 - Studio Theatre Performance II Credit(s): 1

Choose one Theatre History/Theory course from the following list:

THE 3110 - Theatre History I Credit(s): 3
THE 3111 - Theatre History II Credit(s): 3
THE 4264 - History of Costume Credit(s): 3
THE 4283 - Architecture And Decoration Credit(s): 3
THE 4574 - Sport as Performance Credit(s): 3
THE 4930 - Selected Topics In Theatre Credit(s): 1-3

Choose one Dramatic Literature course from the following list:

THE 4330 - Shakespeare for the Theatre Credit(s): 3
THE 4401 - American Drama Credit(s): 3
THE 4434 - Caribbean Theatre Credit(s): 3
THE 4480 - Drama-Special Topics Credit(s): 3

FOURTH YEAR (3 CREDIT HOURS):

THE 4562 - Contemporary Performance Theory Credit(s): 3

THEATRE ARTS CONCENTRATION
The Theatre Arts Concentration is intended for the student who, in consultation with the Theatre Advisor, wishes to construct his/her own degree program from a broad spectrum of theatre courses. In addition to courses in performance and design, areas of study available are Technical Theatre, Playwriting, Stage Management, Directing, Literature and Criticism, and more.

**TOTAL CONCENTRATION HOURS: 24**

**CONCENTRATION CORE (24 CREDIT HOURS)**

24 additional Theatre elective credits must include:
- 3 credit hours of TPP courses.
- 21 credit hours of THE; TPA, TPP courses (9 credit hours must be at the upper level).

**THEATRE B.A. - ADDITIONAL INFORMATION**

**GPA REQUIREMENTS**

Students must maintain an overall GPA of 2.0.

**GRADING REQUIREMENTS**

A minimum grade of C (not a C-) is required in major courses.

**AUDITION AND PORTFOLIO REVIEW**

All students desiring admittance into the upper level acting courses must audition and those entering the upper level design sequence must present a portfolio. This normally occurs after the completion of the sophomore year.

**RESIDENCY REQUIREMENT**

A minimum of 20 credit hours in the major must be earned in residence.

**RESEARCH OPPORTUNITIES**

Undergraduate students in any degree program are able to participate in undergraduate research. Several options exist to show mentored undergraduate research activity on a student's official transcript. Those who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 4914 course. This course will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research is able to assist with further inquiries.

**OPTIONAL HONORS PROGRAM**

The School Honors Program allows small select groups of upper-division students to work on special projects with faculty and guest artists for up to one year. The Honors Program is available to upper level majors who have a 3.5 GPA in the major and a 3.2 overall GPA and who have achieved a comparably high level of artistic or scholarly achievement. A 6-8 credit one-year sequence of courses is offered to students accepted into the Honors Program. The sequence progresses from a reading seminar to a guest artist practicum to a student thesis or project. With approval of director and instructor, the entire Honors sequence may substitute for one of the Theatre History/Literature requirements.

**ACCREDITATION INFORMATION**

USF is fully accredited by the National Association of Schools of Theatre (NAST).
The School of Theatre & Dance believes in the ongoing influence of guest artists as choreographers, teachers for master classes, residencies and performers. The programs provide numerous opportunities to enhance the students' artistic awareness of professional possibilities. Recent Artists-in-Residence have included Trisha Brown, Bill T. Jones, Doug Varone, and Jennifer Archibald.

Through its curriculum and production program, Theatre offers seriously interested students the opportunity to prepare within a liberal arts atmosphere for a professional career in the theatre or to continue their studies at the graduate level.

For over 30 years, our exclusively undergraduate program has prepared critically aware and skilled theatre practitioners. The school's mission is to educate students in the art of theatre, to conduct original research, and to present challenging productions to the university and Tampa Bay communities.

Students may graduate with a broad-based theatre arts degree, or they may specialize in performance or design.

SPECIAL FEATURES

The endowed British International Theatre Program (BRIT) brings three or more professional artists from the UK to work with upper level students for up to 6-8 weeks each spring semester. The BRIT Program is available to advanced theatre students by audition. The program consists of master classes and/or production experience with selected guest artists from the U.K.

The John W. Holloway Endowed Chair in Dance and Theatre provides funds annually for guest artist residencies. The Holloway Program provides classes and production experiences with internationally renowned artists in design, directing, acting, writing, and musical theatre.

USF's Theatre program has a formal student Exchange Program with Middlesex University in London, England. Guest artists have been working professionals from New York, San Francisco, Denver, Los Angeles, Munich, London, Tel Aviv.

VISITING ARTISTS AND ARTIST-IN-RESIDENCE

The Theatre program at USF actively promotes guest artists on campus. A representative list of artists includes Maria Aitken, Peter Barkworth, Bill Bryden, Daniel Chumley, Russel Craig, Matthew Francis, George Froscher, Christopher Fry, John and Lisel Gale, Patrick Garland, Ronald Harwood, Jeff Jones, Rachel Kavanaugh, Sam Mendes, Bob Moody, Eric Overmyer, Louise Page, Estelle Parsons, Olga Petrovna, Roni Pinkovitch, Denis Quilley, Gerlind Reinshagen, L. Kenneth Richardson, Lord Brian Rix, James Roose-Evans, Dorothy Tutin, Robert Wierzel, and Jose Yglesias. These and others have helped the School develop relationships with UMO, London's West End, The Royal National Theatre, The Royal Shakespeare Company, The Actors' Studio, Broadway, San Francisco Mime Troupe, Free Theatre of Munich, The Chichester Festival, The Edinburgh Festival, The Spoleto Festival, Yale Repertory Theatre, and Habimah Theatre in Israel.

- DAA 3214 - Ballet II Credit(s): 1-3
- DAA 3209 - Ballet III Credit(s): 1-3
- DAA 4211 - Ballet IV Credit(s): 1-3
- DAA 2104 - Modern Dance I Credit(s): 2
- DAA 3108 - Modern Dance II Credit(s): 1-3
- DAA 3109 - Modern Dance III Credit(s): 1-3
- DAA 4110 - Modern Dance IV Credit(s): 1-4
- DAA 2504 - Jazz Dance Credit(s): 2

CREATIVE STUDIO STUDIES (4 CREDIT HOURS):

Select 4 credit hours from the following list:

- DAA 3624 - Dance Improvisation Credit(s): 2
- DAA 3614 - Choreography I Credit(s): 2
- DAA 3615 - Choreography II Credit(s): 2

DANCE THEORY (6 CREDIT HOURS):

Select 6 credit hours from the following list:

- DAN 2100 - Understanding the Dance Experience Credit(s): 3
- DAN 4134 - Ballet History Credit(s): 3
- DAN 4135 - 20th Century Dance History Credit(s): 3

MINOR ELECTIVES (4 CREDIT HOURS)

4 credit hours of Dance electives.

GPA REQUIREMENTS

Students must maintain an overall GPA of 2.0.

GRADING REQUIREMENT

The student choosing a Dance minor must achieve a grade of C or better in all courses applied to the minor in Dance.

OTHER INFORMATION

Students must be at a Level II of technique to take DAA 3614 - Choreography I.

To attain the dance minor, students must complete at least one semester at the level II of technique (ballet or modern). Students must complete at least one semester of both ballet and modern.

ADVISING INFORMATION
Theatre Minor

Total Minor Hours: 24

The Theatre Minor is structured to give students an overview of drama and theatre, in terms of history, performance, and criticism. The curriculum involves the student in both the practical and theoretical aspects of the theatre process. The minor offers ample opportunities for students to apply their skills onstage and/or backstage.

Theatre Minor Core (15 Credit Hours)

- THE 2000 - Theater and Culture Credit(s): 3
- TPP 2110 - Acting I Credit(s): 3
- TPP 2190 - Studio Theatre Performance I Credit(s): 1
- TPA 2292 - Production Involvement I Credit(s): 1
- TPA 2200 - Introduction to Technical Theatre I Credit(s): 3
- TPA 2290L - Technical Theatre Lab I Credit(s): 1
- TPA 3007C - Introduction to Entertainment Design Credit(s): 3

Theatre Minor Electives (9 Credit Hours)

In addition to the Theatre Minor Cores courses, students must take a minimum of 9 credits hours chosen from courses with the following prefix: THE, TPP, TPA and with the approval of the advisor.

All audition and portfolio requirements apply.

GPA Requirements

Students must maintain an overall GPA of 2.0.

Grading Requirements

A minimum grade of C (not C-) is required for minor courses.

Advising Information

Students are encouraged to meet with the advisor for the School of Theatre and Dance. Please contact Nadine Niforos at nniforos@usf.edu.
ADVANCED DANCE STUDIES CERTIFICATE

TOTAL CERTIFICATE HOURS: 12

This certificate is designed for students who possess a strong background in dance technique (ballet/modern). It is meant for individuals who would like to heighten their studies in dance and earn advanced level training.

CERTIFICATE REQUIREMENTS

Students are required to take 12 credit hours composed of the course options below. At least one semester of either Ballet IV or Modern Dance IV is required.

CERTIFICATE CORE (3 CREDIT HOURS)

Required course:
- DAA 4211 - Ballet IV Credit(s): 1-3
- or
- DAA 4110 - Modern Dance IV Credit(s): 1-4

CERTIFICATE ELECTIVES (9 CREDIT HOURS)

Students choose nine credit hours of coursework from the following list of courses.

Note: Ballet and Modern classes may be repeated.

- DAA 3109 - Modern Dance III Credit(s): 1-3
- DAA 3209 - Ballet III Credit(s): 1-3
- DAA 3624 - Dance Improvisation Credit(s): 2
- DAA 3294 - Ballet Variations Credit(s): 1
- DAA 4110 - Modern Dance IV Credit(s): 1-4
- DAA 4211 - Ballet IV Credit(s): 1-3
- DAA 4687 - Performance Credit(s): 1-2

GRADING REQUIREMENT

A grade of B- or higher in all courses is required.

RESIDENCY REQUIREMENT

A minimum of six (6) credit hours of coursework taken at USF is required to meet residency requirements.

OTHER REQUIREMENTS

Students must audition for placement through the dance program and place into at least the level III of ballet or modern in order to qualify to pursue the certificate.

OTHER INFORMATION

Any degree-seeking student not currently majoring in Dance B.F.A. or B.A. or any non-degree seeking student may pursue the Advanced Dance Studies certificate.

ADVISING INFORMATION

Intent to pursue the certificate should be discussed with the academic advisor for Dance, Nadine Niforos via email at n.niforos@usf.edu or 813-974-1739.
DANCE MEDICINE AND SCIENCE CERTIFICATE

TOTAL CERTIFICATE HOURS: 18

This certificate is designed for students who are degree-seeking (any major) OR non-degree seeking and who possess a strong interest in exploring the field of dance medicine/science. This certificate program will give students a basic understanding of issues pertaining to the wellness of dancers such as: typical injury and misalignment patterns, injury prevention and treatment, injury risk factors, effective conditioning, muscular analysis of dance movement, and current topics in dance medicine/science research. Undergirding this specialized study are support courses which address the structure and function of the musculo-skeletal system as well as the mechanical principles related to motor performance, the physiological effects of exercise, nutrition, and principles of motor development and skill acquisition. The capstone experience will be undertaken in the Research in Dance II course where students will review a variety of research in the dance medicine/science field and will complete a research project exploring a relevant topic in the field. Students who are dance majors, health science majors, exercise science majors, or physical education majors interested in dance medicine/science, are encouraged to apply. Other majors are also welcome. Students are required to take 18 credit hours composed of the courses below. Intent to pursue the certificate should be discussed with the academic advisor for dance.

COURSE NOTES

*Anatomy and Physiology I and II for Nursing and other Healthcare Professionals with lab are required as prerequisites for these courses. Non-major and major sections (for Exercise Science majors) of these courses are offered in alternating semesters.

**This course is restricted to health professions majors but open to other USF students pending space availability. Anatomy and Physiology transfer courses will also be accepted to meet this requirement. Special consideration for registration access will be given to students in the dance medicine certificate program.

***Exercise Science majors only. Permission may be granted on a case-by-case basis, pending space availability and instructor approval.
GPA REQUIREMENTS
Students must maintain an overall GPA of 2.0.

GRADING REQUIREMENT
A grade of C+ or higher in all courses is required.

RESIDENCY REQUIREMENT
A minimum of nine (9) credit hours of coursework taken at USF is required to meet residency requirements.

OTHER REQUIREMENTS
The Research in Dance courses should generally be taken last in the course sequence. Electives may be taken concurrently with the Research in Dance courses. Ideally, the student should take the Research in Dance II course last as it involves a capstone research experience.

OTHER INFORMATION
Any degree-seeking student or any non-degree seeking student may pursue the Dance Medicine/Science certificate.

ADVISING INFORMATION
Intent to pursue the certificate should be discussed with the academic advisor for Dance, Nadine Niforos via email at nniforos@usf.edu or 813-974-1739.

The Office of Undergraduate Studies (UGS) works in partnership with the academic colleges in the development, review, and enhancement of the undergraduate programs to assist faculty to provide outstanding undergraduate education for students. The members of the UGS team work with faculty to establish and administer academic policies, assist with undergraduate curriculum development and review, and support proposals for new and revised programs and courses through the various approval processes. In addition to assisting with the academic programs offered by the colleges, Undergraduate Studies offers a number of academic programs.

Undergraduate Studies provides strong set of student success focused departments and initiatives designed to make it more likely that students will successfully navigate the complexities of the transition to college and the Baccalaureate experience. It integrates academic endeavors with meaningful experiences within myriad student development programs. Together, they aim to provide coordinated opportunities for students to develop their identities and intellectual competencies for successful careers and lifelong learning.

Physical Location: Student Services building (SVC) located in the center of the USF campus.

About Undergraduate Studies

The Office of Undergraduate Studies (UGS) works in partnership with the academic colleges in the development, review and enhancement of the undergraduate programs to assist faculty to provide outstanding undergraduate education for students. The members of the UGS team work with faculty to establish and administer academic policies, assist with undergraduate curriculum development and review, and support proposals for new and revised programs and courses through the various approval processes. In addition to assisting with the academic programs offered by the colleges, Undergraduate Studies offers a number of academic programs.

Undergraduate Studies provides strong set of student success focused departments and initiatives designed to make it more likely that students will successfully navigate the complexities of the transition to college and the baccalaureate experience. It integrates academic endeavors with meaningful experiences within myriad student development programs. Together, they aim to provide coordinated opportunities for students to develop their identities and intellectual competencies for successful careers and lifelong learning.

Mission, Vision, Values

Our goal is to help ensure that students graduate from the University of South Florida with a world-class education, in a timely fashion, confident in the skills and knowledge they need to succeed in their post-baccalaureate careers, and with the conviction that enrolling at USF was the best decision of their lives. All departments within Undergraduate Studies (UGS) are focused squarely on helping USF meet its Strategic Plan goals.

Undergraduate Studies shares these key values with the greater University of South Florida community:

- High-quality education and excellence in teaching and learning
- Diversity of students, faculty, and staff
- Affordable and accessible education
- Community engagement and public service
- Focus and discipline in aligning the budget with institutional priorities
- A campus life with broad academic, cultural, and athletic opportunities
- Success and achievement of its students, faculty, staff, and alumni
- Collegiality, academic freedom, and professional responsibility
- Efficiency and transparent accountability
Academic Programs Overview

Uniquely positioned in the Office of Undergraduate Studies, the Academic Programs unit consists of a highly specialized team working together to empower students in educational transition for life-long success through individualized advising and meaningful academic experiences. Academic Programs oversees two-degree completion programs (the Bachelor of General Studies (BGS) and the Bachelor of Science in Applied Science (BSAS)), the Exploratory Curriculum Track (ECM), four undergraduate studies minors and two courses (Academic Foundations and Academic Transitions). This team is responsible for certifying undergraduate studies minors and bachelor degrees, developing corporate partnership programs for the local community, offering specialized Academic Advising services to students, and certifying AA certificates.

Undergraduate Studies Academic Programs Mission Statement

The mission of UGS Academics is to empower students in educational transition for life-long success through individualized advising and meaningful academic experiences.

Baccalaureate-Level Degree Programs

Bachelor of General Studies

The Bachelor of General Studies is a degree completion program that provides nontraditional students options for completing their educational goals. USF’s Bachelor of General Studies Degree (B.G.S.) is a customized, interdisciplinary degree that allows students to choose an academic program that fits their educational and professional goals.

Students pursuing a Bachelor of General Studies degree are restricted from declaring a minor, due to USF’s degree progression policy.

Students pursuing a Bachelor of General Studies degree are restricted from declaring a minor, due to USF’s degree progression policy. Students may not pursue the Bachelor of General Studies as a second major, co-degree (concurrent degree), dual degree, or second or post-baccalaureate degree. Baccalaureate degree holders who wish to pursue further education are encouraged to pursue admission into a graduate degree program of study.

The following concentrations are available for the B.G.S. degree:

- Aging Sciences
- Behavioral Healthcare
- Business
- Computer Systems Technology
- Criminal Justice
- Educational Foundations
- Environmental Policy
- Information Architecture: Information Studies
- Leadership Studies
- Public Administration
- Public Health
- Urban Studies
- Women's Studies

Bachelor of General Studies (BGS) Admission Requirements

https://www.usf.edu/undergrad/programs/bgs/application.aspx

To be admitted into the Bachelor of General Studies (BGS) program, applicants must:

- Have earned 60 or more credits at institutions accredited by either the Higher Learning Commission, the Middle States Commission on Higher Education, the New England Commission of Higher Education, the Northwest Commission on Colleges and Universities, the Southern Association of Colleges and Schools Commission on Colleges, or the WASC Senior College and University Commission.
- Have a gap in education of three years or more.
- Complete a screening process conducted by an Academic Advisor.
- Be in good standing with most recent former educational institution.
- Demonstrate ability and desire to complete the degree (personal statement).
Be a mature, post traditional student with extensive work experience.  
Meet USF general admissions standards for transfer students (2.3 GPA is required for out of state transfer students).  
Be pursuing first bachelor’s degree (General Studies is not an option for students seeking a second bachelor degree).

Bachelor of Science in Applied Science (B.S.A.S)

The B.S.A.S. degree program designed specifically for Associate in Science (A.S.) degree graduates from a Florida public community or state college. The B.S.A.S. degree is designed to serve Florida’s A.S. graduates who desire a bachelor’s degree for self-enrichment, advancement in their current career or to qualify for higher-level employment in other settings. A.S. graduates looking for a flexible Bachelor's degree program will find the BSAS degree recognizes the value of academic work already completed. Most students can complete their concentrations and exit requirements within an additional 60 credit hours.

USF will award up to 60 transfer credits from the A.S. degree (applicable only to the BSAS program). Up to 42 hours of technical coursework may be eligible for transfer into the B.S.A.S. program. The remaining 18 credit hours of transferable General Education coursework from the A.S. will be matched against USF requirements to determine which courses remain outstanding for the fulfillment of the University’s 36 credit hour General Education requirements.

Students may not pursue the Bachelor of Sciences in Applied Science (B.S.A.S.) as a second major, co-degree (concurrent degree), dual degree, or second or post-baccalaureate degree. Students that have earned a Bachelor degree from USF or other institutions who wish to pursue further education are encouraged to pursue admission into a graduate degree program of study or contact the college associated with the bachelor degree program of their choice.

The following concentrations are available for the B.S.A.S. degree:

Aging Sciences  
Behavioral Healthcare  
Computer Systems Technology  
Criminal Justice  
Environmental Policy  
Information Architecture: Information Studies  
Leadership Studies  
Public Administration  
Public Health  
Urban Studies

Bachelor of Science in Applied Science (B.S.A.S) Admission Requirements

Students admitted to the BSAS must have a completed A.S. degree from a public Florida community or state college and will have completed a minimum of 18 credit hours of transferable General Education coursework, which should include writing and math courses that meet Gordon Rule requirements.

A completed Associate of Science (A.S.) degree from a Florida public community or state college.  
At least 18 credit hours of transferrable general education coursework.  
Successful completion of ENC 1101 or equivalent English composition courses.  
Successful completion of at least one college-level math or quantitative reasoning.**

** MAT 1033 is not considered college-level math.

NOTE: To be admitted students must have a transcript that indicates completion of the A.S. degree. Keiser University AS degrees are also accepted (as long as criteria above has been met).

Exploratory Curriculum Track
The Exploratory Curriculum Track (ECM) allows USF students to register for up to 36 credit hours before they must officially declare a major. During this time they will focus on satisfying the 2019-2020 State and USF General Education requirements, which are needed for any major at USF. These courses are a great way to learn about career fields and academic disciplines that students may not be familiar with yet.

The cornerstone of the Exploratory Curriculum (ECM) track is the customized student success course entitled U-Decide, a first-year experience course with a significant major/career exploration component (offered as either SLS 2901 - Academic Foundations Seminar or IDS 2378 - Critical Thinking: Foundations of Interdisciplinary Knowledge and Inquiry). The goal of the course and the entire Exploratory Curriculum experience is to equip students with the ability to make decisions regarding their future. The economic and career landscape is always changing, and this new generation of students needs to be able to adapt at a much higher rate than previous generations.

PROGRAM REQUIREMENTS
The only program requirement for the Exploratory Curriculum (ECM) is the registration and completion of the mandatory U-Decide course during a student's first Fall or Spring semester (offered as either SLS 2901 - Academic Foundations Seminar or IDS 2378 - Critical Thinking: Foundations of Interdisciplinary Knowledge and Inquiry). The course is not offered during any Summer semesters.

PROGRAM ADMISSION INFORMATION
To be admitted to the Exploratory Curriculum (ECM), a student should be at or below 36 college credits at the time of orientation. If a student is in AP, IB, Dual Enrollment, AICE or any other college credit accruing program in high school, please reach out to the Exploratory advisor for further options. You can reach the ECM advisor at ECMadvise@usf.edu.

Minors
Aerospace Studies
https://www.usf.edu/undergrad/programs/minors/aerospace-studies.aspx
This program will provide the student an understanding of management and leadership concepts as they relate to military officers.

Leadership Studies
The program has a unique approach to leadership education that combines practical theories and opportunities for students to study the characteristics of authority, leadership, social and role dynamics, political processes and the values that orient their careers.
Military Leadership  
[https://www.usf.edu/undergrad/programs/minors/military-science.aspx](https://www.usf.edu/undergrad/programs/minors/military-science.aspx)  
This minor lays out a leadership framework that allows students to apply leadership concepts learned in the classroom.

Naval Science and Leadership  
The minor lays out a framework by which the Navy and Marine Corps conduct routine operations and planning and it also provides a foundation in design theory with a practical application to naval platforms and weapon systems.

**Associate of Arts**  
[https://www.usf.edu/undergrad/programs/aa-degree.aspx](https://www.usf.edu/undergrad/programs/aa-degree.aspx)  
Students must apply for the Associate of Arts (AA) it is not automatically awarded. Students can apply for the AA by going to their OASIS account and clicking the "Student Tab" prior to the application deadline. The deadline to apply for a degree/certificate in each semester is stated in the Academic Calendar in the catalog. Applying for and receiving the AA does not prevent a student from continuing in their major.  
To receive the Associate of Arts at USF, a student must:  

- Complete 60 semester hours of university credit; at least 20 of the last 30 semester hours counted, or 36 hours overall, must be completed in residence at the home institution of USF. Physical education and military science credits do not count within the 60 semester hours toward the Associate of Arts.  
- Achieve a minimum grade point average of 2.00 based on work attempted at USF. In addition, a transfer student must have a GPA of 2.00 or higher when combined with transfer work accepted and evaluated by the USF Office of Admissions.  
- Complete the General Education Requirements.  
- Meet the Foreign Language Entrance Requirement (FLENT).  
- Fulfill the State Communication and Computation requirements.

**Undergraduate Advising Information**

4202 E. Fowler Avenue, SVC 2002  
Tampa, FL 33612  
(813) 974-4051

Please be sure to contact/schedule appointments with your specific USF college advisor. Questions related to your specific major should be directed to the appropriate advising contacts. The Undergraduate Studies Advisors specialize in the BSAS and BGS degrees, and cannot advise on other majors.

To schedule an advising appointment:

- Prospective or current students with an active UID can schedule an appointment online:  
- Prospective students who have not yet applied or students who are inactive (e.g., dismissed or not enrolled for 3 consecutive terms) should contact the appropriate advising location in their intended major:  
  [https://www.usf.edu/undergrad/students/advising.aspx](https://www.usf.edu/undergrad/students/advising.aspx)
APPLIED SCIENCE B.S.A.S., WITH AGING SCIENCES CONCENTRATION

TOTAL DEGREE HOURS: 120

Workforce projections for the 21st Century indicate there will be an ongoing need for people with specific skills and abilities to fill Florida's growing number of specialized, scientific, industrial and technological positions. Florida's two-year colleges offer many exceptional programs that meet these demands through their Associate in Science (A.S.) degrees. Although these applied and technical degrees provide excellent preparation for students seeking jobs that require specific knowledge, skills and abilities, they have not generally transferred very efficiently into four-year bachelor's degree programs. The Bachelor of Science in Applied Science has been developed by USF under certain provisions of Florida legislation to remove constraints from the transfer process, recognize some past coursework as transferable credit to the university, and afford exciting new opportunities for those with an A.S. degree from a Florida public state or community college to pursue and acquire a distinctive bachelor's degree from the University of South Florida.

Students may not pursue the Bachelor of Sciences in Applied Science (B.S.A.S.) as a second major, co-degree (concurrence degree), dual degree, or second or post-baccalaureate degree. Students that have earned a Bachelor degree from USF or other institutions who wish to pursue further education are encouraged to pursue admission into a graduate degree program of study or contact the college associated with the bachelor degree program of their choice.

UNIVERSITY ADMISSIONS

Admission to the University is based on the University's Undergraduate Admission Requirements that may be found by clicking on the following URLs:

- Freshman: https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx
- Transfer: https://www.usf.edu/admissions/transfer/admission-information/index.aspx
- International: https://www.usf.edu/admissions/international/admission-information/index.aspx

GRADUATION REQUIREMENTS

Satisfactory completion of the following requirements:

- General Education Program (36 credit hours), including State Core General Education, State Computation and State Communication;
- Minimum of 120 unduplicated credit hours;
- A minimum adjusted grade point average (GPA) of 2.0 on all coursework taken at USF and an overall 2.0 GPA average on all college-level coursework;
- Major and college requirements in a chosen degree program;
- Nine credit hours of coursework taken during the summer term(s) (if entered USF with less than 60 credit hours);
- Registration and successful completion of at least thirty (30) of the last sixty (60) credit hours;
- 42 credit hours of upper-level coursework;
- Civics Literacy;
- Foreign language admissions coursework.

STATE MANDATED COMMON COURSE PREREQUISITES

There are no State Mandated Common Prerequisites for this degree program.

Students wishing to transfer to USF must complete an A.S. degree (from a Florida public state or community college) with a minimum overall 2.0 GPA in all college-level courses accepted for transfer credit to USF, with no grade lower than C-. Students should complete at least 18 credit hours of the general education requirements as part of their A.S. degree, which should include the State Communication Requirement and State Computation Requirement courses to fulfill these requirements while at the community or state college. Students must complete ENC 1101 and at least one college-level math course to be admitted into the Applied Science program.
USF will award up to 60 transfer credits from the A.S. degree (applicable only to the B.S.A.S. program). Up to 42 hours of technical coursework may be eligible for transfer into the B.S.A.S. program. The remaining 18 credit hours of transferable General Education coursework from the A.S. will be matched against USF requirements to determine which courses remain outstanding for the fulfillment of the University's 36 credit hour General Education requirements.

REQUIRED COURSES: (3 CREDIT HOURS)

MAJOR CORE COURSE: 1 COURSE; 3 CREDIT HOURS

IDS 4934 - Senior Capstone for BSAS/BGS Credit(s): 3

MAJOR (RESTRICTED) ELECTIVES: (21 CREDIT HOURS)

Students complete an Applied Science program of study and one concentration in: Aging Sciences; Behavioral Healthcare; Computer Systems Technology; Criminal Justice; Environmental Policy; Information Studies: Information Architecture; Leadership Studies; Public Administration; Public Health; or Urban Studies.

AGING SCIENCES CONCENTRATION: 7 COURSES; 21 CREDIT HOURS

CONCENTRATION CORE: 4 COURSES; 12 CREDIT HOURS

- GEY 2000 - Introduction to Aging Sciences Credit(s): 3
- GEY 3601 - Physical Changes and Aging Credit(s): 3
- GEY 3625 - Sociological Aspects of Aging Credit(s): 3
- GEY 4612 - Psychology of Aging Credit(s): 3

CONCENTRATION RESTRICTED ELECTIVES: 3 COURSES; 9 CREDIT HOURS

Select three courses from the following list:

- GEY 3503 - Administration of Assisted Living Facilities Credit(s): 3
- GEY 4101 - Aging in Special Populations Credit(s): 3
- GEY 4102 - Aging in Modern Literature and Film Credit(s): 3
- GEY 4231 - Elder Abuse and Neglect Credit(s): 3
- GEY 4232 - Care Management for Older Adults Credit(s): 3
- GEY 4360 - Counseling for Older Adults Credit(s): 3
- GEY 4608 - Alzheimer's Disease Management Credit(s): 3
- GEY 4628 - Health, Ethnicity, and Aging Credit(s): 3
- GEY 4635 - Business Management in an Aging Society Credit(s): 3
- GEY 4641 - Death and Dying Credit(s): 3
- GEY 4647 - Ethical and Legal Issues in Aging Credit(s): 3
- GEY 4690 - Senior Seminar in Aging Credit(s): 3

APPLIED SCIENCE B.S.A.S. - ADDITIONAL INFORMATION

GPA REQUIREMENTS

A minimum adjusted grade point average (GPA) of 2.0 on all coursework taken at USF. An overall 2.0 GPA average on all college-level coursework.

GRADING REQUIREMENTS

A minimum grade of C- or better must be earned in each concentration course.

RESEARCH OPPORTUNITIES
All undergraduate students in any degree program can participate in undergraduate research. There are a number of options to receive academic credit for a mentored research experience and to have the experience show on the official transcript. Students who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 2912, IDS 4914 or IDH 4910 courses. These courses will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research will assist students in understanding the various course options.

Applied Science B.S.A.S., With Behavioral Healthcare Concentration

Total Degree Hours: 120

Workforce projections for the 21st Century indicate there will be an ongoing need for people with specific skills and abilities to fill Florida's growing number of specialized, scientific, industrial and technological positions. Florida's two-year colleges offer many exceptional programs that meet these demands through their Associate in Science (A.S.) degrees. Although these applied and technical degrees provide excellent preparation for students seeking jobs that require specific knowledge, skills and abilities, they have not generally transferred very efficiently into four-year bachelor's degree programs. The Bachelor of Science in Applied Science has been developed by USF under certain provisions of Florida legislation to remove constraints from the transfer process, recognize some past coursework as transferable credit to the university, and afford exciting new opportunities for those with an A.S. degree from a Florida public state or community college to pursue and acquire a distinctive bachelor's degree from the University of South Florida.

Students may not pursue the Bachelor of Sciences in Applied Science (B.S.A.S.) as a second major, co-degree (concurrent degree), dual degree, or second or post-baccalaureate degree. Students that have earned a Bachelor degree from USF or other institutions who wish to pursue further education are encouraged to pursue admission into a graduate degree program of study or contact the college associated with the bachelor degree program of their choice.

University Admissions

Admission to the University is based on the University's Undergraduate Admission Requirements that may be found by clicking on the following URLs:

- Freshman: https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx
- Transfer: https://www.usf.edu/admissions/transfer/admission-information/index.aspx
- International: https://www.usf.edu/admissions/international/admission-information/index.aspx

Graduation Requirements

Satisfactory completion of the following requirements:

General Education Program (36 credit hours), including State Core General Education, State Computation and State Communication;

- Minimum of 120 unduplicated credit hours;
- A minimum adjusted grade point average (GPA) of 2.0 on all coursework taken at USF and an overall 2.0 GPA average on all college-level coursework;
- Major and college requirements in a chosen degree program;
- Nine credit hours of coursework taken during the summer term(s) (if entered USF with less than 60 credit hours);
- Registration and successful completion of at least thirty (30) of the last sixty (60) credit hours;
- 42 credit hours of upper-level coursework;
- Civics Literacy;
- Foreign language admissions coursework.

State Mandated Common Course Prerequisites

There are no State Mandated Common Prerequisites for this degree program.

Students wishing to transfer to USF must complete an A.S. degree (from a Florida public state or community college) with a minimum overall 2.0 GPA in all college-level courses accepted for transfer credit to USF, with no grade lower than C-. Students should complete at least 18 credit hours of the general education requirements as part of their A.S. degree, which should include the State Communication Requirement and State Computation Requirement courses to fulfill these requirements while at the community or state college. Students must complete ENC 1101 and at least one college-level math course to be admitted into the Applied Science program.
USF will award up to 60 transfer credits from the A.S. degree (applicable only to the B.S.A.S. program). Up to 42 hours of technical coursework may be eligible for transfer into the B.S.A.S. program. The remaining 18 credit hours of transferable General Education coursework from the A.S. will be matched against USF requirements to determine which courses remain outstanding for the fulfillment of the University’s 36 credit hour General Education requirements.

REQUIRED COURSES: (3 CREDIT HOURS)

MAJOR CORE COURSE: 1 COURSE; 3 CREDIT HOURS

IDS 4934 - Senior Capstone for BSAS/BGS Credit(s): 3

MAJOR (RESTRICTED) ELECTIVES: (21 CREDIT HOURS)

Students complete an Applied Science program of study and one concentration in: Aging Sciences; Behavioral Healthcare; Computer Systems Technology; Criminal Justice; Environmental Policy; Information Studies: Information Architecture; Leadership Studies; Public Administration; Public Health; or Urban Studies.

BEHAVIORAL HEALTHCARE CONCENTRATION: 7 COURSES; 21 CREDIT HOURS

CONCENTRATION CORE: 6 COURSES; 18 CREDIT HOURS

*MHS 3411 should be taken during student's first semester of concentration coursework; a minimum grade of "B" is required.

**MHS 4022 (for students with an interest in working with adults), MHS 4490 (for students with an interest in working with children).

- MHS 3411 - Multidisciplinary Behavioral Healthcare Services Credit(s): 3 *
- MHS 4002 - Behavioral Health Systems Delivery Credit(s): 3
- MHS 4022 - Adult Psychopathology in the Community Credit(s): 3 **
- or MHS 4490 - Behavioral Healthcare Issues for Children Credit(s): 3 **

Florida's two-year colleges offer many exceptional programs that meet these demands through their Associate in Science (A.S.) degrees. Although these applied and technical degrees provide excellent preparation for students seeking jobs that require specific knowledge, skills and abilities, they have not generally transferred very efficiently into four-year bachelor's degree programs. The Bachelor of Science in Applied Science has been developed by USF under certain provisions of Florida legislation to remove constraints from the transfer process, recognize some past coursework as transferable credit to the university, and afford exciting new opportunities for those with an A.S. degree from a Florida public state or community college to pursue and acquire a distinctive bachelor's degree from the University of South Florida.

Students may not pursue the Bachelor of Sciences in Applied Science (B.S.A.S.) as a second major, co-degree (concurrent degree), dual degree, or second or post-baccalaureate degree. Students that have earned a Bachelor degree from USF or other institutions who wish to pursue further education are encouraged to pursue admission into a graduate degree program of study or contact the college associated with the bachelor degree program of their choice.

UNIVERSITY ADMISSIONS

Admission to the University is based on the University's Undergraduate Admission Requirements that may be found by clicking on the following URLs:

- **Freshman**: https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx
- **Transfer**: https://www.usf.edu/admissions/transfer/admission-information/index.aspx
- **International**: https://www.usf.edu/admissions/international/admission-information/index.aspx

GRADUATION REQUIREMENTS

Satisfactory completion of the following requirements:

- General Education Program (36 credit hours), including State Core General Education, State Computation and State Communication;
- Minimum of 120 unduplicated credit hours;
- A minimum adjusted grade point average (GPA) of 2.0 on all coursework taken at USF and an overall 2.0 GPA average on all college-level coursework;
- Major and college requirements in a chosen degree program;
- Nine credit hours of coursework taken during the summer term(s) (if entered USF with less than 60 credit hours);
- Registration and successful completion of at least thirty (30) of the last sixty (60) credit hours;
- 42 credit hours of upper-level coursework;
- Civics Literacy;
- Foreign language admissions coursework.

STATE MANDATED COMMON COURSE PREREQUISITES

There are no State Mandated Common Prerequisites for this degree program.

Students wishing to transfer to USF must complete an A.S. degree (from a Florida public state or community college) with a minimum overall 2.0 GPA in all college-level courses accepted for transfer credit to USF, with no grade lower than C-. Students should complete at least 18 credit hours of the general education requirements as part of their A.S. degree, which should include the State Communication Requirement and State Computation Requirement courses to fulfill these requirements while at the community or state college. Students must complete ENC 1101 and at least one college-level math course to be admitted into the Applied Science program.
USF will award up to 60 transfer credits from the A.S. degree (applicable only to the B.S.A.S. program). Up to 42 hours of technical coursework may be eligible for transfer into the B.S.A.S. program. The remaining 18 credit hours of transferable General Education coursework from the A.S. will be matched against USF requirements to determine which courses remain outstanding for the fulfillment of the University's 36 credit hour General Education requirements.

**REQUIRED COURSES: (3 CREDIT HOURS)**

**MAJOR CORE COURSE: 1 COURSE; 3 CREDIT HOURS**

IDS 4934 - Senior Capstone for BSAS/BGS Credit(s): 3

**MAJOR (RESTRICTED) ELECTIVES: (21 CREDIT HOURS)**

Students complete an Applied Science program of study and one concentration in: Aging Sciences; Behavioral Healthcare; Computer Systems Technology; Criminal Justice; Environmental Policy; Information Studies: Information Architecture; Leadership Studies; Public Administration; Public Health; or Urban Studies.

**INFORMATION STUDIES: INFORMATION ARCHITECTURE CONCENTRATION: 7 COURSES; 21 CREDIT HOURS**

**CONCENTRATION CORE: 6 COURSES; 18 CREDIT HOURS**

LIS 3261 - Introduction to Information Science Credit(s): 3  
LIS 3353 - IT Concepts for Information Professionals Credit(s): 3  
LIS 3783 - Information Architecture Credit(s): 3  
LIS 3361 - World Wide Web Page Design and Management Credit(s): 3  
LIS 3352 - Interaction Design Credit(s): 3  
LIS 4365 - Web Design Technologies Credit(s): 3

**CONCENTRATION RESTRICTED ELECTIVES: 1 COURSE; 3 CREDIT HOURS**

Select one course from the following list:

CEN 3722 - Human Computer Interfaces for Information Technology Credit(s): 3  
CGS 3847 - Portal Development and E-Commerce Credit(s): 3  
CIS 3360 - Principles of Information Security Credit(s): 3  
CIS 3367 - Architecting Operating System Security Credit(s): 3  
CIS 3932 - Special Topics for Information Technology Credit(s): 1-3  
CIS 4204 - Ethical Hacking Credit(s): 3  
CIS 4253 - Ethics for Information Technology Credit(s): 3  
CIS 4361 - Information Assurance and Security Management for IT Credit(s): 3  
CIS 4365 - Computer Security Policies and Disaster Preparedness Credit(s): 3  
CIS 4368 - Database Security and Audits Credit(s): 3  
CIS 4412 - Resource Management for IT Credit(s): 3  
CIS 4510 - IT Project Management Credit(s): 3  
CIS 4932 - Special Topics for Information Technology Credit(s): 1-3  
CIS 4935 - Senior Project in Information Technology Credit(s): 4  
COP 3931 - Special Topics for Information Technology Credit(s): 1-3  
COP 4834 - Data-Driven Web Sites Credit(s): 3  
COP 4931 - Special Topics for Information Technology Credit(s): 3
APPLIED SCIENCE B.S.A.S. - ADDITIONAL INFORMATION

GPA REQUIREMENTS

A minimum adjusted grade point average (GPA) of 2.0 on all coursework taken at USF.
An overall 2.0 GPA average on all college-level coursework.

GRADING REQUIREMENTS

A minimum grade of C- or better must be earned in each concentration course.

RESEARCH OPPORTUNITIES

All undergraduate students in any degree program can participate in undergraduate research. There are a number of options to receive academic credit for a mentored research experience and to have the experience show on the official transcript. Students who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 2912, IDS 4914 or IDH 4910 courses. These courses will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research will assist students in understanding the various course options.

There are a number of options to receive academic credit for a mentored research experience and to have the experience show on the official transcript. Students who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 2912, IDS 4914 or IDH 4910 courses. These courses will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research will assist students in understanding the various course options.

- Major Elective: Concentration Credit(s): 3
- IDS 4934 - Senior Capstone for BSAS/BGS Credit(s): 3
- Upper-Level Elective Credit(s): 3
- Upper-Level Elective Credit(s): 3
- Upper-Level Elective Credit(s): 3

Total Credit Hours: 15
APPLIED SCIENCE B.S.A.S., WITH URBAN STUDIES CONCENTRATION

TOTAL DEGREE HOURS: 120

Workforce projections for the 21st Century indicate there will be an ongoing need for people with specific skills and abilities to fill Florida's growing number of specialized, scientific, industrial and technological positions. Florida's two-year colleges offer many exceptional programs that meet these demands through their Associate in Science (A.S.) degrees. Although these applied and technical degrees provide excellent preparation for students seeking jobs that require specific knowledge, skills and abilities, they have not generally transferred very efficiently into four-year bachelor's degree programs. The Bachelor of Science in Applied Science has been developed by USF under certain provisions of Florida legislation to remove constraints from the transfer process, recognize some past coursework as transferable credit to the university, and afford exciting new opportunities for those with an A.S. degree from a Florida public state or community college to pursue and acquire a distinctive bachelor's degree from the University of South Florida.

Students may not pursue the Bachelor of Sciences in Applied Science (B.S.A.S.) as a second major, co-degree (concurrent degree), dual degree, or second or post-baccalaureate degree. Students that have earned a Bachelor degree from USF or other institutions who wish to pursue further education are encouraged to pursue admission into a graduate degree program of study or contact the college associated with the bachelor degree program of their choice.

UNIVERSITY ADMISSIONS

Admission to the University is based on the University's Undergraduate Admission Requirements that may be found by clicking on the following URLs:

- Freshman: https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx
- Transfer: https://www.usf.edu/admissions/transfer/admission-information/index.aspx
- International: https://www.usf.edu/admissions/international/admission-information/index.aspx

GRADUATION REQUIREMENTS

Satisfactory completion of the following requirements:

- General Education Program (36 credit hours), including State Core General Education, State Computation and State Communication;
- Minimum of 120 unduplicated credit hours;
- A minimum adjusted grade point average (GPA) of 2.0 on all coursework taken at USF and an overall 2.0 GPA average on all college-level coursework;
- Major and college requirements in a chosen degree program;
- Nine credit hours of coursework taken during the summer term(s) (if entered USF with less than 60 credit hours);
- Registration and successful completion of at least thirty (30) of the last sixty (60) credit hours;
- 42 credit hours of upper-level coursework;
- Civics Literacy;
- Foreign language admissions coursework.

STATE MANDATED COMMON COURSE PREREQUISITES

There are no State Mandated Common Prerequisites for this degree program.

Students wishing to transfer to USF must complete an A.S. degree (from a Florida public state or community college) with a minimum overall 2.0 GPA in all college-level courses accepted for transfer credit to USF, with no grade lower than C-. Students should complete at least 18 credit hours of the general education requirements as part of their A.S. degree, which should include the State Communication Requirement and State Computation Requirement courses to fulfill these requirements while at the community or state college. Students must complete ENC 1101 and at least one college-level math course to be admitted into the Applied Science program.
USF will award up to 60 transfer credits from the A.S. degree (applicable only to the B.S.A.S. program). Up to 42 hours of technical coursework may be eligible for transfer into the B.S.A.S. program. The remaining 18 credit hours of transferable General Education coursework from the A.S. will be matched against USF requirements to determine which courses remain outstanding for the fulfillment of the University's 36 credit hour General Education requirements.

REQUIRED COURSES: (3 CREDIT HOURS)

MAJOR CORE COURSE: 1 COURSE; 3 CREDIT HOURS

IDS 4934 - Senior Capstone for BSAS/BGS Credit(s): 3

MAJOR (RESTRICTED) ELECTIVES: (21 CREDIT HOURS)

Students complete an Applied Science program of study and one concentration in: Aging Sciences; Behavioral Healthcare; Computer Systems Technology; Criminal Justice; Environmental Policy; Information Studies: Information Architecture; Leadership Studies; Public Administration; Public Health; or Urban Studies.

URBAN STUDIES CONCENTRATION: 7 COURSES; 21 CREDIT HOURS

CONCENTRATION CORE: 2 COURSES; 6 CREDIT HOURS

PAD 3003 - Introduction to Public and Community Service Credit(s): 3
URS 3002 - Introduction to Urban Studies Credit(s): 3

CONCENTRATION PLANNING ELECTIVES: 2 COURSES; 6 CREDIT HOURS

Select two courses from the following list:

URP 4050 - City Planning and Community Development Credit(s): 3
URP 4052 - Urban and Regional Planning Credit(s): 3
URP XXXX an approved URP course or URS XXXX an approved URS course

CONCENTRATION RESTRICTED ELECTIVES: 3 COURSES; 9 CREDIT HOURS

Select three courses from the following list:

AMH 3500 - American Labor History Credit(s): 3
AMS 3700 - Racism in American Society Credit(s): 3
ARC 4784 - The City Credit(s): 3
CCJ 3014 - Crime and Justice in America Credit(s): 3
EVR 2861 - Introduction to Environmental Policy Credit(s): 3
GIS 3006 - Mapping and Geovisualization Credit(s): 3
IDS 4942 - Community Internship Credit(s): 1-4
PAD 4144 - Nonprofit Organizations and Public Policy Credit(s): 3
PAD 4204 - Public Financial Administration Credit(s): 3
PAD 4930 - Selected Topics in Public Administration and Public Policy Credit(s): 3
POS 3142 - Introduction to Urban Politics and Government Credit(s): 3
POS 3182 - Florida Politics and Government Credit(s): 3
SOW 3210 - The American Social Welfare System Credit(s): 3
SPC 3710 - Communication and Cultural Diversity Credit(s): 3
SYD 4410 - Urban Sociology Credit(s): 3
TTE 4003 - Transportation and Society Credit(s): 3
APPLIED SCIENCE B.S.A.S. - ADDITIONAL INFORMATION

GPA REQUIREMENTS

A minimum adjusted grade point average (GPA) of 2.0 on all coursework taken at USF.
An overall 2.0 GPA average on all college-level coursework.

GRADING REQUIREMENTS

A minimum grade of C- or better must be earned in each concentration course.

RESEARCH OPPORTUNITIES

All undergraduate students in any degree program can participate in undergraduate research. There are a number of options to receive academic credit for a mentored research experience and to have the experience show on the official transcript. Students who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 2912, IDS 4914 or IDH 4910 courses. These courses will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research will assist students in understanding the various course options.

- Upper-Level Elective Credit(s): 3
- Upper-Level Elective Credit(s): 3

Total Credit Hours: 15
EXPLORATORY CURRICULUM: ARTS & HUMANITIES PATHWAY

TOTAL DEGREE HOURS: 36

The Exploratory Curriculum (ECM) allows USF students to register for up to 36 credit hours before they must officially declare a major. During this time, they will focus on satisfying the State and USF General Education requirements, which are needed for any major at USF. These courses are a great way to learn about career fields and academic disciplines that students may not be familiar with yet.

The cornerstone of the Exploratory Curriculum (ECM) is the customized student success course entitled U-Decide, a first-year experience course with a significant major/career exploration component (offered as IDS 2378 - Critical Thinking: Foundations of Interdisciplinary Knowledge and Inquiry). The goal of the course and the Exploratory Curriculum experience is to equip students with the ability to make decisions regarding their future. The economic and career landscape is always changing, and this new generation of students needs to be able to adapt at a much higher rate than previous generations.

Disclaimer: The Exploratory program is not a major from which you can graduate. During the program, a student will focus on satisfying the Enhanced General Education (Gen Ed.) requirements, which are needed for any major at USF. These courses are a great way to learn about career fields and academic disciplines that you may not be familiar with yet while staying on path for a timely graduation.

STATE MANDATED COMMON COURSE PREREQUISITES

There are no specified common prerequisites for this major. All Florida College System students are encouraged to complete the Associate of Arts degree. Students should consult with an academic advisor in their major degree area at the intended transfer institution.

The following is language approved by those colleges with BAS degree programs: Admission to Bachelor of Applied Science (B.A.S.) degree programs usually requires an Associate in Science (A.S.) or Associate in Applied Science (A.A.S.) degree in a related area. If a student has earned an Associate in Arts (A.A.) degree, or an A.S. degree, an A.A.S. degree, or its equivalent in an unrelated area, the student may be admitted on a case-by-case basis with approval of the appropriate academic administrator. Some majors may have licensure or other types of requirements prior to admittance. Due to the variance in specialized B.A.S. degree programs and concentrations, students are strongly encouraged to consult with an academic advisor at the B.A.S degree-granting institution.

PROGRAM ADMISSION INFORMATION

To be admitted to the Exploratory Curriculum (ECM), a student should be at or below 36 college credits at the time of orientation. If a student is in AP, IB, Dual Enrollment, AICE or any other college credit accruing program in high school, please reach out to the Exploratory advisor for further options. You can reach the ECM advisor at ECMAdvise@usf.edu.

EXPLORATORY CURRICULUM PATHWAYS

- Math, Engineering & Technology
- Business
- Arts & Humanities
- Health & Natural Sciences
- Global & Social Sciences

REQUIRED COURSE FOR THE PATHWAY PROGRAMS: 3 HOURS

The only program requirement for the Exploratory Curriculum (ECM) is the registration and completion of the mandatory U-Decide course during a student's first Fall or Spring semester (offered as IDS 2378 - Critical Thinking: Foundations of Interdisciplinary Knowledge and Inquiry). The course is not offered during any Summer semesters.

IDS 2378 - Critical Thinking: Foundations of Interdisciplinary Knowledge and Inquiry Credit(s): 3
This Pathway is designed for students interested in learning more about Communication-based careers such as Advertising, PR, Journalism, and social media. Students interested in learning how to use an English major to achieve high paying jobs will benefit from this Pathway, as well as, those interested in a global career such as World Languages and Cultures, Art History, or Studio Art. Students wanting to learn more about the Accelerated Master program in Architecture can use this Pathway as a foundation. Finally, this Pathway is recommended for those awaiting entry into an Art major based on an audition in Music or Dance.

Students from this Pathway often go into any of the following majors:

<table>
<thead>
<tr>
<th>Architecture</th>
<th>Classics</th>
<th>Humanities</th>
<th>Philosophy</th>
</tr>
</thead>
<tbody>
<tr>
<td>Art Studio</td>
<td>Communication</td>
<td>History</td>
<td>Religious Studies</td>
</tr>
<tr>
<td>Art History</td>
<td>Dance</td>
<td>Mass Communications</td>
<td>Theatre</td>
</tr>
<tr>
<td>American Studies</td>
<td>English</td>
<td>Music</td>
<td>World Languages</td>
</tr>
</tbody>
</table>

THE FOLLOWING COURSES ARE SUGGESTED FOR THIS ECM PATHWAY.

ENC 1101 - Composition I Credit(s): 3
SYG 2000 - Introduction to Sociology Credit(s): 3
MAC 1105 - College Algebra Credit(s): 3 for Architecture
LIT 2000 - Introduction to Literature Credit(s): 3
ART 2201C - Concepts and Practices I Credit(s): 3
or
DAN 2100 - Understanding the Dance Experience Credit(s): 3
REL 2300 - Introduction to World Religions Credit(s): 3
ARH 2050 - History of Visual Arts I Credit(s): 3
MMC 3602 - Mass Communications and Society Credit(s): 3

ARTS & HUMANITIES PATHWAY ELECTIVES

MGF 1106 - Finite Mathematics Credit(s): 3
MGF 1107 - Mathematics for Liberal Arts Credit(s): 3
AST 2002 - Descriptive Astronomy Credit(s): 3

EXPLORATORY CURRICULUM - ADDITIONAL INFORMATION

RESEARCH OPPORTUNITIES

Undergraduate students in any degree program are able to participate in undergraduate research. Several options exist to show mentored undergraduate research activity on a student's official transcript. Those who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 4914 course. This course will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research is able to assist with further inquiries.

REQUIRED COURSE FOR THE PATHWAY PROGRAMS: 3 HOURS

The only program requirement for the Exploratory Curriculum (ECM) is the registration and completion of the mandatory U-Decide course during a student's first Fall or Spring semester (offered as IDS 2378 - Critical Thinking: Foundations of Interdisciplinary Knowledge and Inquiry). The course is not offered during any Summer semesters.

IDS 2378 - Critical Thinking: Foundations of Interdisciplinary Knowledge and Inquiry Credit(s): 3
GLOBAL & SOCIAL SCIENCES PATHWAY

This Pathway is designed for students who are interested in theories and human interactions. This Pathway is also designed for students who want a career based on helping others or who want to tackle modern social justice issues. This Pathway includes a variety of majors such as Psychology, Political Science, Criminology, International Studies, Social Work, and Women's Studies.

Students from this Pathway often go into the following majors:

<table>
<thead>
<tr>
<th>Africana Studies</th>
<th>Education</th>
<th>Social Sciences</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aging Sciences</td>
<td>Geography</td>
<td>Social Work</td>
</tr>
<tr>
<td>Anthropology</td>
<td>International Studies</td>
<td>Sociology</td>
</tr>
<tr>
<td>Behavioral Healthcare</td>
<td>Political Science</td>
<td>Women's Studies</td>
</tr>
<tr>
<td>Criminology</td>
<td>Psychology</td>
<td></td>
</tr>
</tbody>
</table>

THE FOLLOWING COURSES ARE SUGGESTED FOR THIS ECM PATHWAY.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSY 2012</td>
<td>Introduction to Psychological Science</td>
<td>3</td>
</tr>
<tr>
<td>PHI 1600</td>
<td>Introduction to Ethics</td>
<td>3</td>
</tr>
<tr>
<td>STA 2023</td>
<td>Introductory Statistics I</td>
<td>3</td>
</tr>
<tr>
<td>GEY 2000</td>
<td>Introduction to Aging Sciences</td>
<td>3</td>
</tr>
<tr>
<td>EDF 3514</td>
<td>History of Education in the United States</td>
<td>3</td>
</tr>
<tr>
<td>WST 3015</td>
<td>Introduction to Women's Studies</td>
<td>3</td>
</tr>
<tr>
<td>ENC 1101</td>
<td>Composition I</td>
<td>3</td>
</tr>
<tr>
<td>CCJ 3024</td>
<td>Survey of the Criminal Justice System</td>
<td>3</td>
</tr>
</tbody>
</table>

GLOBAL & SOCIAL SCIENCES PATHWAY ELECTIVES

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BSC 1005</td>
<td>Biological Principles for Non-Majors</td>
<td>3</td>
</tr>
<tr>
<td>PHI 2010</td>
<td>Introduction to Philosophy</td>
<td>3</td>
</tr>
<tr>
<td>MGF 1107</td>
<td>Mathematics for Liberal Arts</td>
<td>3</td>
</tr>
</tbody>
</table>

EXPLORATORY CURRICULUM - ADDITIONAL INFORMATION

RESEARCH OPPORTUNITIES

Undergraduate students in any degree program are able to participate in undergraduate research. Several options exist to show mentored undergraduate research activity on a student's official transcript. Those who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 4914 course. This course will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research is able to assist with further inquiries.

ACCREDITATION INFORMATION

The University of South Florida (USF) is accredited by the Southern Association of Colleges and Schools' Commission on Colleges.

</table>

Total Credit Hours: 6

## EXPLORATORY CURRICULUM: HEALTH & NATURAL SCIENCES PATHWAY
The Exploratory Curriculum (ECM) allows USF students to register for up to 36 credit hours before they must officially declare a major. During this time, they will focus on satisfying the State and USF General Education requirements, which are needed for any major at USF. These courses are a great way to learn about career fields and academic disciplines that students may not be familiar with yet.

The cornerstone of the Exploratory Curriculum (ECM) is the customized student success course entitled U-Decide, a first-year experience course with a significant major/career exploration component (offered as IDS 2378 - Critical Thinking: Foundations of Interdisciplinary Knowledge and Inquiry). The goal of the course and the Exploratory Curriculum experience is to equip students with the ability to make decisions regarding their future. The economic and career landscape is always changing, and this new generation of students needs to be able to adapt at a much higher rate than previous generations.

Disclaimer: The Exploratory program is not a major from which you can graduate. During the program, a student will focus on satisfying the Enhanced General Education (Gen Ed.) requirements, which are needed for any major at USF. These courses are a great way to learn about career fields and academic disciplines that you may not be familiar with yet while staying on path for a timely graduation.

STATE MANDATED COMMON COURSE PREREQUISITES

There are no specified common prerequisites for this major. All Florida College System students are encouraged to complete the Associate of Arts degree. Students should consult with an academic advisor in their major degree area at the intended transfer institution.

The following is language approved by those colleges with BAS degree programs: Admission to Bachelor of Applied Science (B.A.S.) degree programs usually requires an Associate in Science (A.S.) or Associate in Applied Science (A.A.S.) degree in a related area. If a student has earned an Associate in Arts (A.A.) degree, or an A.S. degree, an A.A.S. degree, or its equivalent in an unrelated area, the student may be admitted on a case-by-case basis with approval of the appropriate academic administrator. Some majors may have licensure or other types of requirements prior to admittance. Due to the variance in specialized B.A.S. degree programs and concentrations, students are strongly encouraged to consult with an academic advisor at the B.A.S degree-granting institution.

PROGRAM ADMISSION INFORMATION

To be admitted to the Exploratory Curriculum (ECM), a student should be at or below 36 college credits at the time of orientation. If a student is in AP, IB, Dual Enrollment, AICE or any other college credit accruing program in high school, please reach out to the Exploratory advisor for further options. You can reach the ECM advisor at ECMadvise@usf.edu.

EXPLORATORY CURRICULUM PATHWAYS

- Math, Engineering & Technology
- Business
- Arts & Humanities
- Health & Natural Sciences
- Global & Social Sciences

REQUIRED COURSE FOR THE PATHWAY PROGRAMS: 3 HOURS

The only program requirement for the Exploratory Curriculum (ECM) is the registration and completion of the mandatory U-Decide course during a student's first Fall or Spring semester (offered as IDS 2378 - Critical Thinking: Foundations of Interdisciplinary Knowledge and Inquiry). The course is not offered during any Summer semesters.

IDS 2378 - Critical Thinking: Foundations of Interdisciplinary Knowledge and Inquiry Credit(s): 3
HEALTH & NATURAL SCIENCES PATHWAY

This Pathway is designed for students exploring various medical careers. Maybe you know the type of medicine you want to practice, but not which specific health major to choose. Maybe you know you are great at Biology or Chemistry in high school, but not sure what branch of medicine is associated with these academic disciplines. The other type of student this Pathway is designed for is those exploring various research careers such as Environmental Science, Geology, Communication Science and Disorders, or Public Health.

Students from this Pathway often go into the following majors:

<table>
<thead>
<tr>
<th>Biology</th>
<th>Environmental Science &amp; Policy</th>
<th>Medical Technology</th>
</tr>
</thead>
<tbody>
<tr>
<td>Biomedical Sciences</td>
<td>Exercise Science</td>
<td>Microbiology</td>
</tr>
<tr>
<td>Chemistry</td>
<td>Geology</td>
<td>Nursing</td>
</tr>
<tr>
<td>Communication Sciences &amp; Disorders</td>
<td>Health Sciences</td>
<td>Public Health</td>
</tr>
</tbody>
</table>

THE FOLLOWING COURSES ARE SUGGESTED FOR THIS ECM PATHWAY.

```
MAC 1147 - Precalculus Algebra and Trigonometry Credit(s): 4
BSC 2010 - Cellular Processes Credit(s): 3

BSC 2010L - Cellular Processes Laboratory Credit(s): 1
or
CHM 2045 - General Chemistry I Credit(s): 3

CHM 2045L - General Chemistry I Laboratory Credit(s): 1
STA 2023 - Introductory Statistics I Credit(s): 3
EVR 2001 - Introduction to Environmental Science Credit(s): 3
PHI 1600 - Introduction to Ethics Credit(s): 3
HSC 2100 - Contemporary Health Science Credit(s): 3
or
GEY 2000 - Introduction to Aging Sciences Credit(s): 3
```

HEALTH & NATURAL SCIENCES PATHWAY ELECTIVES

```
HUM 1020 - Introduction to Humanities Credit(s): 3
REL 2300 - Introduction to World Religions Credit(s): 3
```

The course is not offered during any Summer semesters.

IDS 2378 - Critical Thinking: Foundations of Interdisciplinary Knowledge and Inquiry Credit(s): 3
UNDERGRADUATE STUDIES

MATH, ENGINEERING, TECHNOLOGY PATHWAY

This Pathway is designed for students who are exploring the different Engineering majors at USF. For students who know they want to work with technology, but are not sure if that means app development, business intelligence, cybersecurity, website design, or search engine optimization, this track provides the foundation. This Pathway is perfect for those who do not meet the College of Engineering entry requirements. A student in the EMT Pathway can complete the entry requirements and stay on track for graduation by satisfying the general education requirements.

Students from this Pathway often go into the following majors:

<table>
<thead>
<tr>
<th>Chemical Engineering</th>
<th>Cybersecurity</th>
<th>Information Technology</th>
</tr>
</thead>
<tbody>
<tr>
<td>Civil Engineering</td>
<td>Electrical Engineering</td>
<td>Mathematics</td>
</tr>
<tr>
<td>Computer Engineering</td>
<td>Industrial Engineering</td>
<td>Mechanical Engineering</td>
</tr>
<tr>
<td>Computer Science</td>
<td>Information Studies</td>
<td>Physics</td>
</tr>
</tbody>
</table>

THE FOLLOWING COURSES ARE SUGGESTED FOR THIS ECM PATHWAY.

MAC 1147 - Precalculus Algebra and Trigonometry Credit(s): 4
or
MAC 2311 - Calculus I Credit(s): 4
CHM 2045 - General Chemistry I Credit(s): 3
CHM 2045L - General Chemistry I Laboratory Credit(s): 1
MAC 2312 - Calculus II Credit(s): 4
PHY 2048 - General Physics I - Calculus Based Credit(s): 3
PHY 2048L - General Physics I Laboratory Credit(s): 1
LIS 2005 - Information Literacy Credit(s): 3

MATH, ENGINEERING, TECHNOLOGY PATHWAY ELECTIVES

POS 2041 - American National Government Credit(s): 3
ENC 1101 - Composition I Credit(s): 3
ENC 1102 - Composition II Credit(s): 3
PHI 1600 - Introduction to Ethics Credit(s): 3
GEO 2400 - Human Geography Credit(s): 3

**Total Credit Hours:** 8
The Bachelor of General Studies (BGS) major is a customized, interdisciplinary degree completion major that provides students with options to choose an appropriate academic major that fits their educational and professional goals. The BGS major provides mid-career, adult students with the opportunity to integrate completion of the baccalaureate degree into their established lifestyle.

Students pursuing a Bachelor of General Studies degree are restricted from declaring a minor/certificate, due to USF’s degree progression policy.

Students may not pursue the Bachelor of General Studies as a second major, co-degree (concurrent degree), dual degree, or second or post-baccalaureate degree. Baccalaureate degree holders who wish to pursue further education are encouraged to pursue admission into a graduate degree program of study.

Admission to the University is based on the University's Undergraduate Admission Requirements that may be found by clicking on the following URLs:

- **Freshman**: [https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx](https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx)
- **Transfer**: [https://www.usf.edu/admissions/transfer/admission-information/index.aspx](https://www.usf.edu/admissions/transfer/admission-information/index.aspx)
- **International**: [https://www.usf.edu/admissions/international/admission-information/index.aspx](https://www.usf.edu/admissions/international/admission-information/index.aspx)

Satisfactory completion of the following requirements:

- General Education Program (36 credit hours), including State Core General Education, State Computation and State Communication;
- Minimum of 120 unduplicated credit hours;
- A minimum adjusted grade point average (GPA) of 2.0 on all coursework taken at USF and an overall 2.0 GPA average on all college-level coursework;
- Major and college requirements in a chosen degree program;
- Nine credit hours of coursework taken during the summer term(s) (if entered USF with less than 60 credit hours);
- Registration and successful completion of at least thirty (30) of the last sixty (60) credit hours;
- 42 credit hours of upper-level coursework;
- Civics Literacy;
- Foreign language admissions coursework.

Students desiring to transfer to USF should complete an A.A. degree at a Florida College System institution. If students transfer with fewer than 60 semester hours of acceptable credit, the students must meet the University’s entering freshman requirements including ACT or SAT test scores, GPA, and course requirements. Transfer students are also required to comply with the immunization, foreign language, and continuous enrollment policies of the university.

There are no State Mandated Common Prerequisites for this program. All Florida College System students are encouraged to complete the Associate degree. Students should consult with an academic advisor in their major degree area at the intended transfer institution.
REQUIRED COURSES: (3 CREDIT HOURS)

IDS 4934 - Senior Capstone for BSAS/BGS Credit(s): 3

MAJOR CORE COURSE: 1 COURSE; 3 CREDIT HOURS

MAJOR (RESTRICTED) ELECTIVES: (21 CREDIT HOURS)

Students complete a General Studies program of study and one concentration in: Aging Sciences; Behavioral Healthcare; Business; Computer Systems Technology; Criminal Justice; Educational Foundations; Environmental Policy; Information Studies: Information Architecture; Leadership Studies; Public Administration; Public Health; Urban Studies; or Women's and Gender Studies.

AGING SCIENCES CONCENTRATION: 7 COURSES; 21 CREDIT HOURS

CONCENTRATION CORE: 4 COURSES; 12 CREDIT HOURS

- GEY 2000 - Introduction to Aging Sciences Credit(s): 3
- GEY 3601 - Physical Changes and Aging Credit(s): 3
- GEY 3625 - Sociological Aspects of Aging Credit(s): 3
- GEY 4612 - Psychology of Aging Credit(s): 3

CONCENTRATION RESTRICTED ELECTIVES: 3 COURSES; 9 CREDIT HOURS

Select three courses from the following list:

- GEY 3503 - Administration of Assisted Living Facilities Credit(s): 3
- GEY 4101 - Aging in Special Populations Credit(s): 3
- GEY 4102 - Aging in Modern Literature and Film Credit(s): 3
- GEY 4231 - Elder Abuse and Neglect Credit(s): 3
- GEY 4322 - Care Management for Older Adults Credit(s): 3
- GEY 4360 - Counseling for Older Adults Credit(s): 3
- GEY 4368 - Health, Ethnicity, and Aging Credit(s): 3
- GEY 4635 - Business Management in an Aging Society Credit(s): 3
- GEY 4641 - Death and Dying Credit(s): 3
- GEY 4647 - Ethical and Legal Issues in Aging Credit(s): 3
- GEY 4690 - Senior Seminar in Aging Credit(s): 3

GENERAL STUDIES B.G.S. - ADDITIONAL INFORMATION

GPA REQUIREMENTS

A minimum adjusted grade point average (GPA) of 2.0 on all coursework taken at USF and an overall 2.0 GPA average on all college-level coursework.

GRADING REQUIREMENTS

A minimum grade of C- or better must be earned in each concentration course.
RESEARCH OPPORTUNITIES

Undergraduate students in any degree program are able to participate in undergraduate research. Several options exist to show mentored undergraduate research activity on a student's official transcript. Those who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 4914 course. This course will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research is able to assist with further inquiries.

- IDS 4934 - Senior Capstone for BSAS/BGS Credit(s): 3
- Upper-Level Elective or General Education Course Credit(s): 3
- Upper-Level Elective or General Education Course Credit(s): 3
- Upper-Level Elective Credit(s): 3

Total Credit Hours: 15
GENERAL STUDIES B.G.S., WITH BEHAVIORAL HEALTHCARE CONCENTRATION

TOTAL DEGREE HOURS: 120

The Bachelor of General Studies (BGS) major is a customized, interdisciplinary degree completion major that provides students with options to choose an appropriate academic major that fits their educational and professional goals. The BGS major provides mid-career, adult students with the opportunity to integrate completion of the baccalaureate degree into their established lifestyle.

Students pursuing a Bachelor of General Studies degree are restricted from declaring a minor/certificate, due to USF's degree progression policy.

Students may not pursue the Bachelor of General Studies as a second major, co-degree (concurrent degree), dual degree, or second or post-baccalaureate degree. Baccalaureate degree holders who wish to pursue further education are encouraged to pursue admission into a graduate degree program of study.

UNIVERSITY ADMISSIONS

Admission to the University is based on the University's Undergraduate Admission Requirements that may be found by clicking on the following URLs:

- Freshman: https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx
- Transfer: https://www.usf.edu/admissions/transfer/admission-information/index.aspx
- International: https://www.usf.edu/admissions/international/admission-information/index.aspx

GRADUATION REQUIREMENTS

Satisfactory completion of the following requirements:

- General Education Program (36 credit hours), including State Core General Education, State Computation and State Communication;
- Minimum of 120 unduplicated credit hours;
- A minimum adjusted grade point average (GPA) of 2.0 on all coursework taken at USF and an overall 2.0 GPA average on all college-level coursework;
- Major and college requirements in a chosen degree program;
- Nine credit hours of coursework taken during the summer term(s) (if entered USF with less than 60 credit hours);
- Registration and successful completion of at least thirty (30) of the last sixty (60) credit hours;
- 42 credit hours of upper-level coursework;
- Civics Literacy;
- Foreign language admissions coursework.

STATE MANDATED COMMON COURSE PREREQUISITES

Students desiring to transfer to USF should complete an A.A. degree at a Florida College System institution. If students transfer with fewer than 60 semester hours of acceptable credit, the students must meet the University's entering freshman requirements including ACT or SAT test scores, GPA, and course requirements. Transfer students are also required to comply with the immunization, foreign language, and continuous enrollment policies of the university.

There are no State Mandated Common Prerequisites for this program. All Florida College System students are encouraged to complete the Associate degree. Students should consult with an academic advisor in their major degree area at the intended transfer institution.
REQUIRED COURSES: (3 CREDIT HOURS)

MAJOR CORE COURSE: 1 COURSE; 3 CREDIT HOURS

IDS 4934 - Senior Capstone for BSAS/BGS Credit(s): 3

MAJOR (RESTRICTED) ELECTIVES: (21 CREDIT HOURS)

Students complete a General Studies program of study and one concentration in: Aging Sciences; Behavioral Healthcare; Business; Computer Systems Technology; Criminal Justice; Educational Foundations; Environmental Policy; Information Studies: Information Architecture; Leadership Studies; Public Administration; Public Health; Urban Studies; or Women's and Gender Studies.

BEHAVIORAL HEALTHCARE CONCENTRATION: 7 COURSES; 21 CREDIT HOURS

CONCENTRATION CORE: 6 COURSES; 18 CREDIT HOURS

* MHS 3411 should be taken during student's first semester of concentration coursework; a minimum grade of "B-" is required.
** MHS 4022 is for students with an interest in working with adults; MHS 4490 is for students interested in working with children.

- MHS 3411 - Multidisciplinary Behavioral Healthcare Services Credit(s): 3 *
- MHS 4002 - Behavioral Health Systems Delivery Credit(s): 3
- MHS 4408 - Exemplary Practices in Behavioral Healthcare Treatment Credit(s): 3
- MHS 4022 - Adult Psychopathology in the Community Credit(s): 3 **
  or
- MHS 4490 - Behavioral Healthcare Issues for Children Credit(s): 3 **
- MHS 4703 - Legal, Ethical and Professional Issues in BHC Credit(s): 3
- MHS 4723 - Professional Seminar in Behavioral Healthcare Credit(s): 3
  *MHS 3411 should be taken during student's first semester of concentration coursework; a minimum grade of "B-" is required.

CONCENTRATION RESTRICTED ELECTIVES: 1 COURSE; 3 CREDIT HOURS

Select one course from the following list:

- MHS 3204 - Fundamentals of Applied Behavior Analysis Credit(s): 3
  or
- CLP 4414 - Behavior Modification Credit(s): 3
- MHS 4023 - Recovery Oriented Mental Health Services Credit(s): 3
- MHS 4074 - Child Development and Trauma Credit(s): 3
- MHS 4203 - Practical Skills-Children's Behavioral Healthcare Credit(s): 3
- MHS 4425 - Field Experience in Behavioral Healthcare Credit(s): 3
- MHS 4434 - Behavioral Health and the Family Credit(s): 3
- MHS 4452 - Co-Occurring Disorders Credit(s): 3
- MHS 4463 - Suicide Issues in Behavioral Health Credit(s): 3
- MHS 4731 - Writing for Research and Publication in Behavioral and Community Sciences Credit(s): 3
- MHS 4741 - Applied Research Methods Credit(s): 3
- MHS 4931 - Selected Topics Credit(s): 1-3
GENERAL STUDIES B.G.S. - ADDITIONAL INFORMATION

GPA REQUIREMENTS
A minimum adjusted grade point average (GPA) of 2.0 on all coursework taken at USF and an overall 2.0 GPA average on all college-level coursework.

GRADING REQUIREMENTS
A minimum grade of C- or better must be earned in each concentration course.

RESEARCH OPPORTUNITIES
Undergraduate students in any degree program are able to participate in undergraduate research. Several options exist to show mentored undergraduate research activity on a student's official transcript. Those who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 4914 course. This course will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research is able to assist with further inquiries.

If students transfer with fewer than 60 semester hours of acceptable credit, the students must meet the University’s entering freshman requirements including ACT or SAT test scores, GPA, and course requirements. Transfer students are also required to comply with the immunization, foreign language, and continuous enrollment policies of the university.

There are no State Mandated Common Prerequisites for this program. All Florida College System students are encouraged to complete the Associate degree. Students should consult with an academic advisor in their major degree area at the intended transfer institution.
REQUIRED COURSES: (3 CREDIT HOURS)

MAJOR CORE COURSE: 1 COURSE; 3 CREDIT HOURS

IDS 4934 - Senior Capstone for BSAS/BGS Credit(s): 3

MAJOR (RESTRICTED) ELECTIVES: (21 CREDIT HOURS)

Students complete a General Studies program of study and one concentration in: Aging Sciences; Behavioral Healthcare; Business; Computer Systems Technology; Criminal Justice; Educational Foundations; Environmental Policy; Information Studies: Information Architecture; Leadership Studies; Public Administration; Public Health; Urban Studies; or Women's and Gender Studies.

ENVIRONMENTAL POLICY CONCENTRATION: 8 COURSES; 21 CREDIT HOURS

CONCENTRATION CORE: 3 COURSES; 7 CREDIT HOURS

EVR 2001 - Introduction to Environmental Science Credit(s): 3
EVR 2001L - Environmental Science Lab Credit(s): 1
EVR 2861 - Introduction to Environmental Policy Credit(s): 3

CONCENTRATION ENVIRONMENTAL/REGULATION ELECTIVES: 3 COURSES; 9 CREDIT HOURS

Select three courses from the following list:

EVR 4027 - Wetland Environments Credit(s): 3
EVR 4033 - Environmental Regulation Credit(s): 3
EVR 4104 - Karst Environments Credit(s): 3
EVR 4114 - Climate Change Credit(s): 3
GEO 4502 - Economic Geography Credit(s): 3

CONCENTRATION ELECTIVES: 2 COURSES; 5 CREDIT HOURS

Select two courses from the following list:

EVR 4807 - Sustainable Healthy Environments Credit(s): 3
EVR 4930 - Selected Topics Credit(s): 1-3
GEO 4340 - Natural Hazards Credit(s): 3
GEO 4372 - Global Conservation Credit(s): 3
GEO 4421 - Cultural Geography Credit(s): 3
GEO 4471 - Political Geography Credit(s): 3
GIS 4043C - Geographic Information Systems Credit(s): 3
PAD 3003 - Introduction to Public and Community Service Credit(s): 3
PAD 4144 - Nonprofit Organizations and Public Policy Credit(s): 3
PAD 4930 - Selected Topics in Public Administration and Public Policy Credit(s): 3
POS 3142 - Introduction to Urban Politics and Government Credit(s): 3
POS 3182 - Florida Politics and Government Credit(s): 3
URP 4052 - Urban and Regional Planning Credit(s): 3
GENERAL STUDIES B.G.S. - ADDITIONAL INFORMATION

GPA REQUIREMENTS

A minimum adjusted grade point average (GPA) of 2.0 on all coursework taken at USF and an overall 2.0 GPA average on all college-level coursework.

GRADING REQUIREMENTS

A minimum grade of C- or better must be earned in each concentration course.

RESEARCH OPPORTUNITIES

Undergraduate students in any degree program are able to participate in undergraduate research. Several options exist to show mentored undergraduate research activity on a student's official transcript. Those who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 4914 course. This course will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research is able to assist with further inquiries.

GENERAL STUDIES B.G.S., WITH INFORMATION STUDIES: INFORMATION ARCHITECTURE CONCENTRATION

TOTAL DEGREE HOURS: 120

The Bachelor of General Studies (BGS) major is a customized, interdisciplinary degree completion major that provides students with options to choose an appropriate academic major that fits their educational and professional goals. The BGS major provides mid-career, adult students with the opportunity to integrate completion of the baccalaureate degree into their established lifestyle.

Students pursuing a Bachelor of General Studies degree are restricted from declaring a minor/certificate, due to USF's degree progression policy.

Students may not pursue the Bachelor of General Studies as a second major, co-degree (concurrent degree), dual degree, or second or post-baccalaureate degree. Baccalaureate degree holders who wish to pursue further education are encouraged to pursue admission into a graduate degree program of study.

UNIVERSITY ADMISSIONS

Admission to the University is based on the University's Undergraduate Admission Requirements that may be found by clicking on the following URLs:

- Freshman: https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx
- Transfer: https://www.usf.edu/admissions/transfer/admission-information/index.aspx
- International: https://www.usf.edu/admissions/international/admission-information/index.aspx

GRADUATION REQUIREMENTS

Satisfactory completion of the following requirements:

- General Education Program (36 credit hours), including State Core General Education, State Computation and State Communication;
- Minimum of 120 unduplicated credit hours;
- A minimum adjusted grade point average (GPA) of 2.0 on all coursework taken at USF and an overall 2.0 GPA average on all college-level coursework;
- Major and college requirements in a chosen degree program;
- Nine credit hours of coursework taken during the summer term(s) (if entered USF with less than 60 credit hours);
- Registration and successful completion of at least thirty (30) of the last sixty (60) credit hours;
- 42 credit hours of upper-level coursework;
- Civics Literacy;
- Foreign language admissions coursework.

STATE MANDATED COMMON COURSE PREREQUISITES

Students desiring to transfer to USF should complete an A.A. degree at a Florida College System institution. If students transfer with fewer than 60 semester hours of acceptable credit, the students must meet the University's entering freshman requirements including ACT or SAT test scores, GPA, and course requirements. Transfer students are also required to comply with the immunization, foreign language, and continuous enrollment policies of the university.

HUN 3296 - Nutrition and Disease Credit(s): 3
PHC 4031 - Emerging Infectious Diseases Credit(s): 3
PHC 4032 - Foundations of Infection Control Credit(s): 3
PHC 4069 - Biostatistics in Society Credit(s): 3
PHC 4241 - Psychology of Fear & Mental Health Issues Related to Disasters Credit(s): 3
PHC 4720 - Foundation to Professional Writing in Public Health Credit(s): 3

GENERAL STUDIES B.G.S. - ADDITIONAL INFORMATION

GPA REQUIREMENTS

A minimum adjusted grade point average (GPA) of 2.0 on all coursework taken at USF and an overall 2.0 GPA average on all college-level coursework.

GRADING REQUIREMENTS

A minimum grade of C- or better must be earned in each concentration course.

RESEARCH OPPORTUNITIES
Undergraduate students in any degree program are able to participate in undergraduate research. Several options exist to show mentored undergraduate research activity on a student's official transcript. Those who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit IDS 4914 course. This course will not impact degree credits or GPA but will show on an official transcript and document the experience. The Office of Undergraduate Research is able to assist with further inquiries.

GENERAL STUDIES B.G.S., WITH URBAN STUDIES CONCENTRATION

TOTAL DEGREE HOURS: 120

The Bachelor of General Studies (BGS) major is a customized, interdisciplinary degree completion major that provides students with options to choose an appropriate academic major that fits their educational and professional goals. The BGS major provides mid-career, adult students with the opportunity to integrate completion of the baccalaureate degree into their established lifestyle.

Students pursuing a Bachelor of General Studies degree are restricted from declaring a minor/certificate, due to USF's degree progression policy.

Students may not pursue the Bachelor of General Studies as a second major, co-degree (concurrent degree), dual degree, or second or post-baccalaureate degree. Baccalaureate degree holders who wish to pursue further education are encouraged to pursue admission into a graduate degree program of study.

UNIVERSITY ADMISSIONS

Admission to the University is based on the University's Undergraduate Admission Requirements that may be found by clicking on the following URLs:

- Freshman: https://www.usf.edu/admissions/freshmen/admission-information/requirements-deadlines.aspx
- Transfer: https://www.usf.edu/admissions/transfer/admission-information/index.aspx
- International: https://www.usf.edu/admissions/international/admission-information/index.aspx

GRADUATION REQUIREMENTS

Satisfactory completion of the following requirements:

- General Education Program (36 credit hours), including State Core General Education, State Computation and State Communication;
- Minimum of 120 unduplicated credit hours;
- A minimum adjusted grade point average (GPA) of 2.0 on all coursework taken at USF and an overall 2.0 GPA average on all college-level coursework;
- Major and college requirements in a chosen degree program;
- Nine credit hours of coursework taken during the summer term(s) (if entered USF with less than 60 credit hours);
- Registration and successful completion of at least thirty (30) of the last sixty (60) credit hours;
- 42 credit hours of upper-level coursework;
- Civics Literacy;
- Foreign language admissions coursework.

STATE MANDATED COMMON COURSE PREREQUISITES

Students desiring to transfer to USF should complete an A.A. degree at a Florida College System institution. If students transfer with fewer than 60 semester hours of acceptable credit, the students must meet the University's entering freshman requirements including ACT or SAT test scores, GPA, and course requirements. Transfer students are also required to comply with the immunization, foreign language, and continuous enrollment policies of the university.

There are no State Mandated Common Prerequisites for this program. All Florida College System students are encouraged to complete the Associate degree. Students should consult with an academic advisor in their major degree area at the intended transfer institution.

## Leadership Studies Minor

Leadership Studies minor is a significant benefit to students in all areas of study, enabling them to lead lives of impact by providing them with the knowledge and core competencies necessary to succeed in work and life.

The minor is grounded in current theory and best practices from the multidisciplinary field of leadership studies. Courses are designed to give students a theoretical and practical grasp of leadership relying upon the basic assumption that leadership can be learned and, therefore, taught.

The minor takes a unique approach to leadership education that combines practical application of leadership theories and opportunities for students to learn at each of the levels of leadership -- personal, group/team, organizational, and global.

### GPA Requirements

The minimum GPA required for the minor is 2.0.

### Grading Requirements

A minimum grade of "C" (not C-) or better in each course is required.

### Advising Information

Please meet with your advisor for approval to add the minor and then complete the minor declaration form - Leadership Studies Minor Declaration form.
MILITARY SCIENCE AND LEADERSHIP MINOR - ARMY ROTC

TOTAL MINOR HOURS: 18

The Military Science and Leadership – Army ROTC minor is coordinated through the Department of Military Science and is designed to provide the student with an in-depth understanding of Army leadership doctrine and the fundamental principles by which Army leaders act to accomplish their mission. This minor lays out a leadership framework that allows students to apply leadership concepts learned in the classroom. Additional emphasis is placed on character development, physical and mental fitness and military small unit operations.

MINOR CORE (14 CREDIT HOURS)

NOTE: *Repeated for two semesters; may be repeated up to four semesters, however only two credits will count toward minor.

- MSL 2900 - Army Physical Readiness **Credit(s): 1** 
- MSL 3201C - Adaptive Team Leadership **Credit(s): 3**
- MSL 3202C - Leadership in Changing Environments **Credit(s): 3**
- MSL 4301C - Developing Adaptive Leaders **Credit(s): 3**
- MSL 4302C - Leadership in a Complex World **Credit(s): 3**

MINOR ELECTIVES (4 CREDIT HOURS)

Choose four credit hours from the following list of courses:

- AFR 1101 - The Foundation of the United States Air Force Pt 1 **Credit(s): 1**
- AFR 1120 - The Foundations of the United States Air Force Pt 2 **Credit(s): 1**
- AFR 2130 - Evolution of USAF Air and Space Power, Part I **Credit(s): 1**
- AFR 2140 - Evolution of USAF Air and Space Power, Part II **Credit(s): 1**

ACG 2021 Principles of Financial Accounting (3)
Study of basic accounting principles including the recording and reporting of financial activity. The preparation and interpretation of financial statements.

ACG 2071 Principles of Managerial Accounting (3)
PR: ACG 2021 with a grade of C- or better
A study of the accountant’s role in assisting management in the planning and controlling of business activities.

ACG 3006 Professional Topics in Accounting (3)
PR: ACG 2021 with a minimum grade of C, ACG 2071 with a minimum grade of C
The course will develop an in-depth understanding of the theoretical frameworks used in financial reporting and use this understanding to analyze and solve complex analytical problems in financial reporting.

ACG 3074 Managerial Accounting for Non-Business Majors (3)
The study of the uses of accounting data internally by managers in planning and controlling the affairs of organizations.

ACG 3103 Intermediate Financial Accounting I (3)
PR: ACG 2021 with a minimum grade of C, ACG 2071 with a minimum grade of C
CPR: ACG 3341 with a minimum grade of C or ACG 3401 with a minimum grade of C or TAX 4001 with a minimum grade of C
Theory and methodology underlying financial reporting, including the FASB’s conceptual framework, the accounting process, financial statements, accounting changes, present value applications, and current assets.

ACG 3113 Intermediate Financial Accounting II (3)
PR: ACG 3103 with a minimum grade of C and (ACG 3341 with a minimum grade of C or ACG 3401 with a minimum grade of C or TAX 4001 with a minimum grade of C)
Continuation of ACG 3103. Topics covered include property, plant and equipment, intangibles, current liabilities, long-term debt, leases, tax allocation, statement of cash flows.

ACG 3341 Cost Accounting and Control I (3)
PR: ACG 2021 with a minimum grade of C, ACG 2071 with a minimum grade of C
CPR: ACG 3103 with a minimum grade of C
Deals with cost accounting systems for different entities, cost behavior patterns, cost-volume-profit analysis, relevant information for decision making, and budgets and standard costs for planning and control.

ACG 3401 Accounting Information Systems (3)
PR: ACG 2021 with a minimum grade of C, ACG 2071 with a minimum grade of C
CPR: ACG 3103 with a minimum grade of C
This course provides students with a basic understanding of well-controlled information systems in a variety of technological environments with added emphasis on the collection, processing, and reporting of accounting information.

ACG 4123 Intermediate Financial Accounting III (3)
PR: ACG 3113 with a grade of C or better, not C-
Theory and practice underlying stockholders’ equity, dilutive securities and EPS, derivatives, revenue recognition, post-retirement benefits, error analysis, full disclosure, and other current accounting topics.

ACG 4351 Cost Accounting and Control II (3)
PR: ACG 3103 and ACG 3341 with a grade of C or better, not C-
Application of the material covered in ACG 3341 with specific emphasis on cost allocations, performance measurements, analysis of current cost accounting systems and accounting in today’s environment (giving consideration to the influences of the international environment).

ACG 4501 Governmental/Not-for-profit Accounting (3)
PR: ACG 3113 (C or better)
Application of financial and managerial accounting, and auditing, principles and theory to both governmental and not-for-profit entities.

ACG 4632 Auditing I (3)
PR: ACG 3113 and ACG 3401
This course provides a sound conceptual foundation of basic auditing process from the perspective of the public accounting profession. Professional standards, ethics, legal responsibilities, and the utilization of technology are addressed.

ACG 4642 Auditing II (3)
PR: ACG 4632 with a grade of C or better, not C-
Further development of material covered in ACG 4632, with special emphasis on additional reporting topics and audit techniques not previously addressed.

ACG 4684 Fraud Examinations (3)
PR: ACG 3401 with a minimum grade of C
This course further problem solving ability by increasing the student’s knowledge of fraud and forensic examinations. Topics covered include the nature of fraud, detecting and preventing fraud, and various methods of proof for forensic examinations.

</table>
ADV 4800 Advertising Campaigns (3)
PR: ADV 3101, ADV 3300, ADV 3500, ECO 1000, and MAR 3023
Advanced advertising course requiring planning and production of complete general advertising campaign, including research, production methods, budgeting, and media schedules.

ADV 4940 Advertising Internship (3)
CPR: ADV 3008 with a minimum grade of C
Practical experience outside the classroom where the student works for academic credit under the supervision of a professional practitioner. Periodic written and oral reports to the faculty member coordinating the study.

AFA 2000 Introduction to the Black Experience (3)
Fundamental perspectives on the nature and significance of the Black Experience in Africa and black communities in the Americas.

AFA 2380 History and Theory of Genocide (3)
This course examines the concept of genocide; its origins in human history and the evolution of international law aimed at defining and criminalizing genocide.

AFA 4150 Africa and the United States (3)
An examination of the historical and current political, economic, and cultural relations between the United States and Africa.

AFA 4335 Black Women in America (3)
An interdisciplinary survey of the contemporary experience of black women in America, including the African roots, myths, and realities surrounding that experience.

AFA 4350 African American Community Research (3)
This interactive, field experience course introduces students to active and applied research methodologies and the uses of this research in Black urban communities.

AFA 4430 Afro-Diasporic Literature and Political Movements (3)
The course studies the literary and socio-political movements of the Black Diaspora, dating from the 19th to the 20th century. Centered within a diasporic approach, it offers a comparative examination of literary, historical, and theoretical works.

AFA 4713 Haiti: Legacy of Resilience and Freedom (3)
To acquire a more in-depth understanding of the country’s leadership history in order to contribute to the longstanding nation-building projects of the republic. Students examine seminal texts from historians, literary scholars and political scientists.

AFA 4900 Directed Readings (3)
Independent readings in a particular area of African and African American Studies, selected by student and instructor.

AFA 4931 Selected Topics in Africana Studies (3)
Topics offered are selected to reflect student needs and faculty interests. In depth study in such areas as the Black Student and the American Educational Process; the Black Experience in the Americas; European Expansion in Africa to 19th century; Contemporary Economic Problems in Africa.

AFH 3100 African History to 1850 (3)
Introductory survey of African history, from the beginning of the continent’s recorded history, to 1850. Course teaches skills reflected in the core foundations of knowledge in the General Education Curriculum.

AFH 3200 African History since 1850 (3)
Introductory survey of the history of Africa since 1850. Course looks at the state of the African continent in 1850 and the local and global factors that have shaped Africa’s history since that time.

AFR 1101 The Foundation of the United States Air Force Pt 1 (1)
Intro Air Force Reserve Officer Training Corps (AFROTC) & US Air Force (USAF) includes lessons in officership/professionalism and an intro to communication skills. AFR 2001 Lead Lab augments course providing followership and leadership experiences.

AFR 1120 The Foundations of the United States Air Force Pt 2 (1)
A study of Air Force installations, Core Values, Leadership, Team Building, and Diversity within Armed Forces. AFR 2001 Lead Lab augments course providing followership and leadership experiences, utilizing leadership and management principles.

AFR 1903 Directed Independent Studies (4)
Directed Independent Study.

AFR 2001 Air Force ROTC Leadership Laboratory (0)
Leadership Laboratory is required for each of the Aerospace Studies courses. It meets one hour and 45 minutes per week. Instruction is conducted within the framework of an organized cadet corps with a progression of experiences designed to develop each student’s leadership potential. Leadership Laboratory involves a study of Air Force customs and courtesies; drill and ceremonies; career opportunities in the Air Force; and the life and work of an Air Force junior officer. Students develop their leadership potential in a practical laboratory, which typically includes field trips to Air Force installations.
### AFR 2130 Evolution of USAF Air and Space Power, Part I (1)
CR: AFR 2001
A study of air power from balloons and dirigibles through the jet age. Emphasis is on the employment of air power in WWI and WWII and how it affected the evolution of air power concepts and doctrine.

### AFR 2140 Evolution of USAF Air and Space Power, Part II (1)
CR: AFR 2001
A historical review of air power employment in military and nonmilitary operations in support of national objectives. Emphasis is on the period from post WWII to present.

### AFR 3220 Air Force Management and Leadership I (3)
CR: AFR 2001
An integrated management course emphasizing the individual as a manager in an Air Force milieu. The individual motivational and behavioral processes, leadership, communication, and group dynamics are covered to provide a foundation for the development of the junior officer's professional skills as an Air Force officer (officership). The basic managerial processes involving decision making, utilization of analytic aids in planning, organizing, and controlling in a changing environment are emphasized as necessary professional concepts.

### AFR 3231 Air Force Management and Leadership II (3)
CR: AFR 2001
A continuation of the study of Air Force advancement and leadership. Concentration is on organizational and personal values, management of forces in change, organizational power, politics, and managerial strategy and tactics are discussed within the context of the military organization. Actual Air Force cases are used to enhance the learning and communication processes.

### AFR 4201 National Security Affairs & Preparation for Active Duty I (3)
CR: AFR 2001
Examines national sec proc, regional studies, adv leadership ethics, AF doctrine with concentration on military as profession, communication/officership/mil justice/civil control of mil/2/prep for active duty, current issues affecting military professionalism.

### AFR 4211 National Security Affairs & Preparation for Active Duty II (3)
CR: AFR 2001
Cont study national sec proc, reg studies, adv leader ethics, & AF doct. Spec topics include reg stud Europe, Mid East, Russia (former Soviet Republics), perform feedback, effective performance report writing, enl/off eval sys, ops risk mgmt to prep students for active duty.

### AFS 2250 Culture and Society in Africa (3)
Topics include: African religion, value systems, art and the aesthetics, family and life-cycle, impact of Islam and Christianity and conflict of cultures.

### AFS 3251 Environmental - Cultural Study in Africa (3)
PR: AFS 2250
Study tour. A study of traditional African society and culture, the relationship between life and the environment, and the impact of modernization on the culture and the environment.

### AFS 4910 Individual Research (3)
PR: 2000 level introductory course
Course consists of advanced undergraduate research on Africana Studies topic selected by student and professor. Topics vary. The course allows students to develop research skills and independent work discipline.

### AMH 2010 American History I (3)
This class is an introductory survey of American history from Columbus and "First Contact" to Reconstruction.

### AMH 2020 American History II (3)
A history of the United States with attention given to relevant developments in the Western Hemisphere from 1877 to the present.

### AMH 3098 Race in America (3)
This course explores the histories of race, ethnicity, immigration, racism, and racial formation in the United States. The course will treat race as both a social construction and a category of lived experience that has had very real historical effects.

### AMH 3130 The American Revolutionary Era (3)
Emphasis on the causes of the American revolution, the nature of Constitution-making, and the establishment of the federal system. Also examines the significance of loyalism, violence, and slavery in American society from 1750-1789.

### AMH 3140 The Age of Jefferson (3)
A comprehensive study of American society and political culture from 1789-1828. Focuses on demographic trends, party systems, expansionism, Indian policy, labor, and ethnocultural conflicts.
### AMH 3160 The Age of Jackson (3)
The United States from 1828-1850, with emphasis on social and political conflict. Consideration of evangelicalism, reform, labor movements, urbanization, and political activity in the antebellum era.

### AMH 3170 The Civil War and Reconstruction (3)
An examination of political, social, and economic climate of the 1850’s that led to the American Civil War. The course does focus upon the war itself in its military, diplomatic, and political consequences through the end of the Reconstruction (1877).

### AMH 3201 The United States, 1877-1914 (3)
A study of America from the end of Reconstruction to World War I. Ranging over political, social, and international developments, the course covers industrialization, immigration, unions, reform, feminism, race relations and imperialism.

### AMH 3231 The United States, 1914-1945 (3)
The United States from World War I to the end of World War II. Covering political, social and international developments, the course examines the lives of Americans, including minorities and women, during war, prosperity, and the Great Depression.

### AMH 3270 The United States since 1945 (3)
A study of America’s role in the Cold War, in Vietnam, and in the post-Cold War era. Also examines domestic developments, such as the consumer culture, protest movements, and abuses of political power.

### AMH 3341 American Food and Drink History (3)
Traces the history of American food and beverages from the pre-contact era to the present. Examines the cultural, social, economic, and global aspects of food production and consumption and the intersection between food culture, traditions, and history.

### AMH 3342 Globalization and U.S. Culture (3)
This course examines how the U.S. has influenced global culture, food, technology, economic practices, and political ideas, but also how global processes and trends have, in turn, shaped U.S. culture and society. The focus is from 1776-present.

### AMH 3390 19th Century America History (3)
A comprehensive history of society, culture, and politics in the long nineteenth century, 1783-1914. Focuses on the development of liberalism, capitalism, democracy, imperialism, slavery, and religion.

### AMH 3402 Southern History, 1607-1865 (3)
The history of the U.S. South from European exploration to the Civil War. Topics covered include: slavery, black culture and resistance, agrarianism, women and gender, honor culture, the pro-slavery argument, sectionalism, and the Civil War.

### AMH 3403 The South since 1865 (3)
Southern history since the surrender at Appomattox. Topics covered include Reconstruction, the Populist revolt, race relations, demagoguery and disfranchisement, Southern women, and the Civil Rights Movement.

### AMH 3421 Early Florida (3)
A history of colonial Florida under the Spanish and English. Florida as an area of discovery, colonization, and imperial conflict; the emergence of Florida within the regional setting.

### AMH 3423 Modern Florida (3)
An historical survey of Florida from the territorial period to the modern era. An examination of the social, political, and economic changes occurring in Florida between 1821 and the 1980s.

### AMH 3428 Doing Local History: Tampa Bay (3)
An introduction to the history of Tampa and Tampa Bay, and to the practice of public history. Partnerships with local historical sites/museums/practitioners allow students to work on a project of historical significance to the community.

### AMH 3500 American Labor History (3)
A study of American workers from the colonial period to the present. Examines the changing nature of work, its effects on workers (including minorities and women), and their responses as expressed in strikes, unions, and political action.

### AMH 3512 U.S. Foreign Relations (3)
U.S. relations with the world, 1776-present. Includes diplomatic, economic, cultural, and military relations. The course also examines immigration and other global influences on U.S. domestic history and analyzes changes in internationalist thought.

### AMH 3530 Immigration History (3)
A study of the composition and character of the “American” people with emphasis on the period from 1840s to the 1920s. Examines old world backgrounds of immigrants and their responses to the new world's social, economic and political conditions.

<td>African American Literature (3)</td>
<td>A study of black American literature from the nineteenth century to the present, including the works of such writers as W.E.B. DuBois, Jean Toomer, Langston Hughes, Richard Wright, Ralph Ellison, LeRoi Jones, and Nikki Giovanni.</td>
</tr>
</tbody>
</table>
AML 3630 U.S. Latino/Latina Literature in English
(3)
PR: ENC 1101 and ENC 1102
This 3000-level literature course surveys American English literature by Latino/Latina writers (with Spanish American ancestry). Authors may include Piri Thomas, Sandra Cisneros, Esmeralda Santiago, Luis Valdéz, Tomás Rivera, Oscar Hijuelos, etc.

AML 3641 Native American Literature and Film (3)
A survey of Native American literature and films written and produced from the 1960s to the present. It will emphasize the cultural and political contexts out of which these productions emerge by analyzing political cartoons, articles, discourses, etc.

AML 3674 Asian American Literature and Film (3)
This course is a critical survey of Asian American literature and film. We will emphasize the social and political contexts out of which these productions emerge by analyzing political cartoons, news articles, and discourses.

AML 4111 Nineteenth-Century American Novel (3)
A study of the American novel from its beginnings through 1900, including such novelists as Cooper, Hawthorne, Melville, James, Twain, Crane, and Dreiser, among others.

AML 4121 Twentieth-Century American Novel (3)
A study of major trends and influences in American prose fiction from 1900 to the present, including works by such writers as Hemingway, London, Wharton, Fitzgerald, Faulkner, West, Mailer, Bellow, Ellison, Donleavy, Updike, Vonnegut, and others.

AML 4261 Literature of the South (3)
A study of the major writers of the Southern Renaissance, including writers such as Faulkner, Wolfe, Caldwell, Hellman, McCullers, O'Connor, Warren, Styron, Tate, Davidson, and Dickey.

AML 4300 Selected American Authors (3)
The study of two or three related major authors in American literature. The course may include such writers as Melville and Hawthorne, Hemingway and Faulkner, James and Twain, Pound and Eliot, Stevens and Lowell, etc. Specific topics will vary. May be taken twice for credit with different topics.

AML 4624 Black Women Writers (3)
Black women writers focuses on the literature of women of Africa and the African Diaspora. It examines the social, historical, artistic, political, economic, and spiritual lives of Africana women in context of a global community.

AML 4931 American Literary Movements and Genres (3)
PR: ENC 1102, with a grade of C- or better
Looks at a movement or genre in American literature (19th-century novel, Harlem Renaissance, Puritan sermons, etc). Building on skills from survey courses, class requires heavy but focused reading, familiarity with literary scholarship, and writing.

AML 4933 Studies in American Literature and Culture (3)
PR: ENC 1102, with a grade of C- or better
This course examines a particular topic or theme, varying with individual selection, in the American literary tradition.

AMS 2030 Introduction to American Studies (3)
An overview of American Studies, the interdisciplinary study of American culture. Analysis of the arts and literature, including music; social issues; popular culture; material culture; cultural diversity; and social change.

AMS 2201 Colonial American Culture (3)
An examination of cultural patterns in America as they developed between 1600 and 1780 with an emphasis on the texture of everyday life.

AMS 2270 Twentieth-Century American Culture (3)
An examination of cultural patterns in America from 1900 to the present with emphasis on the texture of everyday life.

AMS 3212 Nineteenth-Century American Culture (3)
An examination of cultural patterns in America from 1776 to 1900 with an emphasis on the texture of everyday life.

AMS 3230 America During the 1920s and 1930s (3)
Course provides an interdisciplinary examination of American culture during the turbulent interwar years, 1919 through 1941. Students will examine how the arts, advertising, fashion, and social behavior registered changing cultural values.

AMS 3302 Architecture and the American Environment (3)
By means of slides, lectures and discussion, this course examines 350 years of American architectural history. Architectural styles, aesthetics and the relation between a building and its social environment are stressed.

AMS 3370 Southern Women: Myth and Reality (3)
This course will identify the myths surrounding Southern women, discern their sources and purposes, and contrast them with history.
### COURSE DESCRIPTIONS

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>AMS 3601</td>
<td>Material Culture and American Society (3)</td>
<td>By means of slides, lectures and student projects, examines connections between artifacts and American cultural attitudes from 17th century to present. Topics include: architecture, furniture, gravestones, toys, and the material subcultures of women, African-Americans and communal societies.</td>
<td></td>
</tr>
<tr>
<td>AMS 3605</td>
<td>Working Class Culture in America (3)</td>
<td>An interdisciplinary examination of the cultural identity of American working class families from WWII to present.</td>
<td></td>
</tr>
<tr>
<td>AMS 3615</td>
<td>Film &amp; American Society (3)</td>
<td>This course offers a broad introduction to American cinema history. Exploring the aesthetic and ideological consequences of a variety of genres and modes, it also asks how individual films engage historically specific socioeconomic and cultural context.</td>
<td></td>
</tr>
<tr>
<td>AMS 3700</td>
<td>Racism in American Society (3)</td>
<td>This course examines the roots and contemporary structures of racism in America. Students develop critical, working definitions of race that account for change over time, geography, and co-constructed vectors of power such as class, gender, and sexuality.</td>
<td></td>
</tr>
<tr>
<td>AMS 3930</td>
<td>Selected Topics in American Studies (3)</td>
<td>Offerings include Cultural Darwinism in America, America Through Foreign Eyes, and The Female Hero in American Culture.</td>
<td></td>
</tr>
<tr>
<td>AMS 4210</td>
<td>Regions of America (3)</td>
<td>The pattern of American culture as revealed through an examination of selected writings and other pertinent materials dealing with selected American regions. Topic varies.</td>
<td></td>
</tr>
<tr>
<td>AMS 4305</td>
<td>Photography and American Society (3)</td>
<td>A survey of photography as an art and a craft in America since the mid-nineteenth century. Attention devoted to technological innovations, leading personalities, major movements, and memorable icons. Open to majors and non-majors.</td>
<td></td>
</tr>
<tr>
<td>AMS 4804</td>
<td>Major Ideas in America (3)</td>
<td>Investigates the role of one or more influential ideas in American culture, for example: individualism, identity, community, dissent, reform, utopianism, democracy. Emphasizes the critical analysis of a variety of primary texts. Topic varies.</td>
<td></td>
</tr>
<tr>
<td>AMS 4930</td>
<td>Selected Topics in American Studies (3)</td>
<td>Offerings include the social implications of American painting, Technology in Twentieth Century America, American Environmental Problems, Popular Culture in America, American Military Experience, and Labor in America.</td>
<td></td>
</tr>
<tr>
<td>AMS 4932</td>
<td>Topics in American Film (3)</td>
<td>Topical course on American film genres and themes. Variable topics such as: series on a region, performer, subject, or period of time.</td>
<td></td>
</tr>
<tr>
<td>AMS 4935</td>
<td>Senior Seminar in American Studies (3)</td>
<td>PR: HUM 3804, HUM 4331 and AMS 4936 The American Studies Senior Seminar focuses on the writing of a substantial research paper. Topic varies.</td>
<td></td>
</tr>
<tr>
<td>AMS 4936</td>
<td>American Studies Pro-Seminar (3)</td>
<td>PR: HUM 3804 A course emphasizing the analysis of primary works in relation to cultural contexts, the integration of secondary sources, and the construction of a written argument. Topic varies.</td>
<td></td>
</tr>
<tr>
<td>AMS 4940</td>
<td>Internship in American Studies (3)</td>
<td>A structured, out-of-class learning experience designed to provide first-hand, practical training in careers related to American Studies.</td>
<td></td>
</tr>
<tr>
<td>ANS 3006</td>
<td>Introduction to Animal Science (3)</td>
<td>PR: BSC 2011, BSC 2011L This course will survey the role of poultry, beef cattle, dairy cows, swine, horses, sheep, goats, and aquaculture species in serving humans. Attention will be focused on the nutrition, growth, reproduction, and genetics, in addition to the historical and modern approaches used for each animal industry.</td>
<td></td>
</tr>
<tr>
<td>ANT 2000</td>
<td>Introduction to Anthropology (3)</td>
<td>The cross-cultural study of the human species in biological and social perspective. Surveys the four major branches of anthropology: physical anthropology, archaeology, linguistic anthropology, and cultural anthropology.</td>
<td></td>
</tr>
<tr>
<td>ANT 2410</td>
<td>Cultural Anthropology (3)</td>
<td>Students are exposed to methods and concepts for cross cultural study of the world's peoples. Case studies demonstrate variations in human adaptation and encourage an understanding of and appreciation for diverse cultures and their values.</td>
<td></td>
</tr>
</tbody>
</table>
ANT 2464 Global Health from a Social Science Perspective (3)
Using global health as a lens, this course will introduce students to critical interdisciplinary challenges that will shape the world in the future. It combines classroom and experiential learning while accessing the extraordinary resources of London.

ANT 2511 Biological Anthropology (3)
CR: ANT 2511L
This is an overview of biological anthropology. It covers areas such as evolutionary theory and genetics (critical thinking and scientific process), human variation (diversity), and epidemiology (environment). It also has a historical component.

ANT 2511L Biological Anthropology Laboratory (1)
CR: ANT 2511
This is a lab companion to an overview of biological anthropology. The students will be doing laboratories which are relevant to the class topics covered in the lecture hall in ANT 2511.

ANT 2721 Anthropology of Urban Education in a Globalizing Age (3)
How can anthropology address the major issues in education in the Greater Tampa Bay area? Classwork will help students develop proposals that address pressing educational concerns facing Tampa residents.

ANT 3005 The Anthropological Perspective (3)
Presents the basic concepts of anthropology as they are relevant to contemporary life. Aims at enabling the student to understand the anthropologist's cross-cultural view of the human species as adapting through biosocial means to life on this planet.

ANT 3101 Archaeology (3)
Focuses on critical thinking about the past, archaeological research. Methods, theory, web resources, and scientific analysis in the study of world prehistory, from human origins to modern times.

ANT 3610 Linguistic Anthropology (3)
This course studies language comparatively in cultural and social contexts and examines the role of language in the interpretation of human experience.

ANT 4012 Fantastic Archaeology (3)
Mysteries including the Lost Continent of Atlantis, Ancient Astronauts, Piltdown Man, Psychic Archaeology, Noah's Ark, and the Shroud of Turin will be examined, while emphasizing skills in critical thinking that have much wider practical applications.

ANT 4034 Theories of Culture (3)
The major concepts that form the anthropological view of humanity are viewed in historical perspective. Basic ideas of the western philosophical tradition are analyzed from the Greeks to the 19th century when they became incorporated into the new discipline of anthropology. 20th century anthropological developments on these themes are considered.

ANT 4114 Seminar in Archaeological Method and Theory (3)
PR: ANT 3101 with a grade of C- or better.
Preliminary understanding of basic archaeological methods and theories; examines major theoretical paradigms; learn and practice different types of field methods and analyses of specific materials (i.e., ceramics, lithics, bone, etc.).

ANT 4142 Old World Archaeology (3)
PR: ANT 3101
The archaeology of Europe, Asia and Africa, from the earliest humans through the emergence of state-level societies in many parts of the Old World. The course will focus on comparative aspects of economic, social, political, and religious organization in the prehistoric Near East, Egypt, China, the Aegean, Europe and Africa.

ANT 4143 European Archaeology (3)
PR: ANT 3101
The archaeology of Europe, from the first Paleolithic inhabitants to the fall of Roman civilization. The course will focus on ancient material culture while emphasizing social and economic questions such as the emergence of modern humans, the adoption of agriculture, the development of complex societies, and the rise of civilization.

ANT 4153 North American Archaeology (3)
PR: ANT 3101
An examination of the evidence regarding the human settlement of North America from its beginnings through the development of aboriginal culture to the period of European conquest. Emphasis on the comparative study of material culture at selected sites from all time periods. No field work is involved.

<tbody>
<tr>
<td>ANT 4158</td>
<td>Florida Archaeology (3)</td>
<td>3</td>
<td>ANT 3101</td>
<td>Culture history and culture process over 10,000 years from the time of the first people in Florida (Paleo-Indians) through the elaborate Weeden Island and Safety Harbor burial and temple mound cultures to the Spanish entrada and consequences of European conquest. Review of temporal and spatial relationships within the entire eastern U.S. and elsewhere. May be part of a summer (or other semester) field school, combined with Field Methods in Archaeology and Laboratory Methods in Archaeology.</td>
</tr>
<tr>
<td>ANT 4163</td>
<td>Mesoamerican Archaeology (3)</td>
<td>3</td>
<td>ANT 3101</td>
<td>The chronological sequence from its beginnings through Protohistoric development is described and analyzed. Cultures such as the Maya, Aztec, Mixtec, Zapotec, Olmec, and Toltec are included, with emphasis on the environmental setting and the relationship between cultural ecology and the growth of civilization.</td>
</tr>
<tr>
<td>ANT 4165</td>
<td>South American Archaeology (3)</td>
<td>3</td>
<td>ANT 3101</td>
<td>Describes and analyzes the sequence of cultural development in prehistoric South America. Cultures such as the Inca, Chavin, Mochica, Wari, Chimú are included. Emphasis on the environmental setting and the relationship between cultural ecology and the growth of civilization.</td>
</tr>
<tr>
<td>ANT 4167</td>
<td>Maya, Aztec, and Inka Civilizations (3)</td>
<td>3</td>
<td></td>
<td>This course explores three major civilizations of the pre-Spanish New World from a comparative archaeological framework. Students will gain a broad understanding of the Maya, the Aztecs, and the Inka, as they compare to one another.</td>
</tr>
<tr>
<td>ANT 4172</td>
<td>Historical Archaeology (3)</td>
<td>3</td>
<td>ANT 3101</td>
<td>A survey and analysis of archaeological development focused on the historic period. Laboratory research with data recovered from historic sites in addition to class work.</td>
</tr>
<tr>
<td>ANT 4176</td>
<td>Archaeology of Africa (3)</td>
<td>3</td>
<td></td>
<td>Examine western myths of Africa as a Dark Continent of unsophisticated peoples; fossils revealing Africa as home of the first people; rock art/megaliths of earliest food producers; lives of the ancient pyramid builders; earliest Christian Kingdom.</td>
</tr>
<tr>
<td>ANT 4178</td>
<td>The History &amp; Archaeology of the African Diaspora (3)</td>
<td>3</td>
<td></td>
<td>Rich contributions made by African peoples to life ways outside its borders; reviewing the history of the African Diaspora; identify the earliest migrations of the African peoples into Europe and Southwest Asia.</td>
</tr>
<tr>
<td>ANT 4180</td>
<td>Laboratory Methods in Archaeology (3)</td>
<td>3</td>
<td>ANT 3101</td>
<td>Data and materials recovered from archaeological survey and excavation are processed in the laboratory; includes artifact cleaning, cataloguing, identification, and analysis; soil flotation; reconstruction and conservation of artifacts, mapmaking, etc. May be offered as part of a summer (or other semester) field session. May be combined with Florida Archaeology and Field Methods in Archaeology.</td>
</tr>
<tr>
<td>ANT 4181</td>
<td>Museum Methods (3)</td>
<td>3</td>
<td>ANT 3101</td>
<td>Design, preparation and installation of exhibits in the Department of Anthropology Teaching Exhibit Gallery. Emphasis on theory, research, design, and construction. Discussion of museum-related issues such as administration and curation.</td>
</tr>
<tr>
<td>ANT 4183C</td>
<td>Archaeological Science (4)</td>
<td>4</td>
<td>ANT 3101</td>
<td>This course focuses on the application of scientific methods of analysis to archaeological materials including bone, stone, pottery, and metal. Methods include absolute dating, remote sensing, optical and SEM microscopy, elemental and isotope analysis. Laboratory sections provide hands-on experience with a variety of archaeological materials and analytical methods.</td>
</tr>
<tr>
<td>ANT 4185</td>
<td>Ancient Diets (3)</td>
<td>3</td>
<td>ANT 3101</td>
<td>Study of archaeological remains informing us about ancient diet, including fauna and flora, microscopic soil and ceramic residues, chemical analyses of human tissues, coprolites, gut contents, tooth wear patterns, visual/artistic and written information.</td>
</tr>
<tr>
<td>ANT 4197</td>
<td>Archaeology of Death and Burial (3)</td>
<td>3</td>
<td></td>
<td>This course examines mortuary practices cross-culturally and from an archaeological perspective to reveal both similarities and differences in the ways that societies around the world and through time deal with death and bury the dead.</td>
</tr>
<tr>
<td>ANT 4241</td>
<td>Anthropology of Religion (3)</td>
<td>3</td>
<td>ANT 2000, ANT 2410</td>
<td>The cross-cultural study of the social and cultural aspects of religion will be explored. Religious activities in traditional and modern societies will be discussed. Ritual behavior, religious practitioners, and symbols of belief will be considered.</td>
</tr>

<tr>
<td>ANT 4243</td>
<td>The Middle East and North Africa (3)</td>
<td>PR: ANT 2410</td>
<td>Studying the beliefs and practices of Middle Eastern and North African societies through the perspective and engagement with humanity that is anthropology. The focus is on different Islamic societies, and the effects on them of western influence.</td>
</tr>
<tr>
<td>ANT 4260</td>
<td>Ancient Trade (3)</td>
<td>PR: ANT 3101</td>
<td>This course focuses on long-distance trade and contact in ancient times, based on archaeological evidence and scientific studies, and how this informs us about sociopolitical systems and economic relations and how they vary over time and space.</td>
</tr>
<tr>
<td>ANT 4285</td>
<td>Oral History (3)</td>
<td>PR: ANT 2410</td>
<td>A survey of history, methods and current applications of oral history research from an anthropological perspective.</td>
</tr>
<tr>
<td>ANT 4302</td>
<td>Gender in Cross-Cultural Perspective (3)</td>
<td>PR: an anthropology or a women's studies class</td>
<td>Examines roles of women, men, other genders and social, economic, and political aspects of sex and gender, from a biocultural, 4-field anthropological perspective, emphasizing non-Western societies and cross-cultural comparison in past and present.</td>
</tr>
<tr>
<td>ANT 4312</td>
<td>North American Indians (3)</td>
<td>PR: ANT 2410</td>
<td>An examination of the evidence for the origin and antiquity of human beings in North America and of patterns of regional development until the period of contact with European colonists. Emphasis on varieties of ecological adaptation, social, political and religious systems, enculturation and worldview, folklore and visual art.</td>
</tr>
<tr>
<td>ANT 4316</td>
<td>Ethnic Diversity in the United States (3)</td>
<td>PR: ANT 2410</td>
<td>Special concerns include ethnic diversity in American society, historical and contemporary diversity in values, experiences, and lifestyles, and an examination of policies and problems affecting ethnic groups in the United States.</td>
</tr>
<tr>
<td>ANT 4323</td>
<td>Mexico and Central America (3)</td>
<td>PR: ANT 2410</td>
<td>Focuses on the history, contemporary values and interpersonal relationships, and patterns of rural and urban life in Mesoamerica. Guatemala and Mexico are emphasized.</td>
</tr>
<tr>
<td>ANT 4340</td>
<td>The Caribbean (3)</td>
<td>PR: ANT 2410</td>
<td>Main themes include: the depopulation of the aboriginal population and the resettlement of the area via slavery, indenture, and migration; contemporary ethnic heterogeneity; economic problems of Third World microstates; development of a modern social and political consciousness. Religious diversity, music, the graphic arts, and the literature of the contemporary Caribbean will also be surveyed.</td>
</tr>
<tr>
<td>ANT 4352</td>
<td>Peoples of Africa (3)</td>
<td>Dispel myths &amp; stereotypes of Africa; focus on African geography, history, Western misperceptions of Africa, African worldviews, philosophy, literature, health issues, debt relief, refugees, &amp; food acquisition, security.</td>
<td></td>
</tr>
<tr>
<td>ANT 4390</td>
<td>Visual Anthropology (3)</td>
<td>PR: ANT 2410</td>
<td>The use of photographic techniques for the cross-cultural recording and analysis of human activities. The study of ethnographic photography as both art and science, and the production of an anthropological study that expresses the goal of &quot;visual literacy.&quot; Review and evaluation of the uses of visual techniques and the evidence they provide to the social scientist.</td>
</tr>
<tr>
<td>ANT 4401</td>
<td>Exploring Cross-Cultural Diversity (3)</td>
<td>This course will address a variety of challenging issues related to the general topic of cross-cultural diversity in contemporary American life.</td>
<td></td>
</tr>
<tr>
<td>ANT 4403</td>
<td>Environmental Anthropology (3)</td>
<td>PR: ANT 2410</td>
<td>Explores cultural, social, political, and economic dimensions of contemporary environmental problems. Emphasis placed on the links between local-level environmental degradation and broader regional and global forces.</td>
</tr>
<tr>
<td>ANT 4432</td>
<td>The Individual and Culture (3)</td>
<td>PR: ANT 2410</td>
<td>The relationship between the individual and society is studied cross-culturally. Main themes include child-rearing practices, psychosomatic illness and curing. Discussion of theories and models of personality development with special reference to their applicability to the emerging field of cross-cultural mental health planning.</td>
</tr>
<tr>
<td>ANT 4442</td>
<td>Urban Life and Culture (3)</td>
<td>PR: ANT 2410</td>
<td>The cross-cultural study of urbanization, urbanism and human problems associated with metropolitan environments. Emphasis on the ethnography of city life and its relationship to the practical applications of urban research.</td>
</tr>
</tbody>
</table>
ANT 4445 Ancient Cities and Sustainability (3)
This course is an introduction to the process of urbanism and the rise of pre-industrial cities around the world. The course will focus on the challenges that have faced urban dwellers through the ages and how they have met/failed to meet those challenges.

ANT 4462 Health, Illness, and Culture (3)
PR: ANT 2410
The study of health and human behavior in cross-cultural perspective. Main themes include: the impact of disease on the development of human culture; comparative studies of curing practices; medical systems in their relationship to ideology. Emphasis on understanding the role of medicine, and the behavior of both practitioners and patients in modern societies.

ANT 4465 Anthropology of Food (3)
PR: ANT 2410
Examines the ways that anthropologists write and think about food, beginning with the basic anthropological perspective on food, then looking at food as a part of social rules and the life passage.

ANT 4467 Food, Health, and Culture (3)
PR: ANT 2000 or ANT 2410 or ANT 2511
Basic human nutritional needs & their evolutionary foundation; reconstruction of past diets; relationship between food, health & medicine; food & disease; food in religion; gender and food; food in cross-cultural perspective; political economy of food.

ANT 4468 Biocultural Bases of Health and Disease (3)
PR: ANT 2511 or BSC 1005
Study of the socio-cultural and evolutionary bases of health and disease, including such factors as evolution, genetics, environment, and socio-economics.

ANT 4472 Work and Migration in the Americas (3)
PR: ANT 2410
With a focus on the intersections of class, race, gender, and citizenship, this course examines experiences of work and migration in the Americas to better understand the consequences of globalization.

ANT 4475 Anthropology of Childhood (3)
This course is an exploration of the emerging subfield of anthropology and childhood, engaging with literature on children, childhoods, and youth around the globe. Students read a wide variety of perspectives on anthropology and childhood.

ANT 4495 Methods in Cultural Research (3)
The stages in the development and execution of ethnological research are discussed and practiced. Literature search, hypothesis formation, selection of data collection techniques, elicitation of information, data analysis, and report presentation are stressed. Research design models from the case literature are studied and supervised research in the local community is designed and carried out.

ANT 4516 Human Variation (3)
PR: ANT 2511
An overview of evolution and biological variations of human races. Anatomical, morphological, and physiological patterns are surveyed geographically. Cultural influences on racial biology are explored.

ANT 4520C Forensic Anthropology (4)
PR: ANT 2511
This course is designed to familiarize students with forensic anthropology through lectures and lab work. Students will learn human skeletal biology for personal identification and cause of death. This course is restricted to majors and is not repeatable.

ANT 4525 Human Osteology and Osteometry (3)
PR: ANT 2511 and ANT 2511L
The identification of human skeletal remains, including: instrumentation and procedures; techniques for determining age at death, sex, and ancestry; and measurement of the human skeleton for comparative purposes.

ANT 4532 Anthropology of Infectious and Contagious Diseases (3)
PR: ANT 2410
CR: ANT 2511
This course is on communicable diseases and their transmission, cures, and change with time and technology. We will situate infectious and contagious diseases in their historical and cultural context by looking at the anthropology of these ideas.

ANT 4536 Bioarchaeology (3)
PR: ANT 2511 and ANT 2511L
The study of human skeletal remains from archaeological sites, drawing on techniques from archaeology, anatomy, biology, chemistry, pathology, demography, and history to reconstruct individual lives and collective population histories across the globe.

ANT 4586 Prehistoric Human Evolution (3)
PR: ANT 2511
A survey of the fossil record from the early primates through the ascent of Homo sapiens, focusing on the human lineage. Biosocial patterns and cultures of the past are also covered.
COURSE DESCRIPTIONS
(AS OF SEPTEMBER 20, 2021)

UNIVERSITY OF SOUTH FLORIDA 2021-2022 UNDERGRADUATE CATALOG

ANT 4593 Evolution and Health (3)
PR: ANT 2511
Using an evolutionary framework to develop scientific hypotheses, this course inquires into the origins and causes of illness. Students will use a variety of critical methods to track down evolutionary explanations for disease.

ANT 4620 Language and Culture (3)
PR: ANT 3610
Examines the relationships between language and culture in cross-cultural perspective. Explores the extent to which languages shape the world views of their speakers. Emphasis on the nature and degree of fit between linguistics and other cultural systems of knowledge.

ANT 4701 Applied Anthropology (3)
A review of approaches to applying the anthropological perspective to contemporary human problems. Discussion of the historical development of applied anthropology, the ethics of applied research, and careers in applied settings.

ANT 4750 Language and Social Interaction (3)
PR: ANT 3610
Examines the role of language and other modes of communication in the social settings of speech communities. Student field projects focus on the cross-cultural description and analysis of patterns of communication in ethnographic contexts.

ANT 4824 Archaeological Field Methods (2)
PR: ANT 3101
Offered as all or part of a summer (or other semester) field session. May or may not be combined with Florida Archaeology and Laboratory Methods in Archaeology. Students learn appropriate methods of archaeological survey, excavation, data and materials recovery, recording, and processing.

ANT 4901 Directed Reading (4)
Individual guidance in concentrated reading on a selected topic in anthropology. Contract required prior to registration.

ANT 4905 Individual Research (4)
Individual guidance in a selected research project. Contract required prior to registration.

ANT 4930 Special Topics in Anthropology (3)
Topics to be chosen by students and instructor permitting newly developing sub-disciplinary special interests to be explored.

ANT 4932 Honors Seminar (3)
Seminar designed to provide the honors student with an opportunity to present, discuss and defend his/her own research and to explore in-depth topics in several areas of anthropology.

ANT 4935 Rethinking Anthropology (3)
This course is the senior seminar in anthropology. The objectives are to reflect upon and integrate major material covered in previous courses, to reflect upon the status on the discipline of anthropology, and to allow students to determine where they see themselves within the discipline. We will reflect upon the four fields of anthropology and ethics, as well as key issues such as evolution, race, and culture, and students are encouraged to integrate their knowledge from previous classes.

ANT 4940 Directed Internship Including Practicum (4)
Individual guidance in a selected internship. Contract required prior to registration. Majors and non-majors. May be repeated for credit; max 6 total hours.

ANT 4970 Honors Thesis (3)
PR: ANT 4932
The student under the supervision of a faculty member will formalize, conduct, analyze, and report in writing a research project in anthropology.

APK 3110 Exercise Physiology I (3)
A study of the effects of physical activity on the body. Topics include acute and chronic adaptation of the cardiovascular, muscular, metabolic, hormonal, and energy systems to exercise. Open to non-majors.

APK 3120 Exercise Physiology (3)
This course is designed to explore physiological adjustments and adaptations that occur as the result of exercise. The main focus will be on exercise-induced changes in the metabolic, cardiovascular, respiratory, neuromuscular, and endocrine systems.

APK 4134 Exercise Physiology II (3)
A study of Exercise Physiology focusing on the adult. Includes specific populations such as the obese, heart patients, arthritis, elderly, and high performance athletes.

APK 4138C Applications of Strength and Conditioning (3)
PR: PET 4093 with a minimum grade of C
Applications of Strength and Conditioning is designed to provide practical exposure to concepts and practices within the field of strength and conditioning. This course will cover content related to exercise technique, assessment, and program design.

ARA 1120 Modern Arabic I (4)
An intensive study of basic skills: pronunciation, listening comprehension, speaking and some composition.
<table>

<tr>
<td>UNIVERSITY OF SOUTH FLORIDA 2021-2022 UNDERGRADUATE CATALOG</td>
</tr>
</tbody>
</table>

### ARA 1121 Modern Arabic II (4)
- **PR:** ARA 1120 or its equivalent
- A continuation of ARA 1120. More sophisticated oral/aural skills are attained. Basic reading skills are acquired.

### ARA 2220 Modern Arabic III (4)
- **PR:** ARA 1121 or the equivalent.
- For language students who intend to attain basic proficiency.

### ARA 2221 Modern Arabic IV (4)
- **PR:** ARA 2220 or the equivalent.
- Practice of writing, speaking and listening skills for language students who intend to attain basic proficiency.

### ARA 4905 Directed Study (5)
- Permits study options in Arabic not available in regularly scheduled curriculum at departmental discretion.

### ARA 4930 Selected Topics (3)
- Course permits classes in Arabic not available in the regularly scheduled curriculum at departmental discretion.

### ARC 2112L Architectural Freehand Drawing Methods (4)
- This course provides an introduction to basic freehand drawing with an emphasis on observational drawing, mapping, gesture, and drawing as a means of orientation. The student is introduced to a wide range of drawing methods, media and concepts.

### ARC 2131C Introduction to Architectural Design and Graphics (4)
- An introduction to fundamental "critical thinking" and graphic communication skills in architecture.

### ARC 2135C Introduction to Architectural Design & Graphics II (4)
- **PR:** ARC 2131.
- This course explores fundamental issues of space-making and perception of space, scale and habitation. In addition, this course builds on the skills and knowledge developed in the first introductory course through analysis and interpretation of specific works.

### ARC 2180 Introduction to Digital Architecture (3)
- The Introduction to Digital Architecture course introduces students to various software utilized by Architects in the field such as, AutoCad, Sketch-up, StudioMax, Photoshop, etc.

### ARC 2211 Introduction to Architecture (3)
- An introduction to the analysis and interpretation of the architecture and urban design of various cultures.

### ARC 2701 Architectural History I (3)
- Overview of the built environment from prehistory through the Middle Ages. Buildings and cities in their geographical, topographical, political, aesthetic, social, technological and economic context.

### ARC 2702 Architectural History II (3)
- Overview of the built environment from the Middle Ages to the present. Buildings and cities in their geographical, topographical, political, aesthetic, social, technological and economic context.

### ARC 2931 Selected Topics (3)
- Selected topics will include architectural diagramming, freehand drawing, model making, photography, and computer graphics. Courses are intended for nonmajors and are repeatable.

### ARC 4376 Architecture for Real Estate & Development (3)
- The course introduces the basic processes necessary for large scale projects and developments. Numerous professions are explained from varying points of view to allow participants to better understand how buildings get built and land developed.

### ARC 4541 Physics for Architects (3)
- **PR:** MAC 1105
- Physics for Architects is a study of physical concepts / problems applicable to current and future graduate architecture student, creating a foundation for technical issues of structures, environmental technology & construction methods.

### ARC 4757 Made in Italy: Italian Design and Interdisciplinary Coherence (3)
- This course explores Italian design as a way to understand the coherence among differing fields of study. By discovering shared cross-disciplinary themes found in Italian design, students will gain new insights which will enlighten their own studies.

### ARC 4784 The City (3)
- This course examines the history of the city, as both idea and reality, with a particular focus on Western cities, and the 20th century. The course is open to undergraduates and students in the Graduate Architecture Program.

### ARC 4884 Sustainable Neighborhood Development (3)
- This course will focus on understanding and evaluating sustainable neighborhood development strategies, using multiple concepts, practices and approaches.
COURSE DESCRIPTIONS
(AS OF SEPTEMBER 20, 2021)

ARC 4931 Selected Topics in Architecture and Community Design (3)
Variable topics will be offered for pre-professional studies for students in the Liberal Studies Major/ALA Degree Program and as electives for other undergraduates.

ARH 2000 Art and Culture (3)
This course offers students an enhanced appreciation and understanding of art. Student will critically evaluate a broad range of imagery, media, artists, movements and historical periods in the visual arts.

ARH 2050 History of Visual Arts I (3)
Survey of World Art to AD 1300. Introduction to problems of analyzing and interpreting the art of various cultures without making the Western perspective a privileged one.

ARH 2051 History of Visual Arts II (3)
Survey of World Art since 1300 CE. Introduction to problems of analyzing and interpreting the art of various global cultures without making the Western perspective a privileged one.

ARH 3001 Introduction To Art (3)
This online course investigates the histories of art, asking a range of questions about periods, cultures, styles of art making. We explore the experience of viewing art, inquiring into its many forms and definitions, historically and in the present.

ARH 4115 Ancient Egyptian and Near Eastern Art (3)
A study of the art and cultures of ancient Egypt and the Near East, from the prehistoric period through the conquests of Alexander the Great.

ARH 4130 Greek Art (3)
A comprehensive study of ancient Greek sculpture, painting, architecture, and other artistic media from the Bronze Age through the Hellenistic period.

ARH 4151 Roman Art (3)
A comprehensive study of ancient Roman sculpture, painting, architecture, and other artistic media from the founding of Rome through the reign of Constantine.

ARH 4170 Greek and Roman Art (3)
A comprehensive study of Aegean, Mycenaean, Etruscan, Greek and Roman painting, sculpture and architecture.

ARH 4200 Medieval Art (3)
A comprehensive study of early Christian, Byzantine and Medieval painting, sculpture, architecture and manuscript illumination.

ARH 4301 Renaissance Art (3)
A comprehensive study of Renaissance and Mannerist painting, sculpture and architecture in Italy and Northern Europe.

ARH 4310 Early Italian Renaissance (3)
PR: ARH 2050 or ARH 2051
History of the visual arts in Italy from ca. 1220 to 1493, in the era commonly called the early Renaissance.

ARH 4312 Late Italian Renaissance (3)
PR: ARH 2050 or ARH 2051
This course focuses on the visual arts of Italy of the later Renaissance, from c. 1490 to 1576, with some reference to the broader context of art in the rest of Europe and the world.

ARH 4318 Venetian Art (3)
Major monuments of Venetian art are examined to elucidate the importance of Venice as the crossroads of cultural exchange between Islam, Byzantium, and the West, and the importance of Venetian art to the history of art and art criticism.

ARH 4333 Northern Renaissance Art (3)
PR: ARH 2050 or ARH 2051
Introduction to the history of Northern Renaissance Art, that is, art from northern Europe, esp. the Netherlands, Germany and France, from the late Middle Ages to the early modern era (14th through 16th centuries).

ARH 4350 Baroque and Rococo Art (3)
A comprehensive study of the painting, sculpture and architecture in France, Italy, Spain and the Netherlands in the seventeenth and early eighteenth centuries.

ARH 4430 Nineteenth Century Art (3)
A comprehensive study of nineteenth century painting, sculpture and architecture in America and Europe. Gender/multicultural issues and methodologies in 19th century art are emphasized.

ARH 4450 Twentieth Century Art (3)
A comprehensive study of painting, sculpture and architecture from Cezanne to the present in Europe and the United States. Required of all art majors.

ARH 4455 Modern Political Iconography (3)
The course explores art in which political themes are considered to be the source and determinant of aesthetic decisions. The dominant iconographic theme is the iconography of revolution, rebellion, and other forms of political struggle in 20th Century art and film.

</tr>
</thead>
<tbody>
<tr>
<td>ARH 4475C</td>
<td>Contemporary Issues in Art (3)</td>
<td>PR: ARH 4450</td>
<td>A study of the principles and techniques of educational measurement as applied to the teaching of physical education; study of the functions and techniques of measurement in the evaluation of student progress toward the objectives of physical education.</td>
</tr>
<tr>
<td>ARH 4530</td>
<td>Asian Art (3)</td>
<td></td>
<td>An introduction to concepts of the arts of China, Japan and other Far Eastern countries.</td>
</tr>
<tr>
<td>ARH 4557</td>
<td>Chinese Art (3)</td>
<td></td>
<td>Chinese Art proceeds chronologically, from the Neolithic era up to the contemporary art world. The course considers cultural, linguistic, technical, philosophic, political and religious influences on the art works produced by this ancient society.</td>
</tr>
<tr>
<td>ARH 4571</td>
<td>Themes in Islamic Art and Architecture (3)</td>
<td>PR: ARH 2050</td>
<td>This course examines Islamic art and architecture in relationship to the cultural, religious, and sociopolitical values and practices that unified Muslims from Europe to South Asia from the advent of Islam in the seventh century to the present day.</td>
</tr>
<tr>
<td>ARH 4710</td>
<td>History of Photography (3)</td>
<td>PR: ARH 2051</td>
<td>Comprehensive overview of the history of photography from its inception to the present day with an emphasis on the relationship of photography to the visual arts and popular culture.</td>
</tr>
<tr>
<td>ARH 4721C</td>
<td>History of Printmaking (3)</td>
<td></td>
<td>The history of Western printmaking from the Middle Ages to contemporary times, with an emphasis on artmaking technology and research, cultural perspectives and theoretical/critical analytical capabilities. The course is open to majors and non-majors. It is not repeatable for credit.</td>
</tr>
<tr>
<td>ARH 4724</td>
<td>History of Graphic Design (3)</td>
<td></td>
<td>This course surveys the design profession and the graphic design discipline. Students will explore graphic styles from the turn of the century to contemporary works, highlighting the innovations of influential designers throughout history.</td>
</tr>
<tr>
<td>ARH 4744</td>
<td>Selected Topics in the History of Film (3)</td>
<td></td>
<td>In-depth investigation of a selected period, development, or school in the history of film as art.</td>
</tr>
<tr>
<td>ARH 4800</td>
<td>Critical Studies in Art History (3)</td>
<td>PR: Two advanced Art Histories</td>
<td>Specialized intensive studies in art history. Specific subject matter varies. To be announced at each course offering.</td>
</tr>
<tr>
<td>ARH 4890</td>
<td>Paris Art History (3)</td>
<td>PR: Minimum 8 hours of art history at the undergraduate level or equivalent</td>
<td>This course will explore issues central to the history and criticism of art through the rich visual culture of Paris. Themes will include art and national identity, orientalism, the avant-garde and the role of the museum in the evolution of modern art.</td>
</tr>
<tr>
<td>ARH 4930</td>
<td>Art History: Selected Topics (3)</td>
<td></td>
<td>Lecture/discussion course designed to offer areas of expertise of visiting scholars or specific interests of resident faculty.</td>
</tr>
<tr>
<td>ARH 4940</td>
<td>Art History Practicum (1)</td>
<td>PR: Open to declared Art History majors in their final semester of degree instruction</td>
<td>Short description: This course facilitates a summative assessment as well as vocational guidance for the Art History major in preparation for formulating and realizing future vocational goals. Long description: This course is required for all Art History majors and is ideally taken in the last semester of degree instruction. Students will receive individualized guidance as they revise and submit their degree assessment papers, also meant to serve as application writing samples for graduate school or employment. Students will receive vocational direction as they prepare curriculum vitae and job and graduate school applications.</td>
</tr>
<tr>
<td>ART 2201C</td>
<td>Concepts and Practices I (3)</td>
<td></td>
<td>Introduce students to diverse art studio practices and concepts where topics include forms of communication, sourcing inspiration, and critical theory. Studio projects are augmented by lecture, discussion, reading, writing and critical analysis.</td>
</tr>
<tr>
<td>ART 2203C</td>
<td>Concepts and Practices II (3)</td>
<td>PR: ART 2201C</td>
<td>Continuation of ART 2201 building on diverse art studio practice and concepts including crafting an artistic self, measuring success, and examining the artists role. Art projects are augmented by lecture, discussion, reading, writing and critiques.</td>
</tr>
<tr>
<td>ART 2251 Illustration I (3)</td>
<td></td>

| PR: ART 2203C, ARH 2050, ARH 2051, ART 2301C, ART 3310C, ART 2500C, ART 3530C
| Selected Topics in Painting is an intermediate course providing focused exploration of content specific to the discipline. It furthers the development of skills and critical discourse in the field. Majors only. Repeatable up to 15 hours. |
ART 3530C Intermediate Painting (3)
PR: ART 2201C, ART 2203C, ART 2301C, ART 2500C, ART 3310C, ARH 2050, ARH 2051
An extension of the skills and concepts introduced in Beginning Painting with an emphasis on individual experimentation and the development of advanced critical and technical skills in the discipline. Repeatable up to 15 hours.

ART 3610C Digital Modeling (3)

ART 3612C Beginning Video, Animation and Digital Arts (3)
An introductory exploration of the use of video, animation, and digital art as media for making contemporary art. Emphasis is on all levels of production, concept development, and the history and theory of media, moving image, sound, and animation.

ART 3613C Live Action Filmmaking (3)
PR: ART 3612C.
Students develop a comprehensive understanding of Independent Cinema by producing short film projects. Topics include scriptwriting, professional production tools and practices, and exhibition. Non-repeatable. For majors and non-majors with prerequisite.

ART 3616C Computer Animation (3)
PR: ART 3612C
Hands-on exploration of issues, principles, and practices involved in the creation of 2D animation. Traditional methods are combined with animation and imaging software. Focus is on individual creative growth.

ART 3618 Technology Essentials for Artists (3)
Course provides foundation in the use of technology for Fine Arts majors. Technical and critical skills used to deploy media in the documentation, presentation and promotion of their production in traditional art mediums are explored.

ART 3635 Selected Topics in Video, Animation & Digital Arts (3)
Selected Topics in VADA is an intermediate course providing focused exploration on content specific to the discipline. It furthers the development of skills and critical discourse in the field. Majors only. Repeatable up to 15 hours.

ART 3640 The Art of Video Games (3)
The Art of Video Games investigates the emerging role that fine art plays within the video game medium. Students research connections between contemporary art practice and the commercial video game industry and create their own video game.

ART 3709C Intermediate Sculpture (3)
This course expands upon the principles and processes introduced in Beginning Sculpture, developing a higher level of technical competence and critical sophistication. Repeatable up to 15 hours.

ART 3712C Multiples, Molds, and Bronzecasting (3)
PR: ART 2701C and ART 3709C
Continued studies and projects in sculpture with an emphasis on the nature of multiples explored through advanced mold making and bronzecasting. This course may not be repeated for credit. The conceptual implications of the multiple will be taught through reading, lecture, discussion and demonstration.

ART 3735 Selected Topics in Sculpture (3)
PR: ART 2203C, ARH 2050, ARH 2051, ART 2301C, ART 3310C, ART 2701C, ART 3709C
Selected Topics in Sculpture is an intermediate course providing focused exploration of content specific to the discipline. It furthers the development of skills and critical discourse in the field. Repeatable up to 15 hours.

ART 3761C Intermediate Ceramics (3)
Intermediate problems in ceramics and emphasis on the exploration of methods and media and the development of individual concepts. Repeatable up to 15 hours.

ART 3781C Selected Topics in Ceramics (3)
PR: ART 2203C, ARH 2050, ARH 2051, ART 2301C, ART 3310C, ART 2750C, ART 3761C
Selected Topics in Ceramics is an intermediate course providing focused exploration of content specific to the discipline. It furthers the development of skills and critical discourse in the field. Majors only. Repeatable up to 15 hours.

</tbody>
</table>
ASH 2270 Southeast Asian History (3)
This course examines the origins and development of Southeast Asian history over the past two millennia. Southeast Asia is comprised of Burma, Thailand, Laos, Cambodia, Vietnam, Malaysia, Singapore, Brunei, Indonesia, the Philippines, and East Timor.

ASH 3404 Modern China (3)
Political, economic, and social history of China from the time of the first major Western contacts (17th-18th Centuries) through the consolidation of socialism in the late 1950's, and the Great Leap Forward.

ASL 2140C Basic American Sign Language (4)
Introduction to American Sign Language (ASL) as used in the deaf community. General discussion of ASL structure and introduction to various manual communication systems and philosophies. Emphasis on building a basic vocabulary. One hour of laboratory course work is included. Open to all majors.

ASL 2150C Intermediate American Sign Language (4)
PR: ASL 2140C
A continuation of the basic course which expands the student's signing skills and introduces American Sign Language (ASL) idioms. Provides a greater opportunity for skill development in ASL structure and idiomatic usage. One hour of laboratory course work is included.

ASL 2160C Advanced American Sign Language (3)
PR: ASL 2150C
A continuation of the study of American Sign Language (ASL) at the advanced skill level. Added emphasis on idioms, body language, and facial expression as an integral part of ASL. An hour of laboratory course work is included.

ASL 2220C American Sign Language 4 (3)
PR: ASL 2160C
This course is a continuation of the study of American Sign Language (ASL) at the highly advanced level. It provides added emphasis on skill development of the language, including storytelling and poetry. One-hour laboratory course work is included.

ASL 2300C Structure of Sign Language (3)
PR: ASL 2160C
This course is a basic introduction of semiotic and linguistic consideration of American Sign Language (ASL). It includes aspects of phonology, morphology, syntax, semantics, and discourse of ASL. A one-hour laboratory is incorporated into the coursework.

ASL 3005 History of the Deaf Community (3)
Topics in the history of the Deaf community in the U.S. from the Eighteenth Century to the present, including language, culture, identities, education, labor, political, eugenics, and organizations.

ASL 3324 Advanced ASL Discourse (3)
PR: ASL 2140C, ASL 2150C, ASL 2160C, ASL 2220C, ASL 2300C
This course will focus solely on developing language skills within ASL, which are preliminary steps for interpretation, and will also address the development of student's ability to segment information and perform various cognitive tasks intralingually.

ASL 3505 Advanced Deaf Cultural Studies (3)
PR: ASL 3514 with a minimum grade of C-
Advanced concepts relative to American Deaf culture, including cultural conflicts, tensions, and contradictions. Comprehensive study of the Deaf-World through analysis of historical events, current issues, and expressions of Deaf people themselves.

ASL 3514 Deaf Culture (3)
This is an introduction to Deaf culture, the emergence of the Deaf community as a linguistic and cultural group, and the history of American Sign Language. Students will study cultural norms, values, and rules of social behavior of the Deaf community.

ASL 3517 Audism Linguicism and Systems of Oppression (1)
PR: ASL 2140C with a minimum grade of B-, ASL 2150C with a minimum grade of B-, ASL 2160C with a minimum grade of B-, ASL 2220C with a minimum grade of B-, ASL 2300C with a minimum grade of B-
Examines various forms of oppression through a comparative study spanning cultures and communities. Examines parallels between common forms of oppression and forms specific to the Deaf-World.

ASL 4202 American Sign Language 5 (3)
PR: ASL 2220C with a minimum grade of C-
This course is a continuation of the study of American Sign Language (ASL) at an advanced level. Emphasis on skill development of the language and grammar, including spontaneous discussions, formal debates on current topics, and rehearsed presentations.

ASL 4405 Sign Language Codes (3)
A review of the sign systems (SEE I, SEE II, LOVE, and Signed English) used to code messages through the use of sign. The student will have the opportunity to practice one of the sign systems.

</table>
AST 4217 Stellar Astrophysics (3)
PR: PHY 3101 with a minimum grade of C
An introduction to the physics of stars, including their birth, chemical make-up, interior processes, evolution, and eventual end states. Topics will include the H-R diagram, polytropic models, white dwarfs, neutron stars, black holes, and supernovae.

AST 4721L Astrophysics Laboratory (3)
CPR: PHY 3822L with a minimum grade of C
Advanced-level laboratory in astronomy and astrophysics expanding on topics covered in Modern Physics. Experiments include photometry, emission and absorption spectroscopy, speed-of-light measurement, data analysis, and telescope observations.

ATR 1000 Introduction to Athletic Training (3)
The purpose of this course is to familiarize students with the field of athletic training and the preparation necessary to become an athletic trainer.

ATR 2010C Care and Prevention of Physical Injuries (3)
Principles and techniques of conditioning athletes for competition; prevention and care of injuries in physical education and athletic activities.

ATR 3123 Foundations of Athletic Training (3)
PR: ATR 3213C, ATR 3102C.
Foundational topics in athletic training including anatomy review as it relates to diagnosis and treatment of athletic injuries. Other topic areas to include pharmacology, environmental issues and other current topics in athletic training. AT Majors only.

ATR 3132 Kinesiology and Pathomechanics (3)
A study of the structure and function of the skeletal and muscular systems and of mechanical principles related to psycho-motor performance. Open to non-majors.

ATR 3132 Therapeutic Modalities (3)
This course provides an introduction to the theoretical and practical applications of modalities for the prevention, management and rehabilitation of physically active individuals. Concepts pertaining to the use of pharmacology, thermotherapy, cryotherapy, electrical stimulation, hydrotherapy, fluidotherapy, ultrasound, biofeedback and manual techniques will be emphasized.

ATR 4504 Seminar in Sports Medicine (3)
PR: ATR 4432.
The advanced study, writing, reflection and discussion of current athletic training issues. Emphasis is on professional preparation, scientific inquiry, credentialing, governance, employment practices, ethics, and scope of practice issues.

BCH 3023 Introductory Biochemistry (3)
Introduction to the chemistry and intermediary metabolism of biologically important substances.

BCH 3023L Basic Biochemistry Laboratory (2)
CPR: BCH 3053 with a minimum grade of C or BCH 4033 with a minimum grade of C
Practical work in determination and characterization of important biomolecules. Lec.-lab.

BCH 3053 General Biochemistry (3)
PR: CHM 2210 and BSC 2010
This course is a one-semester, introductory course in Biochemistry. This course is open to all majors and strongly recommended for Biomedical Science majors. This course is not repeatable for credit.

BCH 4033 Advanced Biochemistry I (3)
PR: CHM 2211 and BSC 2010
An advanced undergraduate course emphasizing such topics as metabolic regulation, DNA and RNA structure and function, receptors, channels, antibodies, and contraction.

BCH 4034 Advanced Biochemistry II (3)
PR: BCH 4033 with a minimum grade of C
An advanced undergraduate course emphasizing such topics as metabolic regulation, DNA and RNA structure and function, receptors, channels, antibodies, and contraction.

BME 3032 Biomedical Transport Process (3)
PR: EGN 3343 with a minimum grade of C, EGN 3433 with a minimum grade of C or MAP 2302 with a minimum grade of C
Introduction to the principles of momentum, mass and heat transport. Mathematical modeling of transport in one dimension and obtain solutions for fluxes and profiles. To utilize them to obtain engineering quantities.

BME 3053 Computer Programming for BME (3)
PR: MAC 2283 or MAC 2313 with minimum grade C & PHY 2049 or PHY 2061 with minimum grade C or AP equivalent
CPR: EGN 3433 with a minimum grade of C or MAP 2302 with a minimum grade of C
Computer usage in biomedical engineering. Use of computer methods to solve biomedical engineering problems. Solution of linear and nonlinear algebraic and differential equations that arise in biomedical engineering. Optimization methods.
BME 3082 Ethics for Biomedical Engineers (3)
CPR: BME 4056C with a minimum grade of C
This course raises students' awareness about current ethical and professional issues in biomedical engineering. Students develop skills that broaden their perspectives and prepare them to engage in the society through practice in the biomedical field.

BME 3312 Molecular and Cellular Engineering (1)
PR: BSC 2010 minimum grade C or AP equivalent
CPR: CHM 2210 minimum grade C
This course is designed to convey the basics of biological systems and the roles that engineers play in industrial biology to engineering students (primarily) and to students that are majoring in other sciences.

BME 4056C Biomedical Engineering Lab I (2)
PR: BME 4503 with a minimum grade of C, BME 4508 with a minimum grade of C
CR: EGN 3443 with a minimum grade of C
Biomedical instrumentation design, data acquisition, processing and analysis of physiological systems, including cardiovascular, respiratory, nervous and muscular systems.

BME 4057C Biomedical Engineering Lab II (2)
PR: BME 4056C with a minimum grade of C, EGN 3443 with a minimum grade of C
CPR: BME 3312 with a minimum grade of C, BME 3032 with a minimum grade of C
Experimental design, testing and analysis of molecular, cellular and tissue engineering systems, including biomaterials, biomechanics and fluid transport in biological systems.

BME 4100 Introduction to Biomedical Engineering (3)
PR: CHM 2045 minimum grade C or AP equivalent
CPR: MAC 2281 or MAC 2311 minimum grade C or AP equivalent
An overview of biomedical engineering, including material and energy balances on human subjects, biomechanics, biomaterials, cellular and tissue engineering, biomedical imaging, neuro-engineering, cardiovascular systems, nanomedicine, drug delivery, engineering ethics, intellectual property and product development.

BME 4406 Engineering of Biological Systems (3)
PR: CHM 2210
This course is designed to convey the basics of biological systems and the roles that engineers play in industrial biology to engineering students (primarily) and to students that are majoring in other sciences. Not repeatable for credit. For majors and non-majors.

BME 4409 Engineering Physiology (3)
PR: EGN 3433 with a minimum grade of C or MAP 2302 with a minimum grade of C, PHY 2049 with a minimum grade of C or PHY 2061 with a minimum grade of C or Physics C: Elect/Magnetism with a minimum score of 4, BSC 2010 with a minimum grade of C
General physiology of nerve, muscle, heart, and lung tissue, along with quantitative models of physiological processes at cell, tissue, and/or system level.

BME 4423 Connectomics (3)
PR: BSC 2010 with a grade of "C" or better, and EGN 3433 with a grade of "C" or better or MAP 2302 with a grade of "C" or better, and BME 3053 with a grade of "C" or better
Students will learn the subcellular structure of neurons, their connection patterns (connectome), and methods to analyze the connectome as a graph, and to classify different types of neurons. Students will compare connectomes from the simplest to the most complex.

BME 4440 Introduction to Bioastronautics (3)
PR: EGN 3343
This course will discuss the space environment, impacts of microgravity on human physiology, countermeasures, human factors in spacesuit and spacecraft design, astronaut training, life support systems, mission planning, and private space flight.

BME 4503 Biomedical Instrumentation (3)
CPR: EGN 3373 with a minimum grade of C
Engineering and medical bases of application, measurement and processing of signals to and from living systems. Biomedical transducers for measurements of movement, biopotentials, pressure, flow, concentrations, and temperature are discussed.

BME 4508 Biomedical Signals and Systems Analysis (3)
PR: EGN 3433 with a minimum grade of C or MAP 2302 with a minimum grade of C, BME 3053 with a minimum grade of C, PHY 2049 with a minimum grade of C or Physics C: Elect/Magnetism with a minimum score of 4
Application of analytical methods and computational modeling to the analysis of biochemical, bioelectrical, and biomechanical processes.

BME 4509 Bioelectronics (3)
This course covers bioelectrical phenomena and systems, emphasizing electronics for biomedical applications. The objective is to discuss application-specific electrical systems pertaining to the human body for diagnostics, therapeutics, and advanced in-vivo systems.
COURSE DESCRIPTIONS

UNIVERSITY OF SOUTH FLORIDA 2021-2022 UNDERGRADUATE CATALOG

BME 4571 Nanomedicine (3)
This course will provide a basic knowledge of the principles, technology and applications of nanotechnology in medicine with special emphasis on recombinant DNA technology, protein engineering, drug delivery, biomaterials, MEMs & tissue engineering.

BME 4882 Biomedical Engineering Design I (3)
CPR: BME 4056C with a minimum grade of C or BME 4057C with a minimum grade of C
Teams work with a client in the development of projects that incorporate various aspects of Biomedical Engineering. Emphasizes formal engineering design principles; engineering ethics, risk analysis, safety in design and FDA regulations are reviewed.

BME 4883C Biomedical Engineering Design II (3)
PR: BME 4882 with a minimum grade of C
Teams work with an industry and/or other clients in the development of projects that incorporate various aspects of Biomedical Engineering. Emphasis is put on formal engineering design principles, ethics, entrepreneurship, and safety.

BME 4914 Biomedical Engineering Research Experience (3)
Supervised research determined by the needs and interests of the student.

BME 4931 Selected Topics in Biomedical Engineering (3)
Selected topics in biomedical engineering, which can include biomechanics, biomedical instrumentation and sensors, tissue and cellular engineering, and clinical engineering and health systems.

BME 4943 Biomedical Engineering Industry Internship Experience (3)
Experiential learning course in engineering and biomedical industries that synergizes acquired biomedical engineering theoretical knowledge to practical industry applications. Experience will include direct supervision by the industry and a USF faculty.

BOT 3152C Field Botany (3)
PR: BSC 2110 with a minimum grade of C- BSC 2110L with a minimum grade of C-
A field course emphasizing Identification and classification of native and naturalized flowering plants of Florida including historical, climatic, and floristic aspects of plant communities. Fieldwork required. Lecture and Laboratory.

BOT 3580 Medical Botany (3)
PR: BSC 210 with a minimum grade of C-, BSC 211 with a minimum grade of C-, CHM 2110 with a minimum grade of C-
Study of agents that are produced by plants and that are toxic or psychoactive in human beings or are useful as remedies. Lecture only.

BOT 4184C Biology of Coastal Plants (4)
PR: BOT 3373C and PCB 3043
A field course in coastal plants with emphasis on ecology and functional morphology. Fieldwork will stress the ecological aspects of plants in the coastal environment of Florida. Fieldwork required. Lecture and Lab.

BOT 4404C Phycolgy (4)
PR: BSC 210 or BSC 211, BOT 3015C, with a minimum grade of C- or better.
An introduction to freshwater and marine algae, their classification, distribution and ecology. Lecture and laboratory. This course is a combined lecture and lab class. A lab fee will be assessed.

BOT 4601 Plant Ecology (3)
PR: PCB 3043
This course covers plant ecology on a number of different scales, from that of individuals and their physiology, to those of populations, communities, landscapes, and biomes. The course will emphasize critical thinking and writing skills.

BOT 4714C Plant Taxonomy (4)
PR: BSC 211 with a minimum grade of C
An introduction to plant taxonomy, including the principles and methods of systematic botany and classification. Lab and field exercises provided experience in plant identification. Emphasis on native and introduced plants of peninsular Florida.

BOT 4851 Plants and Human Health (3)
PR: BSC 210 / C- OR BSC 211 / C-
This course is a study about the natural history and nature of plant chemical constituents, and about the historic, present, and future roles of plants in human health.

BSC 1005 Biological Principles for Non-Majors (3)
A comprehensive introduction to living systems, including the scientific basis of biology, cell structure and function, genetic mechanisms, human anatomy and physiology, and ecological and evolutionary processes.

COURSE DESCRIPTIONS
(AS OF SEPTEMBER 20, 2021)

UNIVERSITY OF SOUTH FLORIDA 2021-2022 UNDERGRADUATE CATALOG

BSC 4333 Ecology Of Aquatic Vascular Plants (3)
PR: BSC 2010/C- OR BSC 2011/C- OR BOT 3015/C-
A study of aquatic vascular plants, biological adaptations to aquatic environments, factors influencing community composition, how they influence and are influenced by their habitats; includes a survey of key vascular plant in a wide range of communities.

BSC 4434 Bioinformatics (3)
PR: PCB 3023 with a minimum grade of C-, PCB 3063 with a minimum grade of C-, MAC 2241 with a minimum grade of C- or MAC 2281 with a minimum grade of C- or MAC 2311 with a minimum grade of C- or Calculus AB with a minimum score of 3 or Calculus AB Subscore with a minimum score of 3 or Calculus BC with a minimum score of 3
This lecture-based, nonrestrictive course covers basics of molecular bioscience data management/analysis. Focus is on general computational methods, their bio-basis, and how to evaluate analysis results. Qualitative algorithm descriptions are included.

BSC 4444 Genomics (3)
PR: PCB 3063
We will be using genomic data available from multiple bioinformatics databases to answer an open-ended question fundamental to organismal evolution. The emphasis is to hone scientific inquiry skills in fledgling researchers.

BSC 4444L Genomics Laboratory (1)
Laboratory exercises linked to the Genomics lecture course.

BSC 4452 Computational Biology (3)
PR: CHM 2046 with a minimum grade of C-, MAC 2242 with a minimum grade of C- or MAC 2282 with a minimum grade of C- or MAC 2312 with a minimum grade of C-, STA 2023 with a minimum grade of C-, PHY 2049 with a minimum grade of C- or PHY 2054 with a minimum grade of C-
This course provides a general overview of the data-analytical and theoretical methods, mathematical modeling and computational simulation techniques available to study biological and social systems.

BSC 4454C Digital Dinosaurs (3)
PR: BSC 2011
Synopsis: This course provides a comprehensive exploration, including some hands-on training, of the cutting-edge digital tools used in paleontology. While the subject matter will focus on dinosaurs, the techniques will be applicable to a variety of disciplines. Science is increasingly becoming more digital, and this is particularly true for paleontology, the study of ancient life. New digital tools are allowing paleontologists to image, study, share, and interact with fossils in powerful and exciting ways. From unlocking secrets hidden in ancient fossils to bringing dinosaurs "back to life" in 3D form, motion, and even color, these new insights also provide a better understanding of the evolution of living dinosaurs: birds. Digital Dinosaurs will provide a comprehensive exploration, including some hands-on training, of such cutting-edge hardware and software tools. Lectures will include the history, theory, and application of these approaches: what did the Beatles have to do with the development of X-ray scanning? How can a piece of cardboard transform a smartphone into virtual reality headgear? And how fast could Tyrannosaurus rex actually run? While the subject matter will focus on dinosaurs, the techniques will be applicable to a variety of other STEAM disciplines, from biology and geology to art and architecture. Labs will span the entire virtual workflow: • digital scanning of "analog dinosaurs" (fossils) • 3D reconstruction and analysis • visualization approaches, including virtual reality • the animation techniques (and dinosaurs) used in Jurassic World • rapid prototyping methods such as 3D printing. The "real-world" exams will represent the entire scientific pipeline in professional academia: idea/hypothesis generation, research, and proposal writing (Midterm), followed by data generation/analysis, publication, and presentation (Final Project).

BSC 4851 Biology of Film (3)
PR: BSC 2010 with a minimum grade of C-, BSC 2011 with a minimum grade of C-
This course is designed to be a synthetic capstone experience in biology where students are asked to perform open-ended critical evaluations of cinematic representations of biological phenomena.

BSC 4866 Restoration Ecology (3)
PR: BSC 2011 with a minimum grade of C-, PCB 3043 with a minimum grade of C-
A lecture/discussion-based course that explores the application of ecological principles to rebuilding of ecosystems; examples from Florida are emphasized.

**UNIVERSITY OF SOUTH FLORIDA 2021-2022 UNDERGRADUATE CATALOG**

**COURSE DESCRIPTIONS (AS OF SEPTEMBER 20, 2021)**

---

**BUL 2590 Constitutional Law and Free Enterprise (3)**

This course explores the fundamentals of US constitutional structure and doctrine and its impact on economic and business issues. The course also explores historical events and how changing public policy affects the evolution of constitutional doctrine.

**BUL 3320 Law And Business I (3)**

This course covers the nature of legal and societal institutions and environments, the major aspects of public, private, commercial and business related law including diversity, discrimination law and global dispute resolution.

**BUL 3321 Law And Business II (3)**

PR: BUL 3320. Legal problems in marketing of goods, nature of property, sales of personal property, securing of credit granted, nature and use of negotiable instruments.

**BUL 4930 Business Law: Selected Topics (3)**

The course content will capture an important current issue in the legal field and depend on student demand and available instructor expertise/interest.

**BUL 4945 Anatomy of a Deal (3)**

PR: BUL 3320, with a minimum grade of C or better. This course takes a practical approach to teaching students about business combinations, particularly merger and acquisition transactions (public or private), from inception through post-closing management and exit strategies.

**CAP 4034 Computer Animation Fundamentals (3)**

PR: COP 3514. CR: COP 4530. An introductory course to computer animation. Topics include storyboarding, camera control, hierarchical character modeling, inverse kinematics, keyframing, motion capture, dynamic simulation, and facial animation.

**CAP 4063 Web Application Design (3)**

PR: COP 4530. Analysis, design, and development of software that operates on web servers and web browsers, supporting multiple concurrent users.

**CAP 4103 Mobile Biometrics (3)**

PR: COP 3331 with a minimum grade of C-. Topics include foundations of biometric systems, mobile biometric modalities and features, and adversary attacks.
CAP 4111 Introduction to Augmented and Virtual Reality (3)
PR: COP 4530 with a minimum grade of C-
This course introduces students to computer graphics techniques, computer vision techniques, and hardware designs that make augmented and virtual reality systems immersive.

CAP 4136 Malware Analysis and Reverse Engineering (3)
PR: COP 3515 with a minimum grade of C-
This course will introduce students to the technical definition of malware, to the various malware analysis techniques (including reverse engineering of malware), and how to mitigate a malware attack.

CAP 4160 Brain-Computer Interfaces (3.00)
PR: CDA 3201 with a minimum grade of C-, COP 4530 with a minimum grade of C-
This course involves the exploration of new forms of Human-Computer Interaction (HCI) based on a passive measurement of neurophysiological states (cognitive and affective). These include measuring cognitive workload and affective engagement. Students will read research papers in several related disciplines (i.e. Neuroscience, Cognitive Psychology, Cognitive Science, Medical BCI, Computational Neuroscience, and others) and present and discuss them in the course. We will explore the uses of non-invasive ubiquitous electroencephalographic (EEG) brain technologies. Also, students will learn the basics of other brain imaging technologies such as near-infrared spectroscopy (fNIRS) and Functional Magnetic Resonance Imaging (fMRI) and how they relate to the field of computing. We will also explore ways to use such measurements as a form of machine control.

CAP 4401 Image Processing Fundamentals (3)
PR: COP 4530.
Practical introduction to a range of fundamental image processing algorithms. Extensive programming, with emphasis on image analysis and transformation techniques. Image transformation and manipulation.

CAP 4410 Computer Vision (3)
PR: COP 4530.
Introduction to topics such as image formation, segmentation, feature extraction, matching, shape recovery, texture analysis, object recognition, and dynamic scene analysis.

CAP 4621 Introduction to Artificial Intelligence (3)
PR: COP 4530 with a minimum grade of C-
Introduction to Artificial Intelligence covers basic concepts, tools, and techniques used to produce artificial intelligence. Basic machine learning concepts. Use of different software tools for searching, reasoning and learning.

CAP 4628 Affective Computing (3)
PR: COP 4530 with a minimum grade of C-
The study of systems that can recognize, interpret, process, and simulate human affect. Topics may include physiology of emotion, lie detection, wearable devices, music, gaming, and ethical concerns associated with affective computing.

CAP 4637 Automated Reasoning and Theorem Proving (3)
PR: COP 4530 with a minimum grade of C-
This course covers the principles of automated reasoning/mechanical theorem proving. Topics to be covered include propositional logic, predicate logic, skolem standard forms, various resolution principles and methods, and non-classical logics.

CAP 4641 Natural Language Processing (3)
PR: COP 4530 with a minimum grade of C-
The concepts and principles of computer processing of natural language, including linguistic phenomena, formal methods, and applications.

CAP 4662 Introduction to Robotics (3)
PR: COP 4530, EGN 4450
An introduction to the fundamentals of robotics. Students will learn the fundamentals of robotics including kinematics, inverse kinematics, Jacobian, velocity, configuration space, motion planning, and path planning algorithms.

CAP 4744 Interactive Data Visualization (3)
PR: COP 4530 with a minimum grade of C-
This course introduces the techniques used for developing effective visual analysis tools. The course covers principles from perception and design, and the algorithms used in visualizing a broad range of data types.

CAP 4773 Social Media Mining (3)
PR: COP 4530 with a minimum grade of C-, CDA 3201 with a minimum grade of C-
This course introduces useful techniques to model, analyze, and understand large-scale social media, with focus on social network analysis, user modeling, bot detection, and dynamical processes over social and information networks.

CAP 4790 Data and Security Analytics (3)
The course provides a detailed understanding of Data as a valuable asset of the organization and the need to secure it. Data also requires analytics to provide insights into trends and context of technical, economic, and social and environments.
COURSE DESCRIPTIONS
(AS OF SEPTEMBER 20, 2021)

CAP 4800 Systems Simulation (3)
PR: COP 3331
CPR: COP 4530
An introduction to discrete-event simulation for performance modeling of computer systems. Topics include performance metrics, random number generation, workload generation, queueing theory, simulation languages, model design, and output analysis.

CBH 4004 Comparative Psychology (3)
PR: PSY 3213 with a grade of C or better
The study of the evolution of behavior, similarities, and differences in capacities for environmental adjustment and for behavioral organization among important types of living beings.

CCE 4031 Construction Management (3)
PR: EGN 3613C.
Fundamentals of construction management. Topics include: general definitions, organizational roles, types of contracts, analysis of labor and equipment, cost estimating, contractor cash flow analysis, planning and scheduling, project control, construction administration, quality and safety management, and use of computer software in construction management.

CCJ 3014 Crime and Justice in America (3)
This course is a non-technical survey of the nature of crime in the United States and the ways in which our society seeks to deal with juvenile and adult offenders and victims of crime.

CCJ 3024 Survey of the Criminal Justice System (3)
An introduction to the structure and operation of law enforcement, prosecution, the courts, and corrections. Also includes brief coverage of major reported crimes.

CCJ 3026 Crime and Social Justice (3)
This experiential learning course examines the concepts of justice, conflict, social change and movement theories with regard to crime and criminal justice reform. Topics covered will include intersectionality and crime, critical race theory, feminist theory, police community relations, immigration and crime, miscarriages of justice, systems of oppression, activism, advocacy, grassroots movements, and political resistance mobilization.

CCJ 3058 Professionalism in Criminology and Criminal Justice (3)
PR: CCJ 3024 with a minimum grade of C-, CCJ 3117 with a minimum grade of C
This course explores the essential characteristics of a criminal justice professional and makes use of reflection and self-awareness to demonstrate the importance of communication, critical thinking, conflict management skills.

CCJ 3117 Theories of Criminal Behavior (3)
PR: CCJ 3024
Provides a basic understanding of the complex factors related to crime, with concentration on principal theoretical approaches to the explanation of crime.

CCJ 3336 Prisoner Reentry and Recidivism: When Inmates Come Home (3)
Students will study prisoner reentry and recidivism in the U.S. by working with local organizations to understand the challenges facing ex-inmates and assist those attempting to combat these challenges and ease an ex-inmate's reintegration into society.

CCJ 3621 Patterns of Criminal Behavior (3)
Reviews the nature and extent of the crime problem. The course will concentrate on major patterns of offender behavior including crimes against the person, property crimes, violent crimes, economic/white collar offense, syndicated (organized) crimes, consensual crimes, female crime, political crime, and will examine criminal career data.

CCJ 3644 White Collar Crime (3)
This course is designed to introduce you to the topic of white-collar crime, including crime that is committed in or by corporate and other types of organizational entities.

CCJ 3666 Victimology (3)
PR: CCJ 3024
This course examines the field of Victimology. It covers the victim's role in the criminal justice process, patterns and theories of victimology, victim-offender relationships and victims' rights.

CCJ 3701 Research Methods in Criminal Justice I (3)
PR: a grade of C or better (a grade of C- is not acceptable) in CCJ 3117
Introduces the student to some of the fundamentals of knowledge-generating processes in criminal justice.

CCJ 3718 Applied Statistics in Crime (3)
This course is designed as a beginning undergraduate level statistics course for criminology majors. In addition to learning how and when to apply appropriate statistical tests, students will learn a number of basic statistical concepts. Majors Only.

CCJ 4072 Introduction to Crime Mapping with ArcGIS (3)
This course is designed to cover the basic concepts and applications of mapping with ArcGIS to explore or explain crime or crime-related issues or outcomes.
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CCJ 4224</td>
<td>Miscarriages of Justice (3)</td>
<td>To provide a critical examination of the current functioning of the American criminal justice system and to discuss how procedures used by police, prosecutors, defense attorneys, judges, and corrections agents potentially produce miscarriages of justice.</td>
</tr>
<tr>
<td>CCJ 4361</td>
<td>Death Penalty (3)</td>
<td>The primary purpose of this class is to provide a critical examination of capital punishment in the United States. It will also delve into the key dimensions of the death penalty debate and justifications for the death penalty and arguments for abolition.</td>
</tr>
<tr>
<td>CCJ 4450</td>
<td>Criminal Justice Administration (3)</td>
<td>This course is designed to provide an in-depth examination of both the practical and theoretical aspects of the administration of criminal justice agencies. The major focus will be on law enforcement and correctional agencies.</td>
</tr>
<tr>
<td>CCJ 4487</td>
<td>Ethics and the Criminal Justice System (3)</td>
<td>Ethics applied to issues in policing, courts, and investigations.</td>
</tr>
</tbody>
</table>
| CCJ 4604  | Abnormal Behavior and Criminality (3) | PR: CCJ 3117
A systematic introduction to the relationship between mental illness and criminality, with focus on psychiatric labeling of deviant behavior and its implications for the handling of the criminal offender. |
| CCJ 4613  | Forensic Psychology (3) | An upper-level course designed to provide students with an overview of the interdisciplinary field of psychology and law. The course explores how the disciplines of psychology and law can benefit from an exchange of ideas, and thus improve both fields. |
| CCJ 4651  | Drugs and Crime (3) | An in-depth examination of the relationship between mind-altering substances (both legal and illegal) and crime in our society. Topics include the legalization debate, organized crime drug cartels, and the relationship between legality and dangerousness. |
| CCJ 4662  | Race and Crime (3) | The course focuses on race (racial bias, racial inferiority, cultural norms and adaptations) and social class (structural deficiencies, economic deprivation, economic exploitation, social capital) as they relate to one another, crime and life in general. |
| CCJ 4670  | Women and Crime (3) | PR: CCJ 3024 with a minimum grade of C
This course is designed to provide an overview of the roles of women in society and how those roles affect the treatment of women in the criminal justice system as victims, offenders, and employees. |
| CCJ 4681  | Domestic Violence (3) | This course is designed to examine the criminal justice systems response to domestic violence by focusing on the interactions between battered persons and the individual components of the criminal justice system. |
| CCJ 4690  | Sex Offenders (3) | This course is designed to cultivate a psychological, criminological, and legal understanding of sex crimes and sex offenders. This course will provide an overview of current theoretical and clinical issues related to sexual offenders and sexual offenses. |
| CCJ 4794  | Environmental Criminology (3) | This course is designed to explore issues related to the crime hot spots and the relationship between crime hot spots and environmental factors. |
| CCJ 4900  | Directed Readings (3) | PR: CCJ 3024, CCJ 3117, CCJ 3621
(a) Students wishing to enroll must make arrangements with a faculty member during the semester prior to actually taking the course. (b) A minimum of four 4 CCJ courses must have been completed satisfactorily prior to enrollment. (c) First consideration will be given to Criminology majors. (d) Individual faculty members may add additional requirements at their discretion. No more than six hours of CCJ 4900, CCJ 4910 or any combination of the two will be accepted toward the minimum number of hours required for the major. This course is specifically designed to enable advanced students the opportunity to do in-depth independent work in the area of criminal justice. Each student will be under the close supervision of a faculty member of the program. |
### CCJ 4910 Directed Research (3)
PR: CCJ 3024, CCJ 3117, CCJ 3621
(a) Students wishing to enroll must make arrangements with a faculty member during the semester prior to actually taking the course. (b) A minimum of four 4 CCJ courses must have been completed satisfactorily prior to enrollment. (c) First consideration will be given to Criminology majors. (d) Individual faculty members may add additional requirements at their discretion. No more than six hours of CCJ 4900, CCJ 4910 or any combination of the two will be accepted toward the minimum number of hours required for the major. This course is designed to provide students with a research experience in which they will work closely with faculty on the development and implementation of research projects in the area of criminal justice.

### CCJ 4930 Critical Issues in Policing (3)
PR: CCJ 3024 or CJE 4114
Focuses on some of the most critical issues in law enforcement today including: understanding and controlling police use of deadly force; police deviance; police prejudice and discrimination; violence-prone police officers; substance abuse by police officers; and administrative review of alleged police brutality.

### CCJ 4933 Selected Topics in Criminology (3)
PR: CCJ 3024, CCJ 3117, CCJ 3621
Lecture course. Topic varies and is designed to address a wide variety of issues in criminology and criminal justice. Open to non-majors with CI.

### CCJ 4934 Seminar in Criminology (3)
PR: a grade of C or better (a grade of C- is not acceptable) in CCJ 3701.
The seminar is designed to provide a research experience in which the student will be expected to work closely with faculty on the development and implementation of research projects in the area of criminal justice.

### CCJ 4939 Senior Capstone Seminar (3)
PR: CCJ 3024, CCJ 3117, CCJ 3701.
This course is designed to provide students with the opportunity to demonstrate their understanding of the American criminal justice system and crime theories, and show competency in research methods, critical thinking, and scholarly writing.
CDA 4205 Computer Architecture (3)  
PR: CDA 3201, CDA 3201L.  
Principles of the design of computer systems, processors, memories, and switches.  
Consideration of the register transfer representation of a computer, ALU's and their implementation, control units, memory and I/O, and the hardware support of operation systems.

CDA 4205L Computer Architecture Lab (1)  
PR: CDA 3201 with a minimum grade of C  
CR: CDA 4205  
Laboratory component of the Computer Architecture class.

CDA 4213 CMOS-VLSI Design (3)  
PR: CDA 3201, CDA 3201L.  
Covers analysis and design of CMOS processing technology, CMOS logic and circuit design, layout timing and delay, and power and thermal issues.  
CMOS transistor theory. VLSI system design, case studies and rapid prototype chip design.

CDA 4213L CMOS-VLSI Design Lab (1)  
PR: CDA 3201, CDA 3201L  
CR: CDA 4213.  
Scalable CMOS layout design, circuit extraction, transistor-level and lay-out level simulation, SPICE parameters/modeling, transistor sizing, standard and macro-cell based layout, static/dynamic CMOS, combinational/sequential block layout, memory I/O design.

CDA 4253 Field Programmable Gate Array System Design and Analysis (3)  
PR: CDA 3201, CDA 3201L.  
Covers analysis and design of digital systems using VHDL simulation. Provides experience with field programmable logic gates and gate arrays.  
Introduces the requirements for field programmable systems; testing of circuitry, and analysis of system design.

CDA 4321 Cryptographic Hardware and Embedded Systems (3)  
PR: CDA 3201 with a minimum grade of C  
Efficient hardware implementation of cryptographic algorithms is presented to meet the performance and cost requirements of computing platforms from handheld to server-level computers.  
Cryptographic implementation attacks and countermeasures are covered.

CDA 4322 Principles of Secure Hardware Design (3)  
PR: CDA 3201 with a minimum grade of C, CDA 3201L with a minimum grade of C  
This course introduces the fundamentals of hardware security for integrated circuits, intellectual property, and reconfigurable devices, including hardware security primitives, Trojans, physical and side-channel attacks, and emerging countermeasures.

CDA 4323 Practical Hardware Security (3)  
PR: CDA 3201 with a minimum grade of C, CDA 3201L with a minimum grade of C  
This course introduces practical aspects of hardware security for integrated circuits and reconfigurable hardware, with hands-on assignments introducing physical, side channel, and system-level attacks and countermeasures.

CDA 4621 Control of Mobile Robots (3)  
PR: CDA 3201.  
Mobile Robotic Control Systems design and implementation. Includes microcontroller, sensor, and actuator control processes for localization and navigation. Team project development of software interface for robot control.

CDA 4622 Introduction to Mobile Robotics for Information Technology (3)  
PR: COP 2512  
Introduction to mobile robot systems covering aspects that include robot architectures, sensors, actuators, control and behavior. Students will learn and experience mobile robot systems using either Physical Robots or Simulated Robots.

CDA 4623 Advanced Mobile Robotics for Information Technology (3)  
PR: CDA 4622  
The course gives an overview of advanced mobile robotic systems covering aspects that include path planning and collision avoidance. Additional themes may vary such as collaboration and competition in multiple Physical or Simulated robots.

CEG 4011 Geotechnical Engineering I (3)  
PR: EGN 3353, EGN 3331.  
Fundamental and experimental concepts in soil mechanics with emphasis on soil properties, soil moisture, soil structure, and shearing strength.

CEG 4011L Geotechnical Engineering Laboratory (1)  
CPR: CEG 4011 with a minimum grade of C  
Demonstrates and experiments verifying theoretical bases of Geotechnical Engineering.

</table>
CGS 3850 Web Development: JavaScript & jQuery (3)
PR: CGS 3853.
JavaScript is used to develop interactive Web pages/sites. OO language, with its dynamic functionality, is quickly inserted into a Web page. Used on WWW it is the most popular programming language worldwide & is the basis for the jQuery Library.

CGS 3853 Web Systems for IT (3)
PR: CEN 3722
Examines how web sites are developed. Focus on client-side and server-side scripting including HTML, JavaScript, and CSS. A substantial project requiring the design and implementation of an online web site is required.

CGS 4855 Intermediate Web Development (jQuery) (3)
PR: CGS 3850.
This course provides more practical and professional tools for working with Cascading Style Sheets (CSS) and JavaScript using the jQuery and the jQuery UI (User Interface) libraries.

CGS 4856 Intermediate Web Design (HTML5) (3)
PR: COP 2030, COP 2250, CGS 3853 and CGS 3850
This course continues from the first courses in Web Design and Web Development to add the new concepts and capabilities of HTML5.

CGS 4857 Android Web Applications (w/HTML5, CSS3, JavaScript) (3)
PR: CGS 3853, CGS 3850, CGS 4856.
A mobile web application is one built with core client web technologies. Students will learn to develop designs for mobile devices; these will also work as desktop web apps if the browser uses the same versions of technologies (HTML5, CSS3, JavaScript).

CGS 4858 Web Design and Development (HTML5) (3)
PR: COP 3718 with a minimum grade of C-
The course covers using HTML (HyperText Markup Language), CSS (Cascading Style Sheets), and JavaScript to produce powerful interactive Web content.

CHI 1100 Practical Chinese (3)
This course is an introductory course in Practical Chinese. It is designed for students with various levels of proficiency

CHI 1120 Modern Chinese I (4)
Mandarin. An intensive study of basic skills: pronunciation, listening, comprehension, speaking, and some composition.

CHI 1121 Modern Chinese II (4)
PR: CHI 1120 or equivalent.
A continuation of CHI 1120. More sophisticated oral/aural skills are attained. Basic reading skills are acquired.

CHI 1955 Overseas Study in China (6)
PR: CHI 1121, CHI 1121
Intensive study of Chinese language in China involving classroom instruction and cultural excursions conducted in Chinese. Must be enrolled in Tier I of the USF Chinese Learning in the Culture program in Qingdao. Students from other institutions eligible.

CHI 2220 Modern Chinese III (4)
PR: CHI 1121 or the equivalent.
For language students who intend to attain basic proficiency.

CHI 2221 Modern Chinese IV (4)
PR: CHI 2220 or the equivalent.
Practice of writing, speaking and listening skills for language students who intend to attain basic proficiency.

CHI 3241 Advanced Chinese Conversation I (3)
PR: CHI 2221
This is the first of a two-course sequence in advanced spoken Mandarin Chinese at the third-year level. Particular emphasis is placed on student performance in commonly encountered contexts in Chinese culture, both formal and informal.

CHI 3242 Advanced Chinese Conversation II (3)
PR: CHI 3241.
This is the second of a two-course sequence in advanced spoken Mandarin Chinese at the third-year level. Particular emphasis is placed on student performance in commonly encountered contexts in Chinese culture, both formal and informal.

CHI 4443 Networking in China and America (3)
PR: CHI 2221
Intensive study of Chinese language and culture at the upper division. Focus on interaction skills necessary to interact in business and professional settings.

CHI 4905 Directed Study (5)
Permits study options in Modern Chinese not available in the regularly scheduled curriculum at departmental discretion.

CHI 4930 Special Topics (3)
Varied topics.

<tr>
<td>CHM 2020</td>
<td>Chemistry for Liberal Studies I (3)</td>
<td>This course is designed for liberal arts students to learn basic chemical principles. Students will learn about reactions, energy and the scientific method. The course will have an emphasis on the chemistry of global climate change.</td>
</tr>
<tr>
<td>CHM 2023</td>
<td>Chemistry for Today (3)</td>
<td>PR: High school chemistry and mathematics including algebra are recommended. An introduction to the principles and applications of modern chemistry including the properties of matter, structural view of matter and reactions, quantitative relations in chemical reactions, technological aspects and societal impact.</td>
</tr>
<tr>
<td>CHM 2045</td>
<td>General Chemistry I (3)</td>
<td>PR: 570 SAT Quantitative score or completion of MAC 1105 College Algebra with a C or better AND one year of high school chemistry or completion of CHM 2023 with a grade of C or better. Principles and applications of chemistry including properties of substances and reactions, thermochromy, atomic-molecular structure and bonding, periodic properties of elements and compounds.</td>
</tr>
<tr>
<td>CHM 2045L</td>
<td>General Chemistry I Laboratory (1)</td>
<td>CPR: CHM 2045. Laboratory portion of General Chemistry I. Introduction to laboratory techniques; study of properties of elements and compounds; synthesis and analysis of natural and commercial materials.</td>
</tr>
<tr>
<td>CHM 2046</td>
<td>General Chemistry II (3)</td>
<td>PR: CHS 2440 or CHM 2045 with a minimum grade of C Principles and applications of chemistry including solutions, chemical thermodynamics, kinetics, equilibria, aqueous chemistry, electrochemistry, and nuclear chemistry.</td>
</tr>
<tr>
<td>CHM 2046L</td>
<td>General Chemistry II Laboratory (1)</td>
<td>PR: CHM 2046 or CHS 2440L with a minimum grade of C CPR: CHM 2046 with a minimum grade of C Laboratory portion of General Chemistry II. Continuation of chemistry laboratory.</td>
</tr>
<tr>
<td>CHM 2210</td>
<td>Organic Chemistry I (3)</td>
<td>PR: CHM 2046, CHM 2046L with a C or better. Fundamental principles of organic chemistry. Lecture.</td>
</tr>
<tr>
<td>CHM 2211</td>
<td>Organic Chemistry II (3)</td>
<td>PR: CHM 2210 with a C or better. Continuation of organic chemistry.</td>
</tr>
<tr>
<td>CHM 2211L</td>
<td>Organic Chemistry Laboratory II (2)</td>
<td>PR: CHM 2210L. CR: CHM 2211. Continuation of organic chemistry laboratory.</td>
</tr>
<tr>
<td>CHM 2414C</td>
<td>Science of Cooking (3)</td>
<td>An active, experiential-learning environment of interdisciplinary explorations of science as a process, information, and techniques underlying contextually interesting topics pertaining to delicious substances.</td>
</tr>
<tr>
<td>CHM 3080</td>
<td>Chemistry for Sustainability (3)</td>
<td>PR: CHM 2020 with a minimum grade of C or CHM 2023 with a minimum grade of C or CHM 2045 with a minimum grade of C, CHM 2045L with a minimum grade of C. This course introduces a range of science and chemical concepts required for understanding and implementing sustainable technology, plans, and policies. Topics include mass and energy balances, water chemistry, energy production, and system theory.</td>
</tr>
<tr>
<td>CHM 3415C</td>
<td>Physical Chemistry Methods (4)</td>
<td>PR: CHM 2046 and MAC 2282 or MAC 2312 or MAC 2242. This class will familiarize chemistry majors with the analytical and numerical math of physical chemistry and the use of specialized software for symbolic and numerical math and visualization.</td>
</tr>
<tr>
<td>CHM 3610</td>
<td>Intermediate Inorganic Chemistry (3)</td>
<td>PR: CHM 2046, CHM 2046L. Fundamental principles of inorganic chemistry including atomic structure, bonding theories and structural consequences, transition metal chemistry and illustrative laboratory work.</td>
</tr>
<tr>
<td>CHM 3610L</td>
<td>Intermediate Inorganic Chemistry Laboratory (1)</td>
<td>PR: Two semesters of general chemistry lecture and lab CR: CHM 3610. Illustrative laboratory work concerning the fundamental principles of inorganic chemistry including atomic structure, bonding, transition metal chemistry, structural consequences and spectroscopic methods.</td>
</tr>
<tr>
<td>CHM 3941</td>
<td>Peer Leading in Chemistry (3)</td>
<td>CPR: CHM 2046. The purpose of this course is to prepare students for the role of peer leader. Peer leaders work with students enrolled in chemistry courses on a regular basis. The course involves coverage of chemistry concepts and training in pedagogical techniques.</td>
</tr>
</tbody>
</table>
CHM 4060 Use of Chemical Literature (1)  
PR: CHM 2045, CHM 2046, CHM 2210, CHM 2211.  
Discussions and assignments using abstracts, bibliographies, indices, encyclopedias, journals, patent files, electronic databases, and other information sources to obtain chemical and technical material and including written and oral presentations. Career information and opportunities also discussed.

CHM 4070 Historical Perspectives in Chemistry (3)  
PR: One year of college chemistry  
A study in depth of the historical and philosophical aspects of outstanding chemical discoveries and theories. Lec.-dis.

CHM 4080 Environmental Chemistry I (3)  
PR: CHM 2046 with a minimum grade of C, CHM 2046L with a minimum grade of C  
Application of geochemical principles to environmental issues, with a focus on aquatic and terrestrial environments.

CHM 4081 Environmental Chemistry II (3)  
PR: CHM 2211 with a minimum grade of C  
This course introduces the students to the principles of atmospheric chemistry and climate. This includes studying atmospheric oxidation process of primary air pollutants, remote sensing and numerical modeling in addition to climate change and energy.

CHM 4130C Methods of Instrument Analysis (4)  
PR: CHM 3120C, CHM 2211, CHM 2211L, CHM 4060, CHM 4410.  
Theory and applications of instrumental methods in chemical research, chemical synthesis and analysis; electrochemical and calorimetric techniques, separation methods, spectroscopy, statistical analysis of data, computer data handling, and individual projects. Lec.-lab.

CHM 4131C Methods of Chemical Investigation II (4)  
PR: CHM 4130C.  
Continuation of CHM 4130C. Lec.-lab.

CHM 4230 Spectroscopic Analysis of Organic Compounds (3)  
PR: CHM 2211  
The objective is to provide the student with a thorough understanding of the theory and use of spectroscopic techniques (MS, IR, UV-vis, and NMR,) and their use in identification of organic compounds from the spectroscopic data from techniques discussed.

CHM 4274 Introduction to Drug Discovery (3)  
PR: BSC 2010 and CHM 2211  
This course explores the entire drug discovery process, from initial target identification and hit generation through lead optimization and clinical trials to FDA approval. Case studies will be used to illustrate the process.

CHM 4292 Introduction to Medicinal Chemistry (3)  
PR: CHM 2211 and BCH 3023  
This course in medicinal chemistry is designed to acquaint students with modern applications of chemical techniques and methods to the discovery, design and synthesis of molecules that interact with biomolecular targets and thereby serve as new drugs.

CHM 4300 Biomolecules I (3)  
PR: CHM 2211.  
Nature, structure, elucidation, synthesis and (in selected cases) organic chemical mechanisms of biochemical involvement of the major classes of organic compounds found in living systems.

CHM 4307 Bio-Organic Chemistry (3)  
PR: BCH 3053 or BCH 4033  
Discussion of current research directions in the field of chemical biology.

CHM 4410 Physical Chemistry I (4)  
PR: CHM 2046, MAC 2242 or MAC 2282 or MAC 2312, and PHY 2044 or PHY 2049.  
Thermodynamics, the state of matter and solutions are presented. The course includes a recitation.

CHM 4410L Physical Chemistry Laboratory (1)  
PR: CHM 4410.  
A physical chemistry laboratory with emphasis on modern techniques and instruments. Lab.

CHM 4411 Physical Chemistry II (4)  
PR: CHM 2046, MAC 2242 or MAC 2282 or MAC 2312, and PHY 2045 or PHY 2049.  
Introduction to quantum mechanics and molecular spectroscopy. Chemical Kinetics and statistical mechanics are also presented. The course includes a recitation.

CHM 4413 Biophysical Chemistry (3)  
PR: CHM 2046, CHM 4410, MAC 2242 or MAC 2282 or MAC 2312, and PHY 2052 or PHY 2049.  
This course will cover spectroscopy, bonding and kinetics with emphasis placed on biological molecules and biochemical reactions.

CHM 4418 Functional Porous Materials (3)  
PR: CHM 3610 with a minimum grade of C  
The design and application of porous materials including porous organic polymers, porous carbon materials, zeolites, and metal-organic frameworks are presented.
### CHM 4455 Chemistry of High Polymers (3)
**PR:** CHM 2210
The purpose of this course is to prepare students for scientific careers in polymer science and technology or in related fields. The course involves coverage of chemistry concepts involving synthesis and characterization of polymeric materials.

### CHM 4611 Advanced Inorganic Chemistry (3)
**PR:** CHM 4410, CHM 2046, MAC 2242 or MAC 2282 or MAC 2312 and PHY 2054 or PHY 2049.
An advanced descriptive and theoretical treatment of inorganic compounds.

### CHM 4803 Safety in the Chemistry Laboratory (1)
**PR:** CHM 3120C with a minimum grade of C+, CHM 2211L with a minimum grade of C+
This is a course designed to develop a solid foundation in the fundamentals of safety in the chemistry laboratory and a strong safety ethic that can support good lab practices in academia, industry or any other lab setting.

### CHM 4905 Independent Study (3)
Specialized independent study determined by the student's needs and interests. The written contract required by the College of Arts and Sciences specifies the regulations governing independent study.

### CHM 4932 Selected Topics in Chemistry (3)
The course content will depend on the interest of faculty members and student demand.

### CHS 2440 General Chemistry for Engineers (3)
**PR:** 570 SAT Quantitative score or completion of MAC 1105 College Algebra with a grade of C or better AND one year of high school chemistry or completion of CHM 2023 with a grade of C or better.
Introduction to important concepts and principles of chemistry with emphasis on areas considered most relevant in an engineering context.

### CHS 4301L Clinical Laboratory (2)
**PR:** BCH 3023 and CHM 3120C
Laboratory experience in some of the most important clinical determinations. Lec.-Lab.

### CHS 4411 Chemistry and Microbiology of Beer (3)
**PR:** CHM 2045
A series of investigations into the chemistry and microbiology underlying the various aspects of beer, its brewing process, and its pairings with food.

### CHT 3110 Traditional Chinese Literature in Translation (3)
This course is a general survey of traditional Chinese literature from the beginnings to the Qing Dynasty (1911). Major genres including philosophical texts, poetry, fiction, drama, and prose are explored in English translation.

### CHT 3124 Modern Chinese Literature in Translation (3)
An introductory survey of modern Chinese literature in translation. The course begins with the end of the Qing Dynasty (1644-1911) and extends into contemporary China. Taught in English and open to all majors. The course is not repeatable.

### CHT 3500 Introduction to Chinese Culture (3)
An introductory survey of Chinese cultural traditions with an emphasis on themes important to successful interaction in contemporary Chinese society. The language of instruction is English.

### CHT 3512 Contemporary Chinese Language and Society (3)
An introductory survey of modern Chinese language and society taught in English and open to all majors. Course activities revolve around developing an understanding of Chinese language and society in the Reform Era (1976-present).

### CHT 3520 Chinese Film (3)
A survey of Chinese film taught in English and open to all majors. This course traces the development of Chinese film and the Chinese film industry from its beginnings in the early 1900s through the contemporary period.

### CIS 3201 Laws and Legal Aspects of IT (3)
**PR:** CIS 3360.
The course provides an overview of rights, responsibilities, and liabilities associated with IT systems today. Statutes, case histories, regulations, etc. will be discussed, to understand and control risk. Research topics will be assigned to students.
CIS 3213 Foundations of Cybersecurity (3)
PR: COP 2512
The fundamentals of cyber security are introduced. Students learn to identify attack phases, understand the adversary's motivations, the resources and techniques they use, and the intended end-game. Techniques for mitigating threats are described.

CIS 3303 Unified Modeling Language (3)
The Unified Modeling Language (UML) is a world-class visual language for analysis and design of object-oriented systems. This course examines the various graphical tools and their applications in the context of extended case studies.

CIS 3360 Principles of Information Security (3)
Board review of Information Security and related elements. Includes terminology, history of the discipline, overview of information security program management. Suitable for IS, criminal justice, political science, accounting information systems students

CIS 3362 Cryptography and Information Security (3)
PR: MAD 2104
This course examines classical cryptography, entropy, stream and block ciphers, public key versus symmetric cryptography, one-way and trap-door functions, plus other specific tools and techniques in popular use.

CIS 3363 Information Technology Systems Security (3)
PR: CIS 3213 with a minimum grade of C-, COP 2513 with a minimum grade of C, MAD 2104 with a minimum grade of C
This course covers foundations of systems security, including availability, authentication, access control, network penetration/defense, reverse engineering, cyber physical systems, forensics, supply chain management security, and secure systems design.

CIS 3367 Architecting Operating System Security (3)
PR: CIS 3360
This course examines tools and techniques for securing Windows and Linux operating systems. Students will acquire knowledge and skills to perform audit assessments and implement enterprise-wide operating system security.

CIS 3433 System Integration and Architecture for IT (3)
PR: CGS 3303
Role of systems architecture in systems integration, performance, and effectiveness. Principles and concepts of "devops" (development operations) interplay between IT applications roll-out and related organizational processes.

CIS 3615 Secure Software Development (3)
PR: COP 3515 with a minimum grade of C-
Information is power. It also has value. Thus, there is an incentive for unscrupulous individuals to steal information. This course covers a number of different techniques to help developers to build enterprise-level systems that are secure and safe.

CIS 3932 Special Topics for Information Technology (3)
Topics to be chosen by students and instructor permitting newly developing sub-disciplinary special interests to be explored.

CIS 4083 Cloud Computing for IT (3)
PR: COP 3515 with a minimum grade of C-
This is a hands-on class in the methods and technologies of cloud computing. Upon completion of this course students will be able to create, configure, build, deploy, and manage a variety of cloud based solutions.

CIS 4200 Penetration Testing for IT (3)
PR: COP 3515 with a minimum grade of C-
Penetration testing and related software tools are presented. Legalities and various cyber-attacks such distributed denial of service, man-in-the-middle, and password attacks are covered. Methods to correct security flaws are given.

CIS 4203 Cyber Forensics and Investigations (3)
PR: COP 2030 and MAD 2104
Teaches the methods of acquiring, preserving, retrieving, and presenting data that have been processed electronically and stored on computer media for use in legal proceedings. Focus on MS Windows systems.

CIS 4204 Ethical Hacking (3)
PR: COP 2030 and MAD 2104
Provides an understanding of computing, networking, exploitation techniques, used for IT security. In testing, a legal ethical hacker tries to penetrate a system, finds its weakest link and analyzes ways to correct security flaws.

CIS 4212 Privacy-Preserving and Trustworthy Cyber-Infrastructures (3)
CPR: COP 4530 with a minimum grade of C-
This course will explore emerging cyber-security technologies addressing security issues of cyber-infrastructures. It will cover privacy-enhancing and trustworthy techniques for cloud computing and internet of thing systems.
CIS 4216 Aggressive Hacking - What Hackers Do (3)
PR: CGS 3373 with a minimum grade of C-, CGS 3374 with a minimum grade of C-, COP 2250 with a minimum grade of C- or COP 2030 with a minimum grade of C-
Commonly known as Red Teaming, the course provides an understanding of computing, networking, programming concepts, and exploitation techniques, related to computer security. Focus of the course is to legally break-test into systems to improve security.

CIS 4219 Human Aspects of Cybersecurity (3)
PR: CIS 3363 with a minimum grade of C-
This course will study the human aspects of cybersecurity and cover such topics as: identity management, social engineering, societal behaviors, privacy and security, and individual awareness and understanding of cybersecurity.

CIS 4250 Ethical Issues and Professional Conduct (3)
This course introduces students to ethical issues and professional responsibilities arising in the computer sciences. Students will develop ethical solutions to real-world problems and present them.

CIS 4253 Ethics for Information Technology (3)
This course covers the professional code of ethics and a survey of ethical issues in computing such as intellectual property, security, privacy, and copyright. Class discussions cover ethical responsibilities of IT professionals and issues that are shaping our society.

CIS 4342 NoSQL Databases (3)
PR: COP 2250
This course covers various types of unstructured data management technologies, also known as NoSQL databases, such as Columnar, Key-Value, Graphic and Document databases; their schema-free characteristics (ACID) for storage, retrieval and data quality.

CIS 4344 Big Data Architecture with Hadoop (3)
PR: COP 2250
This course provides students with necessary skills and knowledge to develop practical Big data solutions based on the Hadoop eco-system. Topics include fundamentals of Hadoop 2.x, the HDFS, MapReduce, Spark, Data Analytics using Pig, Hive and YARN.

CIS 4345 Big Data Storage and Analysis with Hadoop (3)
PR: COP 3331 with a minimum grade of C
This is an introductory course for big data storage and analysis in Hadoop cluster. Topics include Hadoop file system, Hadoop cluster architectures, Hadoop ecosystems, and big data processing frameworks MapReduce, Spark, Pig and Hive.

CIS 4361 Information Assurance and Security Management for IT (3)
PR: COP 3515
The CIANA model, information security management techniques, and security concerns are presented. Topics include access control systems, network security, security management practices, cryptography, disaster recovery planning, and others.

CIS 4362 Applied Data and Information Security (3)
The course covers design, analysis and implementation of basic security tools to protect sensitive data and information. Specifically, it covers encryption, decryption, operation modes, hash function, public certificate, one-time pad, secure data and information storage, lightweight verification of information source, secure random number generation, and vulnerabilities and attacks against data and information security, including frequency analysis attack, collision attack, and length extension attack.

CIS 4364 Cryptology and Information Security (3)
PR: COP 4530
CPR: COP 4600.
Covers the fundamentals of computer security. The following topics are addressed: Network Security, Cryptography, Access Control, Security Architecture and Models, Applications and Systems Development, Vulnerability Assessment.

CIS 4365 Computer Security Policies and Disaster Preparedness (3)
PR: CIS 3360.
When an organization's functioning is interrupted by disasters, accidents, or natural events, a loss of data and/or productivity may occur. The impact on the organization is determined by how prepared it is for dealing with these disruptions.

CIS 4368 Database Security and Audits (3)
PR: COP 3718
An in-depth look at database security concepts and auditing techniques. Hands-on approach when examining security techniques. Examines different security strategies and advancements in implementation as well as problem solving.

CIS 4369 Web Application Security (3)
PR: COP 3718 with a minimum grade of C-, CGS 3853 with a minimum grade of C-
This is a comprehensive overview of Web applications and their common vulnerabilities. Web Goat will be used to give students pseudo practical experience with penetration testing tools and to give them concrete examples of the concepts of the class.
<table>
<thead>
<tr>
<th>COURSE</th>
<th>DESCRIPTION</th>
</tr>
</thead>
</table>
| **CIS 4387 Mobile and Wireless Security (3)** | PR: CGS 3373 with a minimum grade of C-, CGS 3374 with a minimum grade of C-, COP 2030 with a minimum grade of C-  
Mobile/wireless systems provide untethered network connectivity anywhere/anytime. Securing these systems have unique challenges due to travels outside physically protected spaces and limited battery & processing power. This course addresses these issues. |
| **CIS 4412 Resource Management for IT (3)** | PR: COP 3515  
An overview of the information resource management function, with emphasis on information systems management, is covered. Topics include planning, organizing and controlling user services, managing information system development process, and the fundamentals of EDP auditing. |
| **CIS 4510 IT Project Management (3)** | This course covers the general aspects of project management and emphasizes the important, special considerations which apply to information technology projects. Supporting software is used extensively. |
| **CIS 4512 Agile Risk Management (3)** | PR: CIS 4510  
This course addresses the risks associated with the IT/Business environment. Risk Management plays a key role in the successful development and implementation of IT projects. |
| **CIS 4514 Requirements Led PM/PM Software & Tools (3)** | PR: CIS 4510.  
This course focuses on an innovative approach to using project requirements to manage the project development life cycle. |
| **CIS 4515 Managing Global Teams w/ Agile (3)** | PR: CIS 4510  
Global/telecommuting teams deal with tough issues like isolation, lost emails, miscommunication, time zones, lack of face-to-face interactions, travel budget restrictions, and cultural differences which potentially impede productivity and effectiveness. |
| **CIS 4518 Quality & Testing w/ Agile in Project Management (3)** | PR: CIS 4510  
This course explains concepts & principles of tenets of quality management & practical methodologies to implement them. It covers little q & big Q; addresses thinking, misconceptions & alternative theories, focusing on big Q to build a case for change. |
| **CIS 4524 IT Project Schedule & Cost Control (3)** | PR: CIS 4510  
Students will develop fundamental skills in estimating, scheduling, cost control, and reporting, essential for successful information technology projects. |
| **CIS 4525 Contract Management & Negotiations (3)** | PR: CIS 4510  
Today’s dynamic performance-based work environment requires partnerships and alliances to obtain a marketable mix of skills, tools and business practices. The course covers key aspects of contract negotiation planning, documenting and closing contracts. |
| **CIS 4622 Hands-on Cybersecurity (3)** | PR: COP 2513 with a minimum grade of C  
This course covers hands-on skills for cybersecurity -- how to perform common offense and defense activities on computer networks, penetration testing, software exploit basics, basic network forensics, and basics on incident response. |
| **CIS 4623 Practical Cybersecurity (3)** | PR: COP 3331 with a minimum grade of C  
This course covers how to protect the security of real-world systems -- configuring host/network security settings, penetration testing, software exploit basics, and basics on incident response and forensics. |
| **CIS 4900 Independent Study in Computer Science (5)** | PR: COP 4530 and CDA 3201  
Specialized independent study determined by the needs and interests of the student. |
| **CIS 4910 Computer Science and Engineering Project (3)** | PR: COP 4530  
Offers a focused team-based design experience incorporating appropriate engineering standards and multiple realistic constraints. Projects are proposed by industry and/or other partners and are completed within a defined development process. |
| **CIS 4915 Supervised Research in Computer Science (5)** | PR: COP 4530 and CDA 3201  
Supervised research determined by the needs and interests of the student. |
| **CIS 4916 Cyber Security and IT Capstone Project (2)** | This course introduces students to the process of research and systematic inquiry and facilitates the mastery of research skills needed to complete projects where an understanding of research methods is critical. |

<tbody>
<tr>
<td>CIS 4930</td>
<td>Special Topics in Computer Science I (3)</td>
<td>PR: COP 4530 and CDA 3201</td>
<td>Special topics in computer science and computer engineering.</td>
</tr>
<tr>
<td>CIS 4932</td>
<td>Special Topics for Information Technology (3)</td>
<td></td>
<td>Topics to be chosen by students and instructor permitting newly developing sub-disciplinary special interests to be explored.</td>
</tr>
<tr>
<td>CIS 4935</td>
<td>Senior Project in Information Technology (4)</td>
<td></td>
<td>This course is the capstone project for IT majors. Students are required to design, implement, and deliver a complete IT solution to a problem leveraging discipline-specific, critical thinking, and communication skills acquired in this major.</td>
</tr>
<tr>
<td>CIS 4940</td>
<td>Industry Internship (6)</td>
<td>PR: COP 4530 and CDA 3201</td>
<td>Individual study as practical computer science and/or computer engineering work under industrial supervision with a faculty approved outline and end-of-semester report.</td>
</tr>
<tr>
<td>CIS 4947</td>
<td>Industry Internship for IT (5)</td>
<td></td>
<td>Practical information technology work under industrial supervision with a faculty-approved outline and end-of-semester report.</td>
</tr>
<tr>
<td>CJC 4010</td>
<td>American Correctional Systems (3)</td>
<td>PR: CCJ 3024 or CCJ 3117</td>
<td>Provides coverage of the juvenile and family courts, their clientele, and the complex of human services agencies and facilities that contribute to efforts at juvenile correctional intervention.</td>
</tr>
<tr>
<td>CJE 4114</td>
<td>American Law Enforcement Systems (3)</td>
<td>PR: CCJ 3024 or CCJ 3117</td>
<td>This course provides a comprehensive examination of the American law enforcement system at the federal, state and local levels and an assessment of career opportunities within the community.</td>
</tr>
<tr>
<td>CJE 4244</td>
<td>Analytic Forensic Case Studies (3)</td>
<td>PR: CJE 4647 with a minimum grade of C, CJE 4731 with a minimum grade of C</td>
<td>Case-based inquiry of major cases and forensic failures in the criminal justice system to determine root cause issues, remediations, and prevention of errors using forensic evidence.</td>
</tr>
<tr>
<td>CJE 4610</td>
<td>Criminal Investigation (3)</td>
<td>PR: CCJ 3024 or CCJ 3117</td>
<td>Covers the major components of criminal investigation, with special attention to the scientific aspects of criminal investigation and the management of major cases.</td>
</tr>
<tr>
<td>CJE 4647</td>
<td>Crime Scene Sciences (3)</td>
<td></td>
<td>Crime Scene Sciences covers crime scene processing, including the recognition, recovery, and recording of physical evidence of all types.</td>
</tr>
<tr>
<td>CJE 4731</td>
<td>Forensic Investigations (3)</td>
<td>PR: CJE 3650, with a minimum grade of C</td>
<td>The use and abuse of physical and forensic evidence in investigations; cognitive biases that can create problems in investigations; structured analytic techniques to reduce bias and improve objectivity; introduction to case-based inquiry and analysis.</td>
</tr>
<tr>
<td>CJL 3110</td>
<td>Substantive Criminal Law (3)</td>
<td>PR: CCJ 3024, CCJ 3117</td>
<td>Examines the historical basis of the American criminal law system, the substantive elements of the crime, and court procedures.</td>
</tr>
<tr>
<td>CJL 3502</td>
<td>Introduction to Courts (3)</td>
<td></td>
<td>Offers understanding of process &amp; functions of US court system. Define &amp; identify different aspects of law &amp; crime; examine aspects of Federal &amp; State court systems: trial process; examine roles of court workers; sentencing. Not restricted or repeatable.</td>
</tr>
<tr>
<td>CJL 4115</td>
<td>Environmental Law and Crime (3)</td>
<td>PR: CCJ 3024</td>
<td>The course provides students with an introduction to issues in the area of environmental crime and environmental law.</td>
</tr>

### COURSE DESCRIPTIONS

(AS OF SEPTEMBER 20, 2021)

---

**CJL 4410 Criminal Rights and Procedures (3)**

PR: CCJ 3024

Emphasizes the Constitutional issues and rules that are applied and enforced by the courts while processing criminal cases.

**CLA 3103 Daily Life in Ancient Greece (3)**

This course surveys the major social, political, and cultural aspects of the ancient Greek world, examined both topically and chronologically across the centuries of the Ancient Greece, c. 1400 to 146 BCE.

**CLA 3124 Daily Life in Ancient Rome (3)**

This course surveys the major social, political, and cultural aspects of the ancient Roman world, topically and chronologically, from 753 B.C.E to 476 CE, through the literary, historical, and artistic records of the Romans.

**CLA 3435 Ancient Globalization: East and West in the Hellenistic World (3)**

The military campaigns of Alexander the Great brought the Greek culture into the 'Near' and 'Middle' East, from modern Turkey to India. The course examines the multicultural world that emerged, its effect on Rome, and parallels with modern globalization.

**CLA 3503 Ancient Medicine: Quacks, Doctors, and Magicians (3)**

This course will investigate the historical importance of Greek and Roman medicine and cover its main developments from its beginnings around 1000 BCE until the dethronement of Hippocratic/Galenic theories around the 17th c. CE.

**CLA 3930 Selected Topics (3)**

An examination of various aspects of Greek and Roman Culture, based on ancient sources, literary and archaeological. Repeatable as topics vary.

**CLA 4501 Women in Antiquity (3)**

Women in Antiquity surveys the social, political, and cultural life of women in the ancient Mediterranean world, historically and thematically, through lecture, reading, video, and slide presentations.

**CLP 2001 Psychology of Adjustment (3)**

Genetic, organic, and learned factors involved in the processes of personal adjustment; applications of mental health principles to everyday living.

**CLP 4134 Abnormal Child Psychology (3)**

PR: PSY 3213

This course provides an integration of theory, etiology, research, treatment, and prevention of maladaptive behavior from infancy through adolescence.

**CLP 4143 Abnormal Psychology (3)**

PR: PSY 3213 with a grade of C or better

Descriptions, theoretical explanations, research evidence, and treatment of maladaptive behavior.

**CLP 4302 Introduction to Clinical Psychology (3)**

PR: PSY 3213, CLP 4143

This course provides an introduction to clinical psychology, including coverage of theories of behavior change and research designs. Evidence-based practices and mental health careers will be covered.

**CLP 4314 Health Psychology (3)**

PR: PSY 3212 and PSY 3204, or STA 3023 or PSY 3213, with a grade of C or better.

This course provides a survey of contributions of psychology to the promotion and maintenance of health and prevention and treatment of illness. Topics will include: coping with stress, substance use, chronic illnesses, and diversity issues in health.

**CLP 4414 Behavior Modification (3)**

PR: PSY 3213 with a grade of C or better

Introduction to behavior analysis, and application of learning principles, behavioral measurement, research designs, and interventions in treatment settings.

**CLP 4433 Psychological Tests and Measurement (3)**

PR: PSY 3213 with a grade of C or better

A consideration of the instruments for intellectual and personality assessment including their applications, development, and potential abuses.

**CLP 4620 Ethics in Psychology and Health (3)**

PR: PSY 3213

The purpose of this course is to review the ethical, legal, and professional standards that direct the activities of health and mental health professionals. Ethical issues will be reviewed and an ethical decision making model will be presented.

**CLP 4941 Community Practicum in Selected Topics (3)**

PR: PSY 2012 with a minimum grade of C-, PSY 3204 with a minimum grade of C-

Service-learning for student to apply psychological principles learned in the classroom to volunteer experiences. Community is defined at the local, national and international level. Free-standing practicum or with a corequisite course.

**CLP 4944 Abnormal Psychological Tests and Measurement (9)**

PR: PSY 2012 with a minimum grade of C-, PSY 3204 with a minimum grade of C-

A consideration of the instruments for intellectual and personality assessment including their applications, development, and potential abuses.

**CLT 2044 Wordpower from Latin and Greek (3)**

Study of Greek/Latin elements as a means of building English vocabulary. Examination of Greek/Latin-based terminology from various scientific fields, its adoption into English and current usage. Attention given to Greek/Latin stems, prefixes, suffixes.
CLT 3040 Scientific and Medical Terminology (3)
A course in the Greek and Latin word elements used in science and technology.

CLT 3103 Epic Battles and Dramatic Reversals in Greek Thought (3)
This class investigates the most important texts of the Archaic and Classical Greek world, which are analyzed in both a chronological sequence (c. 700 to 399 BCE) and by genre (epic poetry, philosophy, lyric, history, and drama).

CLT 3123 Voyages and Metamorphoses in Roman Imagination (3)
This course surveys the major literary texts of the ancient Roman world, examined through both the chronological order of their production (from the 3rd century B.C.E to the 2nd century C.E) and their classification into various literary genres.

CLT 3370 Gods Heroes and Monsters in the Ancient World (3)
Classical Mythology surveys the myths, legends, and sagas of the Greeks and Romans chronologically (c. 1200 BCE to 17 CE) and thematically, through literature (prose and poetry), iconography (art and architecture), and film (documentary and dramatic.)

CLT 3511 Greece and Rome in World Film (3)
This course surveys cinematic representations of ancient Greece and Rome to illustrate the imaginative power of film and television to shape modern perceptions of the Greco-Roman past across and between global cultures.

CLT 3521 American Greece, American Rome (3)
This course investigates the intellectual influence of Classical antiquity in the United States from the first colonies to the aftermath of 9/11. Students will contextualize and evaluate Greek and Roman models in American "formal" and "popular" culture.

CNT 4004 Computer Networks I (3)
PR: COP 3514 min grade B  
CPR: COP 4530 min grade C-  
An introduction to the design and analysis of computer communication networks. Topics include application layer protocols, Internet protocols, network interfaces, local and wide area networks, wireless networks, bridging and routing, and current topics.

CNT 4004L Computer Information Networks Laboratory for Information Technology (1)
PR: COP 3515  
CR: CNT 4104  
This lab provides a hands-on introduction to computer networking and the protocols used to coordinate and control communications on them.

CNT 4104 Network Security and Firewalls (3)
PR: CNT 4104  
This course surveys network security standards and emphasizes applications that are widely used on the Internet and for corporate networks. This course also examines Firewalls and related tools used to provide both network and perimeter security.

CNT 4104L Computer Information Networks Laboratory for Information Technology (1)
PR: COP 3515  
CR: CNT 4104  
This lab provides a hands-on introduction to computer networking and the protocols used to coordinate and control communications on them.

CNT 4111 Computing and Network Security (3)
PR: CNT 4004  
The course is a study of fundamental concepts and principles of computing and network security. The course covers basic security topics, including symmetric and public key cryptography, digital signatures, hash functions, and network security protocols.

CNT 4199 Secure Coding (3)
PR: COP 4530 with a minimum grade of C-  
Principles and practices for secure computing and writing secure software, including software for performing information management and networking and communications.

CNT 4504 Computer Networks II (3)
PR: CNT 4004  
CPR: COP 4530  
Networking skills, hands-on experience in technologies and protocols, with emphasis on Internet technologies. Topics: Operation, Analysis and Evaluation of distributed systems, communication hardware/software, network monitoring and performance tools.

CNT 4603 System Administration and Maintenance for Information Technology (3)
PR: CNT 4104 with a minimum grade of C-  
Examines the activities related to the selection, installation and management of computer systems. Covers concepts essential to the administration of OS, networks, and services. Covers system documentation, policies and procedures.
COURSE DESCRIPTIONS
(AS OF SEPTEMBER 20, 2021)

UNIVERSITY OF SOUTH FLORIDA 2021-2022 UNDERGRADUATE CATALOG

CNT 4716C Network Programming for IT (3)
PR: CNT-4104 or equivalent. This course presents the fundamentals of network programming in C# .NET. In this course, the student will learn how to use the Visual Studio development environment to create Windows client and server applications. Topics include network object oriented programming, the study of network protocols, client/server applications, peer-to-peer applications, ASP.NET, Web Services, cloud computing and an introduction to Windows 8 Phone development.

CNT 4800 Network Science (3)
PR: COP 4530 with a minimum grade of C-
This course introduces the science of networks via elements of graph theory and practical analysis of real-life datasets.

COM 2000 Introduction to Communication (3)
Introduction to the roles, contexts, and issues in contemporary human communication. Required of Communication majors.

COM 2130 Communication Skills for Health Professionals (3)
Skills-oriented course for students interested in health sciences: basic tools for communicating clearly with patients, clients and non-medical audiences; also brings scholarly understanding of general communication-related issues in medical professions.

COM 3014 Communication, Gender and Identity (3)
Examines the communicative origins and implications of gender roles.

COM 3051 Analyzing Culture and Media (3)
Applies theories of media and media industries to analysis of media texts to investigate relationships among culture, media, representation, and democracy. Majors only; non-majors by permit only. May not be repeated for credit.

COM 3052 Cultural Studies and Communication (3)
Application of theories and methods of Cultural Studies to communication research. Emphasis on critical analysis of processes by which culture is produced, circulated, and negotiated.

COM 3110 Communication For Business and the Professions (3)
Identification of communication situations specific to business and the professions. Analysis of variables related to communication objectives and preparation of oral presentations in the form of informational reports, conference management, persuasive communications, interviews, and public hearings.

COM 3120 Organizational Communication (3)
A survey of communication concepts which impact upon organizational effectiveness.

COM 3122 Interview Communication (3)
A study of communication theory relative to persuasive interviewing with an emphasis on career interview situations.

COM 3413 Communication and Visual Culture (3)
Examines the nature and practices of seeing as fundamental to communication with special emphasis on cultural and rhetorical implications of visual practices in aesthetic, political, and social arenas.

COM 4016 Public Memory (3)
Exploration of collective memory as public communication. Examines public memory as created and communicated in memorials, museums, mediated history, nostalgia, and story.

COM 4020 Communicating Illness, Grief, and Loss (3)
PR: COM 2000 with C- or above
Focus on stories of illness, grief, and loss to make sense of these experiences; to understand the cultural and rhetorical influences on how stories are told; and to explore the context of everyday life, romantic relationship, families, institutions, and culture in which they occur.

COM 4021 Family Communication and the End of Life (3)
Explores theories and practices of family communication at end-of-life through language, relationships, bioethics, and case analysis techniques.

COM 4022 Health Communication (3)
Application of communication theory and research to the health context including provider-patient communication, health information campaigns, and health beliefs and behavior. Special attention to the value issues in health communication.

COM 4027 Intercultural Health Communication (3)
This course aims to help students understand how intercultural complexities influence communication on health in multiple contexts, such as health care, global health crises, health identity, health literacy, and media campaigns on health.

COM 4030 Women and Communication (3)
Examines women's patterns of communication in a variety of contexts. Also offered under Women's Studies.

COM 4050 Globalization and Democratic Discourse (3)
Examines rhetoric of globalization and democracy from communication perspectives, especially the discourses of war, terrorism, nationalism, and security.
### COURSE DESCRIPTIONS

**UNIVERSITY OF SOUTH FLORIDA 2021-2022 UNDERGRADUATE CATALOG**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>COM 4124</td>
<td>Communication and Organizational Change (3)&lt;br&gt;An advanced course covering current issues in organizational transformation (e.g., organizational dialogue, learning organizations, reengineering, work teams), and the role communication processes play in such changes.</td>
</tr>
<tr>
<td>COM 4128</td>
<td>Integrated Organizational Communication (3)&lt;br&gt;Explores theories, practices, and functions of integrated communications strategies and tactics in organizational contexts. For Communication majors; non-majors by permit only. May not be repeated for credit.</td>
</tr>
<tr>
<td>COM 4151</td>
<td>Communication and Working Life in Cont Orgs (3)&lt;br&gt;Explores workers and organizations through socialization, self-presentation, technologies, identity issues, and work-family balance.</td>
</tr>
<tr>
<td>COM 4152</td>
<td>Communication and Leadership (3)&lt;br&gt;Effective leadership today relies less on control and more on the strategic use of communication to build relationships and guide behavior. This course examines the various ways leaders can communicate more effectively in contemporary organizations.</td>
</tr>
<tr>
<td>COM 4225</td>
<td>Global &amp; Cultural Issues in Health Communication (3)&lt;br&gt;Explores issues in global health, culture, and communication in health care initiatives.</td>
</tr>
<tr>
<td>COM 4374</td>
<td>Critical Issues in Social Media (3)&lt;br&gt;The course examines the relationship of social media to culture. We will explore theories about social media; analyze social media; investigate questions of democracy, resistance, and oppression.</td>
</tr>
<tr>
<td>COM 4414</td>
<td>Race and Gender in Popular Film and Television (3)&lt;br&gt;PR: SPC 3544 or COM 3051&lt;br&gt;Explores representations of race and gender in contemporary TV and film and utilizes feminist and critical race theories to interrogate social inequalities. Majors only. Non-majors by permit only. May not be repeated for credit.</td>
</tr>
<tr>
<td>COM 4490</td>
<td>Communication and Love (3)&lt;br&gt;Examines concepts, philosophy, and theories of love in connection with communication skills.</td>
</tr>
<tr>
<td>COM 4530</td>
<td>Influencing Public Opinion (3)&lt;br&gt;Explores foundations, history, measurement techniques, and persuasive strategies of public opinion research and practice from rhetorical perspectives.</td>
</tr>
<tr>
<td>COM 4702</td>
<td>Communication, Language, and Mental Illness (3)&lt;br&gt;Explores intersection of mental illness and communication as language, talk-in-interaction, and discourse as social practice.</td>
</tr>
<tr>
<td>COM 4710</td>
<td>Writing Lives (3)&lt;br&gt;Emphasizes writing stories about our lives and the lives of others as a way to understand, cope with and communicate social experiences.</td>
</tr>
<tr>
<td>COM 4744</td>
<td>Critical Issues in Reality Television (3)&lt;br&gt;This course examines contemporary reality TV, investigating why it has become popular and what it can tell us about culture. We look at inequality, oppression and disenfranchisement, in the context of surveillance (the shows use surveillance techniques).</td>
</tr>
<tr>
<td>COM 4931</td>
<td>Special Topics in Media Analysis (3)&lt;br&gt;Selects contemporary topics in media, media genres, and forms to examine how social issues are reflected and changed. Majors only; non-majors by permit only. May be repeated for credit as topics change for 9 total credits.</td>
</tr>
<tr>
<td>COP 1930</td>
<td>Special Topics for Information Technology (3)&lt;br&gt;Special topics course.</td>

</tbody>
</table>
COP 3722 Advanced Database Systems Design (3)
PR: COP 3718 and COP 2700
This course presents contemporary data modeling and database design techniques in a vendor-neutral manner. Students will learn to create conceptual, logical, and physical data models, specialized techniques for handling temporal and analytical data.

COP 3931 Special Topics for Information Technology (3)
Topics to be chosen by students and instructor permitting newly developing sub-disciplinary special interests to be explored.

COP 4020 Programming Languages (3)
PR: COP 4530.
An introduction to the specification, design, and analysis of programming languages. Topics include syntax, operational semantics, type systems, type safety, lambda calculus, functional programming, polymorphism, side effects, and objects.

COP 4260 Systems Programming: Java EE (3)
PR: COP 2250.
This course covers Java EE, the Enterprise Java Platform. Java EE is a super-set of Java SE. This platform has matured to a degree where it can be both complete and lightweight, while, at the same time incorporating many new and enhanced tools.

COP 4313 Symbolic Computations in Mathematics (3)
PR: MAS 3105 and MAP 2302.
Students will write programs to solve problems in various areas of mathematics including calculus and linear algebra with symbolic programming systems such as Maple, Mathematica, or Macsyma.

COP 4365 Software System Development (3)
PR: COP 4530.
Analysis, design, and development of software systems using objective methodology with object oriented programming and advanced software development tools (such as integrated development environments).

COP 4368 Adv Object-Oriented Programming for IT (3)
PR: COP 2513 with a minimum grade of C
Advanced object-oriented programming techniques and applications. Topics include GUI design, visual objects, event handling, data validation, interfaces, database connection, etc.

COP 4376 Java-Based Python (Jython) (3)
PR: COP 3259 and COP 3375
Focus is on the Python language as used with the Jython (Java-based) interpreter in a Java EE environment – Python enables the best of two worlds by bridging between the elegant, expressive code of the Python world and the "enterprise ready" Java world.

COP 4520 Computing in Massively Parallel Systems (3)
PR: COP 4530 with a minimum grade of C-
This course will cover basics in large-scale parallel computing and CUDA programming, and advanced techniques for parallel code optimization and domain-specific case studies.

COP 4530 Data Structures (3)
PR: COP 3514 min Grade B and CDA 3103 min Grade B
Understand and implement fundamentals of concise data structure and organization for program efficiency, clarity and simplification. Implementation of different data types and structures. Understanding of current data structures. Functional programming concepts will be covered.

COP 4538 Data Structures and Algorithms for Information Technology (3)
PR: COP 3515
Formalizes the concepts of algorithm and time complexity. Data structures such as heaps, lists, queues, stacks, and various forms of trees are covered. Students design and analyze algorithms. Numerous classic algorithms are covered.

COP 4564 Application Maintenance & Debugging for IT (3)
PR: COP 3515
Addresses the software-development cycle and code maintenance, as well as software correctness. Various code testing strategies and debugging methods are presented along with tools for software maintenance and debugging.

COP 4600 Operating Systems (3)
PR: COP 4530.
Introduction to systems programming. Design of operating systems. Concurrent processing, synchronization, and storage management policies.

COP 4610 Operating Systems for Information Technology (3)
PR: COP 4538
This course is an introduction to operating systems using an algorithmic approach. Topics include processes, parallelism, memory management, resource allocation, file systems, remote file systems, virtual machines, and virtualization.
COURSE DESCRIPTIONS
(AS OF SEPTEMBER 20, 2021)

COP 4620 Compilers (3)
PR: COP 4530
Introduction to techniques for compiling software; lexical, syntactic, and semantic analyses; abstract syntax trees; symbol tables; code generation and optimization.

COP 4656 Software Development for Mobile Devices (3)
PR: COP 4530
This course covers software development for mobile devices, mainly cellular phones. The primary goal of the course is to teach students how to design, develop, and deploy complete market-ready applications for mobile devices.

COP 4663 Mobile Applications Development (3)
PR: COP 2030, COP 2250, and COP 3375
This course provides the beginning programmer with a strong foundation necessary to build mobile applications for mobile devices.

COP 4703 Advanced Database Systems for Information Technology (3)
PR: COP 4538 with a minimum grade of C- Database management systems are presented, covering relational, CODASYL, network, hierarchical, and object-oriented models. Backups and database server admin are covered. Best practices for information management are covered.

COP 4710 Database Design (3)
PR: COP 3331
CPR: COP 4530
This course covers the fundamentals and applications of database management systems, including data models, relational database design, query languages, and web-based database applications.

COP 4834 Data-Driven Web Sites (3)
This course builds on students’ knowledge of Web development and databases by adding server-side scripting using the PHP language to interact with the mySQL database system to build transaction processing and report generating systems over the Internet.

COP 4883 Java Programming for Information Technology (3)
PR: COP 4538
This course covers object-oriented programming in Java and Java foundation classes. Topics include classes, inheritance, interfaces, graphical user interfaces (GUIs), event-driven programming, exception handling, and networking.

COP 4900 Independent Study in Information Technology (5)
Specialized independent study determined by the needs and interests of the student.

COP 4930 Information Technology Seminar (3)
A survey of current Information Technology topics are covered to keep the IT student abreast of the variety of domains associated with their major. Speakers with a wide variety of IT experience will give seminars to senior IT students.

COP 4931 Special Topics for Information Technology (3)
Topics to be chosen by students and instructor permitting newly developing sub-disciplinary special interests to be explored.

COT 3100 Introduction to Discrete Structures (3)
PR: MAC 2281 or equivalent.
Introduction to set algebra, propositional calculus and finite algebraic structures as they apply to computer systems.

COT 4115 Advanced Discrete Structures with Cryptology (3)
PR: COP 4530, COT 3100.
Advanced topics in discrete mathematics: number theory, groups, rings and fields, finite fields, and combinatorics, as applied to computer systems. Theoretical application of mathematic concepts to coding theory and cryptography.

COT 4210 Automata Theory and Formal Languages (3)
PR: COT 3100 with a minimum grade of C-
Introduction to the theory and application of various types of computing devices and the languages they recognize.

COT 4400 Analysis of Algorithms (3)
PR: COT 3100, COP 4530.
Design principles and analysis techniques applicable to various classes of computer algorithms frequently used in practice.

COT 4521 Computational Geometry (3)
PR: COP 4530, COT 4400.
Computational geometry is the study of efficient algorithms to solve geometric problems. Topics covered include Polygonal Triangulations, Polygon Partitioning, Convex Hulls, Voronoi Diagrams, Arrangements, Search and Intersection, and Motion Planning.
COURSE DESCRIPTIONS

(AS OF SEPTEMBER 20, 2021)

UNIVERSITY OF SOUTH FLORIDA 2021-2022 UNDERGRADUATE CATALOG

COT 4601 Quantum Computing and Quantum Algorithms (3)
PR: CDA 3103 Computer Organization min grade B or permission of instructor and COP 4530 Data Struct. min grade C- or permission of instructor and EGN 4450 Linear Systems min grade C
Introduction to and survey of quantum computing. Theory of qubits and quantum computation are studied including entanglement, superdense coding, quantum teleportation, and current topics. Students will also program simulated and real quantum computers.

CPO 2002 Introduction to Comparative Politics (3)
Comparison and analysis of representative European and non-Western political systems.

CPO 4034 Politics of the Developing Areas (3)
An analysis of the ideologies, governmental structures, and political processes of selected nations of the non-Western world.

CPO 4930 Comparative Government and Politics of Select Areas (3)
Studies political systems with common elements. Structure, process, domestic and foreign politics, and regional roles are considered.

CRW 2100 Narration and Description (3)
A study of narrative and descriptive techniques in prose. By making the student sensitive to language usage, the course is designed to bridge the gap between expository writing and imaginative writing.

CRW 3013 Creative Writing (3)
PR: ENC 1102.
This course will introduce students to the fundamental tools of creative writing: how to generate ideas, recognize and develop a writers voice, choose a form and genre, assess and edit creative work, and how professional writers work on their craft.

CRW 3111 Form and Technique of Fiction (3)
A study of short narrative forms such as the anecdote, tale, character sketch, incident, monologue, epistolary story, and short story as they have been used in the development of fiction and as they exist today.

CRW 3112 Fiction I (3)
PR: CRW 2100 or CRW 3111.
An introduction to fiction writing, beginning with a practical study of the various elements of fiction and proceeding through the many processes of revision to arrive at a completed work of art.

CRW 3121 Fiction II (3)
PR: CRW 2100 or CRW 3111, CRW 3112.
A fiction workshop that provides individual and peer guidance for the student's writing and that encourages the development of critical skills.

CRW 3212 Nonfiction I (3)
An examination of the diverse strategies employed in the forms of nonfiction, including but not limited to memoir, essay, researched essay, memoir, braided essays, nature writing, food writing, writing about place, and/or literary journalism.

CRW 3311 Form and Technique of Poetry (3)
An examination of the techniques employed in fixed forms from the couplet through the sonnet to such various forms as the rondel, ballad, villanelle, sestina, etc. Principles in the narrative, dramatic, and lyric modes are also explored.

CRW 3312 Poetry I (3)
PR: CRW 3311.
An introduction to poetry writing utilizing writing exercises employing poetic language and devices; the exercises progress to the writing of both rhymed and unrhymed metrical and non-metrical forms.

CRW 3321 Poetry II (3)
PR: CRW 3312 with a minimum grade of C-
A poetry workshop that provides individual and peer guidance for the student's writing and that encourages the development of critical skills.

CRW 4924 Advanced Creative Writing (3)
PR: CRW 3013
This course provides advanced training in a specific genre or mode of writing; focuses on a single theme or genre; will further develop student capabilities in reading, critical thinking, and written expression. Repeatable for 6 credits.

CRW 4930 Selected Topics in Creative Writing (3)
PR: 12 hours of CRW courses
The focus of the course will be governed by student demand and instructor interest. Topics to be covered may include writing the literary essay, writing in mixed genres, and utilizing popular conventions in serious works. May be taken twice for credit with different topics.

CTS 3165 Linux Essentials (3)
This course describes installation and configuration of Ubuntu Linux as a powerful desktop workstation capable of competing with the leading desktop operating system, but at a much lower cost. A wide variety of applications are installed to cover many areas.

CTS 4337 Linux Workstations System Administration for IT (3)
PR: COP 3353
Students learn to install, configure, tune, and administer a Linux system. Administration focuses on managing user accounts, file systems, and processes. System commands are presented and students learn to write basic scripts.
CTS 4348 Linux Administration (3)
PR: CTS 3165.
The course provides the breadth and depth of material necessary to effectively implement and manage Linux servers in real-world business environments.

CTS 4805 Web Development Tools (3)
This course builds on web design concepts and extends them to build and maintain complete Web Sites using the current de facto industry-standard integrated web site development environment/applications.

CWR 4202 Hydraulics (3)
PR: EGN 3353.
Fundamental and applied aspects of pipe flow, free surface flow, and unsteady flow for hydraulic systems.

CWR 4202L Civil Engineering Hydraulics Laboratory (1)
CR: CWR 4202
Performance of experiments to reinforce principles of hydraulics engineering.

CWR 4540 Water Resources Engineering I (3)
PR: CWR 4202.
A study of the engineering principles involved in sustaining and managing the quantity and quality of water available for human activities with particular emphasis on surface water and ground water hydrology.

CWR 4541 Water Resources Engineering II (3)
PR: EGN 3353, CWR 4202.
The course is intended to be a technical elective for students specializing in water resources or environmental engineering. Material in the course covers subsurface hydrology including both soil vadose zone processes and the ground water flow.

CWR 4620 Ecological Engineering (3)
PR: CHM 2045 min grade C or CHS 2440 min grade C or AP25 min score 4 AND CWR 4540 min grade C
This course explores ecological principles and engineering design techniques to enable the creation and rehabilitation of ecosystems for the benefit of nature and society. Particular applications to be covered include water pollution control (wastewater and stormwater), and ecosystem restoration (freshwater/coastal wetlands, and rivers).

CWR 4812 Capstone Water Resources/Environmental Design (3)
PR: ENV 4001, CWR 4540
CR: ENV 4417, CEG 4012 or TTE 4005.
A capstone water resources design experience for seniors in Civil and Environmental Engineering. A design-oriented course to design both industrial and domestic water treatment and water transport systems and hydraulic systems.

DAA 2100 Fundamentals Of Modern Dance (2)
A studio class for students with a serious interest in concert modern dance. Emphasis upon correct alignment, development of strength, rhythmic and dynamic activity, as well as spatial and locomotor patterns. May be repeated up to six credit hours.

DAA 2104 Modern Dance I (2)
A studio class for students with a serious interest in concert modern dance. Further emphasis on correct alignment, development of strength, rhythmic and dynamic activity as well as spatial and locomotor patterns. May be repeated up to 8 credit hours.

DAA 2200 Fundamentals Of Ballet (2)
A studio class for students with a serious interest in Ballet. Emphasis on correct alignment of the body and a progressive development of positions and barre exercises as well as the application of combinations in center work using classical Ballet vocabulary (French terms). May be repeated.

DAA 2204 Ballet I (2)
A studio class for students with a serious interest in Ballet. Further emphasis on correct alignment of the body and a progressive development of positions and barre exercises as well as the application of combinations in center work using classical Ballet vocabulary (French terms). May be repeated.

DAA 2500 Fundamentals Of Jazz Dance (2)
A basic movement course in Jazz Dance involving dance vocabulary, alignment, styles and simple rhythmic patterns. May be repeated up to 6 credits.

DAA 2504 Jazz Dance (2)
PR: DAA 2500
A technique class for the intermediate level dancer to become acquainted with the dance styles and forms of musical theatre and concert jazz dance. Emphasis is on highly stylized movement with a strong rhythmic base. May be repeated.

DAA 2570 Jazz Theatre Dance (3)
PR: DAA 2504
Further emphasis on projection, phrasing, rhythmic patterns and dynamics. Solo and ensemble studies leading to performance. May be repeated up to 6 credits.
# COURSE DESCRIPTIONS

(AS OF SEPTEMBER 20, 2021)

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Prerequisites</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>DAA 3108 Modern Dance II (3)</td>
<td>Study of principles of modern dance technique. Practical work in exercises and movement phrases, utilizing changing rhythms and dynamics. Concert and performance attendance required. May be repeated.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>DAA 3109 Modern Dance III (3)</td>
<td>Continuation of DAA 3108. Further emphasis on style and phrasing. Work on projecting mood and quality by dancing and rehearsing in more advanced choreography, leading to performance. May be repeated.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>DAA 3209 Ballet III (3)</td>
<td>Continuation of DAA 3208. Intensification of barre exercises for the development of strength and form. Application of phrasing and movement. Material covered as practical work in class for concerts and performances. May be repeated.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>DAA 3214 Ballet II (3)</td>
<td>Positions and barre exercises. Emphasis on correct alignment of the body and the application of simple step combinations in centre work. The use of ballet vocabulary (French terms). Material is covered almost totally as practical work in class with a few outside projects. Concert and performance attendance required. May be repeated.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>DAA 3294 Ballet Variations (1)</td>
<td>This course provides instruction in various forms of ballet. Semester courses include: Pointe technique, Men's Class, Character Dance, Spanish Dance and Partnering. BFA Ballet concentration students are required to complete two semester hours. May be repeated.</td>
<td>PR: DAA 3209</td>
<td></td>
</tr>
<tr>
<td>DAA 3395 World Dance Topics (1)</td>
<td>Students will experience fundamental knowledge of dance representing various world cultures. In addition to a dance/movement component, a connection will be made to historical, spiritual/religious, ethnological and environmental indigenous aspects of people involved in dance as a cultural experience. May be repeated.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>DAA 3614 Choreography I (2)</td>
<td>Focus is upon movement invention and concepts of time, space and force. Integration of basic musical foundations and compositional structures, i.e. ABA and Canon, theme/variation. Research of various musical genres, rhythms and styles.</td>
<td>CR: DAA 3108 or DAA 3214</td>
<td></td>
</tr>
<tr>
<td>DAA 3615 Choreography II (2)</td>
<td>This course focuses on the use of choreographic devices/tools for movement inspiration, improvisation for generating movement, creating meaning, and music and its relation to the art form of dance (i.e. meter, tempo, rhythm, and style).</td>
<td>PR: DAA 3614</td>
<td></td>
</tr>
<tr>
<td>DAA 3624 Dance Improvisation (2)</td>
<td>Exploring various methods of spontaneously creating dance movement in individual and group situations. Focus is upon movement expression as communication and as a revealing aspect of selfhood.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>DAA 3654 Repertory I (1)</td>
<td>The development and performance of solo and/or group dances.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>DAA 3684 Repertory II (1)</td>
<td>The development and performance of solo and/or group dances.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>DAA 3686 Junior Performance Project (1)</td>
<td>Required for junior dance majors. Involves rehearsal and performance of work presented by a senior dance major in the dance program. Open to all university students proficient in dance techniques and concurrently enrolled in technique courses. Repeatable.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>DAA 4110 Modern Dance IV (4)</td>
<td>Intense work on the growth of personal performance styles. Equal emphasis will be given to training the body in the development of technical excellence. May be repeated.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>DAA 4211 Ballet IV (3)</td>
<td>Perfecting the execution of barre work. Intensification of centre work. More stress on aesthetic quality of movement and phrasing. Students expected to be proficient in pointe work. Outside projects, concerts, and performances are required. May be repeated.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>DAA 4616 Choreography III (2)</td>
<td>Course emphasis is primarily on group choreography, along with a final project where students work with incorporating text and movement. Continuation of the study of meter, tempo, rhythm, and style in music, as well as dynamics and phrasing.</td>
<td>PR: DAA 3615</td>
<td>CR: DAA 3109 or above, or DAA 3209 or above</td>
</tr>
<tr>
<td>DAA 4617 Choreography IV (2)</td>
<td>The focus of this course is taking choreography beyond the stage, structured around two main projects: creating a site-specific work, and filming/editing a dance video project, including creating an audio score. Introduction to music editing.</td>
<td>PR: DAA 4616</td>
<td></td>
</tr>
<tr>
<td>Course Code</td>
<td>Title</td>
<td>Description</td>
<td></td>
</tr>
<tr>
<td>-------------</td>
<td>-------</td>
<td>-------------</td>
<td></td>
</tr>
<tr>
<td>DAA 4687</td>
<td>Performance (2)</td>
<td>Open to all university students proficient in dance techniques and concurrently enrolled in Technique. Involves rehearsal and performance of works presented by the department. May be repeated.</td>
<td></td>
</tr>
<tr>
<td>DAA 4694</td>
<td>Senior Choreography Project (5)</td>
<td>The creation of an original group work and solo within the senior's major concentration-ballet or modern. To be performed and presented with the concurrence of a faculty advisor.</td>
<td></td>
</tr>
<tr>
<td>DAE 4340</td>
<td>Dance Pedagogy: Secondary Curriculum (3)</td>
<td>This course is designed to meet the needs of students in Dance Education to understand the scope and sequence of dance curriculum design and teaching methods appropriate to the secondary student.</td>
<td></td>
</tr>
<tr>
<td>DAE 4340L</td>
<td>Dance Pedagogy: Internship (1)</td>
<td>CR: DAE 4340 This course is designed to meet the needs of students interested in teaching at the secondary level (Middle/High School). It provides an internship experience where students have the opportunity to develop their teaching skills in a public school setting.</td>
<td></td>
</tr>
<tr>
<td>DAE 4394</td>
<td>Senior Seminar In Dance Education (2)</td>
<td>CR: DAE 4940 This course represents a synthesis of the teacher candidates courses and is required concurrently with the internship.</td>
<td></td>
</tr>
<tr>
<td>DAN 2100</td>
<td>Understanding the Dance Experience (3)</td>
<td>A study of dance through lectures, discussions, concert attendance, and studio practice. Designed to develop awareness and insight of dance through creation, discussion, observation, writing, and movement experiences.</td>
<td></td>
</tr>
<tr>
<td>DAN 2160</td>
<td>Entry Seminar (2)</td>
<td>This is a study of dance-related career opportunities through lectures, assigned reading and video viewing. This course will aid majors in understanding dance as an aesthetic art form through discussion and critical evaluation.</td>
<td></td>
</tr>
<tr>
<td>DAN 3584</td>
<td>Technical Theatre in Dance (2)</td>
<td>An introductory course in technical production including lighting, sound, scenic, stage management/production and front of house. Requires load-in hours/crew assignments during USF Fall and Spring Dance Concerts.</td>
<td></td>
</tr>
<tr>
<td>DAN 3714</td>
<td>Dance Kinesiology (3)</td>
<td>This course will give the student an understanding of basic human anatomy and how it functions in relation to movement, injury prevention, teaching and performance. Individual structural differences and how these affect movement potential will also be studied. There will be an emphasis on the kinesiological analysis of movement with the goal of increased efficiency, enhanced performance and injury prevention.</td>
<td></td>
</tr>
<tr>
<td>DAN 4134</td>
<td>Ballet History (3)</td>
<td>This is a lecture course in dance history stemming from its roots in Renaissance court dance through the mid-20th century focusing primarily on the history of ballet as an art form.</td>
<td></td>
</tr>
<tr>
<td>DAN 4135</td>
<td>20th Century Dance History (3)</td>
<td>Designed for majors and non-majors, this course will trace the development of dance as an art form in the 20th Century. It is designed to develop awareness and insight through lecture, discussion, video, observation and writing. Students will be required to attend at least two dance performances.</td>
<td></td>
</tr>
<tr>
<td>DAN 4162</td>
<td>Research in Dance I (3)</td>
<td>This course will introduce basic research tools and methodologies for conducting research in the dance genre, and will serve the student in preparing for future research based study in the field of dance. Interdisciplinary linkages will be explored.</td>
<td></td>
</tr>
<tr>
<td>DAN 4163</td>
<td>Research in Dance II (2)</td>
<td>PR: DAN 4162 with a minimum grade of C- This course will build upon the research methods and processes introduced in the Research in Dance 1 course. Students in the BA degree track in dance are required to take this course to develop their research proposal for the independent research project.</td>
<td></td>
</tr>
<tr>
<td>DAN 4180</td>
<td>Dance Senior Seminar (2)</td>
<td>A study of career opportunities in performance, teaching, research, design, and choreography. To aid majors in self-appraisal as artists and develop methods to further their potential in the professional world. Discussion, critical evaluation and projects.</td>
<td></td>
</tr>
<tr>
<td>DAN 4434</td>
<td>Laban Movement Analysis (3)</td>
<td>Specialized study in movement theories, body alignment, and movement patterns focusing on the scientific and analytical basis of movement in dance with consideration for developmental processes, technique, creative expression, and performance.</td>
<td></td>
</tr>
<tr>
<td>DAN 4906</td>
<td>Directed Study (5)</td>
<td>Independent studies in the various areas of Dance. Must receive approval prior to registration. May be repeated.</td>
<td></td>
</tr>

</tr>
<tr>
<td>PR: PSY 3213 Overview of research; information about causes of disorder; historical and philosophical views; biological &amp; psychological research; efforts to help individuals live productive &amp; independent lives; recent controversies; integrative approach to treatment.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>DIG 3020C Digital Public History (3)</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>This course explores a wide range of digital applications on public history focusing on the impact 3D visualization has got on public historians, curators, museum educators, docents and local and global public.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>DIG 3119C Digital Drawing (3)</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>PR: ART 2301C with a minimum grade of C Exploration of digital vector and raster based illustration and design. Students synthesize traditional drawing and painting skills with digital tools. Includes study of digital imaging, drawing systems, color theory, and idea generation.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>DIG 3306C 3D Animation (3)</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>DIG 3323C Digital Sculpture (3)</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Hands-on exploration of high-polygon digital sculpting for art and design. Students digitally sculpt figures and organic forms for 2D images, animation, 3D environments, and digital fabrication. Includes study of history, theory, and practices.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>DIG 3465C Visual Storytelling (3)</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>PR: ART 3612C with a minimum grade of C This is an intermediate course focused on digital storytelling for animation and film. Students explore story development, storyboarding, and the creation of animatics. Includes study of pre-production and conventions of cinematography.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>DIG 3950C Digital Archaeology (3)</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>This course provides a hands-on, project based introduction to digital technologies as they are used in the study of the ancient Greek and Roman civilization.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>DSC 3013 Terrorism and Homeland Security (3)</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>This course will introduce you to the phenomena of contemporary terrorism and extremism. Emphasis will be placed on extremism as a foundation for terrorist behavior, types of terrorism, and how governments and law enforcement agencies respond to terrorism.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>DSC 3594 Introduction to Intelligence Analysis (3)</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>This course is designed for understanding how the intelligence community's history, structure, procedures, and functions affect policy decisions. It will explore challenges facing the intelligence community by examining NSA and CIA programs.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>EAP 1600 Listening &amp; Speaking for International Students (3)</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>PR: English language proficiency test score of 5.0 IELTS score with no sub-scores lower than 4.5 or the equivalent 50 iBT TOEFL score; OR successful completion of Academic English Level 3 in the English Language Program at USF. The goal of this course is to help international students develop their English language abilities in speaking, listening, pronunciation and presentations for academic studies.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>EAP 1660 Grammar for International Students (3)</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>PR: English language proficiency test score of 5.0 IELTS score with no sub-scores lower than 4.5 or the equivalent 50 iBT TOEFL score; OR successful completion of Academic English Level 3 in the English Language Program at USF. The goal of this course is to help international students learn to use grammatical structures in spoken and written academic contexts.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>EAP 1680 Essential Academic English Skills (6)</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>PR: English language proficiency test score of 5.0 IELTS score with no sub-scores lower than 4.5 or the equivalent 50 iBT TOEFL score; OR successful completion of Academic English Level 3 in the English Language Program at USF. The goal of this course is to help international students develop reading, writing, lecture-listening and note-taking skills needed for university study while learning about events in American history and their impact on American culture.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>EAP 1850 English for International Students I (6)</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>This course supports the development of academic English for international students, with an emphasis on processing, analyzing, and integrating information from academic texts and lectures, and applying pragmatic skills in university interactions.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
EAP 1851 English for International Students II (6)
This course supports the development of academic English for international students, with an emphasis on researching and producing papers and presentations in a variety of academic genres with appropriate academic language use.

EAS 4121 Hydro and Aerodynamics (3)
PR: EML 3701, MAP 2302. Advanced fluid dynamics, ideal and viscous flows, applications to flow around immersed bodies.

EBD 4011 Introduction to Behavior Disorders (3)
PR: EEX 4012, or equivalent Survey of emotional, behavioral and social disorders in children and youth. History of the field, definitions, classifications, theoretical approaches, intervention techniques, classroom management, service delivery models, trends and issues.

EBD 4909 Directed Study: Behavior Disorders (3)
To extend competency in teaching field.

EBD 4941 Undergraduate Supervised Practicum in Behavior Disorders (6)
PR: EEX 4012 Supervised field experience in assessment, classroom management, and clinical teaching with children who have emotional and behavioral disabilities.

ECH 3002 Introduction to Chemical and Biomolecular Engineering (2)
Introduce chemical and biomedical engineering careers through discussion, videos, industrial/academic speakers, problems by virtual experiments to gather data for modeling and analysis with software tools.

ECH 3023 Material and Energy Balances (3)
PR: PHY 2048 with a minimum grade of C or PHY 2060 with a minimum grade of C or Physics C: Mechanics with a minimum score of 4, MAC 2282 with a minimum grade of C or MAC 2312 with a minimum grade of C or Calculus BC with a minimum score of 4, CHM 2046 with a minimum grade of C or Chemistry with a minimum score of 5, ECH 3854 with a minimum grade of C- Integration of previous knowledge into the definition of reactors and separation processes, through the hierarchical use of material balance, phenomenological and energy balance equations. Representation of streams as arrows and processes as black boxes in Box Flow Diagrams, BFD. Application of degree of freedom analysis.

ECH 3031 Chemical Engineering Thermodynamics I (3)
PR: ECH 3023 with a minimum grade of C- CPR: EGN 3433 with a minimum grade of C or MAP 2302 with a minimum grade of C Introduction to foundational concepts in classical thermodynamics including entropy, work, first and second laws, and properties of ideal and real substances. Applications to chemical engineering cycles, processes, and unit operations.

ECH 3240L Chemical Engineering Laboratory I (2)
CPR: ECH 4267 with a minimum grade of C- Laboratory experiments in chemical engineering topics, such as mass and energy balances, transport phenomena and thermodynamics. Accompanied by lectures on safety, data analysis, and obtaining information.

ECH 3266 Transport Phenomena I (3)
PR: EGN 3434, ECH 3023, MAP 2302 OR EGN 3433 Introduce principles of momentum, mass and heat transport. Mathematical modeling of transport in one dimension and obtain solutions for fluxes and profiles. To utilize them to obtain engineering quantities.

ECH 3702 Instrument Systems I (3)
PR: MAP 2302 or EGN 3433, EGN 3343 and ECH 3023 Basic concepts of electric circuits and their applications. Resistors, capacitors, inductors, logic operations, junction devices. Programmable Logic controllers, ladder diagrams.

ECH 3783 Sustaining the Earth: An Engineering Approach (3)
It provides a global perspective on ecological principles revealing how all the world’s life is connected and sustained within the biosphere and how technology provides the tools to design solutions in the context of social and environmental development.

ECH 3854 Engineering Computations (3)
CPR: MAC 2282 with a minimum grade of C or MAC 2312 with a minimum grade of C or Calculus BC with a minimum score of 4 Engineering statistics and programming in MATLAB, with applications to ChBME problems. Includes numerical representations, matrix indexing, nested loops, conditional statements.
<table>

<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECH 4123</td>
<td>Chemical Engineering Thermodynamics II (3)</td>
<td>Correlation of thermodynamic properties of real systems and solutions. Description of multicomponent, multiphase systems in equilibrium. Applications to separation processes and reactor design.</td>
</tr>
<tr>
<td>ECH 4241L</td>
<td>Chemical Engineering Laboratory II (2)</td>
<td>Laboratory experiments in reaction engineering, process control, heat and mass transfer. Lectures on theoretical concepts explored, sensors and data acquisition, data analysis, uncertainty analysis and experimental design.</td>
</tr>
<tr>
<td>ECH 4267</td>
<td>Transport Phenomena II (3)</td>
<td>Introduce application of unsteady and steady state modeling in mass, momentum, and heat transfer. Explain design based on transport processes for equipment such as heat exchangers, packed beds, mixing tanks etc.</td>
</tr>
<tr>
<td>ECH 4418</td>
<td>Separation Processes (3)</td>
<td>Design of stage-wise and continuous separation processes for gas absorption, distillation, adsorption, liquid-liquid extraction, membrane separations. Utilization of process simulators and design case studies.</td>
</tr>
<tr>
<td>ECH 4504</td>
<td>Kinetics and Reaction Engineering (3)</td>
<td>The course introduces design of commercial chemical reactors, emphasizing synthesis of chemical kinetics and transport phenomena.</td>
</tr>
<tr>
<td>ECH 4535</td>
<td>Catalysis: Concepts and Applications (3)</td>
<td>Descriptions of thermodynamic, dynamic, and structural features of surfaces. Analysis of the chemical bonds at surfaces. Assessment of unique properties of surfaces and exploitation in applications including heterogeneous catalysis.</td>
</tr>
<tr>
<td>ECH 4615C</td>
<td>Product and Process Design (3)</td>
<td>Synthesis and analysis of economically feasible and environmentally acceptable chemical processes and products; design of safe chemical production and treatment facilities; Computer aided design; Cases studies and design projects</td>
</tr>
<tr>
<td>ECH 4680C</td>
<td>Product Development (3)</td>
<td>An introduction to the concepts and practice of chemical process safety and ethics</td>
</tr>
<tr>
<td>ECH 4715</td>
<td>Chemical Process Safety and Ethics (2)</td>
<td>Ethical, cultural and economic diversity aspects will be developed thru community involvement.</td>
</tr>
<tr>
<td>ECH 4804</td>
<td>Synthetic Fuel Production (3)</td>
<td>Descriptions of historic developments in transportation fuel production, current oil and gas industry methods for fuel production; Analyses of futuristic synthetic fuel production. Assessment of proposed future fuel economies.</td>
</tr>
<tr>
<td>ECH 4846</td>
<td>Numerical Methods in Chemical Engineering (3)</td>
<td>Use of computer methods to solve chemical engineering problems. Solution of linear and nonlinear algebraic and differential equations that arise in chemical engineering. Optimization methods.</td>
</tr>
<tr>
<td>ECH 4905</td>
<td>Independent Study (4)</td>
<td>Specialized independent study determined by the student’s needs and interests. Students must have contract with instructor.</td>

</table>
ECO 4421 Introduction to Econometrics (3)  
PR: ECO 3101 or ECP 3703 with a minimum grade of C-, and STA 2023 with a minimum grade of B  
Survey of basic econometric techniques. Regression analysis employed to estimate consumption, investment, demand, cost, and production functions. Examines problems of autocorrelation, heteroscedasticity, multicollinearity, and specification errors.

ECO 4422 Time Series Analysis and Forecasting (3)  
PR: ECO 4421 with a minimum grade of C-

This course covers the basics of forecasting and time series analysis as used in economics, finance, and business. Time series topics will include linear regression, ARIMA models, trend modeling, seasonal adjustments and volatility modeling.

ECO 4504 Public Finance (3)  
PR: ECO 3101 or ECP 3703 with a grade of B or better

ECO 4704 International Trade and Policy (3)  
PR: ECO 3101 or ECP 3703 with a grade of C or better

Advanced analysis of international trade theory and commercial policy, international economic integration, multinational enterprise.

ECO 4713 International Macroeconomics (3)  
PR: ECO 3101 or ECP 3703 with a grade of C or better

Advanced analysis of international macroeconomic relationships. Foreign exchange market, international monetary system balance of payments.

ECO 4914 Independent Research (3)  
Individual study contract with instructor and department chairperson required. The research project will be mutually determined by the student and instructor. May be repeated up to 6 hours.

ECO 4935 Selected Topics in Economics (3)  
Topics to be selected by the instructor or instructors on pertinent economic issues.

ECO 4970 Economics Honors Thesis (3)  
This course is the climax of an undergraduate experience in the College of Business. Thesis development supports critical investigation to develop explanations or solutions to academically interesting business problems or opportunities.

ECP 3125 Economics of Inequality (3)  
PR: ECO 1000 or ECO 2013 or ECO 2023 or equivalent

Economic facts, theories and policies concerning income inequality, poverty and discrimination in the U.S. economy and elsewhere in the world.

ECP 3201 Economics of Women and Work (3)  
PR: ECO 1000 or ECO 2013 and ECO 2023

Survey of research on women, men and work in the labor market and the household. Focuses on the economic status of women. Includes historical perspective, examination of the family as an economic unit, changing work roles, and gender differences in occupation and earnings.

ECP 3203 Labor Economics (3)  
PR: ECO 3101 or ECP 3703 with a grade of C or better

Determinants of wage and employment levels; occupational, industrial and geographical wage differentials; union and public policy effects on labor markets; the economics of discrimination; inflation, and unemployment.

ECP 3302 Environmental Economics (3)  
PR: ECO 2023

An economic analysis of environmental issues. The economics of resource use and pollution control are examined using the concepts of externalities, cost-benefit analysis, public goods, and property rights.

ECP 3303 Economics and the Environment (3)  
Intro to economic analysis centered on environmental issues and their impact on local communities. Economics of resource use and pollution examined using concepts of externalities, cost-benefit analysis, policy instruments. Course only Study Abroad.

ECP 3403 Industrial Organization (3)  
PR: ECO 3101 or ECP 3703

Behavior of firms and market structure when the standard assumption of perfect competition in the market is violated. Existence of market power, how firms create and maintain it, implications of market power, and related public policy issues.

ECP 3413 Economics of Regulation and Antitrust (3)  
PR: ECO 2013 and ECO 2023

Economic analysis of the rationale and performance of government regulation and antitrust policy. Examination of antitrust issues such as price fixing, mergers, and monopolization, and issues regulating electric utilities, airlines, trucking, consumer product safety, product quality, and the environment.
ECP 3530 Economics of Health (3)  
PR: ECO 3101 or ECP 3703 with a grade of C- or better  
Application of economic methods to health care topics such as demand for medical care, public and private health insurance, physician and hospital supply of medical care, government regulations, and national healthcare systems.

ECP 3613 Urban Economics (3)  
PR: ECO 3101 or ECP 3703  
The role of space in understanding urban areas and their problems. Economic forces determining where people and firms locate within urban areas. Urban economic growth and development, land-use regulation, urban sprawl, transportation, urban government.

ECP 3623 Regional Economics (3)  
PR: ECO 3101 or equivalent  
Survey of regional economics covers theories of location and land use of households and firms; central place theory; spatial structure of urban economy; regional income determination; interregional migration; and urban and regional policy analysis.

ECP 4006 Economics of Sports (3)  
PR: ECO 3101 or ECP 3703  
This course teaches economics using sports as a backdrop. Topics covered include the economics of labor markets, exploitation, discrimination, monopoly, monopsony, game theory, bargaining, and cartels. No particular knowledge of sports is required.

ECP 4451 Law and Economics (3)  
PR: ECO 2013 and ECO 2023  
Advanced analysis of the economic impact of tort, criminal, property, and contract law as well as in the formation and adjudication of law.

ECP 4505 Economics of Crime (3)  
PR: ECO 2013 and ECO 2023  
Application of economic theory to the analyses of criminal behavior, crime prevention, law enforcement, sanctions, and corrections.

ECP 4510 Economics of Education (3)  
PR: ECO 3101, or ECO 2023 and ECO 2013 with B or better  
Economic analysis of the goals of education in American society. Topics include theories of human capital and signaling, private returns to schooling, social welfare benefits and role of the public sector, and factors affecting educational productivity.

ECP 4704 Economics of Business Strategy (3)  
PR: ECO 3101 or ECP 3703  
This course examines strategies businesses can employ to improve their abilities to compete profitably. Employs game theory to examine horizontal and vertical boundaries of firm, strategic diversification, pricing, and entry deterrence.

ECS 3013 Economic Development (3)  
PR: ECO 2013 and ECO 2023  
Economic development in emerging nations.

ECS 4003 Comparative Economic Systems (3)  
PR: ECO 1000 or ECO 2013 or ECO 2023  
The major economic systems: traditional, capitalism, democratic socialism, communism and fascism.

ECS 4430 Economics of Latin America (3)  
PR: ECO 1000, or BOTH ECO 2013 and ECO 2023  
The course examines key aspects of economic reform efforts in Latin America and the Caribbean and the challenges facing the region at the beginning of the 21st century.

ECT 4905 Independent Study: Industrial-Technical Education (4)  
Specialized independent study determined by the student’s needs and interests.

ECT 4909 Directed Study: Industrial-Technical Education (3)  
To extend competency in teaching field.

ECT 4936 Senior Seminar in Industrial-Technical Education (2)  
CR: EVT 4940  
Synthesis of teacher candidate's courses in complete college program.

EDE 4223 Creative Experiences: Using Arts-Based Inquiry & Design Thinking for Problem-Based Learning (3)  
Students will have opportunities to use techniques from creative industries to develop arts-based inquiry strategies that can be used to foster design thinking and creative approaches to solving authentic problems across a variety of contexts and spaces.

EDE 4301 Instructional Planning for Diverse Learners (3)  
This course examines the legal issues affecting classroom/school management, school safety, professional ethics and elementary school methods. The course explores the current knowledge of best practices of a variety of teaching and management strategies and methods deemed appropriate for a diverse elementary classroom setting including ESOL students and other exceptionalities.
COURSE DESCRIPTIONS
(AS OF SEPTEMBER 20, 2021)

UNIVERSITY OF SOUTH FLORIDA 2021-2022 UNDERGRADUATE CATALOG

EDE 4302 The Learning Environment (3)
PR: EDE 4947, RED 4310, EEX 4084, and MAE 4310
CR: EDE 4948
This course covers the practical, theoretical, and ethical aspects of the learning environment, including the current knowledge of best practices of a variety of management strategies and methods appropriate for a diverse elementary classroom setting.

EDE 4323 Planning for Instruction of Diverse Learners (3)
PR: EDE 4223, EDF 3604, EDF 3122, TSL 4240, all with a minimum grade of C-
This course will explore various theoretical and philosophical beliefs regarding effective instruction. Students will plan rigorous, integrated lessons inclusive of national & state standards & benchmarks while meeting diverse learners' needs.

EDE 4504 Creating and Differentiating Learning Environments (3)
Approaches to managing the elementary instructional environment and specific strategies for maintaining a safe, positive classroom climate are examined as well as current knowledge of innovative best practices in differentiated instruction.

EDE 4802 The Teacher as Researcher (3)
CR: EDE 4940
This research prepares teacher candidates to conduct teacher research within their classrooms. This research is presented as a paper which is revised across the semester that summarizes the classroom research.

EDE 4905 Independent Study: Elementary Education (4)
Specialized independent study determined by the student's needs and interests.

EDE 4940 Internship: Elementary Education (2)
PR: EDE 4941 and EDE 4942
CR: EDE 4902
Teacher candidate required to demonstrate professional competencies during full day internship in a public or private elementary school.

EDE 4941 Childhood Education Internship Level I (3)
CR: RED 4310, EDG 4620
Students spend six hours per week in a supervised in-school experience and attend weekly seminar.

EDE 4942 Childhood Education Internship Level II (6)
PR: EDE 4941, RED 4310, EDG 4620 , EDF 3122, LAE 4314, EDE 4301, MAE 4310, SCE 4310, LAE 4414, SSE 4313, EME 2040.
Students spend two days per week in a supervised internship experience in classroom settings and attend a weekly seminar. Course is restricted to Elementary Education majors. Course is repeatable for credit, for a total of 6 credit hours.

EDE 4943 Alternative Setting Field Experience (3)
PR: EDE 4942.
This alternative setting field experience course provides Undergraduate Teacher Candidates with opportunities to work with children in non-traditional, diverse settings and integrate course and field experiences to facilitate learning.

EDE 4944 Childhood Education Internship Level III (3)
PR: EDE 4942.
This internship experience complements foundational coursework expected in the Elementary Education program. Students spend two full days per week in an internship experience in K-6 classrooms. The classroom experiences are supplemented by a weekly seminar.

EDE 4947 Clinical Education I (3)
PR: EDE 4947, EDE 4323, MAE 4310, and RED 4511
CR: EDE 4302
Students will work in an elementary classroom for 3 hours per day of student contact time throughout the semester, learning to plan and instruct pupils and begin to understand the structure and operation of the school.

EDE 4948 Clinical Education II (6)
PR: EDE 4947, EDE 4323, MAE 4310, and RED 4511
CR: EDE 4302
CPR: RED 4310
Students will teach in an assigned elementary school for 14 weeks. Candidates/mentors assess their teaching abilities and personal attributes necessary to the profession through a process of dialogue and reflection.

EDE 4949 Clinical Education III (2)
PR: EDE 4948
The teacher candidate is required to demonstrate professional competencies during one semester of full day internship in a public elementary school. Candidates are expected to perform all teaching duties and responsibilities including a weekly seminar.

**EDP 3273 Learning and Development within the School Context (3)**

An introductory course designed to acquaint students with developmental theories and research that can be applied within a school context. This course is required and restricted for the undergraduate elementary education program.

**EDP 4275 Enhancing Children's Learning and Development within a School Context (1)**

A course that helps students to design instruction while considering individual differences & theories and research in child development and learning. Emphasis on the Elementary School years. Restricted to elementary or Special Education majors.

**EEC 4008 Teaching Literature and Writing in Early Childhood (3)**

This course is designed to provide pre-service teachers with the skills necessary to implement a coordinated literature program and an integrated writing curriculum.

**EEC 4203 Programs for Young Children (3)**

Develops students' understanding of historical and social foundations of early childhood education, establishing professional beliefs regarding teaching young children, and developing an appropriate learning environment.

**EEC 4211 Science for Young Children (3)**

PR: EDF 4124

The purpose of this course is for pre-service teachers to apply research-based learning theories to plan and teach science effectively in the Early Childhood classroom. Enrollment is restricted to majors.

**EEC 4212 Integrated Curriculum: Social Sciences/Humanities & Art (3)**

PR: EDF 4124

Develops an understanding of appropriate curriculum experiences in social science, humanities, and arts for kindergarten and primary grades with an emphasis on integrated experiences, and sociological influences such as culture, ethnicity, language and gender impact understandings, values, and learning.

**EEC 4303 Creative and Affective Experiences for Young Children (3)**

Develops students' understandings of young children's creative expression through art, music, movement, play and drama. Emphasizes how to plan, implement, and evaluate appropriate learning experiences as well as selection of appropriate instructional materials.

**EEC 4307 Cognitive Experiences for Young Children (3)**

PR: EDF 4124

Emphasizes theoretical and practical aspects of cognitive development for children ages 3 through 6 with focus on planning integrated experiences and content in science, mathematics, and social sciences.

**EEC 4321 Mathematics for Young Children (3)**

The purpose of this course is for pre-service teachers in the Early Childhood Program to apply research-based learning theories to plan and teach math effectively in the Early Childhood classroom.

**EEC 4404 Family, School and Community Partnerships (3)**

Focus on developing an understanding of traditional and non-traditional family structures and parenting and diverse cultures for the early childhood educator. Implications will guide the professional development of family involvement strategies.

**EEC 4408 Child, Family & Teacher Relations (3)**

PR: EDF 4124

Focuses on developing an understanding of traditional and non-traditional families, structural and life style variations and parenting in diverse cultures and at-risk families. Implications from these understandings will guide development of a parent involvement plan that includes effective ways to communicate with parents, conference with parents, and plan parent meetings and home visits.

**EEC 4604 Classroom Management and Guidance of Young Children (3)**

CR: LAE 4414, EEC 4408, RED 4310.

This course for early childhood education majors explores the current knowledge of guidance procedures and techniques for managing classrooms for children ages 3 to 8 years old.

**EEC 4613 Assessment and Evaluation of Young Children (3)**

This course focuses on assessment and evaluation procedures when working with young children ages 3-8. It examines appropriate ways of observing and documenting children, and ways of implementing, interpreting, and utilizing multiple assessment data.

**EEC 4614 Current Trends and Issues in Early Childhood Education (3)**

This course focuses on the current trends and issues in the field of early childhood education. It examines how the political and societal underpinnings of the early education system are influencing schools, teachers, young children, and their families.
EEC 4706 Language and Emerging Literacy (3)
PR: EDF 4124
Provides knowledge of language development and emerging literacy for typical and atypical development in children from birth to third grade, including ESOL children.

EEC 4905 Independent Study: Early Childhood Education (4)
Specialized independent study determined by the student's needs and interests.

EEC 4909 Directed Study: Early Childhood Education (3)
To extend knowledge in teaching field.

EEC 4936 Senior Seminar in Early Childhood Education (3)
CR: EEC 4940
This course focuses on helping the student synthesize university coursework and experiences in a full-time Pre-K and primary teaching placement. Emphasis is placed on planning and implementing developmentally appropriate teaching-learning experiences.

EEC 4940 Internship: Early Childhood (9)
CR: EEC 4936
Teacher candidate is required to demonstrate professional competences during one semester of full-time final internship teaching young children ages 3 through 8.

EEC 4941 Field Experience I (3)
Field placement with three and four year olds where teacher candidates have opportunities to apply knowledge and skills in authentic situations and become objective observers of young children's development. Weekly seminars are conducted in conjunction with the field experience which provide teacher candidates an opportunity for reflection on their understandings.

EEC 4942 Field Experience II (3)
Field placement in kindergarten or primary grade where teacher candidates have opportunities to apply knowledge and skills in authentic situations. Emphasis on developing deeper understanding of children's development and implications of development for program planning for both typical and atypical children.

EEC 4943 Field Experience III (3)
Field placement in kindergarten or primary grade where teacher candidates have opportunities to apply knowledge and skills in authentic situations. Focus on developing deeper understanding of growth and development and relationship to curriculum planning with an emphasis on self-evaluation of knowledge, skills, and dispositions essential for teaching.

EEE 3302 Electronics I (3)
PR: EGN 3373 min grade C
A course in the physical principles of electronic devices with emphasis on semiconductor electronics. Includes the analysis and design of amplifiers and switching circuits.

EEE 3394 Electrical Engineering Science I - Electronic Materials (3)
PR: CHS 2440 with a minimum grade of C or CHM 2045 with a minimum grade of C or Chemistry with a minimum score of 4, PHY 2048 with a minimum grade of C or PHY 2060 with a minimum grade of C or Physics C: Mechanics with a minimum score of 4
CPR: MAC 2283 with a minimum grade of C or MAC 2313 with a minimum grade of C
This course provides electrical and computer engineering students with a strong background in material science and quantum physics as they relate to electrical/electronic material and device properties and applications.

EEE 4260C Bioelectricity (3)
Bioelectricity, generation and transmission from cells through tissues. Electrical activity in and among cells is explored from historical models through hands-on laboratory experience.

EEE 4271 Bioelectronics (3)
This is the second course in the series covering bioelectrical phenomena and systems. In this course the focus is electronics for biomedical applications, and the objective is to discuss electrical systems pertaining to the human body.

EEE 4274 MEMS I: Chemical/Biomedical Sensors and Microfabrication (3)
The course gives an introduction to MEMS, microfabrication techniques and processes as well as basic design principles of biological and chemical Sensors. The course concentrates on basics of MEMS, different processes involved and principles of sensing.

EEE 4301 Electronics II (3)
PR: EEE 3302.
Provides further study in electronic circuits. Includes feedback and frequency response techniques in amplifier design.

EEE 4305 Communications Electronics (3)
PR: EEE 4301
Provides the basic principles of RF communications circuits including oscillators, mixers, high frequency amplifiers, etc. Requires the design and implementation of a short range communications link including a transmitter and a superheterodyne receiver.

</tbody>
</table>
### EEL 3705L Fundamentals of Digital Circuits Laboratory (1)
- **PR:** EEL 3705
  - Develop designs and demonstrate logic concepts. Schematic capture for design implementation, simulation and design verification.

### EEL 3924 Makecourse-Art: Leonardo in the New Millennium (3)
- This course aims to introduce students to the design of products with functional and aesthetic beauty. All students will design a device combining the engineering design process with artistic methodology.

### EEL 4010 MAKE Hands-On Engineering Design (3)
- The primary objective of the course is to introduce students to the creative design of devices following the engineering design process. The course will teach students the essential design skills needed for the design of "mechatronic" devices (i.e. devices incorporating electronic, mechanical and software based components). After taking this course students will have basic knowledge in computer aided design, electronic circuit development, programming concepts and control systems.

### EEL 4030 Electrical Systems Environments (3)
- **PR:** MAP 2302 and PHY 2049
  - Dynamics, vibration, thermodynamics, and heat transfer in electrical, electronic, and electromechanical systems and their environments.

### EEL 4102 Signals and Systems (3)
- **PR:** EGN 3420 with a minimum grade of C, EGN 3374 with a minimum grade of C
  - **CR:** EEL 3163C
  - Provides further study in the analysis of signals and linear systems. Includes time and frequency domain points of view such as Laplace and Fourier analysis as well as convolution.

### EEL 4206L Electromechanical Energy System Lab (1)
- **PR:** EGN 3374 with a minimum grade of C
  - **CR:** EGN 3375
  - This course aims to provide students with hands-on experience related to Electric Mechanical Conversion Systems.

### EEL 4212 Energy Delivery Systems (3)
- **PR:** EEL 4241 with a minimum grade of C
  - The course provides the students the fundamentals and analysis of the electric power delivery system to facilitate the integration of distributed energy resources, e.g. solar energy.

### EEL 4213 Industrial Power Distribution 1 (3)
- **PR:** EGN 3375 with a minimum grade of C
  - Prepares the student to design electrical power systems for industrial applications. Source configurations, transformer connections, symmetrical and asymmetrical fault calculations, protective device sizing, arc flash calculations.

### EEL 4214 Electric (Utility) Distribution Systems (3)
- **PR:** EGN 3375 with a minimum grade of C, EEL 4213 with a minimum grade of C
  - Familiarizes the student with electric utility power distribution systems. Modeling loads; distribution transformers; subtransmission lines, substations, and distribution primary and secondary; power system calcs, voltage regulation, protection methods.

### EEL 4224 Electric Machines and Drives (3)
- **PR:** EGN 3375 with a minimum grade of C, EEL 4241 with a minimum grade of C
  - This course examines power electronic for motor control. AC motor control objectives and realization through power electronic converters will be discussed and validated through Matlab/SimPowersystems based circuit simulation.

### EEL 4241 Power Electronics (3)
- **PR:** EGN 3373 with a minimum grade of B or EGN 3374 with a minimum grade of B
  - This course covers circuit topologies used to convert electricity from one form to another. The course will emphasize switch mode building blocks, variety of converters based on the building block, Pulse Width Modulation based control, and applications.

### EEL 4243 Switching Power Supply Design (3)
- **PR:** EEE 4301
  - Provides the basic principles of switching power supply circuits: magnetic circuits, power semiconductors, Buck, Boost, and Flyback configurations, dc to dc converters, dc to ac inverters. Requires the design and construction of a switching power supply.

### EEL 4251 Power System Analysis (3)
- **PR:** EGN 3374 with a minimum grade of B, EGN 3375 with a minimum grade of C
  - This course will introduce analysis and operation of power systems. The topics covered in this course include per unit system, load flow analysis, voltage stability, economic dispatch, state estimation and power system economics.
## EEL 4252 Power Systems II (3)
**PR:** EGN 3375 with a minimum grade of C, EEL 4102 with a minimum grade of C

Power system control and stability will be covered in this course. The two main controls in power system are voltage control and frequency control. The mechanism of the two types of control & power system stability will be examined.

## EEL 4258 Industrial Power Distribution II (3)
**PR:** EEL 4213 with a minimum grade of C

Prepares the student to design electrical power systems for industrial applications. Raceway design, switchgear and motor control centers, ladder logic, motor application, lighting systems.

## EEL 4271 Power System Protection (3)
**PR:** EGN 3375 with a minimum grade of C, EEL 4213 with a minimum grade of C

Protection philosophy; electromechanical and microprocessor relays; device coordination; instrument transformers; distance and differential relays; non-radial line, transformer, and generator/motor protection.

## EEL 4283 Sustainable Energy (3)

This course aims to introduce students to concepts of sustainable energy conversion. Solar, wind, hydroelectricity, hydrogen, biomass and geothermal energy conversion methods as well as main storage technologies will be discussed.

## EEL 4295 Power Quality (3)
**PR:** EGN 3375 with a minimum grade of C

Basic power quality concepts including interruptions, voltage sags and swells, transient overvoltages, and harmonics. Emphasis on identifying and designing means of mitigation for commonly-encountered power quality problems.

## EEL 4420 RF & Microwave Measurements (3)
**PR:** EEL 4423L

This course introduces students to the theory and applications of modern radio frequency and microwave measurements. Topics to be included are network analyzer, spectrum analyzer, noise, power, and non-linear distortion measurements. Modern trends also treated are the use of on-wafer measurements for transistor characterization and the evaluation of monolithic microwave integrated circuits.

## EEL 4421 RF/Microwave Circuits I (3)
**CPR:** EEL 4423C, with a minimum grade of C

Introduction to passive RF/Microwave circuit design. Investigate the characteristics of transmission lines used in modern microwave systems, the tools used for analysis, and some common circuit topologies for matching, filtering and power distribution. Part one of a two-part sequence. EE majors only. Not available on an S/U basis.

## EEL 4422 RF/Microwave Circuits II (3)
**PR:** EEL 4421.

Introduction to active RF/Microwave circuit design. Investigate the characteristics of amplifiers and oscillators used in modern microwave systems, the tools used for analysis, and some common circuit topologies for biasing and matching. Substantial coverage of stability analysis, constant gain methods and noise figure. Part two of a two-part sequence. EE majors only. Not available on an S/U basis.

## EEL 4423C Wireless Circuits & Systems Design Laboratory (3)
**PR:** EEL 3472C with a minimum grade of C

An extensive hands-on introduction to wireless radio frequency and microwave circuits and systems, involving modern measurements, fabrication and computer-aided design experiences at both component and sub-system levels. Not available on an S/U basis.

## EEL 4461 Antenna Theory (3)
**PR:** EEL 3472C with a minimum grade of C or EEL 4423L with a minimum grade of C

Fundamental principles of antennas and application of EM theory for antenna analysis and design. Different types of antennas and their applications are introduced with particular focus on linear, loop, patch antennas and antenna arrays.

## EEL 4512C Introduction to Communication Systems (3)
**PR:** EEL 4102 with a minimum grade of C

Provides an introduction to the fundamental principles and techniques of analog and digital communication systems. Theory is put into practice by investigating a variety of applications. Lectures and projects develop understanding of modern communication systems design and analysis.

## EEL 4567 Electro-Optics (3)
**PR:** EEL 3115L, EEL 3116L, EEL 4471.

An introduction to the field of electro-optics, including visible and infra-red sources and detectors, radiometry, optical and electronic components, and fiber optics.

## EEL 4595 Mobile and Personal Communication (3)

Providing the students with a comprehensive knowledge of most technical aspects, operations, and applications of second/third/fourth generations and future cellular mobile and personal communication technology.
EEL 4635 Digital Control Systems (3)  
PR: EEL 4657 Linear Control Systems minimum grade C  
Review of linear control systems, sampling process, discrete time linear systems analysis, Z-transforms, modeling and design of digital control systems, digital implementation of analog controller, state space representation, concepts of observability and controllability, concepts of nonlinear digital controls and optimal controls.

EEL 4657 Linear Control Systems (3)  
PR: EGN 3374 with a minimum grade of C  
Analysis and design of linear feedback controls systems. State Variable descriptions to include block diagrams, signal-flow graphs, stability, Routh Hurwitz analysis, Root Locus methods, Bode plots, PID compensators, & introduction to full-state feedback.

EEL 4657L Linear Control Systems Laboratory (1)  
CR: EEL 4657  
This laboratory introduces students to the techniques needed for the design and implementation of automatic industrial control systems. Students will learn the basics of the software and hardware used for the design and implementation of control systems.

EEL 4727C Digital Signal Processing with Field Programmable (3)  
PR: EEL 4102 and EEL 4512C  
Development of real-time digital signal processing systems from algorithm to hardware using DSP, FPGA and hybrid DSP/FPGA rapid prototyping platforms. The course has both lecture and laboratory components.

EEL 4740 Embedded Systems (3)  
CPR: EEL 2161 with a minimum grade of C, EEL 3705L with a minimum grade of C  
This course covers the principles of hardware and software design for higher-end embedded systems inherent in many hardware platforms and applications being developed for engineering and science.

EEL 4743L Microprocessor Laboratory (1)  
CR: EEL 4744.  
Application of microprocessors and microcontrollers for data entry, processing, display and real time signal input/output and control.

EEL 4744 Microprocessor Principles and Applications (3)  
PR: EEL 4705.  

EEL 4756 Digital Signal Processing (3)  
PR: EEL 4102  
Sampling and quantization of signals; frequency-domain representations, transforms; digital filtering filter structures; DFT, FFT; multi-rate processing, Special analysis.

EEL 4782 Data Networks and Systems and Security (3)  
PR: EEL 2161 min grade C (Basic course in programming, e.g., EEL 2161 or equivalent, and familiarity with computers required.)  
The objective of this course is to provide a technical and operational introduction to data/computer communication networks, including network management and security.

EEL 4835 Programming Design (3)  
PR: EEL 2161 with a minimum grade of C  
This course provides essential knowledge for engineering students to design computer programs to solve various tasks in real-world applications.

EEL 4852C Data Base Systems (3)  
PR: EEL 4851C.  
Fundamentals of data base management systems. Codasyl, network, hierarchical, and relational data base systems are analyzed, and typical applications are presented.

EEL 4905 Independent Study (5)  
Specialized independent study determined by the students' needs and interests.

EEL 4906 EE Design 1 (3)  
PR: EEL 4906  
Students apply the knowledge acquired in the classroom to design a system which meets a predetermined set of specifications. Students work individually or in small groups with a faculty member (project director) in their area of interest. (Majors only.)

EEL 4935 Special Electrical Engineering Topics I (3)  
EEL 4936 Special Electrical Engineering Topics II (3)  
EEL 4937 Special Electrical Engineering Topics III (3)

### EEX 3751 Enhancing Family Involvement in Education (2)
This course is designed for pre-service teachers to examine the development of partnerships with families of students with disabilities and their communities to address the educational needs of all students.

### EEX 4012 Foundations of Special Education (3)
Characteristics and needs of children who have learning disabilities, emotional disabilities, hearing impairments, mental retardation, physical handicaps, speech impairments, visual limitations, and who are gifted and talented.

### EEX 4070 Integrating Exceptional Students in the Regular Classroom (3)
Designed for non-special education majors. Includes basic identification techniques and strategies to promote academic and social integration and interaction of "mainstreamed" exceptional students. Concurrent field experience projects are included.

### EEX 4084 Instruction for Exceptional and Diverse Students (3)
PR: EDE 4223 with a minimum grade of C-
CR: EDE 4947
Teacher candidates will review the concepts of differentiated instruction, universal design for learning, and inclusionary classroom practices for exceptional and diverse students with an emphasis on using arts integration.

### EEX 4201 Young Children With Special Needs (3)
Focuses on developing an understanding of the wide range of needs and services for young children with special needs.

### EEX 4202 Context and Foundations (6)
CR: EEX 4942
This course is restricted to majors and forms the foundation for understanding the context of schools including curriculum, characteristics of students with disabilities, the nature of special education, and the role of the special education teacher.

### EEX 4204 Educational Assessment of Exceptional Students (3)
PR: EDF 3214, EDF 4430 and EEX 4012
CR: EEX 4941 and EEX 4894
Introduction to assessment of exceptional students through formal and informal techniques. Emphasis placed on the interpretation of information for educational programming and individualization of instruction.

### EEX 4240 Beginning to Teach (6)
PR: EEX 4202 with a minimum grade of C-
CR: EEX 4942
This course is second in a sequence that focuses on Beginning to Teach in Special Education, allowing teacher candidates to use their understandings think critically and to solve problems.

### EEX 4241 Creating Effective Learning Environments (3)
PR: EEX 4240, EEX 4942
CR: EEX 4942
This course is third in a sequence for majors and focuses on Creating Effective Learning Environments in Special Education allowing teacher candidates to apply their understandings in a variety of school contexts with a small group of students.

### EEX 4242 Enhancing Expertise in Teaching and Instructional Decision Making (6)
PR: EEX 4241, EEX 4942
CR: EEX 4942
This course is fourth in sequence for majors and focuses on Enhancing Expertise in Teaching and Instructional Decision-Making.

### EEX 4244 Becoming a Special Education Teacher (3)
PR: EEX 4242, EEX 4942
CR: EEX 4944
This course is designed to allow teacher candidates to demonstrate mastery of instructional planning, implementation of instruction, and data-based instructional decision-making during their final internship.

### EEX 4742 Narrative Perspectives on Exceptionality: Cultural and Ethical Issues (3)
This course is designed to offer students a meaningful way to interpret and understand exceptionalities.

### EEX 4764 Instructional and Adaptive Technologies for Exceptionalities (3)
This course is designed to enhance the use of technology for students with profound and severe exceptionalities as well as for the general classroom.

### EEX 4880 Integrated Clinical Experience: ESE Secondary 6-12 (3)
An integrated clinical experience designed to provide pre-service teachers with opportunities to work with students in grades 6-12, for reading endorsement and certification in ESE K-12. Candidates will be in their schools two full days per week.

<td>PR: CHM 2045, CR: EGN 311. Structure and property relationships in engineering materials, i.e., metal, ceramic and polymer systems. Environmental effects are also treated.</td>
</tr>
<tr>
<td>EGN 3373</td>
<td>Electrical Systems I (3)</td>
<td>CPR: EGN 3433 with a minimum grade of B or MAP 2302 with a minimum grade of B. A first course in electrical systems: AC/DC circuit analysis, electronics (diodes, transistors, operational amplifiers), digital circuits (logic gates, K-maps), control systems concepts (final value theorem), electrical safety, and AC power.</td>
</tr>
<tr>
<td>EGN 3374</td>
<td>Introduction to Electrical Systems II (3)</td>
<td>PR: EGN 3373, CR: MAP 2302. A second course in linear passive circuits (following EGN 3373). An extension of the physical principles and models, AC/DC steady-state, transient analysis and power analysis techniques.</td>
</tr>
<tr>
<td>EGN 3375</td>
<td>Electromechanical Systems (3)</td>
<td>PR: EGN 3374, with a minimum grade of B. Analysis of electromechanical device performance: transformers, transducers, DC motors and generators, AC motors and alternators.</td>
</tr>
<tr>
<td>EGN 3420</td>
<td>Engineering Analysis (4)</td>
<td>PR: MAC 2282. Introduction to fundamentals of functions, matrices, matrix calculations, simultaneous equations, vector space, vector analysis, vector calculus, vector algebra, Laplacian operator, linear transformations, eigenvalues and eigenvectors.</td>
</tr>
<tr>
<td>EGN 3433</td>
<td>Modeling and Analysis of Engineering Systems (3)</td>
<td>PR: MAC 2283, PHY 2049. Dynamic analysis of electrical, mechanical, hydraulic and thermal systems; Laplace transforms; numerical methods; use of computers in dynamic systems; analytical solution to first and second order ODEs. Restricted to majors.</td>
</tr>
<tr>
<td>EGN 3443</td>
<td>Probability and Statistics for Engineers (3)</td>
<td>PR: MAC 2282. An introduction to concepts of probability and statistical analysis with special emphasis on critical interpretation of data, comparing and contrasting claims, critical thinking, problem solving, and writing.</td>
</tr>
<tr>
<td>EGN 3615</td>
<td>Engineering Economics with Social and Global Implications (3)</td>
<td>Presents basic economic models used to evaluate engineering project investments with an understanding of the implications of human and cultural diversity on financial decisions through lectures, problem solving, and critical writing.</td>
</tr>
<tr>
<td>EGN 3940</td>
<td>Professional Engineering Internship (0)</td>
<td>Professional or interdisciplinary work period in engineering or career-related field. Enrollment limited to one semester and/or one summer per academic year. Offered on a S/U basis only. Restricted to engineering majors.</td>
</tr>
<tr>
<td>EGN 4450</td>
<td>Introduction to Linear Systems (2)</td>
<td>PR: MAC 2282. Study and application of matrix algebra, differential equations and calculus of finite differences.</td>
</tr>
<tr>
<td>EGN 4453</td>
<td>Numerical &amp; Computer Tools I in Civil &amp; Env Eng (3)</td>
<td>PR: MAC 2281, PHY 2048. Computer basics, computer programming operations, flow charts, developing simple computer programs, vector and matrix algebra, equation solving techniques.</td>
</tr>
<tr>
<td>EGN 4454</td>
<td>Numerical &amp; Computer Tools II in Civil &amp; Env Eng (3)</td>
<td>PR: EGN 4453, CPR: MAP 2302. Numerical Methods including numerical integration, root finding, numerical differentiation and integration, eigen-values, and eigen-vectors, data modeling. Development of computer programs to perform these operations.</td>
</tr>
<tr>
<td>EGN 4905</td>
<td>Independent Study (5)</td>
<td>Specialized independent study determined by the students' needs and interests.</td>
</tr>
<tr>
<td>EGN 4930</td>
<td>Special Topics in Engineering (3)</td>
<td>New technical topics of interest to engineering students.</td>
</tr>
<tr>
<td>EGS 2040</td>
<td>History of Technology (3)</td>
<td>Covers the evolution of technology and its influence on society from pre-historic man to the modern day. Topics include: seven technological ages of man, methods of producing power, materials, transportation, communication and calculation, and technology and society.</td>
</tr>
<tr>
<td>EGS 2070</td>
<td>Professional Formation of Engineers 1 (1)</td>
<td>Designed with your professional and personal goals in mind, this course will introduce you to engineering and ethical best practices; helping you broaden your educational experience and giving you insight to enhance your future career opportunities.</td>

<td>EGS 3011</td>
<td>Research Design, Methods, &amp; Interpretation (3)</td>
<td>PR: MAC 1105 with a minimum grade of C or SAT Math with a minimum score of 550 or SAT Math Section with a minimum score of 570 or CPT College Level Math with a minimum score of 60 or ACT Math with a minimum score of 24 or Calculus AB with a minimum score of 3 or MAC 1147 with a minimum grade of C. This course has primarily been designed to build skills in the area of critical thinking about scientific information, studies, and data. A second component is how to make scientifically sound decisions some of which require the use of basic statistics.</td>
</tr>
<tr>
<td>EGS 3071</td>
<td>Professional Formation of Engineers 2 (1)</td>
<td>PR: EGS 2070 with a minimum grade of C. Introduction to professional careers in technology development, research and academia. Includes Engineering lab tours, faculty guest lectures, and the incorporation of local/global community perspectives into the creation of innovative solutions.</td>
</tr>
<tr>
<td>EGS 3072</td>
<td>Professional Formation of Engineers 3 (1)</td>
<td>PR: EGS 3071 with a minimum grade of C. Introduction to Engineering Design Concepts, Innovation, and Entrepreneurship. Learn to create designs, products, and solutions using ethical engineering and business principles that meet societal needs.</td>
</tr>
<tr>
<td>EGS 3720</td>
<td>Globalization and Technology (3)</td>
<td>This course explores the fundamental processes underlying globalization with particular emphasis on the role of technological development in both historical and contemporary context.</td>
</tr>
<tr>
<td>EIN 4173</td>
<td>Quality Management Systems (3)</td>
<td>This course presents the functions and responsibilities of the quality organization. Quality Management Systems concepts and tools for continuous improvement, include Baldridge Criteria, ISO 9000, and 6-Sigma, are analyzed for sequence of use and application.</td>
</tr>
<tr>
<td>EIN 4180</td>
<td>Principles of Engineering Management (3)</td>
<td>Emphasis is placed on management practice in an engineering-intensive context. Topics include management theory, planning and control, strategic management, organizing, ethics, leadership, innovation and change, and communication skills.</td>
</tr>
<tr>
<td>EIN 4200</td>
<td>Creativity in Technology (3)</td>
<td>This course is designed to aid in re-opening the creativity within ourselves so that each life can be a work of art. Exploration and discovery of the individual's higher SELF helps to develop their complete potential and creativity in all parts of life.</td>
</tr>
<tr>
<td>EIN 4213</td>
<td>Engineering Systems Safety (3)</td>
<td>PR: EGN 3443. This course covers the theory and practical implications of concepts of system safety related to the life cycle of a product/system, analysis of the fundamental concepts, design implications, and specifications of safety in a human machine environment.</td>
</tr>
<tr>
<td>EIN 4214</td>
<td>Occupational Safety Engineering (3)</td>
<td>Introduction to the principles of designing, maintaining, and managing a free-hazard workplace, including mechanical, fall/lifting, climate/environmental, electrical, fire, explosive and pressure. Covers design issues, warnings, and personal protective equipment.</td>
</tr>
<tr>
<td>EIN 4241</td>
<td>Human-Machine Systems Engineering (3)</td>
<td>PR: EGN 3615 with a minimum grade of C. This course presents the theory and practical implications of concepts of human machine systems engineering including operation analysis and workspace design, work measurement, standard data, ergonomics, and labor costing.</td>
</tr>
<tr>
<td>EIN 4333</td>
<td>Production Control (3)</td>
<td>PR: ESI 4312. Planning and control of production systems. Includes: forecasting and inventory control models, scheduling and sequencing, MRP, CPM/PERT, and resource requirements.</td>
</tr>
<tr>
<td>EIN 4364</td>
<td>Facilities Design and Cost Analysis (3)</td>
<td>PR: EIN 4312C. Principles and techniques for the design, modification, cost analysis, and evaluation of service and industrial production facilities.</td>

</table>
### EML 3041 Computational Methods (3)
- **PR:** MAP 2302 with a minimum grade of C- or EGN 3433 with a minimum grade of C- and EML 3035 with a minimum grade of C- and EGN 3343 with a minimum grade of C and EML 3500 with a minimum grade of C
- Techniques to solving engineering problems using numerical methods. Topics include roots of equations, matrix algebra, simultaneous linear equations, numerical integration and differentiation, and curve fitting.

### EML 3262 Kinematics and Dynamics of Machinery (3)
- **PR:** EGN 3321 with a minimum grade of C+, and EML 3022 with a minimum grade of C-, and EGN 3343 with a minimum grade of C, and EML 3500 with a minimum grade of C
- Kinematics of machines and mechanisms; position, velocity, and acceleration analysis of mechanisms; cams; gear trains; inertia forces in mechanisms; flywheels; balancing of rotating masses.

### EML 3303 Mechanical Engineering Lab I (3)
- **PR:** EGN 3443
- **CR:** EML 3701, EML 3500

### EML 3500 Mechanics of Solids (3)
- **PR:** EGN 3311
- Stress and deflection analysis of machine parts, variable loads, endurance limits, fasteners, bearings, power transmission, code consideration of pressure and vacuum vessels, elements of design.

### EML 3701 Fluid Systems (3)
- **PR:** EGN 3321 with a minimum grade of C+, EML 3022 with a minimum grade of C-, and EGN 3343 with a minimum grade of C, and EML 3500 with a minimum grade of C
- Principles of fluid flow; piping and duct systems; fluid machinery; metering of compressible and incompressible flow; boundary layer theory; dimensional analysis; introduction to aerodynamics.

### EML 4106C Thermal Systems and Economics (3)
- **PR:** EGN 3343 and EML 3500, both courses with a minimum grade of C
- Power and refrigeration cycles; fuels and combustion; internal combustion engine cycles; co-generation; nuclear energy; methods of economic analysis.

### EML 4123 Heat Transfer (3)
- **PR:** EML 3701, EML 3041
- Conduction, convection and radiant heat transfer; thermal properties of materials; role of fluid flow in convective heat transfer; design and selection of heat exchangers.

### EML 4141 Thermal Management of Electronic Systems (3)
- **PR:** EML 4123
- Introduction to principles of thermal management for controlling heat dissipation in electronics systems. Passive & active thermal management techniques for electronic systems & components are considered with regard to fundamental heat transfer modes.

### EML 4220 Vibrations (3)
- **PR:** EML 3262, EML 3041 (Grade of C- required)

### EML 4230 Introduction to Composite Materials (3)
- **PR:** EML 3500 and EML 3041.
- The course introduces manufacturing types and applications of advanced composites. Students study micromechanical and macromechanical behavior of a lamina and analyze and design a laminated structure made of advanced composite materials.

### EML 4284 Compliant Mechanisms (3)
- **PR:** EML 3262
- To introduce students to microcontroller technology, and to provide them with an understanding of the concepts and principles used to interface input and output devices to microcontrollers, program microcontrollers, and to develop applications.
**EML 4312 Mechanical Controls (3)**
- **PR:** EGN 3321, EGN 3373.

**EML 4325 Mechanical Manufacturing Processes (3)**
- **PR:** EGN 3365 with a minimum grade of C- and EGN 3343 and EML 3500 both with a minimum grade of C
- Description of mechanical material cutting, forming and fabrication methods, as used in modern industrial manufacturing processes.

**EML 4326 Advanced Materials Processing (3)**
- **PR:** EML 3500 and EML 4325.
- Advanced materials processing focuses on the fundamental principles of solidification, deformation, additive and subtractive processes. Integrated process modeling will lead to optimized performance through processing - structure - property relationships.

**EML 4395 Motor Selection and Control (3)**
- **PR:** ENG 3373
- Standard electrical voltages; power wiring in industrial plants; NEMA motor designs and their uses; techniques for estimating motor starting times and temperature rise; motor selection, starting, and operating safety interlocks; conventional starting and control systems; programmable controllers; electrical code requirements for conductors and protective devices.

**EML 4419 Propulsion I (3)**
- **PR:** EML 3701, EML 3500
- Introduction to the design of propulsion systems. Basic analysis of internal combustion, jet and rocket engines. Application to ground and air transportation. Advanced propulsion concepts. Special topics for class discussion.

**EML 4421 Internal Combustion Engines (3)**
- **PR:** EGN 3343 and EML 3500, both courses with a minimum grade of C
- This course is for the application of thermodynamics, chemistry, dynamics of machinery, electronics and fluid mechanics. Topics covered are: introduction of engines, fuels and combustion, numerical modeling, ignition, fuel systems, balance of reciprocating mechanisms and emission control of exhaust pollutants.

**EML 4450 Alternative & Renewable Energy (3)**
- **PR:** EML 3500 and EGN 3343
- An overview of energy conversion for electrical power generation and transportation, both conventional and sustainable. The course is aimed at mechanical engineering seniors and includes hands-on design projects.

**EML 4501 Machine Design (3)**
- **PR:** EML 3500 with a minimum grade of C and EML 3022 and EML 3262 both with a minimum grade of C
- Designed to teach students to apply the principles of engineering mechanics, materials and manufacturing to the design/analysis of machine elements and mechanical systems. Emphasis is given toward good design practice as well as pitfalls that can result in a catastrophic failure.

**EML 4503 Sustainable Design and Materials (3)**
- **PR:** EML 4501
- This course integrates sustainability into the design of engineered products. Topics include materials selection and function performance, design for the 4 Rs, end-of-life concerns and product life cycle assessment methods.

**EML 4536 Applied Finite Element Analysis (3)**
- **PR:** EML 3022 with a minimum grade of C- and EML 3500 with a minimum grade of C
- **CPR:** EML 4501 with a minimum grade of C-

**EML 4550 Capstone I - Ethics (3)**
- **PR:** EML 4501 with a minimum grade of C-
- Comprehensive study of Ethics, Design process, Communication, Human factors and safety in engineering design, Teamwork skills, and Meaningful critical reflection.

**EML 4551 Capstone Design (3)**
- **PR:** EML 4501 with a minimum grade of C-, EML 4106C with a minimum grade of C-
- **CPR:** EML 4312 with a minimum grade of C-, EML 4123 with a minimum grade of C-, EML 4302 with a minimum grade of C-
- Comprehensive design or feasibility project requiring application of previously acquired engineering knowledge; use of ANSYS, CAD and SolidWorks.

**EML 4552 Senior Mechanical Design (3)**
- Comprehensive design or feasibility study project. In some cases may be a continuation of EML 4551.
EML 4575 Principles of Fracture Mechanics (3)
PR: EML 3500, EGN 3343
Introduction to failure and fracture of linear and nonlinear engineering materials, as well as designing against fracture in modern materials.

EML 4593 Haptics (3)
PR: EML 3041; EML 4312
Course covers the theory and implementation of haptic interfaces and rendering, teleoperation, modeling, control and stability of feedback for robotic systems and virtual environments, and the related human haptic sensing capabilities.

EML 4601 Air Conditioning Design (3)
PR: EGN 3343 and EML 3500, both courses with a minimum grade of C
Application of thermodynamics, heat transfer, and fluid flow to sizing of HVAC systems. Heating and cooling calculations, air requirements, equipment sizing. Energy Code requirements. Design project.

EML 4702 Fluid Dynamics II (3)
PR: EGN 3343, EGN 3321 and EML 3701
The Fluid Dynamics II course is a senior level technical elective for Mechanical Engineering Students. The goal of the course is develop an advanced understanding of fluid dynamics applied to mechanical engineering as well as to other related fields.

EML 4703 Mechanics of Compressible Fluids (3)
PR: EML 3701, EGN 3343
Introduction to kinetic theory of gases, compressible flow equations, isentropic flow, flow with friction and heat transfer, compression and expansion in supersonic flow, normal and oblique shock waves and Prandtl-Meyer expansions.

EML 4905 Independent Study (4)
Specialized independent study determined by the student’s needs and interests.

EML 4930 Special Topics in Mechanical Engineering (3)
Selected Topics

ENC 1101 Composition I (3)
This course helps prepare students for academic work by emphasizing expository writing, the basics of library research, and the conventions of academic discourse.

ENC 1102 Composition II (3)
PR: ENC 1101 (or the equivalent, i.e. passing the CLEP exam).
This course emphasizes argument, research, and style. As students engage in creative and critical thinking, they learn to support assertions based on audience and purpose; students apply library research, strategies for revision, and peer response.

ENC 1130 Improving College-Level Writing (3)
This class approaches writing as a process and utilizes prewriting, drafting, revising, and editing. Through intensive reading and writing practice, the curriculum will address grammar, mechanics, punctuation, word usage, and essay structure.

ENC 2210 Technical Writing (3)
PR: ENC 1101 and ENC 1102 or ENC 1121 and ENC 1122.
Effective presentation of technical and semi-technical information. Will not count toward the English major.

ENC 3241 Scientific Writing and Presentation (3)
PR: ENC 1101 with a minimum grade of C, ENC 1102 with a minimum grade of C
A course designed to give students the skills necessary to prepare professional materials for science writing assignments, presentations, or publication.

ENC 3242 Technical Communication for Majors (3)
PR: ENC 1101 & 1102 or ENC 1121 & 1122.
The study of the range of possible careers for technical communicators with special emphasis on the issues that professional writers face in various workplace contexts and on the skills needed in word processing.

ENC 3246 Communication for Engineers (3)
Focuses on writing concerns of engineers. Deals with the content, organization, format, and style of specific types of engineering documents. Provides opportunity to improve oral presentations.

ENC 3249 Communication for IT Professionals (3)
PR: ENC 1101 and ENC 1102 or Honors English.
This course is devoted to the written and oral communication concerns of the 21st Century information technology professional. Students will be engaged individual and team development of professional and technical documents relevant to the IT field.

ENC 3250 Professional Writing (3)
PR: ENC 1101 and ENC 1102 or ENC 1121 and ENC 1122.
The course is an introduction to the techniques and types of professional writing, including correspondence and reports. It is designed to help strengthen skills of effective business and professional communication in both oral and written modes.
ENC 3266 Research Methods for Professional and Technical Communication (3)
Students will be introduced to the idea of research as inquiry and as a knowledge-making enterprise that is used in the workplace to solve problems or answer questions. By examining a variety of research methods, students will learn how to develop an idea, plan a research project, go about gathering data (whatever “data” may be), perform analysis, and present their work.

ENC 3310 Expository Writing (3)
PR: ENC 1101 and ENC 1102 or ENC 1121 and ENC 1122.
This is a course that teaches the techniques for writing effective prose, (excluding fiction), in which student essays are extensively criticized, edited, and discussed in individual sessions with the instructor and with peers.

ENC 3330 Rhetorical Traditions (3)
PR: ENC 1102, with a grade of C- or better.
Examine texts from the rhetorical tradition alongside contemporary examples of rhetoric and engage questions that arise from the study of rhetoric; apply rhetoric to teaching, literary criticism, professional writing, publishing, politics, and law.

ENC 3331 Client and Civic Communication (3)
PR: ENC 1102.
This course provides the groundwork for writing in civic life and explores working definitions of key terms: civic engagement, ethics, rhetoric, writing, composing and technology.

ENC 3370 Writing Technologies (3)
PR: ENC 1101 and ENC 1102 (or equivalent)
This course introduces students to essential writing and design technologies they will use in their careers and provides students the opportunity to practice writing and design while building a technological literacy around the use of new tools.

ENC 3371 Rhetorical Theory for Technical Communication (3)
This course provides undergraduates exposure to key rhetorical theorists and concepts, placing special emphasis on the relationships between rhetor, audience, context, and medium. This course is open to all students and is not restricted or repeatable.

ENC 3373 Rhetoric of Marginalized Communities (3)
PR: ENC 1102.
Study mainstream and marginalized communities in an interactive seminar featuring discussion, collaboration, essay writing, presentations, electronic media, and the development of a final project/ portfolio negotiated between each student and instructor. Study mainstream and marginalized communities in an interactive seminar featuring discussion, collaboration, essay writing, presentations, electronic media, and the development of a final project/ portfolio negotiated between each student and instructor.

ENC 3376 Multimodal Composition (3)
PR: ENC 1102.
Compose with still and moving images, color, music, sound, and gesture. Write between modes, media, and genres of texts and events, and use traditional writing processes to create a multimodal project.

ENC 3416 New Media for Technical Communication (3)
PR: ENC 1101 and ENC 1102 or ENC 1121 and ENC 1122.
The study and production of digital media with special emphasis on emergent and evolving applications.

ENC 3435 Rhetoric and Gaming (3)
This course applies different theoretical lens to broaden students’ understandings of videogames. Students familiarize themselves with the major genres of writing predominant in the videogame industry. Students work together to design and implement a game.

ENC 3445 Introduction to the English Major (3)
PR: ENC 1102, with a minimum grade of C- or better.
This course introduces students to analytical approaches, critical readings, and forms of writing typically found within the English major.

ENC 4212 Professional & Technical Editing (3)
PR: At least one of the following: ENC 2210, ENC 3250, ENC 3310, ENC 4260, ENC 4906, ENC 4946, ENC 4268, ENC 4311
This course helps students meet professional and technical editing challenges in the workplace. Assignments concern research, interviewing, writing, editing, and the technology needed for successful results. Unrestricted to majors, not repeatable.
### ENC 4218 Visual Rhetoric for Technical Communication (3)
**PR:** ENC 1101 and ENC 1102 or ENC 1121 and ENC 1122.
The study and production of visual rhetoric with special emphasis on print and digital document design and technical graphics.

### ENC 4260 Advanced Technical Writing (3)
**PR:** ENC 2210, or ENC 3310
Advanced Technical Writing is a course designed to develop writing skills of a high order: technical exposition; technical narration, description, and argumentation; graphics; proposals; progress reports; physical research reports; and feasibility reports.

### ENC 4260C Technical and Professional Communication Capstone (3)
**PR:** ENC 2210 or ENC 3310
This portfolio-based capstone course allows students to further develop and demonstrate mastery and integration of the skills, principles, and knowledge gained from their professional and technical communication coursework.

### ENC 4264 Managerial Communications (3)
**PR:** ENC 3310
Instruction and practice in writing effective, lucid, and compelling prose, with special emphasis on style, logical argumentation, and critical thinking.

### ENC 4268 Senior Seminar in Professional & Technical Writing (3)
**PR:** ENC 4946
This course helps students consolidate learning from previous Professional and Technical Writing courses to prepare for professional employment by performing advanced assignments guided by professional mentors and instructor.

### ENC 4311 Advanced Composition (3)
**PR:** ENC 3310
Instruction and practice in writing effective, lucid, and compelling prose, with special emphasis on style, logical argumentation, and critical thinking.

### ENC 4353 Public Rhetorics (3)
**PR:** ENC 1102
This course explores the role of rhetoric in the ways communities and individuals empower themselves to frame issues, tackle problems, and promote change. Students will adopt various roles and responsibilities to practice organizing and advocating positions.

### ENC 4377 Advanced Rhetoric (3)
**PR:** ENC 1102 with a grade of C- or better.
Study rhetorical cultures and produce rhetorical performances in an interactive seminar featuring discussion, collaboration, essay writing, presentations, electronic media, and the development of a final project/portfolio.

### ENC 4431 Writing and New Media (3)
**PR:** ENC 1102 with a grade of C- or better.
Engage social networking, interactivity, virtual communities, and the issues that emerge in the creation, consumption, distribution, and publication of digital media. Students research, and create a variety of social media for a wide range of purposes.

### ENC 4906 Professional & Technical Writing Independent Study (3)
**PR:** At least two of the following courses: ENC 2210, ENC 3250, ENC 3310, ENC 4209, ENC 4212, ENC 4260, ENC 4264, ENC 4311
This course focuses on such individually chosen topics as communications crisis management and PR strategy through written assignments, selected readings, and in-person or online meetings. Not restricted to majors; may be repeated for credit.

### ENC 4931 Selected Topics in Professional and Technical Writing (3)
**PR:** ENC 3250, ENC 2210, or ENC 3310
Focus of the course will be determined by student demand and instructor interest. Topics to be covered may include legal writing, the conventions of business writing, writing in the medical fields, and writing for the social sciences. May be taken twice for credit with different topics.

### ENC 4940 Technical and Professional Communication Internship (3)
Supervised work-and-learning experience in technical and professional communication under the direction of an employee of a participating firm and a University faculty member. 10-12 hrs per week of student time for regular term; 13-16 per week in summer.

UNIVERSITY OF SOUTH FLORIDA 2021-2022 UNDERGRADUATE CATALOG
**ENL 3016 Studies in 17th and 18th Century British Literature (3)**  
This is a topics course focusing on 17th and 18th century British literature. It satisfies a historical distribution requirement for the English major, LIT, and may be taken more than once for credit.

**ENL 3017 Studies in 19th Century British Literature (3)**  
This is a topics course focusing on British Literature primarily of the years 1800-1900. It satisfies a historical distribution requirement for the English major, LIT, and may be taken more than once for credit.

**ENL 3230 British Literature 1616-1780 (3)**  
A survey of 17th Century and Neoclassical Literature, including such figures as Donne, Herbert, Crashaw, Vaughan, Marvell, Milton, Pope, Swift, Johnson, Boswell, and Goldsmith.

**ENL 3251 British Literature 1780-1900 (3)**  
The poetry and poetics of the Romantic figures, with attention to the continuing importance of Romantic thinking in contemporary affairs and letters; a survey of representative figures of the Victorian and Edwardian periods, including poetry, prose, and drama.

**ENL 3270 British Literature, 1900 to the Present (3)**  
PR: ENC 1102, with a minimum grade of C- or better.  
This course surveys major movements and authors in British literature from 1900 to the present, situating literary works within historical and cultural contexts.

**ENL 3273 British Literature 1900-1945 (3)**  
Survey of poetry, drama, and fiction of such writers as Eliot, Yeats, Thomas, Conrad, Shaw, Joyce, Lawrence, Huxley, Woolf, Forster, Waugh, Owen, Auden, O'Casey, and others.

**ENL 3331 Early Shakespeare (3)**  
A study of from five to eight of Shakespeare’s comedies, histories, and early tragedies, ending with Hamlet. Special attention to developing the student’s ability to read and interpret the text.

**ENL 3332 Late Shakespeare (3)**  
A study of from five to eight of Shakespeare’s problem plays, major tragedies, and late romances. Special attention to developing the student’s ability to read and interpret the text.

**ENL 3333 Shakespeare (3)**  
PR: ENC 1102 with a grade of C- or better.  
This course studies conditions, conventions & mode of representations of the early modern stage and examines Shakespeare’s uses of them. Along with analyzing plays in these contexts, students will experience interpretation through performance.

**ENL 3334 Shakespeare from an Historical Perspective (3)**  
This course introduces students to at least six of Shakespeare’s plays. The course will focus on artistic elements of the plays; the political, social, and intellectual milieu of the period; as well as issues of class, race, and gender. Will not count toward English major.

**ENL 4112 Eighteenth-Century British Novel (3)**  
This course studies exemplary British novels from the eighteenth century, the distinctive literary features of the novel in this formative period, and the critical questions surrounding the emergence of this genre.

**ENL 4122 19th Century British Novel (3)**  
Study of the 19th-century British novel, including works by novelists such as Thackeray, Dickens, Eliot, Hardy, Trollope, and others. Analysis of the characteristics of the novels and their historical, social, cultural, and political contexts.

**ENL 4132 British Novel: Conrad to the Present (3)**  
A critical study of British fiction from 1900 to the present, with emphasis on such writers as Conrad, Lawrence, Joyce, Woolf, Huxley, Orwell, Burgess, Murdoch, Goldberg, and others.

**ENL 4203 Introduction to Old English (3)**  
This course will give students a reading knowledge of the Old English language and introduce them to its literature.

**ENL 4303 Selected British Authors (3)**  
The study of two or three major figures in British Literature. The course may include such writers as Fielding and Austen, Keats and Yeats, Joyce and Woolf. Specific topics will vary. May be taken twice for credit with different topics.

**ENL 4311 Chaucer (3)**  
An intensive study of The Canterbury Tales and major critical concerns.

**ENL 4338 Advanced Studies in Shakespeare (3)**  
PR: ENL 3331 or ENL 3332  
Intensive study of selected plays of Shakespeare, with special attention to significant critical issues and to the Elizabethan and Jacobean cultural setting.

**ENL 4341 Milton (3)**  
Study of the poetry and major prose of John Milton, with special emphasis on Paradise Lost.
ENL 4501 Studies in Medieval and Early Modern Literature (3)
This course will examine specific eras, genres, and authors within medieval and early modern literature.

ENL 4930 Selected Topics (3)
PR: ENC 1102 with a grade of C- or better.
This course examines a specific literary movement or genre in British literature (ie, Shakespearean genre, Romanticism).

ENL 4931 Studies In British Literature And Culture (3)
PR: ENC 1102, with a minimum grade of C-
This course examines a particular topic or theme, varying with individual selection, in the British literary tradition.

ENT 3003 Principles of Business in Entrepreneurship (3)
Introduction to business principles in entrepreneurship for non-business and non-industrial engineering students. Provides basic foundation in entrepreneurship, finance and accounting. Helps students to understand the role of entrepreneurship in society.

ENT 3004 Principles of Entrepreneurship (3)
Study of the principles related to entrepreneurship and entrepreneurial activity. Emphasis is placed on understanding the differences between small business and entrepreneurship. An introduction to skill sets required for entrepreneurial success.

ENT 3013 New Venture Creation (3)
PR: MAN 4802, with a grade of C- or better.
Focused on the application of idea generation processes. The student will be exposed to processes for effective opportunity recognition, innovation, creativity, & execution of developing a sound business prototype & pitch.

ENT 3613 Creativity and Innovation in Entrepreneurial Firms (3)
This class is designed to prepare the student in the use of creative thinking tools and a mindset equipped to explore possibilities and create options to establish a competitive advantage in an increasingly complex and uncertain environment.

ENT 4014 New Venture Formation (3)
PR: ENT 3003 or (MAN 3025 and ACG 2021)
Course for Business and Industrial Engineering students. Integrates business principles with entrepreneurship and venture creation. Synthesizes theoretical and practical aspects of entrepreneurial new business creation.

ENT 4024 Small Business Management - Entrepreneurship (3)
Study the factors involved in starting and managing a small to medium sized company. Emphasis on conduct of pre-business feasibility, start-up of business, successful management of firm, and options for succession or termination.

ENT 4214 Entrepreneurial Leadership (3)
Focuses on entrepreneurial leaders & experiences that have lead to their success and failures. Guest entrepreneurs will present their experiences & engage in open discussion. Concepts conveyed by speakers will be expanded on by the instructor.

ENT 4244 Scalability in Entrepreneurial Firms (3)
PR: ENT 3013 and MAN 4802, both with a grade of C- or better.
Addresses the greatest challenge for a high growth firm—scalability. Scalability issues throughout the firm will be addressed including change management, culture, leadership, human resources, financial, funding, marketing, strategy and business modeling.

ENT 4424 Fundamentals of Venture Capital and Private Equity (3)
PR: ENT 4014.
Elective course for business and industrial engineering students. Integrates basic principles of venture financing through an examination of both venture capital and private equity in entrepreneurial new business creation and growth.

ENT 4803 Sustainable Entrepreneurship (3)
PR: ENT 3004 with a minimum grade of C-
This course will focus on how to design, grow, and lead sustainable enterprises. Students will learn that economic sustainability is integrally linked to the environmental and social outcomes a business venture achieves.

ENT 4901 Independent Research in Entrepreneurship (3)
PR: ENT 3013 and MAN 4802, both with a grade of C- or better.
This class will allow students the opportunity under faculty guidance to explore issues related to entrepreneurship not currently included in existing curricula; allow students the opportunity to pursue more detailed knowledge on an area of interest.

ENT 4943 Internship in Entrepreneurship (3)
PR: ENT 3013 and MAN 4802, both with a grade of C- or better.
Allow students practical experience working in a Small or Mid-Sized Firm (SME); focus on skills associated with operations within the unique environment of a small business; not allowed for credit for someone currently working full/part-time in an SME.

<tr>
<td>ENT 4945</td>
<td>Student Consulting in High Growth Ventures</td>
<td>3</td>
<td>ENT 3013, ENT 4244 and MAN 4802, all with a grade of C- or better.</td>
<td>Students will work directly as consultants to high growth potential firms in the Gazelle Lab business accelerator program. Students will analyze feasibility, environmental concerns, financial benchmarking, executive summaries, and the investor pitch.</td>
</tr>
<tr>
<td>ENV 2061</td>
<td>Engineering Sustainable and Healthy Environments</td>
<td>2</td>
<td>PHY 2048 with a minimum grade of C or PHY 2060 with a minimum grade of C or Physics C : Mechanics with a minimum score of 4, CHM 2045 with a minimum grade of C or CHS 2440 with a minimum grade of C or Chemistry with a minimum score of 4</td>
<td>Case studies are used to explore the technical and non-technical perspectives involved with designing and managing equitable and enduring infrastructure that reduces environmental contamination and health risks from exposure to environmental hazards.</td>
</tr>
<tr>
<td>ENV 4001</td>
<td>Environmental Systems Engineering</td>
<td>3</td>
<td>EGN 3353</td>
<td>Introduction to environmental engineering. Protection of human health, air, water, and land resources. Sustainable design, water quality, solid and hazardous waste management, air quality control, contaminated environments. Application of mass balances.</td>
</tr>
<tr>
<td>ENV 4004</td>
<td>Environmental Engineering Lab</td>
<td>1</td>
<td>EGN 3353 with a minimum grade of C- or ENV 4001 with a minimum grade of C-</td>
<td>Laboratory experience in the measuring of environmental engineering parameters.</td>
</tr>
<tr>
<td>ENV 4053C</td>
<td>Fate and Transport of Chemicals in the Environment</td>
<td>3</td>
<td>ENV 4001 with a minimum grade of C-</td>
<td>Investigates how chemical properties, physical processes, and environmental characteristics all influence the fate and transport of chemicals in natural and engineered systems. Includes theory, practical examples, and laboratory experiment.</td>
</tr>
<tr>
<td>ENV 4071</td>
<td>Environmental Site Assessment</td>
<td>3</td>
<td>CHM 2045 with a minimum grade of C- or CHS 2440 with a minimum grade of C</td>
<td>All of the fundamental elements of environmental site assessments, including a review of pertinent laws and regulations, the process of interviews, file reviews, and the site reconnaissance, through the use of procedures based on the Scientific Method.</td>
</tr>
<tr>
<td>ENV 4082</td>
<td>Environmental Field Sampling</td>
<td>3</td>
<td>CHM 2045 with a minimum grade of C- or CHS 2440 with a minimum grade of C</td>
<td>This course is designed to provide students with an interest in the field of environmental science/engineering, with the highest level of practical, hands-on environmental field training to help them advance their careers.</td>
</tr>
<tr>
<td>ENV 4102</td>
<td>Air Pollution Fundamentals</td>
<td>3</td>
<td>CHM 2046 with a minimum grade of C</td>
<td>An introduction to ambient air pollution control. Emphasis is given to principles underlying our understanding of air pollution, its sources, its effects, along with approaches for its management.</td>
</tr>
<tr>
<td>ENV 4351</td>
<td>Solid Waste Engineering</td>
<td>2</td>
<td>CHM 2045 with a minimum grade of C- or CHS 2440 with a minimum grade of C</td>
<td>Introduction to the principles of integrated municipal solid waste management; waste minimization, recycle and disposal options. Design of landfill disposal systems. Course restricted to Civil and Environmental Engineering majors.</td>
</tr>
<tr>
<td>ENV 4417</td>
<td>Water Quality and Treatment</td>
<td>3</td>
<td>EGN 3353</td>
<td>An introduction to municipal water supply and waste water treatment. Topics include water requirements and waste volumes, water quality, physical and chemical treatment processes, and advanced wastewater treatment processes.</td>
</tr>
<tr>
<td>ENV 4612</td>
<td>Green Engineering for Sustainability</td>
<td>3</td>
<td>EGN 3353</td>
<td>Offers an overview of principles of green engineering including innovation, inherency, interdisciplinary, integration, and international, with an emphasis on applications of green engineering principles in different design stages.</td>
</tr>
<tr>
<td>ENV 4620</td>
<td>Envision Sustainable Communities</td>
<td>3</td>
<td></td>
<td>This course explores how infrastructure projects can be conceived and designed with relevant partners to make our societies more sustainable and equitable. Criteria used by the Envision™ rating system are reviewed, and applied to built infrastructure projects relevant to civil and environmental engineers.</td>

<td>Introduction to Entomology</td>
<td>4</td>
<td>BSC 2010, BSC 2010L, BSC 2011, BSC 2011L &amp; CHM 2045, CHM 2046 &amp; MAC 1105 or higher-level MAC course, or STA 2023.</td>
<td>An introduction to general aspects of insect morphology, development, and classification. The identification of local forms will be emphasized. Fieldwork required. Lecture and Laboratory.</td>
</tr>
<tr>
<td>ESC 2000</td>
<td>Introduction to Earth Science</td>
<td>3</td>
<td></td>
<td>An introductory course in the Earth Sciences. Topics covered include geology, weather, climate change, ocean dynamics, and the history of the Earth, the solar system and beyond</td>
</tr>
<tr>
<td>ESC 3210</td>
<td>Earth and Space Science Fundamentals</td>
<td>4</td>
<td></td>
<td>This course is designed to further develop science teachers' understanding of the earth and space sciences commonly found in 6-9 school curricula, with a focus on effective earth and space sciences pedagogy and instructional practice</td>
</tr>
<tr>
<td>ESC 4705</td>
<td>Geology and Development of Modern Africa</td>
<td>3</td>
<td></td>
<td>An in-depth look at how geology has affected the politics, history and culture of Africa. Units include the Nile and hydropolitics, deserts and climate, rifts and hominid evolution, and mining and politics.</td>
</tr>
<tr>
<td>ESE 4322</td>
<td>Classroom Management for Diverse School and Society</td>
<td>3</td>
<td></td>
<td>Focuses on classroom management in secondary schools including classroom climate, specific strategies to address management issues, school safety, violence, diversity, ethics, and educational law.</td>
</tr>
<tr>
<td>ESE 4341</td>
<td>Secondary Teaching Methods</td>
<td>3</td>
<td>COP 2510, EGN 4450.</td>
<td>This course prepares pre-service teachers by developing an understanding of the foundations of the social sciences, science, and English. Pre-service teachers will explore &amp; describe concepts as well as demonstrate knowledge of methods in their discipline.</td>
</tr>
<tr>
<td>ESI 4007</td>
<td>Engineering Programming</td>
<td>3</td>
<td>MAC 2281, with a minimum grade of C (C- not accepted).</td>
<td>A problem based approach to describing programming concepts using Visual Basic for Applications and MS Excel.</td>
</tr>
<tr>
<td>ESI 4221</td>
<td>Statistical Quality Control</td>
<td>3</td>
<td>EGN 3443.</td>
<td>This course will present the theory and methods of quality monitoring including process capability, control charts, acceptance sampling, quality engineering, and quality design.</td>
</tr>
<tr>
<td>ESI 4244</td>
<td>Design of Experiments</td>
<td>3</td>
<td>EGN 3443.</td>
<td>Activity forecasting models and control. Design and use of inventory control models, both designs applicable to engineering analyses. Analysis of variance and regression.</td>
</tr>
<tr>
<td>ESI 4312</td>
<td>Deterministic O.R.</td>
<td>3</td>
<td>COP 2510, EGN 4450.</td>
<td>An introduction to operations research techniques with particular emphasis on deterministic models. Linear programming, dynamic programming, goal programming, integer programming, and PERT/CPM networks are considered.</td>
</tr>
<tr>
<td>ESI 4326</td>
<td>Engineering the Supply Chain</td>
<td>3</td>
<td></td>
<td>Students learn tools to design supply chain networks considering all drivers including: facilities, transportation, inventory, information, sourcing and pricing, as well as techniques to support design, planning and operational decisions in the supply chain.</td>
</tr>
<tr>
<td>ESI 4523</td>
<td>Systems Simulation</td>
<td>3</td>
<td>ESI 4313.</td>
<td>A study of the development and analysis of computer simulation models: Monte Carlo, time-slice, and next-event. Introduction to special purpose simulation languages.</td>
</tr>
<tr>
<td>ESI 4606</td>
<td>Engineering Analytics I</td>
<td>3</td>
<td>EGN 3443, ESI 4312.</td>
<td>Engineering Analytics I covers the leading techniques that help to identify and manage key data from business processes. Topics covered include techniques for understanding the meaning of data; cleaning up data; transforming data into information.</td>
</tr>
<tr>
<td>ESI 4607</td>
<td>Engineering Analytics II</td>
<td>3</td>
<td>ESI 4606.</td>
<td>Engineering Analytics II covers important techniques that help to identify and manage key data from industrial engineering processes. Topics covered include data exploration; date visualization; and large-scale engineering system decomposition.</td>
</tr>

<tr>
<td>EUH 2001</td>
<td>Western Civilization II</td>
<td>(3)</td>
<td></td>
<td>This course surveys the development of western civilization from the Renaissance to the present.</td>
</tr>
<tr>
<td>EUH 2011</td>
<td>Ancient History I</td>
<td>(3)</td>
<td></td>
<td>An introductory survey of ancient history. EUH 2011 treats the ancient Near East, Egypt and Greece from the origins of civilization to the Hellenistic kingdoms following the death of Alexander the Great.</td>
</tr>
<tr>
<td>EUH 2012</td>
<td>Ancient History II</td>
<td>(3)</td>
<td></td>
<td>An introductory survey of ancient history. EUH 2012 deals with Rome through the Regal, Republican, and Imperial periods, from the beginnings of civilization in Italy to the division of the Roman Empire, A.D. 285.</td>
</tr>
<tr>
<td>EUH 2022</td>
<td>The Medieval West</td>
<td>(3)</td>
<td></td>
<td>An introductory survey of medieval history. EUH 2022 examines the European and Mediterranean worlds, exploring the evolution and transformation of beliefs, institutions and social structures, ca. 500-1500.</td>
</tr>
<tr>
<td>EUH 2030</td>
<td>Modern European History I</td>
<td>(3)</td>
<td></td>
<td>A thematic survey of Europe in the modern age. EUH 2030 treats the period from the Renaissance to the French Revolution.</td>
</tr>
<tr>
<td>EUH 2031</td>
<td>Modern European History II</td>
<td>(3)</td>
<td></td>
<td>This course explores the social, political and economic forces which have shaped Europe over the past two hundred and fifty years.</td>
</tr>
<tr>
<td>EUH 3124</td>
<td>Early Crusades</td>
<td>(3)</td>
<td></td>
<td>The Early Crusades course will cover the period between the call of the First Crusade in 1095 AD until the fall of the Crusader Kingdom of Jerusalem in 1291.</td>
</tr>
<tr>
<td>EUH 3129</td>
<td>Medieval Warfare</td>
<td>(3)</td>
<td></td>
<td>A survey of medieval warfare in Europe and Western Eurasia from 500-1500. This course examines major issues in medieval political, social, and economic history through the lens of conflict.</td>
</tr>
<tr>
<td>EUH 3142</td>
<td>Italy During the Renaissance</td>
<td>(3)</td>
<td></td>
<td>This course examines the development and nature of Italian Renaissance society within its political, economic and cultural contexts between the thirteenth and sixteenth centuries.</td>
</tr>
<tr>
<td>EUH 3181</td>
<td>Medieval Culture</td>
<td>(3)</td>
<td></td>
<td>A survey of thought, culture, and art in the Middle Ages. Medieval attitudes as manifested in literature, art, philosophy, education, and religion; with emphasis upon Medieval man's changing perception of himself and his world.</td>
</tr>
<tr>
<td>EUH 3185</td>
<td>Viking History</td>
<td>(3)</td>
<td></td>
<td>The role of the Vikings in the shaping of Western history. A comprehensive survey of their institutions, outlook and daily life. Viking expansion into Europe and North America.</td>
</tr>
<tr>
<td>EUH 3202</td>
<td>History of 17th and 18th Century Europe</td>
<td>(3)</td>
<td></td>
<td>A history of Europe from the beginning of the Thirty Years' War to the outbreak of the French Revolution. Political and intellectual developments will be assessed in the light of society and the economy.</td>
</tr>
<tr>
<td>EUH 3205</td>
<td>History of Nineteenth Century Europe</td>
<td>(3)</td>
<td></td>
<td>A comparative study of economic, political, social, and intellectual developments in nineteenth century Europe.</td>
</tr>
<tr>
<td>EUH 3206</td>
<td>History of Twentieth Century Europe</td>
<td>(3)</td>
<td></td>
<td>A comparative study of economic, political, social, and intellectual developments in twentieth century Europe.</td>
</tr>
<tr>
<td>EUH 3401</td>
<td>Classical Greece</td>
<td>(3)</td>
<td></td>
<td>A study of ancient Greece focusing on the brilliant period following the Persian Wars, but embracing as well the formative Bronze, Middle and Archaic ages, and the decline culminating in the conquest of Greece by Philip II of Macedon in 338 B.C.</td>
</tr>
<tr>
<td>EUH 3402</td>
<td>Age of Alexander</td>
<td>(3)</td>
<td></td>
<td>A study focusing on the career of Alexander the Great and on the Greek and Macedonian conquest of Imperial Persia. Also treated are the great Hellenistic kingdoms prior to Rome's conquest of the eastern Mediterranean.</td>
</tr>
</tbody>
</table>
EUH 3412 Roman Republic (3)
A study of the Roman Republic from 509 B.C. to the assassination of Julius Caesar in 44 B.C., with a prelude treating Rome's early development under royal rule. Political growth and change provide the framework for the treatment.

EUH 3413 Roman Empire (3)
A study of Imperial Roman from the assassination of Julius Caesar in 44 B.C. to the death of the emperor Constantine in A.D. 337. Emphasized is Rome's government of a vast Mediterranean empire including much of the near East and Europe.

EUH 3451 Modern France and its Empire (3)
This course is a survey of the history of France and its empire from the eighteenth-century Age of Revolutions until the present.

EUH 3452 Age of the French Revolution (3)
This course is a study of the origins, causes and course of the French Revolution, with attention to the economic, political, cultural, intellectual, and social dynamics of the Revolutionary period.

EUH 3501 British History to 1688 (3)
A study of major developments in British history from the 15th century to 1688.

EUH 3533 Celtic History (3)
This course will cover the history of the Celtic peoples in the Iron Age, the Roman period, and the early histories of Ireland, Scotland, and Wales in the medieval period.

EUH 3575 History of Imperial Russia, 1689-1917 (3)
A survey of social, political, economic, and cultural development in the Russian Empire from Peter the Great to Nicholas II. Topics include the expansion and modernization of the Empire, the culture of the Imperial court, peasant rebellions, social and legal reforms, the role of the West, and the collapse of the Romanov dynasty.

EUH 3576 History of the Soviet Union, 1917-1991 (3)
A study of Soviet society under communism from the Revolution to the collapse of the USSR. Topics include the origins and development of revolutionary socialism, the Bolshevik seizure of power, Stalinism and the Great Terror, popular dissent and resistance, the treatment and experience of ethnic minorities, Gorbachev and the dissolution of the Soviet Union.

EUH 3673 Food and Drink in Antiquity (3)
From Prehistory through the information age, food has been the foundation of economies. Dating back to 100 CE, Roman poet Juvenal measured popular support for the emperor by his ability to provide "bread and circuses", and now even in 2020, debate rages in the U.S. about who is impoverished enough to receive food stamps. The consumption of food is an unbroken reality of human history. It has touched everyone regardless of age, gender, race, class, or nationality. Despite this continuity of consumption, much has changed from how the ancient Romans baked their bread to how we purchase ours at the nearest Publix. Using written, iconographic and archaeological sources combined with contributions from biomolecular chemistry, this course will focus on material culture of food (aka materiality of food) in Graeco-Roman cultures.

EUH 3676 Early Christians, Pagans, and Heretics (3)
This course provides an overview of the history and theology of Orthodox Christianity. It examines the rise of the early Christian church in the first century AD and explores the eastern Christian Orthodox through the fifteenth century AD.

EUS 3000 Europe (3)
Area study courses are multi-disciplinary in nature and deal with one or more countries of a region. Each course combines some measure of political, economic, historical, religious, geographic, anthropological, and sociological analysis in dealing with salient features and current problems.

EUS 3022 Russia (3)
Area study courses are multi-disciplinary in nature and deal with one or more countries of a region. Each course combines some measure of political, economic, historical, religious, geographic, anthropological, and sociological analysis in dealing with salient features and current problems.

EVR 2001 Introduction to Environmental Science (3)
An introductory lecture course linking the human and physical/biological world. The course will develop an understanding of population and resource interactions.

EVR 2001L Environmental Science Lab (1)
A laboratory course linking the human and physical/biological world. The lab will develop an understanding of population and resource interactions and complement the lecture course. Field trips.
<table>

<th>Prerequisites</th>
</tr>
</thead>
<tbody>
<tr>
<td>EVR 2861</td>
<td>Introduction to Environmental Policy (3)</td>
<td>An introduction to environmental policy using class lectures, student projects, and independent readings. Emphasis will be placed on understanding basic policy mechanisms and major policy actions relating to environmental issues at the local, national and international level.</td>
</tr>
<tr>
<td>EVR 3218</td>
<td>Wildlife Research Techniques (3)</td>
<td>This course will review the ways in which data are collected, analyzed, and reported, so that informed decisions about wildlife management and conservation can be made.</td>
</tr>
<tr>
<td>EVR 3874</td>
<td>Sustainable Human Systems (3)</td>
<td>Evaluates sustainability, resilience, inequality, environmental justice, and environmental health. Provides framework for public policy that can shape sustainable agriculture, energy and water systems, and sustainable cities.</td>
</tr>
<tr>
<td>EVR 4027</td>
<td>Wetland Environments (3)</td>
<td>Study of the general properties and ecology of wetlands, examination of the distribution and functions of wetlands, and consideration of wetland conservation and policies.</td>
</tr>
<tr>
<td>EVR 4033</td>
<td>Environmental Regulation (3)</td>
<td>An in-depth review of the federal environmental regulatory structure of the United States, governing air and water quality, waste disposal, safety, and natural resource use and conservation.</td>
</tr>
<tr>
<td>EVR 4051</td>
<td>Environmental Field Methods (3)</td>
<td>PR: STA 2023 or QMB 2100 This course will provide an overview of aspects of conducting environmental research, field experience, the critical analysis of environmental data, and learning the fundamentals of producing a scientifically sound report.</td>
</tr>
<tr>
<td>EVR 4104</td>
<td>Karst Environments (3)</td>
<td>PR: EVR 2001 The objective is to provide an understanding of the scientific principles pertaining to karst environments in Florida and around the world. Both physical processes and human interactions/impacts will be examined. Not restricted to majors and not repeatable.</td>
</tr>
<tr>
<td>EVR 4114</td>
<td>Climate Change (3)</td>
<td>PR: EVR 2001 The objective is to provide an understanding of the scientific principles pertaining to global and regional climate change. Both mechanisms causing the change and human impacts on climate will be examined. Not restricted to majors and not repeatable.</td>
</tr>
<tr>
<td>EVR 4163</td>
<td>Forest Ecology and Management (3)</td>
<td>PR: GIS 3006 - Mapping and Geovisualization or GIS 4043C - Geographic Information Systems This course provides instruction on the theories and techniques of forest ecology and management. Topics include: forest ecology, silviculture, forest health, dendrology, and forest measurements, global forest biodiversity, urban forestry, and forest stewardship and ethics.</td>
</tr>
<tr>
<td>EVR 4592</td>
<td>Environmental Soil, Water and Land Use (3)</td>
<td>This course gives an overview of relationships between soil, water, and land use. The course is divided into three conceptual modules: 1. Soils and Landscapes, 2. Water and 3. Land use.</td>
</tr>
<tr>
<td>EVR 4807</td>
<td>Sustainable Healthy Environments (3)</td>
<td>This course examines the human health impacts of our daily activities in a modern world, with a focus on more sustainable options for improving human health.</td>
</tr>
<tr>
<td>EVR 4873</td>
<td>Environmental Policy and Sustainability (3)</td>
<td>PR: EVR 2861 and 1 of: ECO2013, ECO 2023 This interdisciplinary course is designed to provide students with an informative overview and comprehensive assessment of environmental policy application to sustainability issues, problems, and solutions.</td>
</tr>
<tr>
<td>EVR 4878</td>
<td>Methods for Environmental Policy Analysis and Sustainability (3)</td>
<td>This course will introduce students to the methods and processes used in policy analysis. Emphasis will be on the practical application of policy analysis principles and concepts to address existing natural resources and environmental problems.</td>
</tr>
<tr>
<td>EVR 4900</td>

COURSE DESCRIPTIONS
(AS OF SEPTEMBER 20, 2021)

EVR 4930 Selected Topics (3)
Each topic is a course under the direction of a faculty member with the content depending on the interests of the students and faculty involved. All areas of Environmental Science, Policy, Ethics and Law included.

EVR 4940 Environmental Science Internship (2)
The purpose of this course is to promote the student’s understanding and application of environmental science and policy within a practical organizational context. Contract and report required.

EVT 4651 Equity in Schools and the Workplace (3)
Examine equity issues related to gender, race, culture, economics in schools/workplaces. Explore legal, ethical, psychological, social perspectives including stereotyping, prejudice and discrimination for personal implications and systems change.

EVT 4946 Supervised Field Experience: Industrial-Technical Education (6)
Planned supervised functions in the area of specialization and coordinated with selected schools, government, offices, social agencies, businesses and industries on site.

EXP 4104 Sensory Processes (3)
PR: PSY 3213 with a grade of C or better
Available to both majors and non-majors.
Psychophysical and neurophysiological data and theory underlying sensory processes. Visual, auditory, chemical, and somatosensory systems, with particular emphasis on visual processes.

EXP 4204C Perception (3)
PR: PSY 3213 with a grade of C or better
Topics include sensory and physiological bases of perception and how people process relevant information in their environments.

EXP 4304 Motivation (3)
PR: PSY 3213 with a grade of C or better
A survey of motivational processes and mechanisms from physiological and psychological viewpoints.

EXP 4404 Psychology of Learning (3)
PR: PSY 3213 with a grade of C or better
Survey of motivational processes and mechanisms from physiological and psychological viewpoints.

EXP 4640 Psychology of Language (3)
PR: PSY 3213
Historical survey of relations between psychology and linguistics leading to the emergence of psycholinguistics as a field of study. The current status of theory and research in the field will be covered.

EXP 4680C Cognitive Psychology (3)
PR: PSY 3213 with a grade of C or better
Survey of methods, empirical findings, and theoretical interpretations of human learning, information processing, verbal learning, and judgment and decision-making.

FAS 4403 Marine Aquaculture (3)
Explore issues and technologies used to farm in the marine aquatic environment to produce seafood for human consumption and restore wild stocks; overview of marine species, production systems, and interactions between aquaculture and marine environments.

FIL 1002 Introduction to Film Studies (3)
Students will be introduced to key concepts and techniques of Film Studies, including the history of film; an examination of film genres; an overview of foreign cinema; and the study of issues of class, race, gender, and sexuality.

FIL 2000 Film and Culture (3)
This course introduces film as an art form and a social/cultural artifact by providing students with an understanding of the technical, theoretical, and ascetic aspects of film production and analysis.

FIL 3011 The Film As Mass Com II: Rhetor & Stylis (3)
A continuation of FIL 3004 to include the effective arrangements of scenes and sequences in motion picture and television films.

FIL 3052 Foundations of Film & New Media (3)
PR: FIL 1002
Offering an advanced introduction to the first 65 years of international film history, this course joins questions of aesthetic and narrative practice to explorations of various film genres, film movements, and national cinemas.

FIL 3077 Contemporary Film & New Media (3)
PR: FIL 1002
Offering an advanced introduction to global motion picture practice after 1959, this course explores the aesthetics of film and new media across various genres, movements, and national contexts.

FIL 3427C Beginning Film (3)
Intermediate problems in film with emphasis on the exploration of materials and media and the development of individual concepts.

FIL 3854 Film Art (3)
The course is an in-depth study of film language and history, focusing on its unique social, political and cultural significance. Students explore the heterogeneous nature of film by examining its role in popular culture and visual art discourse.

</table>
### FRE 1121 Beginning French II (4)
- **PR:** FRE 1120 or equivalent.
- A continuation of FRE 1120.

### FRE 1170 Overseas Study-Elem. French (4)
*Elementary-level French taught in France. In lieu of FRE 1120 and FRE 1121.*

### FRE 2200 French III (3)
- **PR:** FRE 1121 or equivalent.
- A review of the basic structure of French.

### FRE 2201 French IV (3)
- **PR:** FRE 2200 or equivalent.
  *Readings in French on the intermediate level.*

### FRE 2240 Intermediate Spoken French in Cultural Context (3)
- **PR:** FRE 2241 or equivalent.
- Continuing development of intermediate conversational skills through a comparative cultural approach. Students build vocabulary, oral syntax, and enhance fluency while examining socio-cultural realities in France and Francophone countries.

### FRE 2241 Spoken French in Cultural Context (3)
- **PR:** FRE 1121.
- Development of basic conversational skills in French through a wide variety of cultural context. Students build vocabulary, enhance listening comprehension and fluency in French as they examine socio-cultural realities and issues.

### FRE 2270 Overseas Study-Intro. French (6)
- **PR:** Two semesters of university-level French. Departmental approval required.

### FRE 3234 Reading in French Literature and Culture (3)
- **PR:** FRE 2201 or equivalent.
- This course is designed to build reading skills in French while giving students a broad background in French culture.

### FRE 3391 French Cinema (3)
- **PR:** FRE 2200 with a minimum grade of C-.
- Overview of French cinema from invention to present; concentrates on history, stylistic diversity, & thematic range of French cinema; explores cinematic trends & movements; examines film legends as well as contemporary greats; will be taught in French.

### FRE 3420 Written French in Cultural Context (3)
- **PR:** FRE 2200 and/or FRE 2201.
- Development of writing skills in French through a wide variety of cultural context. Students analyze texts relating to descriptions of persons, places and events, films and fiction, publicity, and argumentation. Workshops facilitate their writing.

### FRE 3440 French For Business (3)
- **PR:** FRE 2200 or equivalent.
- An introduction to the French language in ordinary business transactions.

### FRE 3470 Overseas Study (6)
- An intensive study-travel project in France.

### FRE 3500 French Civilization (3)
- Readings and discussion on the cultural history of France.

### FRE 3502 The Francophone World: A Global Culture (3)
- Offers an overview of the main French speaking cultures throughout the world outside France: French Canada, the Caribbean, Belgium, Switzerland, the Maghreb, Sub-Saharan Africa, the Indian Ocean, the Middle East, Southeast Asia, Louisiana.

### FRE 4421 Advanced Written French in Cultural Context (3)
- Development of various styles of writing in cultural context relating to art, social science and science. Analysis of descriptive, narrative, expository and argumentative writing. Refinement of written French including vocabulary, structure and style.

### FRE 4471 Advanced Overseas Study (6)
- **PR:** FRE 3470.
- Intensive language study in France.

### FRE 4700 French Linguistics (3)
- **PR:** LIN 3010 and FRE 2201 or equivalent.
- An introduction to the phonological, morphological and syntactic structure of French.

### FRE 4905 Directed Study (3)

### FRE 4930 Selected Topics (3)
- Study of an author, movement or theme.

### FRT 3001 Great French Love Stories in Translation (3)
- **PR:** ENC 1101 and 1102 or their equivalent.
- A survey of the great love stories that French literature gave to the world from the Middle Ages to the 21st century and that contributed to the evolution of love, influencing not only other literatures but also other cultures throughout history.

### FRW 4100 The French Novel (3)
- **PR:** FRE 3234, FRE 3420.
- Study of the most representative novels from the 17th - 20th centuries in France, examining literary movements, ideas, and techniques. Course taught in French.
FRW 4101 Introduction to French Drama and Poetry (3)
PR: FRE 3234.
A study of the history of drama and poetry. Will include medieval drama, Racine, Corneille, Moliere, Anouilh, Sartre, Ionesco and others. Will also include Villon, Ronsard, DuBellay, Lamartine, Hugo, Vigny, Musset, Baudelaire, Mallarme, Rimbaud, Valery, Peguy, Eliard, Apollinaire, Char, and others. Course content may vary from year to year. Course taught in French.

FSS 3231 Introduction to Food Production Management (3)
Food preparation, standards and techniques in commercial food production and service. Factors affecting the quality of food, practical experience in food production and service, in accordance with food standards, sanitation & safety and cost control.

GEA 2000 World Regional Geography (3)
Comparative and analytical analysis of representative world regions with emphasis on cultural, political, economic, environmental and physical diversity.

GEA 3405 Geography of Latin America (3)
Systematic geographic analysis of the Latin American world region, with emphasis on its cultural, political, economic, environmental, and physical diversity.

GEA 3500 Geography of Europe (3)
Systematic geographic analysis of the European world region, with emphasis on its cultural, political, economic, environmental, and physical diversity.

GEB 2011 Introduction to Business (3)
An introductory course on business, is a class designed to help students develop a basic understanding of business principles, processes, practices, and strategies. The course will enable students to use business theories and concepts.

GEB 2098 Business Honors Professional Development I (1)
Students are provided the opportunity to come together and learn more about the university and college programs, understand the various business disciplines and develop professional skills necessary in their career.

GEB 2099 Business Honors Professional Development II (1)
PR: GEB 2098
This course is designed to provide students in the Business Honors Program (BHP) with the opportunity to learn the distinct features of professional development and critical analysis of business development through discussion of Harvard Business articles.

GEB 2935 Selected Topics in Business (3)
Topics to be selected by department chairs.

GEB 3016 Business Enterprise Management (3)
This course provides an overview of various business aspects of an enterprise, including Accounting, Finance, Marketing, Management, Production and IS, and how they are integrated and implemented through an Enterprise Resource Management System.

GEB 3033 Business Workplace Skills and Best Practices (3)
PR: ENC 1102 with a minimum grade of C-
This course prepares students for success in the business world. It addresses the most frequently cited set of skills employers seek when hiring employees.

GEB 3373 International Business (3)
An overview of unique problems faced by firms engaging in international activities across a broad spectrum of business activities including topics such as: accounting, finance, management, marketing, import-export, multi-national; country-risk analysis.

GEB 4094 Professional Development: Career Transition (2)

GEO 4340 Natural Hazards (3)  
Examination of the physical, social, economic, political and cultural forces that create the phenomena of natural hazards. Case studies from around the world will include floods, droughts, tornadoes, hurricanes, freezes, heat waves, wild fires, earthquakes, tsunami, and volcanoes.

GEO 4372 Global Conservation (3)  
The course examines environmental conservation and policy from a global perspective. It holistically integrates the science of conservation with environmental, economic, sociocultural, and political realities that challenge conservation efforts.

GEO 4379 Geographic Perspectives on Environment (3)  
PR: GEA 2000C  
This course examines human ideas about the natural environment and the fundamental character of the human-nature relationship across space and time through a survey of literature (geography, environmental history, ethics) on environmental perspectives.

GEO 4421 Cultural Geography (3)  
PR: GEO 2400  
The interrelationships of culture and nature, from ancient times to the present.

GEO 4434 Senior Seminar in Geography (3)  
A capstone course for seniors graduating with a BA degree in Geography. Student will bring the knowledge and skills they acquired to demonstrate their analytical thinking skills through writing exercises, peer review, research and presentation.

GEO 4450 Medical Geography (3)  
PR: GEO 2200 with a minimum grade of C  
Deepen understanding of spatial patterns of health/disease at local, regional & global scales; social, cultural, political, economic & epidemiological processes that underlie these patterns; varied approaches to addressing health inequalities/needs.

GEO 4471 Political Geography (3)  
PR: GEO 2400  
The geographic factors underlying political decisions and influencing their outcome; the geographic consequences of these decisions; geopolitics.

GEO 4502 Economic Geography (3)  
PR: GEO 2400  
The spatial organization of economic production, consumption, and exchange systems.

GEO 4900 Directed Reading (4)  
GEO 4910 Individual Research (4)

GEO 4930 Selected Topics (3)  
Topics are at the discretion of the instructor. This course will offer upper level, advanced topics in all aspects of Geography. Course can be repeated for credit as long as the title is different, for up to 8 credits.

GEO 4933 Geography Colloquium (1)  
Weekly topical lectures by faculty and outside speakers. Students will develop a plan for their professional or graduate careers.

GEO 4940 Internship in Geography (4)  
Supervised field experience in local, national, and overseas government, NGOs, and private sector enterprises. Restricted to majors. Nonrepeatable.

GER 1120 Beginning German I (4)  
Development of basic skills in listening and reading comprehension, speaking and writing of German.

GER 1121 Beginning German II (4)  
PR: GER 1120 or equivalent.  
Continued development of basic skills in listening and reading comprehension, speaking and writing German.

GER 2200 German III (3)  
PR: GER 1121 or equivalent.  
A review of the basic structure of spoken and written German. May be taken concurrently with GER 2201.

GER 2201 German IV (3)  
PR: GER 1121 or equivalent.  
Readings in German on the intermediate level. May be taken concurrently with GER 2200.

GER 2240 Conversation I (3)  
PR: GER 1121.  
For development of basic conversational skills.

GER 3333 German Language & Culture through Film (3)  
PR: GER 2200 or above.  
This is a German conversation course which allows students to improve upon their German speaking, reading, and listening skills. German films will be used as the basis for oral communication practice. The language of instruction is German. German speaking, reading, and listening skills. German films will be used as the basis for oral communication practice. The language of instruction is German.

GER 3420 Composition I (3)  
A fundamental course for students who have completed GER 2200 or GER 2201.

GER 3500 The Germans - Past and Present (3)  
PR: GER 2200 or GER 2201  
Survey of German cultural history.
### COURSE DESCRIPTIONS

**UNIVERSITY OF SOUTH FLORIDA 2021-2022 UNDERGRADUATE CATALOG**

**GER 3501 Urban Life & Culture in Germany (3)**
A language and culture course taught in German that will explore the most important cities located in Germany with an emphasis on contemporary urban life and culture. It will improve speaking, reading, and listening skills and cultural competency.

**GER 3573 Cultural Observations in Germany (3)**
This course allows students to experience Germany from a cultural/historical perspective and gives them insights into a city's significance within Germany as a whole. It also includes an emphasis on German language use and cultural practices.

**GER 4410 Conversation II (3)**
Free conversation based on the current German idiom.

**GER 4421 Composition II (3)**
Practical training in modern German usage and differences of style.

**GET 3103 German Literature in English Translation (3)**
Analysis and interpretation of selected major works of German literature, to be read in English, with regard to their thought content and relevance to out thoughts and actions.

**GET 3522 Fantastic Films of Early German Cinema (3)**
An overview of early 20th century German films with emphasis on horror, science fiction, and fantasy films. Course offers insights into Germany's artistic, intellectual, and social history, as well as general film history and criticism. Taught in English.

**GET 4250 Dungeons Dragons & Dwarfs Germanic Myth & Pop Cult (3)**
This course explores historical, literary and visual reconstructions and adaptations of Germanic mythology and history from antiquity to the present.

**GET 4503 New German Cinema to Present (3)**
An overview of post-1945 Ger films with emphasis on films from New Ger Cinema (1960s-early 80s) & its aftermath. Course offers insights into Germany's artistic, intellectual, and social history, as well as general film history and criticism. Taught in Eng.

**GET 4528 German Directors in Hollywood (3)**
This course examines films by German émigré directors produced in Hollywood throughout the twentieth and twenty-first centuries.

**GET 4931 Selected Topics in German Studies (3)**
Study of an author, movement, or theme. Taught in English.

**GEW 4100 Survey of German Literature I (3)**
Course will examine a variety of texts from the 9th to the early 19th century, exposing significant moments in German literature and thought and exploring diverse perspectives on German culture and society. Course taught in German. Not repeatable.

**GEW 4101 Survey of German Literature II (3)**
Course will examine a variety of texts from the 19th century to the present, exposing significant moments in German literature and thought and exploring diverse perspectives on German culture and society. Course taught in German. Course not repeatable.

**GEY 2000 Introduction to Aging Sciences (3)**
This course is designed to be an introduction to the study of aging. The aging process is viewed from a multi-disciplinary perspective including the biological, psychological, and sociological aspects of aging.

**GEY 3323 Community Resources for the Older Adult (3)**
This class is designed to introduce students to services available to older adults and to careers in the field of Aging Services. Content includes theoretical and practical issues, as well as exposure to opportunities for service and employment.

**GEY 3601 Physical Changes and Aging (3)**
A survey of normal and pathological physical changes occurring from middle age through older age. Course emphasis will be on basic age-related changes and their implications for behavior in older age.
GEY 3625 Sociological Aspects of Aging (3)
Consideration of human aging in a broad sociocultural context. Course emphasis will be on historical, philosophical, and demographic aspects of aging, theories of social gerontology, attitudes toward aging and the aged, and cross-cultural perspective.

GEY 4101 Aging in Special Populations (3)
This course explores how special populations (centenarians; the severely mentally ill, homeless older adults; LGBT older adults; older adults with HIV/AIDS; and older offenders) age differently with specific attention paid to their health care needs.

GEY 4102 Aging in Modern Literature and Film (3)
This class focuses on late 20th century and early 21st century literature and film to explore gender, ethnicity, creativity, social class, caregiving, and many other critical aging issues. Not restricted to majors.

GEY 4104 Healthy Global Aging (3)
This course challenges students to understand health and wellness for older adults in a global context at a time when the global population is aging.

GEY 4231 Elder Abuse and Neglect (3)
The purpose of this class is to provide students with a basic understanding of the problem of elder abuse and neglect found within the community and in congregate facilities. Interdisciplinary approaches to intervention are emphasized.

GEY 4322 Care Management for Older Adults (3)
This course examines the role and function of care management in meeting the needs of older adults. All aspects of care management practice are covered, including the elements of the case management process as well as ethical and legal issues.

GEY 4360 Counseling for Older Adults (3)
An introduction to the study of the major mental health problems of older adults. Current approaches to counseling older adults in community and institutional settings are discussed.

GEY 4401 Research Methods in Aging (3)
PR: STA 2122 with a minimum grade of C. Methods and techniques of social research in gerontology. Design of gerontological studies, collection and analysis of data, interpretation of results, and preparation of reports.

GEY 4475 Program Evaluation in an Aging Society (3)
Students develop knowledge of the purposes of evaluation research and the approaches and methodologies necessary to evaluate aging services programs and organizations.

GEY 4507 Understanding Policies and Practices of Long Term Care (3)
PR: GEY 2000
This course provides principles for managing disability in a variety of settings. Topics include historical context, experience of disability, and challenges of providing care for disabled persons. Course is repeatable and not restricted to GEY majors.

GEY 4508 Health Care Operations (3)
PR: GEY 4507, ACG 2021, each with a grade of C or better.
This course addresses the health care operations of long-term care facilities. This course is for students in the BS in long-term care administration, but not limited to GEY majors. The course is repeatable for credit.

GEY 4509 Regulatory and Clinical Operations (3)
PR: GEY 4508, ACG 2021, each with a grade of C or better.
This course will familiarize the student with the basic aspects of nursing home administration through the practical application of management theory and concepts. The course is not repeatable and not restricted to GEY majors.

GEY 4520 Legal Aspects of Health Care Administration (3)
This web-based course presents an overview of the legal issues facing the health care industry and provides special emphasis on long-term care settings. It provides students with a basic working knowledge of legal system and court processes.

GEY 4608 Alzheimer's Disease Management (3)
PR: GEY 2000 or GEY 3326.
This course will provide instruction on effective approaches for providing care to persons with Alzheimer's Disease and related disorders in residential and home care settings. The major dementing disorders and typical behaviors presented by patients are presented along with strategies for successful behavior management. Building a dementia program and building dementia care teams are also covered.

GEY 4612 Psychology of Aging (3)
A comprehensive overview of psychological aspects of aging. Topics will include age-related changes in sensation/perception, cognition, and personality, as well as application to late-life psychopathology.

GEY 4628 Health, Ethnicity, and Aging (3)
This course addresses how people of different ethnic backgrounds age, in the physical, psychological, and social context, with an emphasis on health.
<table>

<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEY 4632</td>
<td>Economics of Aging (3)</td>
<td>This course provides the foundations of economic reasoning necessary to understand the economic implications of key issues in aging.</td>
</tr>
<tr>
<td>GEY 4635</td>
<td>Business Management in an Aging Society (3)</td>
<td>This course provides students with an interdisciplinary perspective that addresses both business management and the impact of our aging society on business.</td>
</tr>
<tr>
<td>GEY 4641</td>
<td>Death and Dying (3)</td>
<td>A broad overview of the basic concepts and psychosocial issues relating to the meaning of loss and death, the process of death, and the experience of grieving. Health care practices are considered along with community resources.</td>
</tr>
<tr>
<td>GEY 4647</td>
<td>Ethical and Legal Issues in Aging (3)</td>
<td>A consideration of the major ethical and legal issues in aging and their implications for policies, priorities, and services.</td>
</tr>
<tr>
<td>GEY 4690</td>
<td>Senior Seminar in Aging (3)</td>
<td>In this senior level capstone course, students discuss important professional issues in aging, integrate knowledge from prior courses, and practice professional skills.</td>
</tr>
</tbody>
</table>
| GEY 4692    | Professional Development and Engagement in Aging (3) | PR: GEY 3601, GEY 3625, and GEY 4612  
The intent of the capstone course is threefold: (1) to enhance professional development in gerontology; (2) pragmatically engage students in the field of practice; and (3) demonstrate mastery of core knowledge/skills gained in the gerontological courses. |
| GEY 4900    | Directed Readings in Aging (3)                  | A reading program with topics in aging conducted under the supervision of a faculty member.                                                                                                                |
| GEY 4917    | Directed Research in Aging (4)                  | This course will provide Undergraduate Students with an opportunity to engage in an agreed upon research project under the supervision of a professor. The course is open to any major and is repeatable for credit. |
| GEY 4935    | Special Topics in Gerontology (3)               | Courses on topics such as preretirement, mental health, human services organization, nursing home administration, the older woman, and elder abuse will be offered.                                              |
| GEY 4945    | Internship (9)                                   | A full-time internship assignment to an agency or organization if in the Aging Science program (3-6 hours) or to a nursing home if in the Long Term Care Administration program (9 hours). |
COURSE DESCRIPTIONS
(AS OF SEPTEMBER 20, 2021)

UNIVERSITY OF SOUTH FLORIDA 2021-2022 UNDERGRADUATE CATALOG

GLY 2010 Dynamic Earth: Introduction to Physical Geology (3)
A first course in geology emphasizing the Earth’s composition, structure, and dynamics. Lectures/activities include but are not limited to plate tectonics, earthquakes, volcanism, glaciation, global warming, shorelines, and natural resources.

GLY 2030 Hazards of the Earth's Surface: Environmental Geology (3)
A first course in geology emphasizing catastrophic events that cause damage to humans and their possessions. Lectures and recitation activities on geologic hazards, tools geologists use to study them, and measures that can be taken to minimize them.

GLY 2051 Origins: From the Big Bang to the Ice Age (3)
The history of the cosmos, origin of the universe, galaxies, the solar system, and earth, evolution of life, great extinction’s including the dinosaurs, evolution of the primates, and the environmental future of the planet. (For both non-science and science majors.)

GLY 2090 Preparing for a Career in Geology (1)
This course is designed to help new geology students learn about different career options available, define curricular goals, and strategize objectives that navigate through the USF curriculum to reach those goals.

GLY 2100 History of Life (3)
This course has several objectives. It is an introduction not only to basic scientific concepts in geology and evolutionary theory but, perhaps more importantly, to science as a way of understanding the world around you and finding answers to big question.

GLY 2100L History of Life Laboratory (1)
Laboratory study of the history of life.

GLY 2160 Geology of the National Parks (3)
This course introduces the nature of geologic processes including plate tectonics, earthquakes, volcanism, and glaciation drawing on examples from our nation’s parks.

GLY 2930 Selected Topics in Geology (3)
Topical courses in geology of general interest.

GLY 3104C Stratigraphy and Paleontology (4)
PR: GLY 2000L, GLY 2100
The study of “deep time”, including how it is measured, how it is correlated over the Earth’s surface, and how important physical, biologic, and chemical geologic processes have varied with time. Lec.-Lab.

GLY 311C Mineralogy, Petrology, Geochemistry (4)
PR: GLY 2000L, CHM 2045

GLY 3402C Structural Geology and Tectonics (4)
PR: GLY 2000L
Plate tectonic theory and its implication re: the formation of structural features on outcrop and regional scales. Field and geophysical tools for structural analysis. Required field trip. Lec-Lab.

GLY 3552C Sedimentary Rocks and Processes (4)
PR: GLY 2010, GLY 2000L, CHM 2045, GLY 3311C
A lecture and laboratory class that discusses sedimentary processes, formation and classification of sedimentary rock, and the sedimentary rock record. Examination of the rock record to solve problems in sedimentary geology.

GLY 3850 Geology For Engineers (3)
An examination of geologic materials and processes designed for engineering students; classification and properties of earth materials, surface processes, site investigation techniques, applications of geology to the solution of engineering problems.

GLY 3866 Computational Geology (3)
PR: MAC 2281 or MAC 2311

GLY 4045 Moons, Planets, and Meteors: An Introduction to Planetary Science (3)
Solar System exploration, from Aristotle to NASA. Modern views on the origins of meteorites, the Moon, Mars, Venus, and other planetary bodies, and the methods of planetary study. Meteor impacts, their effects, future hazard. Space science as a tool in the study of the Earth. Field trips, lectures, Internet exercises.

GLY 4324C Physical Volcanology (4)
PR: GLY 3311C, MAC 2241 or MAC 2311 or MAC 2281.
Physical volcanology explores the nature of volcanism on Earth and nearby planets. Topics in magma production and ascent, eruption dynamics, volcanic hazards, and volcano monitoring will be covered in lecture, laboratory, and independent exercises.
COURSE DESCRIPTIONS
(AS OF SEPTEMBER 20, 2021)

UNIVERSITY OF SOUTH FLORIDA 2021-2022 UNDERGRADUATE CATALOG

GLY 4462 Geomechanics (3)
PR: GLY 2010 or equivalent, PHY 2048 and 2049 or equivalent.
CPR: GLY 3402C (or an equivalent structural geology course).
Overview of the mechanical behavior of earth materials including general theory, an introduction to soil mechanics, and introduction to rock mechanics. Includes two field trips to observe geomechanical issues in Florida and modern methods of rock testing.

GLY 4480 Seismology (4)
PR: GLY 2010, PHY 2048 or PHY 2053, MAC 2281 or MAC 2311
Comprehensive introduction to theoretical and observational seismology, use of seismic waves and earthquake patterns to study earth structure, seismic hazard and risk mitigation, earthquake prediction, and techniques for the analysis of seismic data.

GLY 4554C Sedimentary Environments (4)
PR: At least one course in Geology with lab.
A lecture lab course on principles of weathering, production, erosion, transport, and deposition on the earth's surface, and the resulting sedimentary environments. Morphologic and sedimentologic characteristics of major earth sedimentary environments are discussed, along with several field trips.

GLY 4720C Aqueous and Environmental Geochemistry (4)
PR: GLY 2000L, CHM 2045
CR: CHM 2046
Physical, chemical and biological processes affecting fluids of the lithosphere, oceans and atmosphere. Water as a geologic medium and global entity. A systems approach. Lecture/Lab.

GLY 4734 Beaches and Coastal Environments (3)
A comprehensive introduction to the nature of all coastal environments including beaches, dunes, tidal inlets, estuaries, reefs, and river deltas. Emphasis will be on the natural state of these environments and how human activities have and will impact them. Consideration of coastal management policies involving economics, ethics, policy, and environmental law.

GLY 4780 Geological Field Studies (3)
PR: 1 geology course.
Lectures and field trip to study modern geologic systems and/or geologic origins of specific regions. Mapping and field description techniques introduced. Topic/destination of trip varies. Trip requires camping and vigorous physical activity. Lec. Field trip.

GLY 4822C Hydrogeology (4)
PR: GLY 2010, GLY 2000L, MAC 2281 or MAC 2311, PHY 2048 or PHY 2053, CHM 2045
CR: MAC 2282
Ground water flow systems, ground water geology, introduction to numerical and analytical models of ground water flow. Lec.-lab.-field trips.

GLY 4905 Independent Study (3)
Specialized independent study determined by the student's needs and interests.

GLY 4915 Undergraduate Research (3)
Individual experimental investigations with faculty supervision.

GLY 4920 Geology Colloquium (1)
Weekly topical lectures by faculty, graduate students and invited speakers.

GLY 4921 Scientific Communication (3)
A writing-intensive FKL capstone course designed to develop students' skills in communicating scientific ideas through the written word, spoken word, and through graphical displays of information (graphs, diagrams).

GLY 4930 Selected Topics in Geology (4)
Each topic is a course under the direction of a faculty member with the content depending on the interests of the students and faculty involved. All areas of geology included.

GLY 4946 Practical and Applied Geology: Teaching Experience (2)
PR: 12 credit hours of Geology courses
Hands-on course designed to give students experience in teaching geology.

GLY 4947 Practical and Applied Geology: Laboratory Experience (2)
PR: 12 credit hours of Geology courses
Hands-on course designed to teach the basic laboratory skills of a practicing geologist.

GLY 4948 Practical and Applied Geology: Field Experience (2)
PR: 12 credit hours of Geology courses
Hands-on course designed to teach the basic skills of a practicing field geologist.

GRA 2103 Introduction to Computer Based Design (3)
Introduction to visual communication principles and the Apple computer as a tool for graphic design. Students will use the Macintosh and design software such as Photoshop, Illustrator, and InDesign to take basic projects from concept through production.

<td>Exploration of the Expressive Potential of the Letter Form</td>
</tr>
<tr>
<td>GRA 3735</td>
<td>Multimedia Systems I (3)</td>
<td></td>
<td>This course introduces multimedia systems and focuses on their use as tools in the production of digital multimedia. Content covers all key hardware, navigation, and operating components.</td>
</tr>
<tr>
<td>GRA 4119</td>
<td>Packaging Design (3)</td>
<td>PR: GRA 2190 with a minimum grade of C</td>
<td>An introduction of the basic procedures involved in preparing packaging design. Examine the communication techniques and theories relevant to package design, point-of-purchase displays and sales promotional items.</td>
</tr>
<tr>
<td>GRA 4128</td>
<td>Book Design (3)</td>
<td>PR: GRA 2190 with a minimum grade of C</td>
<td>Historical development of the book with special emphasis on the work of contemporary designers. Modern bindery methods, material and design. Problems in book design, illustration and binding.</td>
</tr>
<tr>
<td>GRA 4137</td>
<td>Advanced Web Design (3)</td>
<td>PR: GRA 4522 with a minimum grade of C</td>
<td>This studio course builds on the principles taught in Graphic Interface. Students are challenged to solve advanced communication problems while addressing technical issues relating to web design and the user experience.</td>
</tr>
<tr>
<td>GRA 4179</td>
<td>Social Design (3)</td>
<td>PR: GRA 2190 with a minimum grade of C</td>
<td>This course will explore the purpose of graphic design for social change outside the scope of advertising. Students will investigate societal issues, and the relevance of design for pro-bono and non-client based causes.</td>
</tr>
<tr>
<td>GRA 4423</td>
<td>Business of Graphic Design (3)</td>
<td>PR: GRA 2190 with a minimum grade of C</td>
<td>Through lectures, discussions, and various assignments, students will be exposed to the legal and business issues affecting graphic designers today.</td>
</tr>
<tr>
<td>GRA 4522</td>
<td>Graphic Interface (3)</td>
<td>PR: GRA 2190 with a minimum grade of C</td>
<td>Focuses on the introduction of principles of interactivity related to user experience. Examines the design of user-interfaces and the development of advanced interactive visual strategies through the study of current or emerging technologies.</td>
</tr>
<tr>
<td>GRA 4547L</td>
<td>Advanced Graphic Design (3)</td>
<td>PR: GRA 3193 with a minimum grade of C</td>
<td>A lab course that concentrates on multi-page and three dimensional designs. Continuation of stress on the design process, professional work, habits and market research and problem solving.</td>
</tr>
<tr>
<td>GRA 4833</td>
<td>Motion Graphics (3)</td>
<td>PR: GRA 3193 with a minimum grade of C</td>
<td>This course introduces students to motion graphics, as it relates to special effects, animation, and typography. Students will be challenged to apply their current design knowledge in motion graphics.</td>
</tr>
<tr>
<td>GRA 4880</td>
<td>Advanced Illustration (3)</td>
<td>PR: ART 2251 with a minimum grade of C</td>
<td>This course surveys the broad field of illustration through studio projects examining areas such as concept art, advertising, editorial and book illustration. Students create illustrations both traditionally and digital.</td>
</tr>

<td></td>
</tr>
<tr>
<td>HSC 4172</td>
<td>Women's Health: A Public Health Perspective (3)</td>
<td>From a public health perspective, this course will explore the multidimensional and multidisciplinary dimensions of women's health. The course will emphasize health promotion, disease prevention, and overall well-being.</td>
<td></td>
</tr>
<tr>
<td>HSC 4211</td>
<td>Health, Behavior and Society (3)</td>
<td>This course focuses on an ecological perspective of the determinants of health including biology, individual behavior, social relationships, social stratification, institutions, neighborhoods and communities, environment, policies and globalization.</td>
<td></td>
</tr>
<tr>
<td>HSC 4213</td>
<td>Environmental and Occupational Risk Analysis (3)</td>
<td>This course provides an introduction of risk analysis for environmental and occupational health. Students will gain knowledge of the various regulations and scientific methods for the evaluation of health risk in environmental and occupational settings.</td>
<td></td>
</tr>
<tr>
<td>HSC 4430</td>
<td>Occupational Health and Safety (3)</td>
<td>This course provides a review of occupational health and safety. Regulatory guidance and compliance, and the underlying science that drives occupational safety regulations are covered. The roles of various health and safety professionals are explored.</td>
<td></td>
</tr>
<tr>
<td>HSC 4504</td>
<td>Foundations of Public Health Immunology (3)</td>
<td>This course provides an overview of the principles of immunology and an introduction to the applications of immunology and immunologic techniques used in the surveillance, prevention and control of diseases of public health importance.</td>
<td></td>
</tr>
</tbody>
</table>
HSC 4537 Medical Terminology (3)
This course provides a unique educational program to improve the student’s medical vocabulary. The course includes medical and scientific content information, which students encounter in other health professional courses. Not restricted to any major.

HSC 4551 Survey of Human Diseases (3)
An overview of the nature, types, and mechanisms of diseases of the major body systems.

HSC 4573 Foundations of Food Safety (3)
This course provides an overview of food safety practices and principles emphasizing the role of food safety in public health. Topics include proper food handling procedures, food safety hazards, food-borne illness prevention, and food safety regulations.

HSC 4579 Foundations of Maternal and Child Health (3)
This course provides an overview of maternal and child health issues and trends. With this primary aim, the objectives are organized around the knowledge of health assessment and interventions for families and children.

HSC 4624 Foundations of Global Health (3)
This course introduces students to the principles of public health from a global perspective. Emphasis will be placed on the impact of social, economic, political and environmental factors that influence health and access to health care across the globe.

HSC 4630 Understanding U.S. Health Care (3)
An introduction to health services; providing an overview of important components of the U.S. health care system, health policy, funding sources, and comparisons with other developed nations.

HSC 4631 Critical Issues in Public Health (3)
This course provides students the opportunity to learn about the multiple ways to view controversial topics in public health. The course covers topics including biomedical issues, social & behavioral factors related to health, and environmental issues.

HSC 4851 Health Sciences Internship (3)
This course will oversee and guide students research project or internship experience coordinated with a mentor external to the course. Students will meet weekly to discuss internship experiences and progress, and present results.

HSC 4932 Special Topics in Health Sciences (3)
This course will address topics in current interest in the Health Sciences. Special topics will vary from semester to semester at the discretion of the instructor.

HSC 4933 Special Topics in Public Health (3)
Content will be governed by student demand and instructor interest.

HUM 1020 Introduction to Humanities (3)
Analysis of selected works of literature, music, film, and visual art, representing artists of diverse periods, cultures, genders, and races. Especially recommended for students who later take 4000-level Humanities courses.

HUM 2210 Studies in Culture: The Classical Through Medieval Periods (3)
A survey of literature and the arts of ancient Greece, Rome, and medieval Europe. Issues to be examined may include the dialogue between local traditions and cosmopolitan cultures, the relationship of the individual to society, and the bases for moral values.

HUM 2230 European Humanities: Renaissance - 20th Century (3)
Students will be exposed to the creative expressions and cultural products of Western European societies in order not only to determine the past’s values, beliefs, and concerns, but also to enrich our own spirits, imaginations, and intellects.

HUM 2250 Studies in Culture: The Twentieth Century (3)
Analyses of selected works of twentieth century art, including films, paintings, music, and literature, in the context of major political, social, and economic events, such as war, depression, totalitarianism, and technological change.

HUM 2273 Eastern and Western Culture Since 1400 (3)
This course examines the different ways Westerners have viewed, understood, and made sense of Asia since the 15th-century.

HUM 2466 Modern Latin American Cultures (3)
An overview of the cultural heritage of Latin America since the time of independence. Verbal and visual texts will be used to study the difficult struggle to create a cultural identity that incorporates African, indigenous, and European traditions.

HUM 2522 Introduction to the Cultural Study of Popular Music (3)
Variable topic. An interdisciplinary examination of popular music traditions as they affect race, class, and gender, and interact with commerce, technology, and politics. Students will combine critical listening with history and cultural analysis.

</tr>
</tbody>
</table>
| HUM 4931   | Seminar in Humanities (3) | PR: HUM 4331 with a minimum grade of C-
Seminar focuses on the writing of a substantial research paper in the humanities. Topic varies. Offered only in spring semester. |
| HUM 4938   | Major Issues in the Humanities (3) | The study of an important topical issue in the Humanities. Materials representing diverse views relating to that issue will be read, and works of art in different media that have relevance to the debate will be studied. Available to majors and non-majors. |
| HUM 4940   | Internship in Humanities (3) | A structured, out-of-class learning experience providing firsthand, practical training in Humanities-related professional careers in the community. |
| HUM 4941   | Study on Location (4) | The art of a culture will be examined during travel in groups, led by an instructor, to important cities or sites. Monuments, museums, architecture, plays, and/or concerts will be studied. Reading assignments and lectures. Not restricted. |
| HUM 2201   | Nutrition (3) | The study of fundamental principles of normal nutrition as they relate to human life and growth from conception through senescence, interpretation of current nutrition information, and application of nutrition knowledge in the establishment of good eating habits. |
| HUM 3126   | Food and Culture (3) | Exploration of the role of cultural diversity in formation of food habits with focus on changes in U.S. dietary patterns related to global cultural plurality. |
| HUM 3272   | Sports Nutrition (3) | This course explores nutrition in the enhancement of health and fitness. Discussion includes the nutrient requirements for attainment and maintenance of health, disease prevention and sports performance. The course is not restricted to majors and it is not repeatable for credit. |
| HUM 3296   | Nutrition and Disease (3) | A nutrition course for those wishing to increase their nutrition knowledge in the areas of health care, diet and disease, and therapeutic nutrition. The course is not restricted to majors and is not repeatable for credit. |
### HUN 3601 Nutrition Education & Counseling (3)
**PR:** HUN 2201
A nutrition course for those wishing to increase their nutrition knowledge in the areas of health care, diet and disease, and therapeutic nutrition. The course is not restricted to majors and is not repeatable for credit.

### IDC 2000C Introduction to Scientific Computing (3)
Introduction to computing for scientific applications. No prior programming experience required. Write readable, modular, correct code to solve problems from scientific disciplines. The course is intended to lead to undergraduate-research opportunities.

### IDH 2009 Honors Discovery: People, Processes and Problems (3)
An appreciation of the research process in multiple disciplines culminating in the production of a collaboratively developed research proposal.

### IDH 2010 Acquisition of Knowledge: Interdisciplinary Inquiry and Practical Wisdom (3)
An examination of different ways of knowing, information literacy across disciplines, and the value of interdisciplinary inquiry. Students explore how knowledge is created/consumed and the relationships between theory of knowledge and information literacy.

### IDH 2930 Selected Topics (3)
**PR:** IDH 2010
This course is designed to emphasize a selected problem or issue that is meaningful and challenging to University Honors students and special populations. A variety of instructional approaches will be used. Topics will vary each semester. Repeatable for a total of 8 credits.

### IDH 3100 Arts/Humanities Honors (3)
Through the examination of particular historical periods, media or themes the course will examine the relationship between different types of creative cultural production (e.g., art, literature, drama, music, film) and society, politics, history & values.

### IDH 3350 Natural Sciences Honors (3)
An applied exploration of current knowledge, issues, and innovation in the natural sciences, and their potential for problem-solving and engagement with ethical and philosophical questions.

### IDH 3400 Social and Behavioral Sciences Honors (3)
This course introduces students to social/behavioral sciences through cultural and sociopolitical inquiry; cultivates ethical ideas and practices pertaining to civic engagement, dimensions of human experience, and the complexity of social interaction.

### IDH 3600 Seminar in Ethics (3)
This course aims to cultivate an understanding of ethical ideas & practice, evaluate these within specific dimensions of human experience, & develop skill pertaining to the realization of practice or policy within a broad context of civic engagement.

### IDH 4000 Honors Program Seminar: Major Works/Majors Issues (3)
**PR:** IDH 2010.
This course explores major works and major issues in a variety of disciplines. Each section will be devoted to content in a different academic area.

### IDH 4200 Geographical Perspectives Honors (3)
**PR:** IDH 2010
Using regions in the Majority World as sites of study, this course explores how the interconnectedness of diverse spaces, places, and peoples constitute community, through the examination of locales, historical periods, and the people who inhabit them.

### IDH 4910 Undergraduate Research (3)
A supervised program of interdisciplinary research in areas of specific interest. Open to all USF students by application through the undergraduate research coordinator.

### IDH 4930 Selected Topics (3)
**PR:** IDH 2010.
This course is designed to emphasize a selected problem or issue that is meaningful and challenging to University Honors students and special populations. A variety of instructional approaches will be used. Topics will vary each semester. Repeatable for a total of 8 credits.

### IDH 4950 Honors Capstone (3)
A culminating experience in the Honors curriculum focused on integrative & applied learning. This course provides in-depth engagement with a specific topic through group research, service-learning, community-engaged education and/or experiential learning.
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>IDH 4970</td>
<td>Honors Thesis</td>
<td>3</td>
<td>Development of an interdisciplinary thesis under the direction of a mentor. Students produce an original project such as a scholarly paper, design project, performance, portfolio, or business plan. Taken for 2 semesters to complete Honors requirements.</td>
</tr>
<tr>
<td>IDS 1505</td>
<td>Introduction to Research in Behavioral and Community Sciences</td>
<td>2</td>
<td>Overview of research problems and processes in the behavioral and community sciences, research ethics involving human and animal subjects, and the responsible conduct of research.</td>
</tr>
<tr>
<td>IDS 2192</td>
<td>Global History and Politics Since 1945</td>
<td>3</td>
<td>This interdisciplinary course, team-taught by the History Department and the School of Interdisciplinary Global Studies, introduces students to the major political, economic, and cultural events and forces that have shaped the world since 1945.</td>
</tr>
<tr>
<td>IDS 2231</td>
<td>Introduction to Global Sustainability</td>
<td>3</td>
<td>The course presents theory and practice of sustainability and discusses its three components: environment, society and economy.</td>
</tr>
<tr>
<td>IDS 2378</td>
<td>Critical Thinking: Foundations of Interdisciplinary Knowledge and Inquiry</td>
<td>3</td>
<td>This course provides an overview of five major domains of knowledge and inquiry: STEM, Social Sciences, Health, Business, and Humanities/Arts. Through applied critical thinking, students in this course will examine social problems.</td>
</tr>
<tr>
<td>IDS 2600</td>
<td>Applications of Research in Community Settings</td>
<td>1</td>
<td>Research in Community Settings introduces students to the principles of community-based participatory research and provides opportunities for students to observe and analyze the application of evidence-based practices in community settings.</td>
</tr>
<tr>
<td>IDS 2912</td>
<td>Undergraduate Research Experience</td>
<td>4</td>
<td>Learning objectives determined by faculty and aligned with students career aspirations and/or academic program. May be repeated a maximum of two times. This course is open to all majors.</td>
</tr>
<tr>
<td>IDS 2931</td>
<td>Selected Topics</td>
<td>3</td>
<td>Selected topics in liberal arts and sciences. A basic introduction to the substance and theory of contemporary topics in humanities, social science or natural science.</td>
</tr>
<tr>
<td>IDS 3186</td>
<td>Scientific and Ethical Dimensions of Human Disease</td>
<td>3</td>
<td>An interdisciplinary perspective of the biological basis of human disease combined with critical thinking and medical ethics. Basic concepts of human disease are integrated with bioethical dimensions of patient choice, physician responsibility and current health care issues.</td>
</tr>
<tr>
<td>IDS 3315</td>
<td>Global Issues, Challenges, and Perspectives</td>
<td>3</td>
<td>This course provides students the opportunity to explore global issues, challenges, and perspectives broadly and participate in a high-impact practice. High-impact practices vary by section.</td>
</tr>
<tr>
<td>IDS 3662</td>
<td>Arts Connections</td>
<td>3</td>
<td>This is an interdisciplinary course to the arts disciplines of music, dance, theatre, and art. Artists from the four disciplines will provide weekly presentations centered around issues and ideas that have formed the basis of their creative research. Influences of diversity, new technologies and community and public arts will be explored. This course will introduce students to the role the arts play in shaping their perceptions of the world as well as reflecting the underlying values and paradigms that form our culture(s).</td>
</tr>
<tr>
<td>IDS 3947</td>
<td>Cooperative Internship</td>
<td>6</td>
<td>Learning objectives determined by faculty and aligned with experiences in the workplace setting related to student's career aspiration and/or academic program. May be repeated for a maximum of 6 credit hours. The internship course is open to all majors.</td>
</tr>
<tr>
<td>IDS 3949</td>
<td>Cooperative Education, Parallel</td>
<td>2</td>
<td>Part-time (10-25 hrs/wk) paid or for credit, career-related work experience. This course may be repeated up to 6 credit hours. Prerequisite: 45+ hours of credit, GPA 2.5+, a declared major and be accepted in Cooperative Education Program. S/U Only.</td>
</tr>
<tr>
<td>IDS 4171</td>
<td>Playing With Words, Images, and Sounds: Multimodal Composing as Creative Thinking</td>
<td>3</td>
<td>Students will develop creative thinking strategies by engaging in composing processes borrowed from different fields to construct multimodal texts.</td>
</tr>
<tr>
<td>IDS 4377</td>
<td>Community-Based Arts Practice</td>
<td>3</td>
<td>This course provides an overview of interdisciplinary socially-engaged arts practices. Methodologies learned in class will be applied through partnerships with community organizations, including events off-campus, and analyzed through class reflection.</td>
</tr>
</tbody>
</table>
## IDS 4910 Community Research (4)
To provide students with a community related research experience.

## IDS 4914 Advanced Undergraduate Research Experience (4)
Learning objectives determined by faculty and aligned with students career aspirations and/or academic program. May be repeated a maximum of four times. This course is open to all majors.

## IDS 4930 Selected Topics (3)
Course content determined by students’ and instructor's interests and needs.

## IDS 4934 Senior Capstone for BSAS/BGS (3)
This course affords students the opportunity to synthesize knowledge they have gained throughout their previous undergraduate coursework and identify how their integrated program of study provides real-world applicability and utility.

## IDS 4942 Community Internship (4)
To provide students with a community internship experience.

## IDS 4949 Cooperative Education, Alternating (3)
Full-time (40 hrs/wk) paid or for credit, career-related work experience. This course may be repeated up to 6 credit hours. Prerequisite: 45+ hours of credit, GPA2.5+, a declared major and be accepted in Cooperative Education Program.

## IDS 4955 International Community Research (4)
To provide students with an international community research experience.

## INP 2101 Applied Psychology (3)
The application of psychological principles and the functions of psychologist in education, government, industry, and clinical practice.

## INP 4004 Industrial Psychology (3)
PR: PSY 3213 with a grade of C or better. Applications of psychological principles to industry. Topics include: selection, training, motivation, job satisfaction, supervision, decision-making.

## INR 1015 World Perspective (3)
An interdisciplinary study of the international system, major world regions and problems.

## INR 2002 Introduction to International Relations (3)
Concepts and analytical tools applied to events such as politics among nations, control of foreign policies, types of actors, war and peace.

## INR 3011 Globalization (3)
Influence of globalization on political-economic and social systems around the world. International organizations involved with globalization processes are studied along with nations benefitting and suffering from the consequences of globalization.

## INR 3018 World Ideologies (3)
A course which details and examines the ideologies of today's independent countries; analyzing them in their political, social, cultural and historical context.

## INR 3033 International Political Cultures (3)
This course will explore ways in which culture influences the nature of government, economic success or failure, and constructive and destructive modes of self and social identification.

## INR 3038 International Wealth and Power (3)
Introduction to the relationship between politics and economics, emphasizing the analysis of government policies in response to both domestic and international economic problems.

## INR 3045 Global Migration (3)
Analysis of the complex subject of human migration in its political and psychosocial aspects, including U.S. and international immigration, undocumented migration, refugees/asylum seekers, and impacts on policy/security.

## INR 3084 International Terrorism (3)
A study of contemporary international terrorism and its causes, ranging from national liberation movements to networks of philosophical anarchists.

## INR 3102 American Foreign Policy (3)
Analysis of the development and scope of United States foreign policy, emphasizing goals and objectives, policy formulation and implementation, themes and issues.

## INR 3141 Global Security Policy (3)
A study of security issues, regional and global (such as proliferation, arms control, arms transfer) as they relate to contemporary international politics.

## INR 3202 International Human Rights (3)
This course explores the evolution of international human rights from the Greeks to the present. It examines human rights issues in major regions of the world.

## INR 3336 Intelligence and U.S. Foreign Policy (3)
An examination of the role of intelligence and the intelligence community in U.S. foreign policy, with emphasis on the period since World War II.
COURSE DESCRIPTIONS
(AS OF SEPTEMBER 20, 2021)

INR 3955 Overseas Study (6)
A program of individual or group research in a foreign country.

INR 4035 International Political Economy (3)
Analysis of the development and politics of the international economic system, focusing on questions of cooperation and conflict in trade, aid, and investment relationships.

INR 4070 Understanding Extremism in the 21st Century (3)
The course lays the foundations for understanding and explaining extremism, how extremist movements form and recruit, and how they carry out their activities.

INR 4083 Conflict in the World (3)
An interdisciplinary course examining theories of conflict, conflict resolution processes and strategies, theories and peacemaking strategies, and the concept of Early Warning Systems related to the outburst of conflict.

INR 4254 Africa in World Affairs (3)
An examination of Africa’s place and role in world affairs, including an analysis of the impact of external forces, international relations in post-colonial Africa, the relations of African states with the major world powers, the U.N. and its agencies.

INR 4403 International Law (3)
Examines essential components of the international legal system; recognition; succession; sea, air and space law, treaties, diplomats, International Court of Justice; laws of war, etc. Introduces the student to legal reasoning as employed in the international context.

INR 4502 International Organizations (3)
Study of the operations and structure of international organizations and effects on world politics; background and achievement of the UN; regional organizations and multi-national corporations.

INR 4900 Directed Readings (3)
A supervised program of intensive reading of interdisciplinary materials in areas of specific interest.

INR 4910 Directed Research (3)
A supervised program of interdisciplinary research in areas of specific interest.

INR 4931 Selected Topics (3)
Interdisciplinary studies with course content dependent on student demand and instructor's interest.

INR 4943 Internship in International Studies (6)
The purpose of the course is to promote the student’s understanding of global international issues within a local and practical context.

INT 3004 Fundamentals of Interpreting (3)
PR: ASL 2140C with a minimum grade of B-, ASL 2150C with a minimum grade of B-, ASL 2160C with a minimum grade of B-, ASL 2220C with a minimum grade of B-, ASL 2300C with a minimum grade of B-
This is a course of intralingual language exercises that introduces students to and provides practice in techniques of rephrasing and restructuring meaning in ASL and English. Students translate texts between English, ASL and English based sign language.

INT 3110 Language and Cognitive Processing Skills in English (1)
PR: ASL 2140C with a minimum grade of B-, ASL 2150C with a minimum grade of B-, ASL 2160C with a minimum grade of B-, ASL 2220C with a minimum grade of B-, ASL 2300C with a minimum grade of B-
Students develop the cognitive processing and language skills within English that are preliminary steps for interpretation. It will develop student’s ability to segment information to perform various cognitive tasks intralingually. For Majors only.

INT 3111 Language and Cognitive Skills in ASL (3)
PR: INT 3205
Students acquire cognitive processing and language development within ASL that are preliminary steps for performing simultaneous interpretation. This course also includes a service component by volunteering in various deaf communities. For majors only.

INT 3112 Translation from English and from ASL (3)
PR: ASL 2140C, ASL 2150C, ASL 2160C, ASL 2220C, ASL 2300C
This is a course of intralingual language exercises that introduces students to and provides practice in techniques of rephrasing and restructuring meaning in ASL and English. Students translate texts between English, ASL and English based sign language.

INT 3205 Interpreting I (3)
PR: INT 3112, ASL 3324, INT 3110
This course reinforces ASL and English skill development and the expressive and receptive skills of beginning interpreting through drill, practice and role play activities and focuses on translation and consecutive interpretation.
INT 3270 Interpreting Process and Skill Development (3)
PR: ASL 2140C, ASL 2150C, ASL 2160C, ASL 2220C, ASL 2300C
Process-oriented approach for applying essential cognitive strategies to interpretation. Strategies include organizing and manipulating visual and spoken images, analyzing messages for meaning, and self-monitoring for message accuracy.

INT 3403 Issues in Educational Interpreting (3)
This course explores the role of the interpreter in the educational setting. Issues related to institutional policies, potential role conflicts, interpreter/faculty collaboration, and support service provision will be emphasized.

INT 3481 Specialized Terminology (3)
PR: INT 3270 - Interpreting Process and Skill Development
ASL 2140C with a minimum grade of B-, ASL 2150C with a minimum grade of B-, ASL 2160C with a minimum grade of B-, ASL 2220C with a minimum grade of B-, ASL 2300C with a minimum grade of B-
ASL 3324 - Advanced ASL Discourse
Students will build on conversational skills from previous ASL courses. The focus will be the settings interpreters work and sign vocabulary related to these specialized settings. Topics include K-12 and Post-secondary Education, Medical, Mental Health.

INT 3945 Interpreting Practicum 1 (3)
PR: INT 3270, INT 3112, INT 3004, ASL 3324
Students will observe professional interpreters working in a variety of settings. They will learn specialized vocabulary, discuss ethical issues, develop rapport with Deaf consumers, and determine language usage in a variety of settings.

INT 4190 Senior Seminar in Interpreter Training (3)
PR: INT 3004
Students expand upon previously learned topics and discuss factors that will affect their profession. Topics include: professional organization, certification, ethics and discuss best practices and will produce a professional portfolio. For majors only.

INT 4206 Interpreting II (3)
PR: INT 3205.
This course provides advanced, in-depth discussion and application of techniques and principles as well as expanded concentration on intermediate expressive and receptive manual communication skills.

INT 4208 Interpreting III (3)
PR: INT 4206.
This course develops advanced competency in interpretation in complex settings. Hands-on practice using advanced interpreting skills, techniques and in-depth exploration of advanced ASL features such as non-manual markers, classifiers, and fingerspelling.

INT 4211 Transliterating (3)
PR: INT 3205
Introduction to the transliterating process and development of expressive transliterating skills through presentation and class participation. Topics include types of consumers who use transliterating and issues that influence the transliteration process.

INT 4235 Advanced Receptive Voicing (3)
PR: INT 3111
Advanced level students will strengthen interpreting skills from a signed message to a voiced English translation. Strategies and techniques include working from ASL to English interpretation, with a focus on fingerspelling and numbering.

INT 4456 Interpreting: Specialized Settings and Populations (3)
Examines settings in which interpreters work (social service and rehabilitation, employment, religious, performing arts, legal, etc.) and the challenges of specific deaf and hard-of-hearing consumers and those with minimal language skills (MLS).

INT 4460 Video Interpreting (3)
Video Remote Interpreting (VRI) and Video Relay Service (VRS) are new settings for sign language interpreters. This course will explore differences between VRI and VRS, ethical considerations related to video interpreting, and required specialized skills.

INT 4490 Introduction to Cued Speech and its Applications (3)
This course covers the fundamentals of the Cued Speech system, including an overview of how it is typically used with children who are deaf. Common applications of cueing and other communication options and relevant research are discussed.

INT 4942 Internship in Deaf Studies (3)
Supervised field experience in a social service agency with children and/or adults who are deaf or hard of hearing or student teaching placement in high school American Sign Language (ASL) classroom. Requires a minimum of 90 hours of field placement.
INT 4947 Interpreting Practicum II (3)
PR: INT 4206, INT 3004
This course provides practice sessions in a variety of settings under supervision of an experienced interpreters and course instructor. Each practicum student will shadow certified interpreters and participate in discussion about the overall experience.

ISM 3011 Information Systems in Organizations (3)
PR: CGS 2100 or equivalent.
An introduction to the language, concepts, structures and processes involved in the management of information systems including fundamentals of computer-based technology and the use of business-based software for support of managerial decisions.

ISM 3113 Systems Analysis and Design (3)
PR: ISM 3011 with a minimum grade of C
CPR: ISM 3232 with a minimum grade of C
The course presents concepts, procedures, and tools needed to build computer-based information systems. The objective is to develop project management, data collection, analysis, design, testing and documentation skills.

ISM 3115 Business Informatics (3)
PR: ISM 3011.
Business informatics is concerned with the use of information technology to solve business problems. The course will present the methods and technical tools required to design systems to support managerial decision making.

ISM 3232 Business Application Development (3)
CPR: ISM 3011 with a grade of "C" or better (not C-).
Presentation of business application development using an object-oriented programming language. Good program design techniques are emphasized. Business applications are developed.

ISM 3431 Operations and Supply Chain Processes (3)
PR: ACG 2071 with a minimum grade of C- or QMB 2100 with a minimum grade of C- or STA 2023 with a minimum grade of C- or STA 2122 with a minimum grade of C-
This course will provide a contemporary overview of operations management with special emphasis on supply chains and services. Both concepts for successful managers and common tools used to build, manage, and improve systems will be covered.

ISM 4041 Global Cyber Ethics (3)
PR: ISM 3011 with a minimum grade of C
This course provides students an in-depth look at the social costs and moral problems that have arisen by the expanded use of the Internet, and offers up-to-date legal and philosophical perspectives on the global scale for the business community.

ISM 4141 Java Programming (3)
PR: ISM 3232 with a minimum grade of B
Utilizes Java to provide hands-on experience in working with object-oriented programming concepts and techniques. Covers a variety of application features including GUIs, database connectivity, client-server computing, and web applications.

ISM 4153 Enterprise Resource Planning Systems (3)
PR: ISM 3011 with a minimum grade of C
An introduction to the use, configuration and implementation of enterprise resource planning systems, and their application to key business processes. This course is restricted to business majors only.

ISM 4212 Database Design and Administration (3)
PR: ISM 3011 with a grade of "C" or better (not C-).
An introduction to the concepts and principles of database management. Provides potential designers, users and managers of database systems with an understanding of physical vs. logical representations, data modeling, implementation, and data management.

ISM 4213 Advanced Database Administration (3)
PR: ISM 3113, ISM 4212, with grades of "C" or better (not C-).
Essential concepts of database administration in a business environment are covered in order to prepare students to understand and deal with database administration issues and concepts. Students gain hands-on experience by administering a database environment and completing assignments that involve resource management, data administration, security, backup, recovery and database tuning issues.

ISM 4220 Business Data Communications (3)
PR: ISM 3011 with a grade of "C" or better (not C-).
Fundamentals of data communication, including network architectures, communication protocols, transmission standards, and internetworking. Basic concepts in distributed computing will also be covered.
ISM 4233 Information System Interface Design (3)
PR: ISM 3232 with a grade of "C" or better (not C-).
An introduction to theories of human-computer interaction and the principles and practices of information system interface design, evaluation, and integration. Students develop programs utilizing various user interface design techniques.

ISM 4234 Object-Oriented Design and Development (3)
PR: ISM 3232 with a grade of "B" or better.
This course presents an object-oriented approach to software development of business information systems. Students will learn to create object models of the business world and to develop information system designs based on these objects.

ISM 4252 Mainframe Technologies (3)
PR: ISM 3232 or equivalent
Mainframe Technologies is an introduction to mainframe and operating environments for business programming and design. Students will apply problem solving using programming in a Mainframe development environment.

ISM 4263 Cloud Solution Architectures (3)
PR: ISM 4220: Business Data Communications
Introduction to Cloud architecture fundamentals, principles and practices and their application in Cloud adoption and implementation. Exposure to latest thinking on Cloud Native Architectures, Cloud technology services, Cloud performance, and Cloud Security.

ISM 4300 Managing Information Resources (3)
PR: ISM 4212 with a minimum grade of C and (ISM 4220 with a minimum grade of C or ISM 4402 with a minimum grade of C)
Current issues in information systems management focusing on managing computer resources and social issues such as ethics, privacy, and legal issues including intellectual property.

ISM 4314 Project Management (3)
PR: ISM 3011 with a minimum grade of C
This course in project management covers the basic principles, processes, and tools of modern project management. Principles and areas of the Project Management Body of Knowledge (PMBOK) are covered utilizing information technology examples.

ISM 4321 Cybersecurity Threat Intelligence (3)
PR: New Course: ISM 4641: Python for Business Analytics
Exploration of cyber intelligence key concepts, tools and terminologies used by professionals in the field. Investigation of practical applications of cyber intelligence tools and models in real-world events.

ISM 4323 Information Security and IT Risk Management (3)
PR: ISM 3011 with a minimum grade of C
Senior standing, all majors. Introduction to information security and IT risk management in organizations. Covers essential IT general controls and frameworks to assess IT risk in a business environment.

ISM 4381 Information Systems for Healthcare Analytics (3)
PR: ISM 3011 with a minimum grade of C
An overview of the application and analytics applied to the various information systems used in today’s health care industry. Students will examine the processes used in the acquisition, application, analysis, and evaluation of Health Information Systems.

ISM 4382 Global Information Systems (3)
PR: ISM 3011 with a grade of "C" or better (not C-).
Role of information technology in global business organizations and challenges in building information systems to enable global operations.

ISM 4402 Business Intelligence (3)
PR: ISM 4212, with a grade of C or better
For undergraduate information systems students, as well as other interested business students. The course covers the rapidly emerging business intelligence and data mining technologies that are likely to play a strategic role in business organizations.

ISM 4432 Software Testing (3)
PR: ISM 3113
The quality assurance of software systems requires rigorous methods for the verification of requirements, design, and implementation. This course surveys the best practices of software testing and explores the latest research ideas.

ISM 4480 Electronic Commerce Systems (3)
PR: ISM 3011 with a grade of "C" or better (not C-)
Familiarize students with the opportunities and challenges associated with e-commerce and its business models, to explore the underlying technologies used in implementing e-commerce systems, and to develop the skills needed to manage effective Web sites.
ISM 4542 Statistical Programming for Business Analytics (3)
PR: QMB 3200 with a minimum grade of C-
This course introduces SAS for statistical programming as a business analytics tool to explore data for managerial purposes such as maintaining or improving day-to-day operations or identifying new opportunities.

ISM 4543 Applied Data Science (3)
PR: ISM 3232 with a minimum grade of C, QMB 3200 with a minimum grade of C-
Applied Data Science is a hands-on course using projects, providing in-depth understanding and application of programming, machine learning, and cognitive computing.

ISM 4545 Big Data Processing with R (3)
PR: STA 2122
This course covers how to process Big Data using an open-source computing platform called R. Fundamental, intermediate and advanced concepts of R are covered. The course also covers some other computing tools that are currently popular, e.g. SAS, Python.

ISM 4547 Excel with Data Modeling for Business Analytics (3)
PR: CGS 2100, ISM 3011, both courses with a minimum grade of C-
This project-based course provides students with an opportunity to explore business analytics using advanced Excel techniques, incorporating SQL.

ISM 4570 Cybersecurity Governance and Planning (3)
PR: ISM 4323: Information Security and IT Risk Management
Investigation of the role of Governance, Risk Management, and Compliance (GRC) in Cybersecurity management process including key functions of cybersecurity policies, management, planning and implementation.

ISM 4571 Cybersecurity Cases (3)
PR: ISM 3011 with a minimum grade of C
A discussion course that uses case studies to enhance the students' judgment in complex situations involving cybersecurity and a substantial individual project to enhance their ability to apply these skills.

ISM 4641 Python for Business Analytics (3)
Introduction to Programming using Python is a hands-on course using projects, providing in-depth understanding and application of programming, machine learning, and data science.

ISM 4905 Independent Study (6)
Independent study as directed by designated faculty.

ISM 4912 Undergraduate Research (3)
In this course, students will conduct a project that enables them, individually or in groups, to pose or work from a defined research question, apply methods of inquiry to generate findings, and share the findings with others.

ISM 4930 Selected Topics in MIS (3)
Selected topics in MIS.

ISM 4940 Business Analytics & Information Systems Internship (3)
The course focuses on professional development skills and an experiential learning experience. The on-site experience averages 10 hrs/week for a total of 120 hours and provides industry experience and the ability to apply knowledge of business practices.

ISM 4950 Independent Research (6)
Individual study contract with instructor and department chairperson required. The research project will be mutually determined by the student and instructor.

ISM 4970 Information Systems Honors Thesis (3)
This course is the climax of an undergraduate experience in the College of Business. Thesis development supports critical investigation to develop explanations or solutions to academically interesting business problems or opportunities.

ISS 1101 Knowledge and Society (3)
Course introduces students to issues concerning the relationship between knowledge and society. Among the issues addressed are competing accounts of knowledge and the relationship between knowledge and other forms of human experience and different aspects of social life such as religion, morality, aesthetics, politics, and gender.

ISS 1102 Self and Society (3)
This course considers the history of the intellectual and social underpinnings of individualism. Why do we consider ourselves "selves," independent of social forces which we so readily recognize in others?

ISS 1103 Nature and Culture (3)
This course examines competing ideas and theories concerning the relationship between nature and culture. Among the issues and questions examined are the relationship between nature and our awareness of it; to what extent is nature transformable; should "nature" dictate the shape of social institutions; how does technology affect our society and environment.
ISS 3010 Introduction to the Social Sciences (3)
Integrates the range of social science fields into a global interdisciplinary perspective. Views social institutions and issues from perspectives of changing paradigms.

ISS 3300 Research Methods in Social Sciences (3)
PR: ISS3010 with a minimum grade of C- AND STA2023 or STA2122 (or equivalent statistics course) with a minimum grade of C-
This course introduces students to the methodologies used in social science research. It covers both qualitative and quantitative research design, sampling, measurement, analysis, and critical evaluation of scholarly literature.

ISS 3311 Applied Statistics for the Social Sciences (3)
PR: STA 2023
This course builds on a basic knowledge of descriptive and inferential statistics and demonstrates the application of statistics in the social scientific research. Students test hypotheses using statistical software and interpret statistical output.

ISS 3420 Interdisciplinary Approaches to Disability Studies (3)
This course examines disability as an aspect of human and cultural diversity and explores moral, religious, historical, cultural, social, medical, artistic, and legal perspectives on minds and bodies that do not conform to normative expectations.

ISS 3930 Selected Topics in the Social Sciences (3)
Interdisciplinary studies of varying topics, with course content dependent on student demand and instructor's interest.

ISS 3931 Selected Topics in the Social Sciences (3)
PR: ISS 3300
Interdisciplinary studies of varying topics, with course content dependent on student demand and instructor's interest. The course builds on the knowledge attained from the Research Methods in Social Sciences course.

ISS 3937 Interdisciplinary Inquiry (3)
PR: ISS 3300
An in-depth interdisciplinary analysis of students ISS concentration areas combined with a 100 hour internship experience. Students will integrate social scientific research and insights in the completion of an internship project.

ISS 4308 Interdisciplinary Community Research (3)
Students will collaborate with faculty and community stakeholders to design and carry out research that addresses issues of global concern at the local level.

ISS 4900 Directed Readings (3)
A supervised program of intensive reading of interdisciplinary materials in areas of specific interest.

ISS 4910 Directed Research (3)
A supervised program of interdisciplinary research in areas of specific interest.

ISS 4935 Seminar in the Social Sciences (3)
PR: ISS 3010
The seminar which caps the interdisciplinary social sciences major wedges personal curiosity with the application of theoretical models to research on salient social issues.

ISS 4939 Senior Capstone Seminar in ISS (3)
PR: ISS 3937
This course facilitates the completion of an interdisciplinary capstone project that showcases the skills students have acquired throughout their course of study in the major. A selected topic is used to illustrate the interdisciplinary research process.

ISS 4940 Internship in Interdisciplinary Social Sciences (4)
Individual guidance in a selected internship.

ISS 4942 Practicing Sustainability (4)
This course is a combination of lecture and internship activities focused on putting your sustainability knowledge into practice. It is the capstone course of Sustainability Studies.

ITA 1120 Beginning Italian I (4)
The first course in the study of elementary Italian. Emphasis is on the development of basic skills in comprehension, speaking, and reading.

ITA 1121 Beginning Italian II (4)
The second course in the study of elementary Italian. Emphasis is on the development of basic skills in comprehension, speaking and reading.

ITA 2200 Italian III (3)
PR: ITA 1121 or equivalent.
Readings in Italian on the elementary level. A review of the basic structure of spoken and written Italian.

<td>Multimedia Reporting (3)</td>
<td>The course prepares students for a digital media environment. Students learn to write, report, as well as produce audio, video, photos, and digital content for news stories. Students produce multimedia news stories for the web.</td>
</tr>
<tr>
<td>JOU 3424</td>
<td>Reporting Practicum (1)</td>
<td>Practical experience outside the classroom where the student works for academic credit under the supervision of a professional practitioner. Periodic written and oral reports to the faculty member coordinating the study.</td>
</tr>
</tbody>
</table>
JOU 4181 Public Affairs Reporting (3)
PR: JOU 3101 or RTV 3301 (RTV majors only), POS 2041 and POS 2112 or POS 3142
Covering city council meetings, courthouse, city hall, courts, society, and other special assignments. Emphasis is on coverage of major governmental units of all levels of government, including examination and interpretation of public documents and records.

JOU 4188 Neighborhood News Bureau (3)
PR: JOU 2100, MMC 2100, MMC 3602
This course provides students with experience and news clips. Classes are conducted as editorial meetings and students report and write about minority and multi-ethnic communities. The course is restricted to majors and is not repeatable for credit.

JOU 4201 News Editing I (3)
PR: ECO 1000, JOU 2100, and SYG 2010.
Evaluating news and its display. Editing and rewriting copy for the mass media including new media, with emphasis on the daily newspaper. News judgment, headlines and makeup. Ethical problems. Introduction to theories of design and graphics.

JOU 4212 Magazine Design and Production (3)
PR: JOU 4201.
Theoretical and practical application of design principles for magazines. Design software. Study of visual design, page architecture, typography, color and illustrations. Integration of design elements in the design of magazine covers. Design elements specific to magazine and production preparation.

JOU 4213 Newspaper and News Publication Design (3)
PR: JOU 4201.
Theoretical and practical applications of newspaper and news publication design, including typography, graphics, graphics software and electronic picture editing. Exercises in design for newspapers and news publications in both print and electronic formats.

JOU 4941 Editing Practicum (1)
PR: JOU 4201.
Practical experience outside the classroom where the student works for academic credit under the supervision of a professional practitioner. Periodic written and oral reports to the faculty member coordinating the study.

JOU 4944 Magazine Practicum (1)
Practical experience outside the classroom where the student works for academic credit under the supervision of a professional practitioner. Periodic written and oral reports to the faculty member coordinating the study.

JOU 4950 Senior Capstone Seminar (3)
Students complete a final professional project, a portfolio, and exit examination. Senior Seminar is the result of the department's development of a plan to set and measure learning outcomes. It is restricted to majors and not repeatable for credit.

JPN 1120 Modern Japanese I (4)
An intensive study of basic skills: pronunciation, listening comprehension, speaking, and some composition.

JPN 1121 Modern Japanese II (4)
PR: JPN 1120 or equivalent.
A continuation of JPN 1120. More sophisticated oral/aural skills are attained. Basic reading skills are acquired.

JPN 2220 Modern Japanese III (4)
PR: JPN 1121 or equivalent.
Continuing study to attain basic proficiency in Japanese.

JPN 2221 Modern Japanese IV (4)
PR: JPN 2220 or equivalent.
Continuation of JPN 2220.

JPN 3400 Japanese V (3)
PR: JPN 2221 with a minimum grade of C
This course is the fifth course in the Japanese language sequence and is designed to integrate all the language skills. It is also intended to develop communication strategies, cultural awareness and connections.

JPN 3401 Japanese VI (3)
PR: JPN 3400 with a minimum grade of C
This course is the sixth course in the Japanese language sequence and designed to guide your Japanese from a low intermediate level to a high intermediate level by integrating all the language skills.

JPN 4020 Japanese Calligraphy (1)
PR: JPN 1120, with a minimum grade of C
This course provides students with the correct order of strokes in kanji writing, the foundation for appreciating calligraphic letters used for commercial purposes as well as subjects of fine arts practiced in Japan today and in the past.

JPN 4905 Directed Study (5)
Permits study options in Japanese not available in regularly scheduled curriculum at departmental discretion.

JPN 4930 Selected Topics (3)
Course permits study options in Japanese not available in the regularly scheduled curriculum at departmental discretion.
**COURSE DESCRIPTIONS**  
(AS OF SEPTEMBER 20, 2021)

---

### JPT 4957 Japan Study Program: Culture, History and Society (3)  
This intensive course is designed to facilitate a successful knowledge base of Japan. This course seeks to nurture students’ multicultural awareness which is needed to successfully navigate in today’s society.

### LAE 4311 Teaching Print and Multimodal Texts in Elementary Education (3)  
PR: LAE 4424.  
The purpose of this course is to understand children’s writing processes and effective instructional strategies for supporting composition.

### LAE 4314 Teaching Writing in the Elementary School, Grades K-6 (3)  
The purpose of this course is for students to understand children’s writing development and to design and implement instructional strategies for teaching composition in an integrated Language Arts curriculum.

### LAE 4323 Methods of Teaching English: Middle School (3)  
Whole language methods of integrating reading, writing, speaking, listening, viewing, and critical thinking activities into a literature-based program for middle school students.

### LAE 4332 Traditional English Grammar for Teachers (3)  
Prepares teachers to teach secondary English with an interactive approach to grammar instruction in which students learn, not only the basic elements of English grammar, but also pertinent and engaging classroom activities for teaching grammar.

### LAE 4335 Methods of Teaching English: High School (3)  
CR: LAE 4464.  
Whole language methods of integrating reading, writing, speaking, listening, viewing, and critical thinking activities into a literature-based program for high school students.

### LAE 4343 Writing across the Curriculum (2)  
Prepares pre-service teachers by developing an understanding of the foundations of writing through the use of Writers workshops and instructional strategies necessary to provide adequate instruction to emergent, novice, and transitional writers.

### LAE 4414 Children’s and Young Adult Literature: Diverse Portrayals of the Human Experience (3)  
Students will examine children’s literature as a literary art form, a visual art form, and a powerful genre that communicates messages about the human experience.

### LAE 4424 Teaching Children’s Literature (3)  
Building on an appreciation for children's literature, this class is for undergraduate teacher candidates to learn how to select quality literature for children and to demonstrate instructional strategies for developing children’s engagement.

### LAE 4464 Adolescent Literature for Middle and Secondary Students (3)  
A study of the types of literature read by adolescents with an emphasis upon the criteria for the choice of good books and knowledge of available books and teaching materials.

### LAE 4469 Teaching World Literature to Middle and Secondary Students (3)  
World literature encompasses more than Western European literature. This course is designed to emphasize, but is not limited to, the study of Eastern literature. This course fulfills the world literature course requirement for teacher certification in English.

### LAE 4530 Methods of Teaching English: Practicum (3)  
This course provides students an opportunity to demonstrate their ability to plan, deliver instruction, and reflect upon the effectiveness of their teaching in secondary school English/Language Arts classrooms. Course is restricted to majors.

### LAE 4936 Senior Seminar in English Education (3)  
Synthesis of teacher candidate’s courses in complete college program.

### LAE 4940 Internship: English Education (9)  
One full semester of internship in a public or private school. In special programs where the intern experience is distributed over two or more semesters, students will be registered for credit which accumulates from 9 to 12 semester hours.

### LAH 2020 Latin American Civilization (3)  
This course introduces the principle historical events, trends, conflicts and outcomes that have shaped the Spanish and Portuguese Americas from the Pre-Columbian period (prior to 1492) to the present.

### LAH 3130 Colonial Latin America (3)  
A study of the Spanish and Portuguese Colonial empires in the New World from 1492-1830.

### LAH 3200 Modern Latin America (3)  
A study of the emergence of the Latin American states. The course will examine developments in Latin America during the nineteenth and twentieth centuries. Special attention is given to the Third World character of the region.
LAH 3430 History of Mexico (3)
Mexican history from pre-Columbian cultures to the twentieth century. Emphasis falls on the colonial political economy, social development, the wars of independence, development of the 19th century Mexican state and the Mexican revolution.

LAH 3630 Modern Brazil (3)
Political, economic and cultural history of Brazil from colonization to the present with emphasis on the twentieth century. Topics include colonization, slavery, independence, nation building, economic development, the Cold War, race, class and gender.

LAH 3743 Spanish America in the Age of Revolution (3)
This course investigates the Age of Revolution in Spain’s American colonies from 1750-1848 that followed a wave of revolutionary activity in Europe and the forced resignation of the Spanish monarch by Napoleon Bonaparte.

LAS 3002 Latin America (3)
Area study courses are multi-disciplinary in nature and deal with one or more countries of a region. Each course combines some measure of political, economic, historical, religious, geographic, anthropological, and sociological analysis in dealing with salient features and current problems.

LAS 3116 Latin America Through Film (3)
This course will use film, video, selected readings, and lectures to teach the interested student about Latin America.

LAS 4023 African Diaspora in Latin American and the Caribbean (3)
The class examines the development and history of the African Diaspora in Latin America and the Caribbean from colonization through the modern era. While primarily a history course, anthropological and sociological perspectives are also incorporated.

LAS 4934 Selected Topics: Latin American Studies (3)
Latin America region will be analyzed through different specific topics to provide students analytical tools to understand hemispheric relations and the relevance of this complex region for the USA. Open to non-majors, repeatable up to 9 credits.

LAS 4940 Internship in Latin American and the Caribbean (9)
Designed to complement other instruction focused on Latin America and the Caribbean. Open to all majors and is repeatable up to 9 hours.

LAT 1120 Beginning Latin I (4)
An introductory course in Latin grammar with appropriate readings.

LAT 1121 Beginning Latin II (4)
PR: LAT 1120 or equivalent. An introductory course in Latin grammar with appropriate readings.

LAT 2220 Intermediate Latin (4)
PR: LAT 1121 or equivalent. Readings in Latin at an intermediate level.

LAT 2221 Intermediate Latin II (4)
PR: LAT 2220.
This class will introduce students to their first Latin author, and to the techniques and skills of intermediate work in Latin. It will also provide a comprehensive review of Latin Grammar. It is not restricted to majors, and not repeatable for credit.

LDR 2010 Leadership Fundamentals (3)
This introductory course includes the study and application of leadership theories, concepts, and skills. Students will analyze their leadership responsibilities for the common good and purposeful change in a global context.

LDR 3003 Introduction to Leadership Studies (3)
This course focus is understanding self and personal leadership. It covers a broad range of leadership topics from understanding self, group behavior, teamwork, organizational design, ethics, and change.

LDR 3115 Contemporary Issues In Leadership (3)
This course offers students interested in the dynamics of contemporary leadership the opportunity to explore relevant leadership trends and examine contemporary leadership theories.

LDR 3216 Leadership and Social Change (3)
This course explores the role of leadership in movements of social change. Grand feats to small initiatives and even failed attempts will be analyzed in order to consider the common practices of those who seek to improve society.

LDR 3261 Leadership in the Great Outdoors (3)
Students will plan and execute a group outdoor expedition. They will explore the dynamics of leadership relevant in an outdoor context using articles, film/documentaries, short fiction, role playing and experiential activities.

LDR 3263 Community Leadership Practicum (3)
PR: LDR 2010 or LDR 3331, with a minimum grade of C-.
This course involves the transference of leadership theories into practice. It provides a practical forum for students to examine and develop personal leadership skills.
LDR 3280 Leadership in the Political Context (3)
This course offers students the dynamics of political leadership, exploring relevant leadership trends and examines leadership theory using articles, film/documentaries, short fiction, experiential activities, and role playing as the learning medium.

LDR 3301 Leadership in Public and Community Service (3)
This course explores the theories, principles, and practice of leadership in the public domain, with a particular focus on their application in furtherance of "the public interest" by government and non-governmental organizations.

LDR 3331 Leading in the Workplace (3)
Explores the complex challenges of leadership through the examination of leaders and workforce situations. Designed to view leadership as a process focusing on the leader, the followers, and real-world workplace situations. Appropriate for working adults.

LDR 3340 Community Leadership and Nonprofit Organizations (3)
This course will teach students how to engage in community leadership by establishing and managing a not-for-profit, charitable corporation.

LDR 3363 Team Dynamics and Leading Diverse Groups (3)
Course is designed to explore the essential role teamwork plays in any leadership endeavor. It picks up from LDR Fundamentals by building upon the concept that leadership is a relational ethical process of people coming together for positive change.

LDR 3365 From Conflict to Consensus Decision Making and Change (3)
This course is designed to learn and apply consensus decision making techniques to avoid becoming paralyzed by indecision and to manage potential conflict and the need for change.

LDR 3371 Language of Leadership: Communicating with Clarity and Impact (3)
The study of leadership communication concepts in multiple contexts to improve the ability to lead others and help to transform an organization through effective leadership dialogue with others.

LDR 3930 Selected Topics in Leadership (3)
Course content will depend upon the interest of the faculty member and student demand. Repeatable up to 15 credits.

LDR 3950 Independent Study in Leadership (6)
This course is designed to encourage students to research areas of interest in leadership studies that relate to their personal goals or an area of interest they desire to know better. Topics of interest will be provided by instructor to maximize success.

LDR 4014 Theories of Leadership (3)
PR: LDR 2010 or LDR 3331, with a minimum grade of C-.
Focuses on historical and modern views of leadership. It is designed to assist students analyzing and understanding the historical, social, political aspects of leadership theories and styles as well as the application of leadership theories in settings.

LDR 4141 Survey of Leadership Readings (3)
Survey of historical and contemporary writings on leadership skills and practices. Examines the contextual manner in which the leader functions.

LDR 4204 Ethics and Power in Leadership (3)
This course addresses the possibility of ethical leadership. Challenges to ethical leadership are explored and responses from leadership and moral theories and from moral psychology are reviewed. Personal moral development is emphasized.

LDR 4230 Global Leadership (3)
A focus on historical and contemporary issues concerning the role, responsibilities and processes for leaders in the global environment. Addresses leadership concerns relating to social, cultural, ethical, political, economical, and environmental issues.

LDR 4564 Images of Leadership in the Media (3)
This course examines the historical development of leadership theory through contemporary times. Surveys literature and other media relevant to role of the leader and to the development and application of leadership skills.

LDR 4951 Leadership Capstone Seminar (3)
PR: LDR 2010
This is the culminating course/experience for the Leadership minor assisting students in the integration of their study of leadership. Students will analyze and synthesize the concept of leadership using cultural, ethical, sociological, political, economic and historical perspectives addressed in prior Leadership courses.

LIN 2002 Language, Culture & Film (3)
This course offers an introductory exposure to an array of major world languages and the corresponding cultural and social contexts, using lectures about and films in the target languages, as well as linguistic and cultural study materials.

</tbody>
</table>
COURSE DESCRIPTIONS
(AS OF SEPTEMBER 20, 2021)

UNIVERSITY OF SOUTH FLORIDA 2021-2022 UNDERGRADUATE CATALOG

LIS 4029 Professional & Technical Comm. for Analysts (3)
Professional and Technical Communication for Analysts introduces students to how they can critically think about risks, threats, and uncertainties, to write and brief effectively and to work productively on individual and group projects.

LIS 4204 Information Behaviors (3)
PR: LIS 3261
Theories and issues surrounding various information behaviors, such as information needs, seeking, and use, and understanding the practices of information professionals and design of information systems. Majors only or permission of instructor.

LIS 4273 Advanced Statistics and Analytics (3)
PR: STA 2023 or STA 2122
Building on elementary statistics, this course focuses on the assumptions, mechanisms, and data science applications for advanced statistical topics, such as logistic regression, maximum likelihood, bootstrapping, nonparametrics, & Bayesian methods.

LIS 4317 Introduction to Visual Analytics (3)
PR: LIS 4800 with minimum grade of C-, LIS 4273 with minimum grade of C-
This course introduces the science of analytical reasoning facilitated by combining statistical analysis with visualizations methods and techniques to promote effective understanding, reasoning and decision-making involving data.

LIS 4365 Web Design Technologies (3)
PR: LIS 3361
Exploration of advanced applications of key Web Technologies. Majors only or permission of instructor.

LIS 4370 R Programming for Data Science (3)
PR: LIS 4800, LIS 4273
This course teaches the use of R, a programming language and software environment for statistical computing and graphics, in applied Data Science. According to InfoWorld, R is the preferred statistical application among data scientists.

LIS 4380 Information and Social Media (3)
Focusing on social media immersion this course explores the roles of people, information, technology and social structures to discover new ways information can contribute to personal goals, an organization's success, and societal inclusion in general.

LIS 4414 Information Policy and Ethics (3)
Examines issues related to information and cybersecurity technology development and use in a global society. Topics include governmental regulations, policy and ethical perspectives related to information literacy, access, security and the digital divide.

LIS 4477 Clinical Decision Support (3)
This course examines how to take advantage of the ever increasing amounts of data available to healthcare professionals and utilize systems for knowledge discovery and clinical decision support.

LIS 4482 Networks and Communication (3)
PR: LIS 3353.
This course is designed to provide a solid foundation in data communication and networking. Topics include local area networks (LANs), wide area networks (WANs), protocols used to implement networks & management issues of IT professionals. Majors or PI.

LIS 4671 Introduction to Intelligence Studies (3)
This course will introduce the students to the field of intelligence studies and to the U.S. intelligence community and its processes and practices.

LIS 4672 Critical Thinking & Methods for Intel Analysis (3)
This course will introduce students to critical thinking and sensemaking as it applies to intelligence analysis, providing connections between the study of intelligence analysis and human judgment and decision-making.

LIS 4673 Open Source Intelligence (OSINT) (3)
This course introduces students to the collection and integration of publicly available information and its uses in addressing specific information or intelligence requirements.

LIS 4761 Introduction to Data & Text Mining (3)
PR: LIS 4800, LIS 4273
Introduction to the Data Mining provides an in-depth study of what data mining is, how it is used, and how it has evolved, including different data types and applications of new technologies.

LIS 4762 Geographic Information Systems for Data Science (3)
PR: LIS 4800
This course introduces the basic principles and techniques of Geographic Information Systems (GIS) with their applications to Data Science, and provides hands on experience with GIS analysis.

**Course Descriptions**

- **LIT 3101 Literature of the Western World Through the Renaissance (3)**
  A study in English of the great works of Western Literature from its beginnings through the Renaissance, including the Bible, Homer, Sophocles, Plato, Euripides, Virgil, Cicero, Dante, Petrarch, Machiavelli, and Rabelais, among others.

- **LIT 3102 Literature of the Western World Since the Renaissance (3)**
  A study in English of the great works of Western Literature from the Neoclassic to the Modern Period, including such writers as Moliere, Racine, Voltaire, Dostoevsky, Chekhov, Ibsen, Kafka, Gide, Sartre, and Camus, among others.

- **LIT 3103 Great Literature of the World (3)**
  A survey of world literature including samples from the ancient and modern era, Western and Eastern traditions, male and female writers, and various ethnic cultures. Focus on values/ethics, race, ethnicity and gender; thinking and writing skills.

- **LIT 3144 Modern European Novel (3)**
  A study of the Modern European novel in translation as it developed from the nineteenth century to the present, including such writers as Dostoevsky, Flaubert, Kafka, Hesse, Camus, and Solzhenitsyn.

- **LIT 3155 Twentieth-Century Literature (3)**
  Examines major literary works of the 20th Century written in English and explores ways authors have expressed the age, its great issues and conflicts, in order to gain an historical perspective that will help relate the present to the recent past.

- **LIT 3301 Cultural Studies and the Popular Arts (3)**
  A study of American and international cultures as they are represented in the film, fiction, and other cultural artifacts of various ethnic groups and nationalities. Focuses on values/ethics, race, ethnicity and gender; thinking and writing skills.

- **LIT 3353 Literature, Race, and Ethnicity (3)**
  PR: ENC 1101 with a minimum grade of C, ENC 1102 with a minimum grade of C
  This course explores the intersections of race, ethnicity, and diverse literary and other cultural texts. Students interpret how identities are formed in marginalized groups and engage in assignments involving ethics, empathy, and the Tampa Bay community.

- **LIT 3374 The Bible As Literature (3)**
  Major emphasis on literary types, literary personalities of the Old (Fall semester) and New (Spring semester) Testaments, and Biblical archetypes of British and American literary classics. Focuses on values/ethics, race, ethnicity and gender; thinking and writing skills. May be taken twice for credit with different subject matter. May count once toward the major.

- **LIT 3375 Religious and Philosophical Themes (3)**
  Theological and philosophical ideas, allusions, and symbols in the writings of Dostoevsky, Mann, Joyce, Eliot, Camus, Sartre, among others.

- **LIT 3451 Literature and the Occult (3)**
  An introduction to the occult tradition as a major ingredient in English, Continental, American, and Multicultural literature. Focuses on values/ethics, race/ethnicity and gender; thinking and writing skills.

- **LIT 3513 Literature, Gender, and Sexuality (3)**
  PR: ENC 1102 with a grade of C- or better.
  Surveys literature from the perspective of gender & sexuality; studying a variety of genres/forms, familiar as well as lesser-known figures; analyze texts aesthetically & rhetorically within various historical, cultural, & theoretical contexts.

- **LIT 3621 Literature of Climate Change: Climate Fiction (3)**
  A study of literature about climate change in the new genre of Climate Fiction, including works by Margaret Atwood, T.C. Boyle, Kim Stanley Robinson and the like.

- **LIT 3930 Special Topics in English Studies (3)**
  The study of variable specialized areas of literary interest, suitable for junior and senior English majors. Topics will vary according to student interest and instructor expertise. May be taken twice for credit with different topics.

- **LIT 4233 Postcolonial Literature (3)**
  This course is a critical introduction to Postcolonial Literature. We will strive to understand the colonial encounter as it has shaped and continues to shape global modernity and some of the new literature in its cultural and historical contexts.

No credit for math majors. Differentiation and integration of algebraic, trigonometric, exponential, and logarithmic functions with applications to life sciences.</td>
</tr>
</tbody>
</table>
MAC 2242 Life Sciences Calculus II (3)
PR: C (2.0) or better in MAC 2241.
Techniques of integration, differential equations, functions of several variables, series and Taylor polynomials.

MAC 2281 Engineering Calculus I (4)
PR: C (2.0) or better in MAC 1114 and C (2.0) or better in MAC 1140 , or C (2.0) or better in MAC 1147, or 670 or better SAT Math score, or 29 or better ACT Math score, or 90 or better College-Level Math CPT score
Differentiation, limits, differentials, extremes, indefinite integral. No credit for mathematics majors.

MAC 2282 Engineering Calculus II (4)
PR: C (2.0) or better in MAC 2281.
Definite integral, trigonometric functions, log, exponential, series, applications.

MAC 2283 Engineering Calculus III (4)
PR: C (2.0) or better in MAC 2282
Techniques of integration, numerical methods, analytic geometry, polar coordinates, Vector algebra, applications.

MAC 2311 Calculus I (4)
PR: C (2.0) or better in MAC 1114 and C (2.0) or better in MAC 1140, or C (2.0) or better in MAC 1147, or 670 or better SAT Math score, or 29 or better ACT Math score, or 90 or better College-Level Math CPT score
Differentiation, limits, differentials, extremes, indefinite integral.

MAC 2312 Calculus II (4)
PR: C (2.0) or better in MAC 2311
Antiderivatives, the definite integral, applications, series, log, exponential and trig functions.

MAC 2313 Calculus III (4)
PR: C (2.0) or better in MAC 2312
Integration, polar coordinates, conic sections, vectors, indeterminate forms and proper integrals.

MAD 2104 Discrete Mathematics (3)
This course covers set theory, logic, proofs, counting techniques, and graph theory.

MAD 3107 Discrete Mathematics (3)
PR: MAC 2281 or MAC 2311.
An introduction to some of the aspects of discrete mathematics that are fundamental to digital computing. Topics include sets, numbers, algorithms, Boolean algebra, computer arithmetic, elementary combinatorics and an introduction to graph theory.

MAD 4203 Introduction to Combinatorics (3)
PR: MGF 3301
Fundamental principles of counting. Topics include bijective proofs, arrangements and permutations, sets and multisets, the Principle of Inclusion-Exclusion, partitions, generating functions, recurrence relations, and the Polya theory of counting.

MAD 4301 Introduction to Graph Theory (3)
PR: MGF 3301
Fundamental principles of Graph Theory, including isomorphism, trees and connectivity, Eulerian circuitry, Hamiltonicity, matching theory, planarity, graph colorings, Ramsey theory, and graph algorithms.

MAD 4401 Numerical Analysis I (3)
PR: MAP 2302 and MAS 3105.
Numerical solution of algebraic and transcendental equations, interpolation and polynomial approximation, numerical differentiation and integration, numerical solution of differential equations.

MAD 4402 Numerical Analysis II (3)
PR: MAD 4401.

MAD 4471 Introduction to Cryptography and Coding Theory (3)
PR: MAS 3105 and MGF 3301
Cryptography combines the studies of cryptography, the creating of masked messages, and cryptanalysis, the unraveling of masked messages. Coding theory is the study of coding schemes used to detect and correct errors that occur during the data transmission.

MAD 4504 Theory of Computation (3)
PR: MGF 3301 or MAD 3107

<tr>
<td>MAD 4515</td>
<td>Mathematics of Quantum Computing (3)</td>
<td>PR: MAS 3105 or EGN 4450. This course introduces the concept of quantum algorithms, and the tools to measure their performances. Special attention will be given to the description and the analysis of Shor's algorithm for factoring large integers and Grover's algorithm for searching an unsorted database. A goal of the course is to provide students with the necessary background for understanding quantum algorithms when formalized in the gate model. This involves being able to decompose the action of a unitary matrix on an input quantum state into a sequence of actions of elementary unitary matrices (the elementary gates). This course provides such a description of two of the most famous quantum algorithms, namely Shor's factoring algorithm, and Grover's search algorithm. In this course, the students also study Kuperberg's algorithm for searching subgroups of the dihedral group and its concrete applications.</td>
</tr>
<tr>

</table>
MAE 4936 Senior Seminar in Mathematics Education (3)
CR: MAE 4940
Synthesis of teacher candidate's courses in complete college program.

MAE 4940 Internship: Mathematics Education (9)
CR: MAE 4936
One full semester of internship in a public or private school. In special programs where the intern experience is distributed over two or more semesters, students will be registered for credit which accumulates from 9 to 12 semester hours.

MAE 4941 Internship I: Middle School Mathematics Education (2)
Candidates will spend each day of the semester in an assigned school implementing acquired knowledge from Practicum I and II, with increased responsibility for planning instruction and assessing student learning, and will attend internship seminars.

MAE 4942 Internship II: Middle School Mathematics Education (6)
Internship II is a continuation of Internship I. Candidates will spend each day of the semester co-teaching in the same school, with responsibility for planning instruction and assessing impact on student learning, and will attend internship seminars.

MAE 4945 Practicum in Mathematics Education (3)
PR: MAE 4320 and MAE 4652.
This course provides students an opportunity to demonstrate their ability to plan, deliver instruction, and reflect upon the effectiveness of their teaching in secondary school mathematics classrooms. Course is restricted to majors.

MAN 3025 Principles of Management (3)
Examines intrapersonal, interpersonal, group/team, organizational, and environmental (both stakeholder and societal) factors influencing the management task.

MAN 3093 Healthcare Management (3)
This class is designed to prepare the student for a management role within the healthcare industry and will focus upon the fundamental building blocks necessary to manage a firm that provides high quality healthcare delivery.

MAN 3240 Organizational Behavior Analysis (3)
PR: MAN 3025 with a minimum grade of C
The course covers research literature relevant to organizational functioning including behavioral effects of power and authority, formal organization, structural variation, leadership, motivation, and communication.

MAN 3301 Human Resource Management (3)
PR: MAN 3025 with a minimum grade of C
To develop a broad exposure to new approaches, techniques, and future trends in the management of personnel. A study of the major functions in personnel including job analysis, manpower planning, selection, performance evaluation, training, and wage and salary administration.

MAN 4063 Management Ethics (3)
PR: MAN 3025.
Examines moral and ethical responsibilities of managing organizations at the personal, interpersonal, and organizational level.

MAN 4280 Organizational Development and Change (3)
PR: MAN 3240
A lab course where students experimentally apply behavioral science techniques in an "action-research" framework to the cycle of planned change so as to build a more effective organization.

MAN 4282 Organizational Assessment (3)
PR: MAN 3240
The analysis and measurement of factors which influence organizational effectiveness and the quality of work life. Data based cases will be used by students to assess managerial and supervisory skills and to measure organizational functioning and work design.

MAN 4329 People Analytics (3)
PR: MAN 3025 with a minimum grade of C
This course provides an overview of people analytics in today's organizations. It looks at how data is being increasingly utilized to drive data-based and evidence-based based decision making into intra-organizational decision-making.

MAN 4402 Employment Laws (3)
PR: MAN 3025 with a minimum grade of C
This course covers Federal and state laws and regulations such as wage and hour laws; EEO; affirmative action programs; employee benefits; insurance; workers' compensation, safety, health, employee's personal rights and collective bargaining.

MAN 4430 Seminar in Negotiations and Administration of Labor Agreements (3)
PR: MAN 3025 with a minimum grade of C
Case studies in contract negotiation, administration, grievance settlement, and arbitration. Assumes familiarity with industrial relations system.
MAN 4441 Negotiation and Conflict Resolution (3)
PR: MAN 3025 with a minimum grade of C and MAN 3240 with a minimum grade of C
Examines what conflict is, how it occurs, and how it can be managed through negotiation, particularly in the workplace.

MAN 4504 Operations and Supply Chain Management (3)
PR: QMB 2100 with a minimum grade of C- or STA 2023 with a minimum grade of C- or STA 2122 with a minimum grade of C-
This course provides an introduction to the integration of operations and supply chain management that enables organizations to compete successfully in the global marketplace.

MAN 4505 Healthcare Operations Management (3)
PR: QMB 2100, with a grade of C or better
This course provides an overview of methodologies and approaches used in the healthcare operations, including performance improvement tools, project management and scheduling.

MAN 4600 International Management (3)
PR: MAN 3025 with a minimum grade of C
Examines the effects of international cultural differences on business practices within and outside the United States and provides methods to build synergies and establish/enhance competitive advantage via those differences.

MAN 4631 Global Perspectives and Management Choices (3)
PR: FIN 3403, MAN 3025, MAR 3023. Two upper-level international courses.
Capstone course for IB major. Integrates business core, international business, concentration, area studies & required overseas experience information. Synthesizes theoretical and practical aspects of doing business in an increasingly global environment.

MAN 4702 Disaster Recovery and Business Continuity Planning (3)
When organizations are interrupted by disasters, accidents, or natural events, a loss of money, data, and/or productivity occurs. The extent to which the loss affects the organization’s health depends on its ability to deal with these disruptions.

MAN 4737 Integrated Management Applications (3)
PR: MAN 3240, MAN 3301, MAN 4282
This capstone course integrates the major topics of management. Students will acquire a broad view of organizations, learning to analyze organizational strengths and weaknesses, and to recommend appropriate actions for improvement.

MAN 4743 Response of Business to Global Environmental Problems (3)
PR: MAN 3025 with a minimum grade of C
CPR: MAN 3240 with a minimum grade of C
Focuses on managing the effectiveness of multi-national corporations and other global organizations operating in the Anthropocene—an era of unprecedented human impact on the rest of the natural environment. Relevant to macro and micro policy issues.

MAN 4802 Entrepreneurship and Small Business Management (3)
PR: ACG 2021, ACG 2071, MAR 3023
Study of the factors involved in starting and managing a small- to medium-sized business. Emphasis on conduct of pre-business feasibility study, start-up of business, successful management of the firm, and options for succession or termination.

MAN 4804 Small Business Management Counseling (3)
PR: MAN 4802
Field application in small business settings by (a) analyzing an on-going small business and developing recommendations for making improvements; or (b) conducting a feasibility study for a new enterprise and developing a strategy for implementation if favorable.

MAN 4905 Independent Study (3)
Specialized independent study determined by the students needs and interests.

MAN 4912 Undergraduate Research (3)
In this course, students will conduct a project that enables them, individually or in groups, to pose or work from a defined research question, apply methods of inquiry to generate findings, and share the findings with others.

MAN 4930 Selected Topics in Management (3)
Topics to be selected by instructor and department chairperson for pertinent Management issues.

MAN 4931 Independent Research (4)
Individual study contract with instructor and department chairperson required. The research project will be mutually determined by the student and instructor.

MAN 4940 Management Internship (3)
This course consists of two components: an academic component focused on professional development skills and an on-site experiential learning experience comprised of at least 120 hours of on-site experience.
MAN 4970 Management Honors Thesis (3)
This course is the climax of an undergraduate experience in the College of Business. Thesis development supports critical investigation to develop explanations or solutions to academically interesting business problems or opportunities.

MAP 2302 Differential Equations (3)
PR: MAC 2283 or MAC 2313.
First order linear and nonlinear differential equations, higher order linear equations, applications.

MAP 4103 Mathematical Modeling (3)
PR: MAP 2302 with a minimum grade of C, MAS 3105 with a minimum grade of C, STA 4442 with a minimum grade of C or STA 4102 with a minimum grade of C.
Mathematical models are formulated for problems arising in various areas where mathematics is applied. Techniques are developed for analyzing the problem and testing validity of proposed model in the context of the specific field.

MAP 4202 Optimization (3)
PR: MAP 2303 and MAS 3105.
Linear and nonlinear programming, the simplex method, duality and sensitivity, constrained and unconstrained optimization.

MAP 4341 Introduction to Partial Differential Equations (3)
PR: MAP 2302 and MAS 3105
Heat, Laplace, and Wave Equations; Initial and Boundary Value Problems; Separation of Variables; Fourier Series; Sturm-Liouville Problems

MAR 2931 Selected Topics in Marketing (3)
Topics to be selected by department chairman.

MAR 3023 Basic Marketing (3)
Survey of the marketing of goods and services within the economy. Attention is paid to the impact of marketing on other functional areas of business as well as society.

MAR 3400 Professional Selling (3)
A study of the stages of the professional selling process, and the role of sales in today’s marketing environment. Emphasis on learning adaptive selling techniques and developing effective interpersonal communications skills. Sales careers are examined.

MAR 3613 Marketing Research (3)
PR: MAR 3023 with a minimum grade of C and (QMB 2100 with a minimum grade of C or STA 2023 with a minimum grade of C).
A study of research methods and techniques applicable to problem solving in marketing. Attention is also given to defining information needs, determining the value of information, interpreting and reporting information for use in marketing decision making.

MAR 3700 Digital Marketing (3)
PR: MAR 3023 with a minimum grade of C.
The course is designed to familiarize students with digital marketing concepts and applications. It provides a detailed understanding of relevant digital channels and platforms, in regard to both paid, earned and owned digital media.

MAR 3823 Marketing Management (3)
PR: MAR 3023.
An applications oriented study of the marketing function at an intermediate level. Emphasis upon techniques for analysis and problem-solving. Builds upon the principles and concepts learned in MAR 3023, and provides a strong foundation for the remaining courses in the marketing curriculum.

MAR 4156 International Marketing (3)
PR: MAR 3023.
A study of procedures and problems associated with establishing marketing operations in foreign countries. Includes the institutions, principles and methods involved in the solution of these business problems as well as the effects of national differences on business practices and buyer behavior.

MAR 4213 Logistics and Physical Distribution Management (3)
PR: MAR 3023.
A study of logistics in the marketing of goods and services. Includes a description and analysis of the logistics environment as well as components of the physical distribution system with emphasis on information flows and the application of quantitative techniques used in establishing and controlling customer service levels.

MAR 4231 Retailing Management (3)
PR: MAR 3023
A comprehensive study of the retailing structure, institutions, and environment. Includes pertinent management theories and practices in analyzing, organizing, planning and controlling retail operations, both large and small.
COURSE DESCRIPTIONS
(AS OF SEPTEMBER 20, 2021)

UNIVERSITY OF SOUTH FLORIDA 2021-2022 UNDERGRADUATE CATALOG

MAR 4333 Marketing Communications Management (3)
PR: MAR 3023
A study of the role of promotion in the marketing program of the firm, including the promotional tools available to the marketing manager and the various types of decisions made in the promotional area. Decision making process in development of a promotional program is emphasized.

MAR 4403 Sales Management (3)
PR: MAR 3023
A study of sales management and strategy as a subset of marketing management. Emphasis is placed on developing the problem-solving and decision-making skills required of the sales manager in the modern market-oriented company.

MAR 4415 Advanced Professional Selling (3)
PR: MAR 3400 with a minimum grade of C-
Advanced study of the professional selling process, including team selling, negotiating, customer conflict management, and CRM systems.

MAR 4431 Financial Services Marketing (3)
PR: MAR 3023 with a minimum grade of C-
This course is designed to introduce students to financial services marketing in a global environment. It examines the interdependence of product, price, distribution and promotion in a financial services context.

MAR 4503 Buyer Behavior (3)
PR: MAR 3023
A study of the basic concepts of buyer behavior, including pre- and post-purchase attitudes and behavior patterns, information processing relating to the functional areas of marketing and the buyer's decision-making process. Managerial applications to marketing are emphasized.

MAR 4712 Healthcare Marketing (3)
A foundational knowledge of the principles of marketing and their application in healthcare administration including the concepts of marketing strategy, customer/patient orientation, products and services, promotion, distribution and pricing issues.

MAR 4824 Marketing Management Problems (3)
PR: MAR 3613 with a minimum grade of C-, MAR 3823 with a minimum grade of C-
The integration of marketing knowledge applied to decision roles in managing the total marketing effort of firms, and coordination with other major functional areas on specific problems. Restricted to Marketing majors.

MAR 4841 Services Marketing (3)
PR: MAR 3023 with a minimum grade of C-
The course focuses on challenges of designing, promoting, and managing services while delivering quality service to customers across industry sectors.

MAR 4903 Independent Research (3)
Individual study contract with instructor and department chairperson required. The research project will be mutually determined by the student and instructor.

MAR 4905 Independent Study (3)
Specialized independent study determined by the students' needs and interests.

MAR 4912 Undergraduate Research (3)
In this course, students will conduct a project that enables them, individually or in groups, to pose or work from a defined research question, apply methods of inquiry to generate findings, and share the findings with others.

MAR 4933 Selected Topics in Marketing (3)
Topics to be selected by instructor and department chairperson.

MAR 4940 Marketing Internship/Practicum (3)
The course consists of two components: an academic component focused on professional development skills and an on-site experiential learning experience comprised of at least 120 hours of on-site experience.

MAR 4941 Student Consulting (3)
The Student Consulting course is designed to provide student teams (Consultants) with the opportunity to apply their learning, experience and skills to a company's or organization's (Client) real-world, business challenge or opportunity. Throughout the course, students will deepen their understanding of business, and develop and practice consulting, teamwork and communication skills. This course is built around the principles of "high impact" and "experiential" learning.

MAR 4970 Marketing Honors Thesis (3)
This course is the climax of an undergraduate experience in the College of Business. Thesis development supports critical investigation to develop explanations or solutions to academically interesting business problems or opportunities.

MAS 3105 Linear Algebra (3)
CPR: MGF 3301 and either MAC 2283 or MAC 2313.
Linear systems, matrix algebra, vector spaces, linear independence, inner product spaces, Gram-Schmidt algorithm, linear transformations and matrix representations, determinants, eigenvalues, diagonalization, quadratic forms.

<td></td>
</tr>
</tbody>
</table>
MCB 3020L General Microbiology Laboratory (1)
CR: MCB 3020
The laboratory involves preparation of culture media, staining, pure culture methodology, isolation of microbes from nature, enumeration techniques, resistance to infectious disease.

MCB 3410 Cell Metabolism (3)
PR: BSC 2010 with a minimum grade of C- or Biology with a minimum score of 4, BSC 2010L with a minimum grade of C- or Biology with a minimum score of 4, CHM 2046 with a minimum grade of C-
This course will provide a broad framework and overview of major metabolic pathways that occur in living cells with emphasis on integration and regulation of those pathways. For majors and non-majors.

MCB 4115 Determinative Bacteriology (3)
PR: MCB 3020, MCB 3020L
Survey of bacterial classification; detailed examinations of bacteria important to man in agriculture, in industry and as pathogens.

MCB 4115L Determinative Bacteriology Laboratory (2)
CR: MCB 4115
Laboratory associated with Determinative Bacteriology.

MCB 4202 Ecology of Infectious Diseases (3)
PR: MCB 3020 or PCB 3023
The ecology of pathogenic microorganisms. Topics include host-parasite interactions, microbial survival strategies, microbial virulence, and environmental influences on the maintenance and spread of disease.

MCB 4223 Food Microbiology (3)
PR: MCB 3020 and MCB 3020L
Food Microbiology is a comprehensive course designed for students interested in microbiology. This course provides an introductory knowledge of food composition and food processing methods essential in the control of microbial growth and food contamination.

MCB 4277 Insect-Borne Diseases and Global Health (3)
PR: BSC 2010 and BSC 2011
This course examines the biology of medically important insects and the pathogens they transmit to humans. This course also discusses important socio-cultural-political factors in disease-endemic countries that maintain disease.

MCB 4320 Molecular Microbiology (3)
PR: MCB 3020 with a minimum grade of C-, MCB 3020L with a minimum grade of C-, PCB 3023 with a minimum grade of C-
Lecture based course building on principles from gen. microbiology to explore advanced topics in molecular microbiology. Emphasis is on: molecular genetics of bacteria and bacteriophages and genetic regulation of responses to the natural environment.

MCB 4404 Microbial Physiology and Genetics (3)
PR: MCB 3020, CHM 2210, PHY 2053
Physiological, metabolic, and genetic phenomena pertinent to understanding the growth, development, ecology, regulation, and reproduction of microorganisms. Emphasizes the interdependence of physiological and genetic approaches. Lecture only.

MCB 4404L Microbial Physiology and Genetics Laboratory (1)
CR: MCB 4404
Laboratory portion of Microbial Physiology and Genetics relating to biochemical characteristics and metabolic capabilities of bacteria. Laboratory only.

MCB 4503 Virology (3)
PR: MCB 3020, MCB 3020L
The biology of viruses associated with plants, animals, and bacteria will be considered; the nature of viruses, mechanisms of viral pathogenesis, and interactions with host cells.

MCB 4905 Microbiology Undergraduate Research (4)
PR: CHM 2210 & MAC 1105 or higher-level MAC course or STA 2023 and CI. CP: PCB 3023 or PCB 3043 or PCB 3063 or PCB 3714 & CHM 2211.
S/U only. Junior standing and 3.0 GPA required. Individual investigation with faculty supervision. Written contract by Department is necessary prior to registration.

MCB 4933 Selected Topics in Microbiology (3)
This course covers various topics in microbiology. The content varies depending on student demand and instructor interest.

MCB 4934 Seminar in Microbiology (1)
**MET 2010C Weather Studies (4)**
Weather Studies covers the structure, composition, and physical basis of the atmosphere. Topics include atmospheric composition and structure, energy and moisture flows, observations, cloud and precipitation development, circulations and weather systems. This course includes several integrated lab investigations.

**MET 4106C Climate Studies (4)**
Information will be provided on the climate system, the scientific principles that govern climate, its variability and change with implications for society and risk management strategies aimed at countering negative impacts of global climate change. This course includes several integrated lab investigations.

**MGF 1106 Finite Mathematics (3)**
PR: C (2.0) or better in MAT 1033, or 480 or better SAT Math score, or 19 or better ACT Math score, or 72 or better Elementary Algebra CPT score. Concepts and analytical skills in areas of logic, linear equations, linear programming, mathematics of finance, permutations and combinations, probability, and descriptive statistics.

**MGF 1107 Mathematics for Liberal Arts (3)**
PR: C (2.0) or better in MAT 1033, or 480 or better SAT Math score, or 19 or better ACT Math score, or 72 or better Elementary Algebra CPT score. This terminal course is intended to present topics which demonstrate the beauty and utility of mathematics to the general student population. Among the topics which might be included are: Financial Mathematics, Linear and Exponential Growth, Numbers and Number Systems, Elementary Number Theory, Voting Techniques, Graph Theory, and the History of Mathematics.

**MGF 3301 Bridge to Abstract Mathematics (3)**
CPR: MAC 2313 or MAC 2283. Techniques and logic of the construction of proofs. Topics will be selected from propositional logic, set theory, relations and functions, equivalence relations, Boolean algebra, cardinality, and limits.

**MHS 3062 Behavioral Healthcare Services for Older Adults (3)**
This course provides an overview of behavioral health disorders, service sectors, service utilization, and evidence-based service delivery models for older adults with behavioral health issues.

**MHS 3063 Cultural Diversity, Health and Behavioral Health (3)**
This course examines critical issues around cultural diversity, behavioral health, health disparities, promoting social change and culturally competent practice with a focus on race/ethnicity, gender, sexual orientation and identity, class and disability.

**MHS 3204 Fundamentals of Applied Behavior Analysis (3)**
The Fundamentals of Applied Behavior Analysis (ABA) course provides the student with information in the form of lectures, demonstrations, and practical exercises on the basic principles and procedures of the field of ABA.

**MHS 3411 Multidisciplinary Behavioral Healthcare Services (3)**
Working in behavioral healthcare requires the application of specific knowledge and skills. This open enrollment course offers a practical multidisciplinary look at service delivery. Students will examine their career and educational goals in context.

**MHS 3753 Research Methods in Behavioral Healthcare (3)**
This course focuses on research methods through social and behavioral science perspectives. Topics include: ethics, literature reviews, measurement, sampling, quantitative and qualitative designs, data collection, data analysis, and report writing. This course was built to provide students with maximum flexibility and support. The course is fully equipped with tools students need to succeed.

**MHS 4002 Behavioral Health Systems Delivery (3)**
PR: MHS 3411
This course is designed to provide students with an understanding of the significant issues and trends in behavioral health delivery systems in America. Four major areas will be emphasized: 1) history and legislation; 2) systems delivery; 3) programs and policies; 4) selected at-risk populations. This course is not repeatable for credit and is open to non-minors in behavioral healthcare.
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>MHS 4022</td>
<td>Adult Psychopathology in the Community (3)</td>
<td>This course will review the experience of persons with mental illness in public service settings. Justice involvement, co-occurring disorders, funding streams, and evidence based practices will be discussed. Not restricted to majors; not repeatable.</td>
</tr>
<tr>
<td>MHS 4023</td>
<td>Recovery Oriented Mental Health Services (3)</td>
<td>This course describes the principles and practices of services that promote recovery and rehabilitation for individuals with severe mental illnesses, with special focus on integration of mental health consumers into meaningful community roles.</td>
</tr>
<tr>
<td>MHS 4052</td>
<td>Human Relations Skills in Counseling (3)</td>
<td>Introduction to the theory of human relations dynamics and development of skills required for effective interpersonal relations. Lecture sessions and experiential training.</td>
</tr>
<tr>
<td>MHS 4074</td>
<td>Child Development and Trauma (3)</td>
<td>Students will acquire a thorough knowledge of normal development and the impact of trauma from the prenatal period through adolescence, in addition to screening, differential diagnosis and selection of appropriate evidence based trauma treatments.</td>
</tr>
<tr>
<td>MHS 4202</td>
<td>Behavioral Assessment and Intervention Planning (3)</td>
<td>A course on how to identify functions of behavior; collect and analyze data; identify and conduct approaches for functional assessment; identify, select, and implement functional interventions; and identify monitoring procedures and ethical considerations.</td>
</tr>
<tr>
<td>MHS 4203</td>
<td>Practical Skills-Children's Behavioral Healthcare (3)</td>
<td>Students will apply system of care values and principles to children's behavioral health services in the assessment of family needs and strengths, working with teams to achieve goals, and development, implementation and evaluation of support plans.</td>
</tr>
<tr>
<td>MHS 4206</td>
<td>Applied Behavior Analysis in Autism and Development Disabilities (3)</td>
<td>ABA in Autism and Developmental Disabilities covers the history of autism and developmental disabilities, developmental milestones, skills assessment, developing programs, verbal behavior, and programming for generalization and maintenance.</td>
</tr>
<tr>
<td>MHS 4408</td>
<td>Exemplary Practices in Behavioral Healthcare Treatment (3)</td>
<td>This course explores exemplary clinical practices in public behavioral health service delivery. Best or exemplary practices are defined as those that have both a track record and their efficacy has been empirically validated. Modules may begin with a historical perspective of the treatment of a specific population or a treatment strategy but will primarily focus on emerging methodologies.</td>
</tr>
<tr>
<td>MHS 4412</td>
<td>Research Methods and Ethical Issues in Behavior Analysis (3)</td>
<td>PR: MHS 4202. How to identify ethical principles and practices in behavior analysis as well as how to implement various single subject research and group designs; write literature reviews and research proposals; and complete the IRB process.</td>
</tr>
<tr>
<td>MHS 4413</td>
<td>Applied Data Analysis for Behavioral Health Research (3)</td>
<td>PR: STA 2122 and (PSY 3213 or CCJ 3701 or GEY 4401 or SOW 3401) Students will obtain the analytic skills necessary to conduct basic quantitative using SPSS and qualitative analyses using NVivo through a practical and applied introduction to the analysis and interpretation of both forms of data.</td>
</tr>
<tr>
<td>MHS 4425</td>
<td>Field Experience in Behavioral Healthcare (3)</td>
<td>PR: MHS 3411 with a minimum grade of a B-, MHS 4002 or MHS 4490, MHS 4408, MHS 4723 with a minimum grade of C-. This experiential class allows the student to observe and participate with multidisciplinary staff of a provider agency. The student will attend team meetings, observe individual, group, and case management services. Assignments will be made to maximize the student's time investment in the field. Observations and experiences will be discussed in biweekly class meetings. Students are required to spend 120 hours (an average of 8 hours per week for 15 weeks) in an agency. Application approval required two semesters in advance.</td>
</tr>
<tr>
<td>MHS 4434</td>
<td>Behavioral Health and the Family (3)</td>
<td>This course covers ways that illness/injury affect the family of a person who is ill or injured; how family relations/behavioral patterns affect healing and return to good health; and how mental health professionals serve families struggling with an ailing loved one.</td>
</tr>
</tbody>
</table>
MHS 4452 Co-Occurring Disorders (3)
This unrestricted course is designed to introduce the topic of co-occurring disorders, impart their knowledge and understanding, and teach skills needed to apply for and obtain employment in behavioral healthcare. It is not repeatable for credit.

MHS 4453 Applied Psychopharmacology in Drug Abuse and Dependency (3)
This survey course will cover a range of topics pertinent to the observation and recognition of drug use and abuse behavior, focusing on a knowledge base useful in applied (treatment) settings, and public and non-profit drug-policy institutions.

MHS 4454 Alcohol Drugs and Crime (3)
This course will provide an overview of research and clinical techniques related to the assessment, diagnosis and treatment of alcohol/drug use and the intersection with criminal behavior and the criminal justice system.

MHS 4455 Drug Abuse Prevention and Treatment (3)
This course will provide students with an orientation to drug abuse in the U.S., and introduce them to the most commonly used prevention and treatment techniques. The impact of important drug legislation will also be discussed.

MHS 4463 Suicide Issues in Behavioral Health (3)
Students explore the psychological and social factors contributing to suicide-related behaviors. Lectures, group activities, and guest speakers help students better understand the dynamics of suicide and the processes of assessment and interventions.

MHS 4490 Behavioral Healthcare Issues for Children (3)
Students explore children's mental health field & systems of care for children and their families. Lectures, group activities, & guest speakers help examine childrens mental health treatment, service delivery, case management, & wraparound processes.

MHS 4704 Ethics, Supervision, and Management in Applied Behavior Analysis (3)
PR: MHS 4202 with a minimum grade of B-
This course provides the student with an understanding of ethical responsibilities for behavior analysts along with skills for assessing, problem solving, and addressing ethical dilemmas. Students will also learn about evidence-based staff training.

MHS 4723 Professional Seminar in Behavioral Healthcare (3)
PR: MHS 3411, with a minimum grade of B-
This course prepares students for fieldwork and professional development in behavioral health. Students apply professional ethics and explore civic engagement strategies that reduce stigma and promote the community integration of marginalized people.

MHS 4731 Writing for Research and Publication in Behavioral and Community Sciences (3)
This course is a writing intensive exit course that fulfills the Gordon rule requirement. Students will develop a research problem statement, complete a literature review, and learn to prepare manuscripts for publication.

MHS 4906 Directed Study (4)
Directed study. Student must have a contract with an instructor.

MHS 4912 Independent Research in Behavioral Health (4)
PR: 1 course in statistics; 1 course in research methods.
Students will conduct an independent research project in behavioral health (mental health and/or substance abuse) under the guidance of a faculty mentor. May be repeated for maximum of 8 credits.

MHS 4931 Selected Topics (3)
The course content will depend on student demand and instructor's interest. The course may be repeated for different topics up to 9 hours.

MHS 4943 Practicum Seminar in Applied Behavior Analysis (3)
CPR: MHS 4202 and Intervention Planning in ABA.
How to find a quality placement in the community in order to become certified as an Assistant Behavior Analyst, navigate the Behavior Analyst Certification Board process, and receive training on current ABA technologies.

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>MLS 4038</td>
<td>Introduction to Medical Technology (2)</td>
<td></td>
<td>A hospital clinical course on principles and methods of medical technology, including professional ethics, safety regulations, quality control, phlebotomy, medical terminology, labor.</td>
</tr>
<tr>
<td>MLS 4860</td>
<td>Clinical Urinalysis and Body Fluids (2)</td>
<td></td>
<td>A hospital clinical course on laboratory methodology and diagnosis using urine and other fluids such as semen, spinal, pleural, peritoneal, and joint fluids.</td>
</tr>
<tr>
<td>MLS 4861</td>
<td>Clinical Immunology (2)</td>
<td></td>
<td>A hospital clinical course on the tissues, cells, and molecules of the human immune system, emphasizing the detection of serum antibodies and disease states.</td>
</tr>
<tr>
<td>MLS 4862</td>
<td>Clinical Hematology (6)</td>
<td></td>
<td>A hospital clinical course on cellular components of the blood as related to laboratory diagnosis and disease, including blood coagulation and morphological and biochemical aspects of blood cells.</td>
</tr>
<tr>
<td>MLS 4863</td>
<td>Clinical Microbiology (6)</td>
<td></td>
<td>A hospital clinical course emphasizing pathogens responsible for diseases in man, including morphology, physiology, and laboratory diagnosis of bacteria, fungi, parasites, and viruses.</td>
</tr>
<tr>
<td>MLS 4864</td>
<td>Clinical Chemistry (6)</td>
<td></td>
<td>A hospital clinical course on the analysis of chemical substances found in the body as related to the diagnosis of human disease, including topics such as instrumentation, electrophoresis, therapeutic drug-monitoring assays, tumor markers, and toxicology.</td>
</tr>
<tr>
<td>MLS 4865</td>
<td>Clinical Immunohematology (6)</td>
<td></td>
<td>A hospital clinical course on blood and tissue typing, including blood group systems, transfusion associated diseases, HLA testing, and preparation of blood and blood components for transfusion therapy.</td>
</tr>
<tr>
<td>MLS 4866</td>
<td>Clinical Laboratory Management and Education (1)</td>
<td></td>
<td>A hospital clinical course on concepts of laboratory management, including personnel staffing, reimbursements, quality assurance, and regulatory issues, and clinical education techniques, including writing, lecture presentation, and evaluation.</td>
</tr>
<tr>
<td>MMC 2100</td>
<td>Writing for the Mass Media (3)</td>
<td>PR: grade of &quot;C&quot; in ENC 1101, ENC 1102</td>
<td>An introduction to the basic skills of writing for the mass media with practice in library research, persuasive writing, and informational writing.</td>
</tr>
<tr>
<td>MMC 2110</td>
<td>Scientific Writing (3)</td>
<td></td>
<td>This 2000 level course will teach science majors to write clearly for their professional peers.</td>
</tr>
<tr>
<td>MMC 3127C</td>
<td>Radio and Podcasting (3)</td>
<td>PR: MMC 2100 with a minimum grade of C, RTV 3301 with a minimum grade of C or JOU 2100 with a minimum grade of C</td>
<td>The course explores the study and practical application of writing, production, and performance for audio storytelling. Students will create live and pre-recorded news, promotions, and/or episodic content for podcasts and radio shows.</td>
</tr>
<tr>
<td>MMC 3140</td>
<td>Web Publishing (3)</td>
<td>PR: JOU 2100, MMC 2100, MMC 3602, VIC 3001.</td>
<td>Course is intended for those with little previous Web design-publishing experience. Course will introduce students to the basic topics, nomenclature, pragmatics, and mechanics involved in Web publishing. Restricted to majors; not repeatable for credit.</td>
</tr>
<tr>
<td>MMC 3602</td>
<td>Mass Communications and Society (3)</td>
<td></td>
<td>A survey of the history, theory, processes, and philosophy of mass communications and the mass media in the United States, and their relationship to the other major institutions of American society.</td>
</tr>
<tr>
<td>MMC 3734</td>
<td>Social Media as Mass Communication (3)</td>
<td></td>
<td>This is a special topics course that covers topics related to social media used for journalistic and other professional purposes. Journalistic practices in the newsroom and the audience's content expectations will be reviewed as they relate to the use of social media.</td>
</tr>
<tr>
<td>MMC 4031C</td>
<td>Student-Run Communications Agency (3)</td>
<td>PR: ADV 3300 with a minimum grade of C, ADV 3101 with a minimum grade of C, PUR 3000 with a minimum grade of C</td>
<td>The student-run agency provides a High Impact Practice learning environment in which students learn while doing to develop mastery of professional level concepts and skills in the management and creation of effective communications for real-world clients.</td>
</tr>
<tr>
<td>MMC 4111</td>
<td>Entrepreneurial Journalism (3)</td>
<td></td>
<td>This course is set-up in a seminar format will offer and present ways students can become independent entrepreneurs in an ever-evolving media market. Students will have hands-on experience and given an opportunity to network with local business owners.</td>
</tr>
<tr>
<td>MMC 4120</td>
<td>Media Convergence (3)</td>
<td>PR: JOU 2100, MMC 2100, MMC 3602.</td>
<td>Students will learn to write for various media and develop news judgment across platforms. A project will include writing, digital photography and capturing audio for a Web news report. Restricted to majors; not repeatable for credit.</td>
</tr>
</tbody>
</table>
MMC 4131 Video Storytelling (3)
PR: MMC 2100, MMC 3602, VIC 3001.
Students will be introduced to concepts and technologies needed to begin working with video as a medium of communication. Basic principles of video editing are taught with short and long form projects. Restricted to majors; not repeatable for credit.

MMC 4133 Video Storytelling II (3)
PR: MMC 4131, minimum grade of "B" This course will cover advanced video shots, audio, post production editing and industry workflow, the art of storytelling through a lens, on camera interviewing techniques, and tight editing for a "two train" story arc will be emphasized.

MMC 4141 Web Publishing II (3)
PR: MMC 3140, minimum grade of "B"
Web Publishing II is an advanced course in creating web-based content, with a focus on dynamic news and informational websites. Essential database technologies are covered all within the context of building effective publication-based websites.

MMC 4200 History and Principles of Communications Law (3)
PR: MMC 2100 and MMC 3602. Historical and constitutional backgrounds of freedom and control of expression, statutory enactments, major court decisions and administrative rulings which affect print media, telecommunications, advertising, public relations, and new media.

MMC 4203 Communication Ethics (3)
PR: MMC 2100 and MMC 3602
A study of the fundamental principles and philosophies of ethics and their application to the decision-making process in the various professions of mass communications.

MMC 4208 Media Law and Ethics (3)
A study of the fundamental principles and philosophies of law and ethics and their application to various professions of mass communications.

MMC 4420 Research Methods in Mass Communications (3)
PR: MMC 2100 and MMC 3602. An introduction to the theory and practice of quantitative and historical research methods as applicable to the study of media and mass communications. Emphasis on survey research, evaluation of data, and report writing.

MMC 4900 Directed Reading in Mass Communications (3)
Reading and directed study in special topics.

MMC 4910 Individual Research in Mass Communications (3)
The course provides means for a student to do independent study in an area not covered by a numbered course.

MMC 4936 Selected Topics in Mass Communications Studies (3)
PR: MMC 2100, MMC 3602 Courses designed to meet current or specific topics of interest to instructors and students.

MMC 4945 Internship (3)
Students work for an employer within the field of mass communication to practice skills and apply knowledge.

MSL 1001C Leadership and Personal Development (2)
Introduces to personal challenges & competencies critical to effective leadership; teaches personal development life skills relative to leadership, officer, & Army profession; focuses on gaining understanding of ROTC Program & its purpose in Army.

MSL 1002C Introduction to Tactical Leadership (2)
Presents leadership basics (eg: setting direction, problem-solving, listening, briefs, giving feedback & use of effective writing skills); explores dimensions of leadership values, attributes, skills & actions in context of practical hands-on exercises.

MSL 2101C Innovative Team Leadership (2)
Explores creative & innovative tactical leadership strategies & styles. Develops knowledge of leadership values & attributes by understanding Army rank, structure, & duties. Broadens knowledge of land navigation & squad tactics.

MSL 2102C Foundations of Tactical Leadership (2)
Examines challenges of leading tactical teams in complex current operating environment; highlights dimensions of terrain analysis, patrolling & operation orders; develops greater self-awareness, communication & team building skills.

MSL 2900 Army Physical Readiness (1)
This course will train students in the unique role of Army physical readiness in sustaining military operations. It will also prepare students to plan, prepare, and conduct military fitness training. Repeatable for 8 semesters, but only 4 credit hours will be counted toward the program.
MSL 2901 Basic Leader Training (4)
A 35 day internship at Fort Knox, Kentucky that incorporates a wide range of military subjects designed to develop/evaluate leadership and officer potential. The course is intentionally stressful and designed to build individual confidence through the accomplishment of tough and demanding training. Students completing the course may qualify for entry into the ROTC Advanced Course.

MSL 3201C Adaptive Team Leadership (3)
Challenges to study, practice, & evaluate adaptive team leadership skills as demands of the ROTC LDAC are presented. Uses challenging scenarios to develop self-awareness & critical thinking skills. Provides specific feedback on leadership abilities.

MSL 3202C Leadership in Changing Environments (3)
Challenges to study, practice, & evaluate adaptive leadership skills as demands of ROTC Leader Development Assessment Course are presented. Develops self-awareness & critical thinking skills with challenging scenarios. Provides feedback on leader skills.

MSL 4301C Developing Adaptive Leaders (3)
Develops ability to plan, & assess complex operations, functioning as member of a staff; provides performance feedback to subordinates; gives opportunities to assess risk, make ethical decisions, & lead fellow cadets; prepares in becoming Army officer.

MSL 4302C Leadership in a Complex World (3)
Explores dynamics of leadership in complex situations of current military operations in current operating environment; examines differences in courtesies, military law, principles of war & rules of engagement in face of international terror & more.

MTG 3212 Geometry (3)
PR: MAC 2311
Emphasis on axiomatics, advanced Euclidean geometry, elements of projective geometry, non-Euclidean geometry.

MTG 4214 Modern Geometry (3)
CPR: MAS 4301
Topics will be selected from modern plane geometry. Mobius geometry, elliptic and hyperbolic geometry.

MTG 4254 Differential Geometry (3)
PR: MAC 2313 (or MAC 2283), MAP 2302 and MAS 3105
The intrinsic geometry of curves and surfaces will be explored using fundamental concepts and techniques from classical differential geometry.

MTG 4302 Introduction to Topology (3)
PR: MAC 2313 and MAS 3105.

MUC 1211 Freshman Composition and Instrumentation 1 (2)
Introduction to Composition is a skill-building course designed for freshman music composition majors. Students will study techniques to ideate, compose, orchestrate, notate and obtain documented performances of their music. (Majors only--not repeatable).

MUC 1212 Freshman Composition and Instrumentation 2 (2)
PR: MUC 1211.
Introduction to Composition is a skill-building course designed for freshman music composition majors. Students will study techniques to ideate, compose, orchestrate, notate and obtain documented performances of their music. (Majors only--not repeatable).

MUC 2221 Sophomore Composition and Instrumentation 1 (2)
PR: MUC 1212.
Students will complete two large-scale chamber works (continuing to learn to orchestrate for strings and winds), two business-oriented projects, lead a discussion based on the writing of a selected composer, and explore major pieces from the literature.
MUC 2222 Sophomore Composition and Instrumentation 2 (2)
PR: MUC 1212.
Sophomore Composition is a two-semester course which requires each student to complete two pieces per semester, two business-oriented projects, lead a discussion based on the writing of a selected composer, and explore major pieces from the literature.

MUC 2301 Introduction To Electronic Music (3)
History and repertory of electronic music; standard sound studio techniques; basic electronics as applied in electronic sound synthesis; mathematics for music, composition and electronic music.

MUC 3231 Junior Composition and Instrumentation 1 (2)
PR: MUC 2222.
A skill-building course designed for junior music composition majors. Students will compose music, notate and orchestrate it and obtain a performance of 2 large-scale pieces, one for large wind ensemble.

MUC 3232 Junior Composition and Instrumentation 2 (2)
PR: MUC 3231.
A skill-building course designed for junior music composition majors. Students will compose music, notate and orchestrate it and obtain a performance of it. Students will begin writing for large ensembles, e.g. wind ensemble and choir.

MUC 3401 Electronic Music-Analog Synthesis I (3)
PR: MUC 2301
Composition for tape medium with analog synthesizers; use of sound recording studio; repertory or analog music synthesis; technical basis of analog systems design and construction.

MUC 3402 Electronic Music-Analog Synthesis II (3)
PR: MUC 2301
Composition for tape medium with analog synthesizers; use of sound recording studio; repertory or analog music synthesis; technical basis of analog systems design and construction.

MUC 3442 Electronic Music-Digital Synthesis II (3)
PR: MUC 3401 or MUC 3402
Computer assisted composition for conventional instruments; composition for tape medium with computer controlled analog synthesizers; direct digital synthesis; digital systems design and construction.

MUC 4241 Senior Composition and Instrumentation (2)
PR: MUC 3232.
A one-semester course which requires each student to complete two pieces, seven business-oriented projects, lead a discussion based on the writing of a selected composer, and explore major pieces from the literature.

MUC 4403 Electronic Music-Real-Time Performance I (3)
PR: MUC 3402 and MUC 3442 or equivalent.
Composition for analog/digital equipment, performance applications; sound synthesis, interfacing electronics with conventional instruments.

MUC 4404 Electronic Music-Real-Time Performance II (3)
PR: MUC 3402 and MUC 3442 or equivalent.
Composition for analog/digital equipment, performance applications; sound synthesis, interfacing electronics with conventional instruments.

MUC 4620 Jazz Composition (3)
PR: MUT 3354
Private instruction in original jazz composition. Required of All Jazz Studies Comp. majors, minimum six of hours.

MUC 4950 Senior Recital/Project/Portfolio Presentation (2)
PR: MUC 4241.
This is course is a "capstone"-type of experience requiring 8th-semester senior to produce and promote 2 concerts: one of his or her own music (on campus), and one with other seniors to be held off campus. A portfolio/database presentation is also required.

MUE 1111 Keyboard Skills for Music Educators I (2)
This course is designed to help students develop musicianship skills through the use of a music keyboard and to develop skills for using the keyboard in teaching and learning situations.
## MUE 1121 Keyboard Skills for Music Educators II (2)
**PR:** MUE 1111
This course is designed to help students continue development of musicianship skills through the use of a music keyboard and to continue development of skills for using the keyboard in teaching and learning situations.

## MUE 2090 Foundations of Music Education (3)
The course is designed to investigate music education practices in the schools. Through the experience and information offered in this course a student will be able to determine his/her commitment to professional music education.

## MUE 3414 Creative Performance Chamber Ensemble (1)
**PR:** MUE 2090.
**CR:** MUE 3424
This course will provide students opportunities to apply concepts of informal learning, gained through various course work, in a non-traditional, student directed, music education performance setting. The course is repeatable for a total of four credits.

## MUE 3415 Creative Performance Chamber Ensemble II (1)
**PR:** MUE 3414
**CR:** MUE 3425
This course will provide students opportunities to apply concepts of informal learning, gained through various course work, in a non-traditional, student directed, music education performance setting.

## MUE 3421 Choral Techniques (1)
A study of choral materials in a laboratory setting appropriate to elementary and secondary school music programs. Course content will change each semester.

## MUE 3422 Wind Techniques (1)
**PR:** MUG 3104
A two-semester sequence intended to equip music education students with basic performance, pedagogical, and rehearsal techniques, applicable to brass and woodwind instruments and ensembles.

## MUE 3423 String Techniques (1)
A study of orchestra materials, in a laboratory setting, appropriate to elementary and secondary school music programs. Course content will change each semester.

## MUE 3424 Progressive Music Education Methods I (3)
**PR:** MUE 2090
**CR:** MUE 3414
This course will provide students a grounding in methods for music education settings outside the traditional general, band, choir and string programs.

## MUE 3425 Progressive Music Education Methods II (3)
**PR:** MUE 3424.
**CR:** MUE 3415
This course will provide students a further grounding in methods for music education settings outside the traditional general, band, choir and string programs.

## MUE 3475 Percussion Techniques (1)
Introduction to percussion pedagogy for the music educator.

## MUE 3691 Introduction to Technology for Music Educators (3)
This course is designed as an introduction to computer technology and its role in teaching and learning processes. Topics include educational software and applications, ethical and social issues and models for integrating technology into instruction.

## MUE 4311 General Music Methods (3)
**PR:** MUE 2090
This course will consist of theoretical and practical information in teaching General Music PreK-12. It will include approaches and methodologies from the USA and internationally.

## MUE 4331 Choral Methods (3)
Development and implementation of methods techniques for teaching secondary school choral music.

## MUE 4332 Instrumental Methods (3)
**PR:** MUE 2450, MUE 2460, MVP 1211.
Development and implementation of methods techniques for teaching secondary school instrumental music.

## MUE 4480 Marching Band Methods (2)
This course is designed for students who are planning to be high school or college band directors and will be in charge of running a marching band. Students will arranging music, write drill, and cover other important marching band topics.
### MUE 4854C Global Music Pedagogy in Local Context (3)
Explore global musical traditions and their local social contexts. Reflect on Western musical values and global music traditions. Awareness of and respect for competing values. Design pedagogical approaches involving civic engagement and social action.

### MUE 4936 Senior Seminar in Music Education (1)
CR: MUE 4940
Synthesis of teacher candidate’s courses in complete college program. Required concurrently with internship.

### MUE 4940 Internship: Music Education (1)
CR: MUE 4936
One full semester of internship in public or private elementary and secondary schools.

### MUE 4941 Global Awareness Music Education Internship (6)
PR: MUE 3424 and MUE 3425
The Global Awareness Music Education Internship will be a four-week intensive summer experience where music education students are assigned to work with one Musical Futures teacher in a k-12 school setting.

### MUG 3104 Basic Conducting (2)
The study and practical application of basic conducting techniques. Development of skills related to the conducting of musical scores.

### MUG 3108 Advanced Conducting (2)
PR: MUG 3104.
Provides USF music education majors with a competency-based lab experience in conducting while placing an emphasis on developing advanced skills necessary to lead an ensemble in rehearsal and performance. Restricted to Music Education Majors.

### MUG 4302 Instrumental Conducting (2)
PR: MUG 3404
A study of those techniques of conducting unique to instrumental music ensembles: baton technique, score reading, terminology, rehearsal management.

### MUH 2020 The History of Blues and Rock (3)
A study of the history of rock music: its roots, regions and countries of origin, evolution, styles, influences, social/cultural context, etc. Blues and rock are particularly American forms of music, but they reflect ancient practice as well.

### MUH 2051 Folk and Traditional Music of World Cultures (3)
A comparative survey of the stylistic traits and functions of folk and traditional music, both sacred and secular, of diverse Western and non-Western cultures. For non-majors and music education majors; may be taken by applied music majors.

### MUH 3016 Survey of Jazz (3)
This course introduces undergraduate students to Jazz music. Students will study historical, cultural and social issues associated with the evolution of jazz music and learn to hear and discern specific musical traits found in jazz music.

### MUH 3300 Music History/Medieval and Renaissance (2)
Required of music majors; a study of the historical development of musical styles of the Medieval and Renaissance periods and of the music of those periods.

### MUH 3301 Music History/Baroque and Classic (3)
PR: MUL 2111
A study of the historical development of musical styles of the Baroque and Classic periods and of the music of those periods.

### MUH 3302 Music History/Romantic and 20th Century (3)
PR: MUL 2111
A study of the historical development of musical styles of the Romantic and Twentieth Century eras and of the music of those periods.

### MUH 4058 Intercultural Music in the Twentieth Century (3)
PR: MUH 2051 or MUL 2111
An in-depth investigation of composers born after c. 1880, from all parts of the world, who have attempted to integrate elements from two or more cultures into their compositions.

### MUH 4801 History of Jazz (3)
PR: MUT 1112
An in-depth study of the historical development of Jazz, including the representative musical literature and sociological implications.
MUL 2010 Music and Culture (3)
This course is intended to expose students to a variety of music and musical experiences through lecture, discussion, and direct experience involving critical listening. Students will enhance their awareness of the various elements, origins, and developments in music, as well as enrich critical thinking skills related to evaluating music. Students will prepare critiques of music performances in writing. By the end of the course, the student should have the background for appreciating the major genres of music, as well as having an enhanced ability to appreciate the various primary elements of any musical creation and/or performance.

MUL 3001 Issues In Music (3)
This class offers a unique opportunity to address and critically analyze current and historical trends within the popular music recording and publishing industry. The course will also emphasize the importance of consumer awareness and responsibility.

MUL 3011 Western Art Music in Your Life (3)
A study in the art of music and its materials, designed to develop an understanding of basic principles of music and a technique for listening to music.

MUL 3600 Vocal Literature - Undergraduate (2)
PR: Four terms of studio grade.
Open to all USF undergraduate vocal performance majors that have completed four terms of vocal study with a passing grade. Other students may petition to enroll with the approval of the instructor. Provides a survey of standard vocal literature.

MUN 1100 University Pep Band and Winter Guard (3)
PR: Auditions for Pep Band are required for students who did not march in the Fall. Auditions for Winter Guard are required for all members. To provide performance experiences with the USF Pep Band and Winter Guard. It is open to any major area. Auditions are required for the Winter Guard and members of the Pep Band who did not march in the Fall.

MUN 1110 University Marching Band (3)
This course provides performance experiences with the Marching Band. The course is open to any major area.

MUN 1120 Concert Band (1)
The concert band provides music majors and non-major enthusiasts the opportunity to rehearse and perform quality wind band literature under the direction of multiple conductors. The course can be taken multiple years for one credit each time.

MUN 1439 Tuba-Euphonium Ensemble (1)
Course is a vital/required performance outlet for all USF tuba/euphonium majors. Repertoire & class size provide for personalized instruction/dynamic musical growth. Non-majors may enroll. Course is repeatable for credit- total 8 credits.

MUN 3113 Marching Ensemble for Experienced Members (0)
PR: 2 semesters of MUN 1110 Participation in the USF Marching Band. Performances at all home football games, select away football games and various exhibitions and community performances throughout the semester.

MUN 3133 Symphonic Band (1)
The Symphonic Band fosters the highest performance standards of wind and percussion literature. Although made up primarily of music majors, the course is open to all university students by comprehensive auditions. It is repeatable for up to 8 credits.

MUN 3143 Wind Ensemble (1)
Open to all university students with the necessary proficiency in their performing media; study and performance of music for large combinations of voices, string, woodwind, brass, or percussion instruments.

MUN 3213 University Orchestra (1)
Open to all university students with the necessary proficiency in their performing media; study and performance of music for large combinations of voices, string, woodwind, brass, or percussion instruments.

MUN 3313 University Singers (1)
Open to all university students with the necessary proficiency in their performing media; study and performance of male chorus music and male-chorus music in combination with string, woodwind, brass, or percussion instruments.

MUN 3323 Bel Canto Women's Choir (1)
Open to all university students with the necessary proficiency in their performing media (singing); study and performance of treble-voice music and treble-voice music in combination with, string, woodwind, brass, or percussion instruments.

MUN 3333 Singing Stampede (1)
Open to all university students with the necessary proficiency in their performing media (singing); study and performance of male-chorus music and male-chorus music in combination with string, woodwind, brass, or percussion instruments.
MUN 3343 Chamber Singers (1)  
Open to all university students with the necessary proficiency in their performance media; study and performance of music for small combinations of voices, string, woodwind, brass, or percussion instruments, and piano.

MUN 3383 University-Community Chorus (1)  
Open to all university students with the necessary proficiency in their performing media; study and performance of music for large combinations of voices, string, woodwind, brass, or percussion instruments.

MUN 3411 String Quartet (1)  
Open to all university students with the necessary proficiency in their performance media; study and performance of music for small combinations of voices, string, woodwind, brass, or percussion instruments, and piano.

MUN 3424 Woodwind Quintet (1)  
Open to all university students with the necessary proficiency in their performance media; study and performance of music for small combinations of voices, string, woodwind, brass, or percussion instruments, and piano.

MUN 3427 Flute Choir (1)  
Flute Choir will rehearse and perform new and standard repertoire for flute ensemble. Students will learn to perform on all members of the flute family including piccolo, C flute, alto and bass flute.

MUN 3431 Brass Quintet (1)  
Open to all university students with the necessary proficiency in their performance media; study and performance of music for small combinations of voices, string, woodwind, brass, or percussion instruments, and piano.

MUN 3433 Brass Choir (1)  
Open to all university students with the necessary proficiency in their performance media; study and performance of music for small combinations of voices, string, woodwind, brass, or percussion instruments, and piano.

MUN 3443 Percussion Ensemble (1)  
Open to all university students with the necessary proficiency in their performance media; study and performance of music for small combinations of voices, string, woodwind, brass, or percussion instruments, and piano.

MUN 3444 Marimba Ensemble (1)  
Open to all university students with the necessary proficiency in their performance media; study and performance of music for small combinations of voices, string, woodwind, brass, or percussion instruments, and piano.

MUN 3453 Piano Ensemble (1)  
Open to all university students with the necessary proficiency in their performing media; study and performance of music for large combinations of voices, string, woodwind, brass, or percussion instruments.

MUN 3474 Collegium Musicum (1)  
Open to all university students with the necessary proficiency in their performance media; study and performance of music for small combinations of voices, string, woodwind, brass, or percussion instruments, and piano.

MUN 3713 Jazz Ensemble (1)  
Open to all university students with the necessary proficiency in their performance media; study and performance of music for large combinations of voices, string, woodwind, brass, or percussion instruments.

MUO 3503 Opera Workshop (1)  
Open to all university students with the necessary proficiency in their performance media; study and performance of music for large combinations of voices, string, woodwind, brass, or percussion instruments.

MUS 2010 Recital Attendance (0)  
BA students must pass the course 4 times, BS students 5 times, and BM students 6 times. A passing grade (S) requires a minimum of 7 attendances per semester. Only performances sponsored by the School of Music will count toward Recital Attendance.

MUS 2201 Language Diction For Singers (1)  
Specialized study in Language Diction for Singers. Specific language varies, to be arranged at each course offering.

MUS 4652 Music and Medicine (2)  
Music and Medicine is an interdisciplinary course dealing with mental, physical, and emotional aspects of music learning and teaching. The course addresses prevention of performance-related pain and injury and effective management of performance anxiety.

MUS 4801 Fit to Play- mind body music (2)  
This course helps students develop efficient, injury-free, successful, and life-long healthy practices for the maximum physical and mental skills development required for a music performance career.
MUS 4900 Directed Reading in Music Performance Medicine (2)
Directed Reading in Biomechanics and Ergonomics, neuroscience, psychology, and physiology in Music Performance guides the student to the cross-disciplinary field materials exploring neurological and psychophysiological knowledge in playing his/her specific instrument or voice. This proposal is requested to change the course title from Directed Reading in Biomechanics and Ergonomics in Music Performance to Directed REading in Music Performance Medicine. Rationale: To expand the field of reading from biomechanics and ergonomics to neuroscience, psychology, and physiology.

MUS 4905 Directed Study (4)
Independent studies in the various areas of music; course of study and credits must be assigned prior to registration.

MUS 4930 Selected Topics In Music (3)
The content of the course will be governed by student demand and instructor interest.

MUS 4931 Selected Studio Topics In Music (3)
The content of the course will be governed by student demand and instructor interest.

MUS 4935 Music Senior Seminar (1)
To aid majors to understand, appraise and perfect their own art through critical and aesthetic judgments of their colleagues.

MUT 1001 Rudiments Of Music (2)
Open to non-music majors; development of skills in hearing and performing music and in basic notation. Will not count as degree credit for music majors.

MUT 1111 Music Theory I (3)
Required of music majors; development of skills in perceiving and writing music through the use of aural and visual analysis and examples from all historical periods of music literature.

MUT 1112 Music Theory II (3)
PR: MUT 1111
Required of music majors; development of skills in perceiving and writing music through the use of aural and visual analysis and examples from all historical periods of music literature.

MUT 1241 Aural Theory I (1)
Course designed to begin training in aural recognition and vocal realization of materials used in music composition. Includes rhythmic, melodic and harmonic dictation, and sight singing.

MUT 1242 Aural Theory II (1)
PR: MUT 1241
Course designed to begin training in aural recognition and vocal realization of materials used in music composition. Includes rhythmic, melodic and harmonic dictation, and sight singing.

MUT 2116 Music Theory III (3)
PR: MUT 1112
Required of music majors, continuation of MUT 1111 and 1112.

MUT 2117 Music Theory IV (3)
PR: MUT 2116
Required of music majors, continuation of MUT 1111, 1112, and 2116.

MUT 2246 Aural Theory III (1)
Course designed to continue training in aural recognition and vocal realization of materials used in music composition. Includes rhythmic, melodic and harmonic dictation, and sight singing.

MUT 2247 Aural Theory IV (1)
PR: MUT 2246
CR: MUT 2116, MUT 2117
Course designed to continue training in aural recognition and vocal realization of materials used in music composition. Includes rhythmic, melodic and harmonic dictation, and sight singing.

MUT 2641 Jazz Theory and Improvisation I (2)
PR: MUT 1112
A study of jazz improvisational techniques and related jazz theory.

MUT 2642 Jazz Theory and Improvisation II (2)
PR: MUT 2641
A study of jazz improvisational techniques and related jazz theory.

MUT 3353 Jazz Composition and Arranging I (3)
PR: MUT 1112
Course designed to develop arranging and/or compositional skills in the jazz idiom through the study of jazz orchestration, harmonic, and melodic practices.

MUT 3354 Jazz Composition And Arranging II (3)
PR: MUT 3353
Course designed to develop arranging and/or compositional skills in the jazz idiom through the study of jazz orchestration, harmonic and melodic practices.

MUT 3663 Advanced Jazz Improvisation I (2)
PR: MUT 2642
A studio course study of the improvised solos of the major innovators in jazz. Oriented toward the continuing development of students’ soloing ability. Students are required to enroll in Jazz Chamber Ensemble as a lab. Open to majors and non-majors.
### MUT 3664 Advanced Jazz Improvisation II (2)
**PR:** MUT 3663  
A continuation of Jazz Styles and Analysis I with the emphasis on contemporary jazz artists. Students are required to enroll in Jazz Chamber Ensemble as a lab. Open to majors and non-majors.

### MUT 4421 Eighteenth Century Practice (3)
**PR:** MUT 2117  
An intensive study of the contrapuntal practice of the 18th century; development of skills in perceiving and writing music in the style of the period through the use of aural and visual analysis.

### MUT 4571 Twentieth Century Practice (3)
**PR:** MUT 2117  
A study of 20th century theoretical concepts; development of skills in perceiving and writing music in contemporary styles through the use of aural and visual analysis.

### MUT 4611 Form and Analysis (3)
**PR:** MUT 1111, MUT 1112, MUT 1241, MUT 1242, MUT 2116, MUT 2117, MUT 2246, MUT 2247  
This course teaches students to think critically, speak, and write fluently about music, music analysis, and how these processes relate to the work done in rehearsals or studios via various inquiry-based learning strategies.

### MVB 1211 Applied Trumpet (1)
One half-hour private lesson or one hour class per week for music students wishing to gain proficiency in an area other than their applied performance major and for a limited number of nonmusic majors who have had prior musical training.

### MVB 1212 Applied French Horn (1)
One half-hour private lesson or one hour class per week for music students wishing to gain proficiency in an area other than their applied performance major and for a limited number of nonmusic majors who have had prior musical training.

### MVB 1213 Applied Trombone (1)
One half-hour private lesson or one hour class per week for music students wishing to gain proficiency in an area other than their applied performance major and for a limited number of nonmusic majors who have had prior musical training.

### MVB 1214 Applied Euphonium (1)
One half-hour private lesson or one hour class per week for music students wishing to gain proficiency in an area other than their applied performance major and for a limited number of nonmusic majors who have had prior musical training.

### MVB 1215 Applied Tuba (1)
One half-hour private lesson or one hour class per week for music students wishing to gain proficiency in an area other than their applied performance major and for a limited number of nonmusic majors who have had prior musical training.

### MVB 1311 Trumpet Principal (2)
Required of all music education and composition majors. Open to a limited number of non-music majors by audition only. Applied music courses are not available on S/U basis. Private and class instruction.

### MVB 1312 French Horn Principal (2)
Private and class instruction.

### MVB 1313 Trombone Principal (2)
Private and class instruction.

### MVB 1314 Euphonium Principal (2)
Private and class instruction.

### MVB 1315 Tuba Principal (2)
Private and class instruction.

### MVB 1411 Trumpet Major (3)
Private and class instruction.

### MVB 1412 French Horn Major (3)
Private and class instruction.

### MVB 1413 Trombone Major (3)
Private and class instruction.

### MVB 1414 Euphonium Major (3)
Private and class instruction.

### MVB 1415 Tuba Major (3)
Private and class instruction.

<td></td>
</tr>
<tr>
<td>NUR 3027L</td>
<td>Patient Centered Care: Essentials of Nursing Practice Lab (1)</td>
<td>CR: NUR 3026, NUR 3026L Focuses on preparing students for clinical experiences by developing foundational nursing skill techniques in the laboratory that will be used to provide safe and effective patient centered care to patients from all cultures.</td>
<td></td>
</tr>
<tr>
<td>NUR 3066</td>
<td>Health Assessment, Wellness, and Prevention Across the Life Span (2)</td>
<td>CR: NUR 3066L Focus is on physical assessment and health promotion of individuals across the lifespan. Included are the use of techniques and instruments necessary for the examination, as well as wellness promotion initiatives.</td>
<td></td>
</tr>
</tbody>
</table>
NUR 3066L Health Assessment, Wellness, and Prevention Across the Life Span Lab (1)
CR: NUR 3066
Physical application of the techniques and instruments necessary for the examination of infants, children and adults. Included are models of wellness and health promotion of individuals across the lifespan.

NUR 3078 Information Technology Skills for Nurses (1)
CR: NUR 3805.
Introduction to information technology in order to enhance efforts and improve communication in the classroom and workplace environment. Focuses on developing technical skills and knowledge.

NUR 3081 Bridge to Professional Nursing (4)
This course assists in transitioning military medic/corpsmen to professional registered nursing practice. Addresses clinical reasoning and communication skills when applying concepts of health to nursing needs of individuals/families across the lifespan.

NUR 3081L Bridge to Professional Nursing Practice (2)
Facilitates transition from military medic/corpsman to clinical nursing practice using nursing process. Provides opportunities to apply clinical reasoning and therapeutic communication skills in meeting nursing needs of individuals and families.

NUR 3125 Pathophysiology for Nursing Practice (3)
This course will provide students with an understanding of pathophysiological concepts and the clinical presentation in humans across the lifespan including genetic, and sociocultural and environmental influences on the expression of disease and injury.

NUR 3145 Pharmacology in Nursing Practice (3)
Builds on foundation of liberal arts and sciences. Focuses on the concepts of pharmacology essential to generalist nursing practice. Emphasizes quality and safety in preventing, monitoring, and managing the effects of pharmacotherapeutic agents.

NUR 3225 Complex Health Nursing I (3)
PR: NUR 3026 with a minimum grade of C, NUR 3026L with a minimum grade of S
CR: NUR 3225L
Integrate bio psychosocial models of nursing practice for individuals and families experiencing health risks, short-term illness or chronic health problems.

NUR 3225L Complex Health Nursing I Clinical (4)
PR: NUR 3026 with a minimum grade of C, NUR 3026L with a minimum grade of S
CR: NUR 3225
Focus is on student clinical experiences for nursing care of clients and families with common chronic illnesses in the adult population. Emphasis is on safe, evidence based care for clients in a variety of settings.

NUR 3678 Nursing Healthcare for Vulnerable Populations (3)
The course focuses on the cultural aspects of providing health-related care through experiential analysis of a selected program designed to serve a vulnerable population either here or abroad.

NUR 3805 Nursing as a Profession (3)
Focus is on knowledge needed for the professional nurse to be an effective member of the healthcare team.

NUR 3825 Introduction to the Profession of Nursing (2)
Focus is on initial knowledge needed for the professional nurse to be an effective member of the healthcare team. These include the history of nursing, definition of nursing, ethics, values, professionalism and healthcare in the United States.

NUR 3826 Ethical/Legal Aspects in Nursing and Healthcare (3)
Exploration of contemporary bioethical and legal issues confronting health care providers. Focuses on reflection and discourse of ethical legal principles underlying the decision-making processes to enhance application of professional excellence.

NUR 4069 Health Assessment for Registered Nurses (3)
This course builds on the RN's previous knowledge and clinical expertise in developing health and physical assessment skills. The emphasis is on the analysis and synthesis of health assessment data as a basis for patient teaching.

NUR 4128 Pathophysiology/Pharmacology (3)
Updates pathophysiological and pharmacological concepts critical to clinical decision making in nursing. Focuses on commonly occurring disease processes.

NUR 4165 Evidence-Based Practice (3)
This course provides the foundations of clinical inquiry, research methodology and critical appraisal in the synthesis of research findings for application in evidence-based nursing practice.
COURSE DESCRIPTIONS
(AS OF SEPTEMBER 20, 2021)

UNIVERSITY OF SOUTH FLORIDA 2021-2022 UNDERGRADUATE CATALOG

NUR 4169C Evidence-Based Practice for Bacc Prepared Nurse (3)
This course provides the foundations of clinical inquiry, research methodology and critical appraisal in the synthesis of research findings for application in evidence-based nursing practice.

NUR 4227 Complex Health Nursing II (4)
PR: NUR 3225 with a minimum grade of C, NUR 3225L with a minimum grade of S
CR: NUR 4227L
Integrate biopsychosocial models of nursing practice for individuals and families experiencing acute complex health problems.

NUR 4227L Complex Health Nursing II Clinical (4)
PR: NUR 3225 with a minimum grade of C, NUR 3225L with a minimum grade of S
CR: NUR 4227
Focus is on student clinical experiences for care of clients and families with complicated acute illnesses in the adult population. Emphasis on safe evidence based care and evaluation of healthcare outcomes.

NUR 4285 Healthy Aging: Nursing Care of Older Adults (2)
This course focuses on the development & mastery of gerontology core competencies as identified as essential components of baccalaureate nursing education necessary to provide holistic, evidence-based, & patient-centered care to the older adult population.

NUR 4355 Child and Adolescent Health Nursing (3)
PR: NUR 3215, NUR 3525 or NUR 3535, NUR 4216 and NUR 3215L, NUR 4216L and NUR 3525L or NUR 3535L or NGR 5580L. CR: NUR 4455, NUR 4635L or NGR 5680L. CPR: NUR 4636.
This course will explore the nursing care of children and adolescents within the context of the family. Focus on health promotion, risk factor identification, disease prevention, and health restoration in children and adolescents.

NUR 4455 Women's Health Nursing (2)
PR: NUR 3215, NUR 3525 or NUR 3535, NUR 4216 and NUR 3215L, NUR 4216L and NUR 3525L or NUR 3535L or NGR 5580L. CR: NUR 4355; CP: NUR 4635L or NGR 5680L.
Focuses on the physiologic and psychosocial needs of women, newborns and families related to fertility and infertility, pregnancy and birth.

NUR 4467 Nursing Care of Women, Children, and Families (4)
PR: NUR 3026 with a minimum grade of C, NUR 3026L with a minimum grade of S
CR: NUR 4467L
Students will learn about the care of the family during the childbearing, parenting, and child developmental phases. The nursing care of the childbearing family will be explored within the social, cultural and community context.

NUR 4467L Nursing Care of Women Children and Families Clinical (3)
PR: NUR 3026 with a minimum grade of C, NUR 3026L with a minimum grade of S
CR: NUR 4467
Focus is on nursing care designed to prevent and reduce risk of disease and injury, promote health, and treat illness and injury of the family during the childbearing, parenting, and child developmental phases in a variety of clinical settings.

NUR 4535 Psychiatric Mental Health Nursing (3)
PR: NUR 3225 with a minimum grade of C, NUR 3225L with a minimum grade of S
CR: NUR 4535L
Explores alterations in health experienced by patients with acute and chronic mental illness. Examines psychopathology, psychopharmacologic therapies, community resources and the role of the nurse in mental health.

NUR 4535L Psychiatric/Mental Health Nursing Clinical (2)
PR: NUR 3225 with a minimum grade of C, NUR 3225L with a minimum grade of S
CR: NUR 4535
Focus is on clinical interventions using critical thinking & communication skills with patients who require complex psychiatric care. Emphasis is on knowledge & application of psychopathology & psychopharmacologic therapies across the lifespan.

NUR 4634C Population Health (3)
PR: NUR 4169C with a minimum grade of C, NUR 4828C with a minimum grade of C
Synthesis of theory & epidemiology enabling students to promote health & wellness in populations. Current practices, policies, & laws will be explored in relation to environment, infectious disease, vulnerable populations, & global health care issues.

NUR 4635 Public Health Nursing (3)
CR: NUR 4635L
An introduction to public health nursing with an emphasis on employing the nursing process to improve the public health outcomes within a community. Focus is on public health nursing issues, health management, health promotion, and health prevention.
NUR 4635L Public Health Nursing Clinical (3)
PR: NUR 4227 with a minimum grade of C, NUR 4227L with a minimum grade of S
CR: NUR 4635
The course provides clinical experiences in community-based sites in both urban and rural settings. The focus is on nursing care designed to prevent and/or reduce risk of disease and injury, promote health and wellness across diverse populations.

NUR 4636L Community/Public Health Nursing Clinical (3)
PR: NUR 3215 or NUR 3525 or NUR 3535, NUR 4216 and NUR 3215L, NUR 4216L and NUR 3525L or NUR 3535L
CR: NUR 4636
CPR: NUR 4636 or NUR 4286.
The course provides clinical learning experiences in community-based sites in both urban and rural settings. Focuses on nursing care designed to prevent and/or reduce risk of disease and injury, promote health and wellness, and to diverse populations across the age spectrum.

NUR 4690 Introduction to Ambulatory Care Nursing (3)
This course examines the nurses role in ambulatory care settings exploring the organizational, professional, clinical knowledge, and skills necessary to facilitate health and navigate the current health care system.

NUR 4795 Cancer Symptom Management (3)
Students taking this course will learn about nursing management of common side effects of cancer and cancer treatments.

NUR 4827 Role Transition and Leadership in Nursing (2)
Professional development and role transition of Baccalaureate graduates entering professional nursing practice focusing on principles of leadership and management applied to health care settings.

NUR 4828C Essentials of Healthcare Leadership and Management (3)
PR: NUR 3805 with a minimum grade of C
Overview of leadership essentials, organizational theories and strategies required in complex, patient-centered healthcare environments, including communication, quality/safety, ethics, and inter-professional practice incorporating community engagement.

NUR 4850 Fundamentals of Healthcare Finance for Nurses and Nurse Leaders (3)
PR: NUR 4828C, with a minimum grade of C
This course provides the nurse and nurse leader with fundamental knowledge and tools to promote fiscal accountability and effective healthcare.

NUR 4888 Coordination of Care in Nursing (3)
Complexity of patient care requires multiple providers across settings. Effective coordination of care and transition management improves outcomes and contributes to high value care. Focus is on care coordination emphasizing collaboration and teamwork.

NUR 4895 Educational Role of the Nurse in Healthcare (3)
The focus of this course is to prepare the nurse as a patient educator by providing the foundation in the principles of teaching and learning as it relates to diverse patient populations.

NUR 4905C Independent Study (5)
Individual or group investigation of problems relevant to the health of individuals or groups. Project requirements individually planned with faculty preceptor.

NUR 4935 Selected Topics In Nursing (3)
Content will depend upon student demand and faculty interest and may focus on any area relevant to nursing practice. May involve class, seminar, and/or clinical laboratory.

NUR 4937 Nursing Seminar (3)
This is a variable topics course. Therefore the particular course objectives and outcomes vary from course to course. But in all cases course objectives and outcomes will meet the CON program outcomes. Examples: PERI OP/ER-Critical Care/Ambulatory Nurse.

NUR 4948L Preceptorship (6)
PR: NUR 4227 with a minimum grade of C, NUR 4227L with a minimum grade of S
Individually contracted clinical practicum collaboratively planned by students, faculty, and agency personnel. Opportunity to synthesize theory and clinical practice for professional nursing.

OCB 3108 Marine Field Studies (4)
PR: BSC 2010, BSC 2011, CHM 2045, and CHM 2046
A field course introducing students to marine biological field methods, biodiversity and key biotic/abiotic features of Florida coastal ecosystems. The course will involve travel around the state exploring the coral reefs, estuaries and the open ocean.

OCB 3265 Coral Reefs (3)
PR: BSC010 or BSC 2011, either with a minimum grade of C- or better.
Biology of reef animals and reef ecology; emphasis on Florida and Caribbean reefs. Classroom instruction and observation of coral reef and turtle grass communities.
OCB 4204 Coral Reef Ecology (3)
PR: BSC 3312 with a minimum grade of C-
This course explores the diversity and function of coral reef ecosystems. It focuses on ecological concepts, but also explores important aspects of the physiology & behavior of reef organisms and ends with a strong emphasis on conservation and management.

OCE 2001 Introduction to Oceanography (3)
This is a class in basic oceanography covering chemical (what is the sea made of), physical (tides, currents, waves), geological (ocean floor and coasts) and biological (all life in the oceans) aspects, and their interactions.

OCE 4655C Scanning Electron Microscopy (4)
Students will work on an individual project using both biological and non-biological specimens the student has prepared and imaged on the SEM instrument.

OCE 4930 Selected Topics in Marine Science (3)
Selected topics in marine science including marine biology, marine chemistry, marine geology and geophysics, physical oceanography, and interdisciplinary topics relating to marine environments.

ORI 3004 Communication as Performance (3)
Designed to develop an understanding of performance as a communicative process and as a method through which to study communication. This course emphasizes the ways performance communicates social, cultural, and political perspectives and identities.

ORI 3950 Communication As Performance Laboratory (3)
The study, rehearsal, and performance of literature for Readers Theatre and Chamber Theatre productions.

ORI 4019 Performing Identity and Culture (3)
Focuses on theory and practice of identity and culture as performed in ritual, community, and aesthetic contexts.

ORI 4150 Performing Nonfiction (3)
Explores the genre of nonfiction, including diaries, memoirs, travelogues, new journalism, personal essays, and weblogs, through performance.

ORI 4220 Performing Young Adult Literature (3)
Performance of literature written for young adults with an emphasis on cultural values and beliefs.

ORI 4310 Group Performance of Literature (3)
PR: ORI 3004, with a grade of C or above
Designed to introduce the student to and give experience in various forms of group approaches to performance.

ORI 4320 Writing for Performance (3)
Explores the intersection of writing and performance as aesthetic and communicative practices.

ORI 4410 Performance Art (3)
Explores history, criticism, and practice of performance art as a genre of performance.

ORI 4460 Performing Relationships (3)
Explores interpersonal, organizational, and intercultural theories of human relationships as realized in literary texts through performance.

ORI 4461 Listening and Performance (3)
This class focuses on listening as a performance, or as a fully embodied act of engaging the world and others in a multi-sensory and multi-modal practice. In this class, listening is broadly understood and approached as a cultural, contextual, and relational act that relies on and uses all of the senses together. In the class students will engage in listening as a performance by creating a variety of listening performances.

ORI 4931 Performance and Video (3)
This course features adaptation, direction, and performance of literature for video productions.

OSE 4601 Optical Product Technology (3)
PR: EML 3500, EGN 3343, both with a minimum grade of C or better
Overview of the operating principles, design, and construction of a broad range of optically-based products, such as: lamps, cameras, displays/monitors, night vision, cloaking, bar codes, rangefinders, locks, etc. Aimed at mechanical engineering seniors.

PAD 3003 Introduction to Public and Community Service (3)
Examination of policy design and implementation, organizational behavior and change, public management, financial administration, and personnel management in the context of public service and community leadership.

PAD 4144 Nonprofit Organizations and Public Policy (3)
Role and importance of third sector (voluntary) organizations in American society; focus on public policy through service in a voluntary organization.

PAD 4204 Public Financial Administration (3)
Analysis of problems in the growth and development of public budgetary theory and Federal budgetary innovations.
## COURSE DESCRIPTIONS

(AS OF SEPTEMBER 20, 2021)

### UNIVERSITY OF SOUTH FLORIDA 2021-2022 UNDERGRADUATE CATALOG

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Prerequisites</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PAD 4415</td>
<td>Personnel &amp; Supervision in Today's Diverse Organizations (3)</td>
<td>Introduces students to concepts, principles and practices of personnel management and supervision that influence the attainment of desired performance goals in today's public and not-for profit organizations. Course participants will explore issues that influence the successful management of human resources in dynamic employment settings.</td>
<td></td>
</tr>
<tr>
<td>PAD 4712</td>
<td>Managing Information Resources in the Public Sector (3)</td>
<td>Introduces students to the fundamental concepts, theories, principles and practices in public information management. Internet access is required.</td>
<td></td>
</tr>
<tr>
<td>PAD 4930</td>
<td>Selected Topics in Public Administration and Public Policy (3)</td>
<td>Selected issues and topics in Public Administration and Public Policy with course content based on student demand and instructor's interest. May be repeated for up to 6 credits as topics vary.</td>
<td></td>
</tr>
<tr>
<td>PCB 3023</td>
<td>Cell Biology (3)</td>
<td>PR: BSC 2010, BSC 2010L, BSC 2011, BSC 2011L &amp; CHM 2045, CHM 2046 &amp; MAC 1105 or higher-level MAC course or STA 2023. CR: CHM 2210</td>
<td>Cell Biology is the study of living properties of cells and encompasses a broad area of the life sciences that includes cellular physiology and life cycle, organelle structure and function, and biomolecular structure and function.</td>
</tr>
<tr>
<td>PCB 3023L</td>
<td>Cell Biology Laboratory (1)</td>
<td>CPR: PCB 3023. Laboratory portion of Cell Biology. Metabolic processes within the cell.</td>
<td></td>
</tr>
<tr>
<td>PCB 3043</td>
<td>Principles of Ecology (3)</td>
<td>PR: BSC 2010, BSC 2010L, BSC 2011, BSC 2011L &amp; CHM 2045, CHM 2046 &amp; MAC 1105 or higher-level MAC course or STA 2023.</td>
<td>An introduction to the basic principles and concepts of ecology at the ecosystem, community, and population level of organization. Lecture only.</td>
</tr>
<tr>
<td>PCB 3063</td>
<td>General Genetics (3)</td>
<td>PR: BSC 2010, BSC 2010L, BSC 2011, BSC 2011L &amp; CHM 2045, CHM 2046 &amp; MAC 1105 or higher-level MAC course or STA 2023. CPR: CHM 2210.</td>
<td>Introduction to genetics including the fundamental concepts of Mendelian, molecular and population genetics. Lecture only.</td>
</tr>
<tr>
<td>PCB 3063L</td>
<td>General Genetics Laboratory (1)</td>
<td>CPR: PCB 3063. Laboratory investigation techniques in general genetics including Mendelian and non-Mendelian relationships, and gene interactions.</td>
<td></td>
</tr>
<tr>
<td>PCB 3306</td>
<td>Stream Ecology (3)</td>
<td>PR: BSC 2010, BSC 2011 and PCB 3043, all with a minimum grade of C- or better</td>
<td>An introduction to the ecology of streams, abiotic influences on streams, and the diversity and adaptations of stream-dwelling organisms.</td>
</tr>
<tr>
<td>PCB 3346C</td>
<td>Field Research Experience Abroad - Costa Rica (3)</td>
<td>PR: BSC 3453 with a minimum grade of C. This course is a field research experience that takes place at biological research stations and preserves in Costa Rica.</td>
<td></td>
</tr>
<tr>
<td>PCB 3404</td>
<td>Medicines of the Rainforest (3)</td>
<td>PR: CHM 2211 with a minimum grade of C, BSC 2010 with a minimum grade of C</td>
<td>This course examines the natural sources of medicinal compounds and their traditional use throughout history. It also provides a review of the approaches utilized in the development of therapeutic agents based upon these natural resources.</td>
</tr>
<tr>
<td>PCB 3712</td>
<td>General Physiology (3)</td>
<td>PR: BSC 2010, BSC 2010L, BSC 2011, BSC 2011L and CHM 2045, CHM 2046 and MAC 1105 or higher-level MAC course or STA 2023.</td>
<td>Comparative analysis of animal structure and function: organ systems and activities of body tissues and organs. Functional responses of plants to both internal and environmental signals lecture only.</td>
</tr>
<tr>
<td>PCB 3713L</td>
<td>General Physiology Laboratory (1)</td>
<td>CPR: PCB 3712 Laboratory portion of General Physiology.</td>
<td></td>
</tr>
<tr>
<td>PCB 4024</td>
<td>Molecular Biology of the Cell (3)</td>
<td>PR: PCB 3023, PCB 3063, MCB 3410</td>
<td>This lecture-based course will focus on advanced principles of molecular cell biology with emphasis on protein structure and function in key cellular pathways. The course is suitable for majors/nonmajors.</td>
</tr>
<tr>
<td>PCB 4026</td>
<td>Molecular Biology of the Gene (3)</td>
<td>PR: PCB 3023, PCB 3063, MCB 3410</td>
<td>This lecture-based course will provide fundamental knowledge of scientific concepts and principles of the molecular aspects of DNA metabolism in pro- and eukaryotes for majors/nonmajors.</td>
</tr>
</tbody>
</table>
PCB 4109 Cancer Biology (3)  
PR: MCB 3410, PCB 3023, PCB 3063  
This course will provide a background in basic cancer biology, including genetics, cellular physiology and metabolism associated with cancer development. Aspects of drug therapy and discovery will be considered.

PCB 4234 Principles of Immunology (3)  
PR: PCB 3023  
Emphasis is on organization and functions of vertebrate immune system. Basic cellular and molecular mechanisms of immune responses in health and disease are addressed as well as the principles and applications of immunological methods. Lecture only.

PCB 4312 Marine Ecosystem Dynamics (3)  
PR: BSC 3312 with a minimum grade of C  
Overview of the fundamental processes in the marine environment that drive biological production and regulate biological patterns in the ocean.

PCB 4315 Marine Ecology (3)  
PR: BSC 3312 with a minimum grade of C  
Develop understanding of contemporary marine research. Topics include: reproductive strategies, deep-sea adaptations, biogeography, biodiversity studies, migrations, primary productivity, microbial loop, ecosystem diversity and marine conservation efforts.

PCB 4402 Disease Ecology (3)  
PR: BSC 2010 and BSC 2011 both with a minimum grade of C  
Introduction to the interdisciplinary field of disease ecology, and its importance and application in public health. Examination of host-pathogen interactions, and the influence of environmental and ecological factors on the spread of disease.

PCB 4522C Experimental Genetics and Cell Biology (3)  
PR: PCB 3023, PCB 3063 and PCB 3023L or PCB 3063L  
This course will teach students how to utilize and integrate concepts from genetics and cell biology in a research laboratory environment using current scientific literature, model organisms and molecular techniques.

PCB 4663 Human Genetics (3)  
PR: PCB3023, PCB3063.  
A lecture-based course building upon principles introduced in Cell Biology and Genetics to explore advanced topics applied to human heredity and inherited disorders. Instruction includes problem solving, group activities, internet and individual projects.

PCB 4674 Organic Evolution (3)  
PR: PCB 3063.  
An introduction to modern evolutionary theory. Lecture on population genetics, adaptations, speciation theory, phylogeny, human evolution and related areas. Lec.-dis.

PCB 4679 Biology Capstone Course: Evolution (3)  
PR: BSC 2010, BSC 2010L, BSC 2011, BSC 2011L  
Principles of evolutionary theory are examined in the context of biological systems at all organizational levels. Required capstone course for Biology majors.

PCB 4723 Animal Physiology (3)  
PR: PCB 3712, CHM 2210, PHY 2053 and MAC 1105 or higher-level MAC course or STA 2023.  
CPR: CHM 2211.  
Advanced presentation of mechanisms employed by animals to interact with their environment and to maintain their organization. Lecture only.

PCB 4744 Biomedical Physiology (3)  
PR: PCB 3023  
Detailed examination of mammalian physiology focusing on the cellular and molecular mechanisms that underlie and regulate physiological function.

PEL 1121 Golf I (2)  
Introductory experience in the sport of golf. Fundamental skills, information, strategy, and participation.

PEL 1341 Tennis I (2)  
Introductory experiences in the sport of tennis. Basic skills, playing strategies, lecture, demonstration, and participation.

PEL 2122 Golf II (2)  
Continuation of PEL 1121. Emphasis on course play and refinement of strokes.

PEL 2441 Racquetball (2)  
Development and refinement of the skills and strategies of racquetball with opportunity for competition and tournament play.

PEM 2131 Weight Training (2)  
Knowledge and techniques necessary for increasing muscle function. Assessment of status and development of a personal program

PEM 2441 Karate (2)  
Introductory experiences in the sport of Karate. Fundamental skills, strategy, information, and participation.

PEM 2930 Selected Topics (2)  
Activities offered are selected to reflect student need and faculty interest.
COURSE DESCRIPTIONS
(AS OF SEPTEMBER 20, 2021)

UNIVERSITY OF SOUTH FLORIDA 2021-2022 UNDERGRADUATE CATALOG

PEN 1121 Swimming I (2)
Development and refinement of the essential skills and information necessary for enjoying swimming. Emphasis on personal safety.

PEN 2136 Skin & Scuba Diving (2)
PR: PEN 1121 or equivalent.
Development of the essential skills and knowledge necessary for enjoying the sport of Skin & Scuba Diving. Correct utilization and care of equipment; emphasis on personal safety.

PET 3031 Motor Behavior (3)
Study of the assessment, evaluation and motor development performance of children and adolescents and application of principles of motor skills acquisition in physical education instruction. Open to non-majors.

PET 3076 Physical Activity in Diverse Populations (3)
PR: APK 3120, APK 4138C, PET 3211, PET 3314, PET3361, PET 3312, PET 4219, PET 3384, PET 4093, PET 4413, PET 3370, PET 3940
All courses with a minimum grade of C-.
The course is designed to assist students in developing an understanding of physical activity limitations, benefits and recommendations in diverse populations (youth, adolescents, older adults, pregnant women, people with disabilities, etc.).

PET 3211 Stress, Health, and Disease (3)
This course will focus on the psychophysiological aspects of stress and its impact on health and disease. An overview of stress and its role in the development and progression of chronic diseases will be covered.

PET 3312 Biomechanics (3)
This course will focus on the structure and function of the skeletal and muscular systems as well as the mechanical principles related to motor performance.

PET 3314 Survey in Exercise Science (3)
An introduction to the field of Exercise Science designed to introduce the students to aspects of professionalism, education, research and service necessary to be personally and professionally successful as graduates.

PET 3361 Nutrition for Fitness and Sport (3)
This course will address weight management/weight loss, common diets, dietary supplements, ergogenic aids, and eating disorders. Content will focus on nutrition and weight management guidelines established by the American College of Sports Medicine.

PET 3364 Physical Activity Epidemiology (3)
A presentation of the background and main concepts of epidemiology and discussion and summary of original research. Major topics include coronary artery disease, cerebrovascular disease, peripheral vascular disease, diabetes, arthritis, and COPD.

PET 3370 Science of Weight Management (3)
This course is designed to provide students with an understanding of the current practices and scientific principles related to weight management.

PET 3384 Exercise Testing and Prescription (3)
In this course students will become proficient in performing a variety of exercise tests and prescribe appropriate exercises for aerobic capacity, muscular strength and endurance, body composition, flexibility and other parameters of physical fitness.

PET 3404 Emergency Response and Planning (3)
Students will develop emergency response knowledge and skills through ARC first aid emergency response, CPR/AED certifications and will proactively assess, develop and implement a plan of response for emergency situations in fitness/wellness centers.

PET 3421 Curriculum and Instruction in Physical Education (3)
Development of knowledge and skills related to the instruction process of physical education. Preparation of materials and planning instruction.

PET 3441 Instructional Design and Content: Middle School Physical Education (3)
The development of physical education content and instructional practices for middle school students. The focus is upon matching appropriate content and learning experiences to the unique needs of the pre- and early adolescent learner.

PET 3640 Adapted Physical Education (3)
A study of characteristics, programming needs and teaching of physical education for students with disabilities.

PET 3713 Theory and Practice of Teaching Group Exercise (3)
In developing group exercise leadership skills, students will learn how to apply principles of teaching safe and effective exercises designed to enhance cardiovascular endurance, muscular strength/endurance, and flexibility.

PET 3931 Selected Topics in Sports Medicine (3)
Topics offered are selected to reflect student need and faculty interest.

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PET 3940</td>
<td>Practicum in Fitness/Wellness (3)</td>
<td>This course will provide the initial field experience in a community fitness/wellness center serving general populations. Students will gain practical experience with regard to teaching group exercise and conducting fitness testing and prescription.</td>
</tr>
<tr>
<td>PET 4088</td>
<td>Individualized Fitness/Wellness Programming (3)</td>
<td>In this course students will learn how to assess, evaluate, and design safe and effective programs for individual clients. Students will also learn how to incorporate appropriate activities for specialized clients or populations.</td>
</tr>
<tr>
<td>PET 4093</td>
<td>Strength and Conditioning (3)</td>
<td>This course will provide students with the information necessary for designing and implementing a successful strength and conditioning program through assessment and analysis of fitness and sport movement.</td>
</tr>
<tr>
<td>PET 4219</td>
<td>Exercise Psychology (3)</td>
<td>A presentation of the basic concepts related to exercise behavior. The content will include topics related to the psychosocial dimensions of exercise behavior to include participation, motivation, and adherence. Theoretical models will also be presented.</td>
</tr>
<tr>
<td>PET 4380</td>
<td>Applied Exercise Science (3)</td>
<td>This course will explore the application of physiological and kinesiological principles to teaching physical education. Specific changes and adaptations of children as a result of exercise will be examined. Restricted to majors. Not repeatable.</td>
</tr>
<tr>
<td>PET 4401</td>
<td>Class Management, Safety, Ethics, Law, and Organization and Administration of Physical Education (3)</td>
<td>This course will examine the various classroom management approaches, professional ethics, school law, safety, and the organization and administration of physical education programs.</td>
</tr>
<tr>
<td>PET 4402</td>
<td>Planning and Evaluating Fitness/Wellness Programs (3)</td>
<td>This course will focus on the design of high quality fitness/wellness programs in worksite and other settings. Students will learn and apply the major components of program planning – needs assessment, development, implementation, and evaluation.</td>
</tr>
<tr>
<td>PET 4413</td>
<td>Administration of Fitness and Wellness Centers (3)</td>
<td>An introduction to facility management concepts for fitness professionals. Included in the class is: human resource, fiscal, program, risk and facility management. Students will also develop, manage and evaluate a needs assessment for a community partner.</td>
</tr>
<tr>
<td>PET 4432</td>
<td>Instructional Design &amp; Content: Physical Education Elementary I (3)</td>
<td>This is the first in a two-course sequence in which students study movement forms and instructional processes suitable for elementary age students. Majors only.</td>
</tr>
<tr>
<td>PET 4433</td>
<td>Instructional Design &amp; Content: Physical Education Elementary II (3)</td>
<td>This course prepares students to select, plan and conduct complex movement experiences for K-6 students.</td>
</tr>
<tr>
<td>PET 4442</td>
<td>Instructional Design and Content: Physical Education Secondary (3)</td>
<td>Development of knowledge and skills related to the teaching of selected movement activities such as team sports, gymnastics, and physical fitness. Focus is on understanding mechanical principles utilized within those activities as well as on instructional progression and the preparation of materials for instruction at the secondary school level.</td>
</tr>
<tr>
<td>PET 4510</td>
<td>Measurement and Evaluation in Physical Education (3)</td>
<td>A study of the principles and techniques of educational measurement as applied to the teaching of physical education; study of the functions and techniques of measurement in the evaluation of student progress toward the objectives of physical education.</td>
</tr>
<tr>
<td>PET 4550</td>
<td>Clinical Exercise Testing and Prescription (3)</td>
<td>A presentation of concepts related to the clinical aspects of fitness assessment and exercise programming. Clinical conditions that will be considered include: cardiovascular disease, pulmonary disease, metabolic disease, arthritis, and geriatrics.</td>
</tr>
<tr>
<td>PET 4742</td>
<td>Secondary Physical Education Methods: Physical Act (3)</td>
<td>The course will prepare students to plan and conduct PE programs which meet National and State Content Standards related to physical activity, fitness, nutrition, and healthy living concepts. PE majors only. Not repeatable for credit.</td>
</tr>
<tr>
<td>PET 4765</td>
<td>Scientific Principles of Athletic Coaching (3)</td>
<td>The application of principles from philosophy, psychology, sociology, and physiology to competitive athletics and coaching.</td>
</tr>
<tr>
<td>PET 4820</td>
<td>Sport Skill Proficiency (3)</td>
<td>This course is designed to assist students in becoming proficient in and acquiring a foundation of the fundamental physical skills necessary to participate in and teach a variety of individual and team sports.</td>
</tr>
<tr>
<td>Course Code</td>

<td>PET 4941</td>
<td>Internship in Fitness/Wellness (9)</td>
<td>This course will provide the final field experience in a community fitness/wellness center serving both general and special populations. Practical experiences will focus on all aspects of program development, delivery, and management.</td>
</tr>
<tr>
<td>PET 4942</td>
<td>Physical Education Pre-Internship: Elementary (3)</td>
<td>A part-time internship in elementary school physical education. Focus on the nature of the total elementary school curriculum, characteristics of students, and application of appropriate content and instructional competencies.</td>
</tr>
<tr>
<td>PET 4944</td>
<td>Physical Education Pre-Internship: Secondary (3)</td>
<td>A part-time internship in middle or high school level physical education with focus on the relationship of physical education to the needs of the adolescent and the implementation of appropriate content and methodology.</td>
</tr>
<tr>
<td>PET 4946</td>
<td>Internship in Physical Education: Elementary (6)</td>
<td>A full-time internship in the elementary school in which the student undertakes the full range of teaching responsibilities in elementary physical education.</td>
</tr>
<tr>
<td>PET 4947</td>
<td>Internship in Physical Education: Secondary (6)</td>
<td>A full-day internship in middle, junior or senior high school physical education programs with focus on the implementation of appropriate content and methodology to meet the needs of secondary students.</td>
</tr>
<tr>
<td>PGY 2401C</td>
<td>Beginning Photography (3)</td>
<td>Introduction to the expressive possibilities of photographic media. Projects and assignments will introduce students to both traditional and experimental ways of working with light-sensitive materials with an emphasis on the interdependence of form, technique, and concept. The course will also provide an overview of significant trends and directions in contemporary art photography.</td>
</tr>
<tr>
<td>PGY 3410C</td>
<td>Intermediate Photography (3)</td>
<td>A mid-level course expanding the student's visual and technical skills while establishing the beginning of a personal artistic direction.</td>
</tr>
<tr>
<td>PGY 3620</td>
<td>Photojournalism II (3)</td>
<td>PR: PGY 3610C. Laboratory required. Advanced process and practice of photography for publication.</td>
</tr>
<tr>
<td>PGY 3820C</td>
<td>Digital Media I (3)</td>
<td>This course builds upon the concepts introduced in Introduction to Multimedia Systems and focuses upon digital photographic creation and editing.</td>
</tr>
<tr>
<td>PGY 3930C</td>
<td>Special Topics: Photography (3)</td>
<td>PR: ART 2201C, ART 2203C, ARH 2050, ARH 2051, ART 2301C, ART 3310C, PGY 2401C, PGY 3410C. A mid-level course expanding the student's visual and technical skills while establishing the beginning of a personal artistic direction by exposing the student to new ideas, technical skills and genres, including, but not limited to: color photography, digital photography, non-silver and documentary photography. Repeatable up to 9 hours.</td>
</tr>
<tr>
<td>PGY 4420C</td>
<td>Advanced Photography (3)</td>
<td>PR: ART 3939, ARH 4450, ARH 4475C,PGY 3410C (3 cr.), PGY 3930C (9 cr.) and a 3.25 major GPA. Continued problems in photography.</td>
</tr>
<tr>
<td>PHC 2100</td>
<td>Introduction to Public Health (3)</td>
<td>A course serving as primer to study of public health. Provides overview of core disciplines of public health, and platform for future undergraduate study in public health.</td>
</tr>
<tr>
<td>PHC 3302</td>
<td>Introduction to Environmental &amp; Occupational Health (3)</td>
<td>Introduces the principles of environmental health from a public health perspective. This course is designed for students with an interest in the environment, assessment of risk, human health issues, and control strategies to reduce health risks.</td>
</tr>
<tr>
<td>PHC 3320</td>
<td>Environmental Health Science (3)</td>
<td>Introduces students to environmental health science topics in the context of their impact on human and public health. It is open to all major programs. It may not be repeated for credit.</td>
</tr>
</tbody>
</table>
### PHC 4030 Introduction to Epidemiology (3)
Course provides an overview of epidemiological methods and the application to understanding health- and non-health issues. Students will develop critical thinking skills and apply the concepts to applied problems, both in and outside the field of health.

### PHC 4031 Emerging Infectious Diseases (3)
This course addresses important infectious diseases and the principles of detection, diagnosis, prevention and control as well as the impact on public health. Students will present information on emerging infectious disease trends in group projects.

### PHC 4032 Foundations of Infection Control (3)
This course is based on infection control competencies from the board certification in infection control exam. With successful completion of this course, students will demonstrate mastery and application of these principles to real-world situations.

### PHC 4069 Biostatistics in Society (3)
This course exposes students to the role of biostatistics in advancing healthcare and improving health through landmark studies and cases in a wide range of fields, including clinical trials, epidemiology, environmental studies, and healthcare evaluation.

### PHC 4101 Overview of Public Health Programs and Policies (3)
A survey of policies and programs in public/community health with emphasis on specific needs and problems of Florida.

### PHC 4116 Public Health in Selected Locations (3)
This course provides an experiential overview of public health in selected locations. This will include site visits to public health agencies, organizations and communities to examine various levels and functions of public health.

### PHC 4117 Workforce & Leadership Development (3)
This course will provide students with an overview of the skills that are necessary to find and obtain employment in the field of public health. It will also cover leadership styles & skills so that students can succeed as public health professionals.

### PHC 4140 Introduction to Public Health Geographic Information Systems (3)
PR: MAC 1105 with a minimum grade of C, STA 2023 with a minimum grade of C, ENC 1101 with a minimum grade of C
This course covers the theory and application of geographic information systems (GIS) for public health and includes an overview of the principles of GIS and its use.

### PHC 4141 Intervention Program Planning and Management (3)
The purpose of this course is for students to describe and implement the basic principles of health education intervention planning, management, and evaluation. Students will present their program to fellow class members.

### PHC 4188 Public Health Emergencies in Large Populations (3)
This course is designed to develop or improve the skills of persons interested in providing emergency health services in global humanitarian emergencies for refugees and displaced populations.

### PHC 4234 Public and Private Continuity Planning for Emergencies (3)
This course identifies, examines and integrates the diverse emergency management, crisis management, contingency planning, and organizational continuity, recovery and restoration issues facing public and private sector organizations.

### PHC 4241 Psychology of Fear & Mental Health Issues Related to Disasters (3)
This course covers how emergency management better meets the needs of children, families, and communities after a disaster through well-timed targeted/response and interventions.

### PHC 4250 Crisis Leadership in Disasters (3)
Explore analytical and intuitive aspects of leadership during disasters including the root cause of domestic and international disaster prevention, preparedness, response, recovery, and mitigation challenges while identifying solutions to complex problems.

### PHC 4375 Community Participation in Homeland Security (3)
This course is intended as an introduction to the role of volunteers in emergency management.

### PHC 4376 Disaster by Design: Exercise Development for Homeland Security Professionals (3)
This course is an introduction to the Homeland Security Exercise and Evaluation Program and will discuss the role of planning, training, and exercises in the context of organizational preparedness for emergency management related activities.

### PHC 4431 Economic Rationale of Health Policy (3)
PR: PHC 2100, HSC 4630
This course introduces the economic rationale for policies that regulate health care markets, focusing on the market failures that triggered policy changes and the successes and failures of those policies.
PHC 4464 Introduction to Health Disparities & Social Determinants (3)
This course provides an overview of health disparities. We will examine social and cultural determinants of health, including race/ethnicity, geography, SES, gender, sexual orientation, disability status, migration status, age, religion and spirituality.

PHC 4471 College Peer Health Education (3)
This course provides students the opportunity to become certified peer health educators and receive credit for career-related, "real world" work experience as they provide health education to USF students.

PHC 4472 Health and Wellness Coaching: Core Methods (3)
Introduction to core frameworks, methods, and skills required for Health & Wellness Coach credentialing. Emphasis is placed on professional competencies & skill building practice to effectively guide clients toward healthy and sustained lifestyle change.

PHC 4501 Health Education Theory and Behavior (3)
Development of a basic understanding of the major theories and models focused on the development, implementation, and evaluation of health education interventions.

PHC 4582 Health Education Methods and Strategies (3)
The purpose of this course is for students to describe and develop those health education methods, communication, and advocacy strategies to enhance the public's health.

PHC 4720 Foundation to Professional Writing in Public Health (3)
This course provides students the opportunity to learn about all aspects of professional writing techniques including grammar and spelling errors, writing styles, authorship, reference and citation systems, and guidance for scientific communication.

PHC 4734 College Peer Health Research (3)
This course provides students the opportunity to conduct "real world" research on the health and wellness issues of college students through an internship with the Peer Academy in the University of South Florida's Center for Transdisciplinary Research.

PHC 4755 Foundations of Evaluation and Research in Public Health (3)
Course covers evaluation and research including literature reviews; ethical issues; differences between evaluation and research; define quantitative and qualitative, use of spreadsheet for budgets and data analysis, and communication of results.

PHC 4931 Health Care Ethics (3)
This course provides the student with a broad overview of health care ethics. Will cover ethical issues that concern a wide variety of health professionals who are interested in clinical situations, as well as public health professionals and researchers.

PHC 4941 Health and Wellness Coaching Practicum (3)
PR: PHC 4472 with a minimum grade of C. Students will demonstrate competencies required for Health & Wellness Coaching credentialing through engaging as a Health & Wellness Coach in professional/clinical practice settings under the supervision of a certified health and wellness coach.

PHC 4942 Public Health Field Seminar (3)
PR: PHC 4101. This course provides students with an overview of field experiences in public health. Representatives from public health organizations will speak about worksites. Students will observe public health professionals in their practice environment. Repeatable for a maximum of 12 credit hours.

PHH 3062 History of Western Philosophy: Ancient Philosophy (3)
A survey of Western philosophy from the Pre-Socratics to Late Antiquity.

PHH 3280 Medieval and Renaissance Philosophy (3)
This course is a survey of medieval and early Renaissance philosophy in the Latin West, focusing on the thought of Augustine, Anselm, Peter Abelard, Thomas Aquinas, John Duns Scotus, and William Ockham.

PHH 3420 Early Modern Philosophy (3)
A survey of Western Philosophy from the end of the Renaissance to the beginnings of the Enlightenment.

PHH 3442 Late Modern Philosophy (3)
A survey of Western Philosophy during the Enlightenment.

PHH 4440 Continental Philosophy (3)
A study of developments in post-Kantian European philosophy.
PHH 4600 Contemporary Philosophy (3)
Selected schools of twentieth century thought such as idealism, positivism, pragmatism, realism, and existentialism.

PHH 4820 Chinese Philosophy (3)
A survey of Confucianism, Taoism and other aspects of Chinese thought. The course is available to both majors and non-majors and does not have laboratory sections associated with it.

PHI 1103 Critical Thinking (3)
Critical thinking is the mind's faculty for catching its own (potential or actual) mistakes, and correcting its own misapprehensions. We will hone this faculty by practicing the critical evaluation of real-world decisions.

PHI 1401 Science and Society (3)
As consumers of scientific information, it is our social obligation to understand how scientific knowledge comes about. This course is about the process of scientific inquiry, and about scientific knowledge as the product of such inquiry.

PHI 1600 Introduction to Ethics (3)
In order to promote reflection concerning how we should act and what kinds of people we should be, this course introduces students to ethical theories, concepts, problems, and methods.

PHI 2010 Introduction to Philosophy (3)
An introduction to several major themes in philosophy, as well as central philosophical concepts, texts, and methods.

PHI 2101 Introduction to Formal Logic (3)
This course is an introduction to the basic terms, concepts, and methods of formal logic.

PHI 2630 Contemporary Moral Issues (3)
Open to all students. A study of contemporary moral issues concerning racism, sex, sexism, abortion, poverty, crime, war, suicide, and human rights in general.

PHI 3130 Formal Logic (3)
PR: PHI 2101 or MGF 1106 or MGF 1107 or one semester of calculus.
A study of predicate calculus, predicate calculus with identity, formal semantics, and elementary metalogic. Strongly recommended for philosophy majors.

PHI 3403 Paradoxes, Pathologies, and Provocations in Science (3)
Conflict in the practice of science takes many forms, from collegial disagreement to outright fraud. We consider both the science and the philosophy of areas such as evolution, quantum physics, climate change, and polywater.

PHI 3404 Philosophy of Science (3)
How is science different from other methods of inquiry about the world? What distinguishes science from pseudoscience? From religion? How do we test scientific theories? What are the factors that lead scientists to accept a theory?

PHI 3633 Biomedical Ethics (3)
This course will focus on the ethical issues arising from advances in medical practice, delivery of health care, and scientific research.

PHI 3636 Professional Ethics (3)
An examination of the ethical problems that professionals will face in the complex, global society of the next few decades: confidentiality, divided loyalty, racism/sexism, etc.

PHI 3640 Environmental Ethics (3)
A study of alternative theories of environmental ethics, including the application of these theories to contemporary environmental problems, such as pollution, resource depletion, species extinction, and land use.

PHI 3700 Philosophy of Religion (3)
Analysis of religious experience and activity and examination of principal religious ideas in light of modern philosophy.

PHI 3930 Selected Topics (3)
Selected topics according to the needs of the student.

PHI 4300 Theory of Knowledge (3)
An examination of human knowledge; its scope and limits, and an evaluation of evidence, criteria of truth, the nature of belief, conditions for meaningfulness, theories of perception, and a study of memory and sense perception in the four major fields of nature, history, personal experience, and the a priori.

PHI 4320 Philosophy of Mind (3)
A study of historical and current issues in philosophy of mind, including the nature and status of mind, mind/body dualism, the relationship of mind and body, the problems of other minds, the physical basis for intelligence.

PHI 4632 Feminist Ethics (3)
A study of the varied approaches to moral reasoning taken by feminist ethical writers such as Wollstonecraft, Mill, Gilligan, Daly, Hoagland and others.

PHI 4670 Contemporary Ethical Theory (3)
A survey of contemporary ethical theory, focusing both on the literature about the status of ethical theorizing--moral skepticism, moral nihilism, narrative ethics--and on specific types of theories--deontological theories, consequentialist theories, rights-based theories, virtue theories.

</table>
PHY 2053 General Physics I (3)
PR: MAC 1140 and MAC 1114, or MAC 1147.
CR: PHY 2053L
First semester of a two semester sequence of non-calculus-based general physics (mechanics, heat, wave motion, sound, electricity, magnetism, optics, modern physics) for science students.

PHY 2053L General Physics I Laboratory (1)
CR: PHY 2053
First semester of a two semester sequence of general physics (mechanics, heat, wave motion, sound, electricity, magnetism, optics, modern physics) laboratory for science students.

PHY 2054 General Physics II (3)
PR: PHY 2053, PHY 2053L.
CR: PHY 2054L
Second semester of non-calculus based general physics. Topics studied include electricity and magnetism, optics and modern physics.

PHY 2054L General Physics II Laboratory (1)
PR: PHY 2053, PHY 2053L
CR: PHY 2054
Second semester of general physics lab for science students.

PHY 2060 Enriched General Physics I with Calculus (3)
PR: MAC 2311 or MAC 2281 with minimum grade of 'A'.
CR: PHY 2048L
First semester of an enriched sequence of calculus based general physics designed for physics majors and other students seeking a deeper understanding of mechanics, kinematics, conservation laws, central forces, harmonic motion, and mechanical waves.

PHY 2061 Enriched General Physics II with Calculus (3)
PR: MAC 2312 or MAC 2282 and PHY 2060 or PHY 2048 with a minimum grade of B
CR: PHY 2049L
Second semester of an enriched sequence of calculus based general physics designed for physics majors and other students seeking a deeper understanding of thermodynamics, electricity, magnetism, electromagnetic fields and waves, circuits, and optics.

PHY 3101 Modern Physics (3)
PR: PHY 2049, MAC 2283 or MAC 2313.

PHY 3220 Classical Mechanics (4)
PR: PHY 3101 and PHZ 3113.
Topics covered: Newtonian mechanics, oscillatory motion, gravitation, Lagrangian and Hamiltonian Dynamics, Central-Force Motion, Dynamics of a System of Particles, Dynamics of Rigid Bodies, and Non-linear and coupled oscillations.

PHY 3221 Mechanics I (3)
PR: PHY 3101 and PHZ 3113.
First semester of a two-semester sequence. Review of vector algebra and vector calculus. Dynamics of single particles and systems of particles; central forces; rotation about an axis; statics; and virtual work.

PHY 3323 Electricity and Magnetism I (3)
PR: PHY 3101 and PHZ 3113.
Electrostatic fields and potentials, dielectrics, classical conductivity, RC circuits, Fourier and finite element methods. First semester of sequence PHY 3323, PHY 4324.

PHY 3822L Intermediate Laboratory (3)
CPR: PHY 3101.
Experiments in modern physics, including the areas of atomic, nuclear, solid state and wave phenomena.

PHY 4324 Electricity and Magnetism II (3)
PR: PHY 3323.
Introduction to special relativity, magnetic fields and potentials, magnetic materials, RL and RLC circuits, Maxwell's equations and applications.

PHY 4424 Optics (3)
PR: PHY 3101
Reflection, refraction, dispersion, interference, diffraction and polarization.

PHY 4523 Statistical Physics (3)
PR: PHY 3221 or PHY 3323 of PHY 4604.
Statistical approach to thermodynamics and kinetic theory and introduction to statistical mechanics.

PHY 4604 Introduction to Quantum Mechanics (3)
PR: PHY 3101 and PHZ 3113.
Basic concepts of quantum mechanics with applications in atomic, nuclear, and condensed matter physics.

PHY 4605 Quantum Mechanics II (3)
PR: PHY 4604.
Second semester of a two-semester sequence in quantum mechanics. Focus given to applications of Schrodinger equation.

COURSE DESCRIPTIONS
(AS OF SEPTEMBER 20, 2021)

UNIVERSITY OF SOUTH FLORIDA 2021-2022 UNDERGRADUATE CATALOG

POR 1120 Beginning Portuguese I (4)
Development of basic skills in listening and reading comprehension, speaking and writing of Brazilian Portuguese.

POR 1121 Beginning Portuguese II (4)
PR: POR 1120 with a minimum grade of C or placement test.
Development of basic skills in listening and reading comprehension, speaking and writing of Portuguese. Portuguese 1 and Portuguese 2 are not designed for native speakers or heritage speakers of Portuguese.

POR 2200 Intermediate Portuguese I (3)
POR 2200 builds upon the four language skills (speaking, comprehension, reading, and writing) introduced in POR 1120 and POR 1121.

POR 2201 Intermediate Portuguese II (3)
For language students who intend to attain basic proficiency.

POR 3010 Accelerated Portuguese (4)
Accelerated Portuguese course (structure and vocabulary as spoken in Brazil) for speakers of Spanish or other Romance languages. Exposes students to some aspects of Portuguese speaking cultures.

POR 4905 Directed Study (5)
Course permits study options in Portuguese not available in the regularly scheduled curriculum at departmental discretion. May be repeated up to 10 hours. S/U Only. Departmental approval required.

POR 4930 Selected Topics (3)
Course permits study options in Portuguese not available in the regularly scheduled curriculum at departmental discretion. May be repeated up to 10 credit hours. Departmental approval required.

POS 2041 American National Government (3)
This course is intended to introduce students to the theory, institutions, and processes of American government and politics. In addition to learning fundamental information about the American political system, this course is designed to help students think critically about American government and politics.

POS 2080 The American Political Tradition (3)
This course is an introductory survey of the historical developments and changes in American political institutions, processes, and thought.

POS 2112 State and Local Government and Politics (3)
Analysis of the structure and function of state and local governments, of the social and political influences that shape them, and of the dynamics of their administrative processes.

POS 3078 Veterans' Reintegration and Resilience (3)
This course seeks to better understand the socio-political challenges and opportunities encountered by military veterans as they attempt to rejoin American society.

POS 3142 Introduction to Urban Politics and Government (3)
Governmental and political structures and processes as they function in urban areas, with special focus on municipalities and locally based public services.

POS 3173 Southern Politics (3)
Examines changes in electoral politics in the South, and the role of interest groups and the state and federal government in facilitating change.

POS 3182 Florida Politics and Government (3)
A study of Florida political culture, political parties and elections, the legislative, executive, and judicial systems, and policy patterns.

POS 3273 Practical Politics (3)
Coordinated scholarly and practical activity through class lecture and supervised field work in local political parties and election campaigns.

POS 3275 The Campaign Process (3)
Lectures will cover topics such as the motivation and the decision to run for the office, developing a campaign strategy, the role of political parties in modern campaign. Students will intern on a major campaign as a major course requirement.

POS 3453 Political Parties and Interest Groups (3)
Analysis and understanding of role, functions, structure, and composition of such, and their impact on American governmental institutions.

POS 3691 Introduction to Law and Politics (3)
Nature of law, legal process, relationship to political life of constitutional law, administrative law, the judicial process, and private law.

POS 3697 Environmental Law (3)
Examines some of the major issues involving environmental law. Specially, the course provides a survey and analysis of statutes, both state and federal, regulating water, air, soil pollution, and resource conservation and recovery. It will also address questions pertaining to problems of implementation, interpretation, enforcement, and development of environmental laws.

POS 3713 Empirical Political Analysis (3)
Fundamentals of empirical political inquiry: systematic data collection and quantitative analysis techniques. Laboratory exercises using the computer are required.

<tr>
<td>PSB 3842</td>
<td>Sleep and Dreams (3)</td>
<td></td>
<td>An overview of the psychological and physiological foundations of sleep and dreams. Disorders and disturbances of sleep and cultural perspectives on sleep and dreams.</td>
</tr>
<tr>
<td>PSB 4004C</td>
<td>Physiological Psychology (3)</td>
<td>PR: PSY 3213 with a grade of C or better</td>
<td>Gross neural and physiological components of behavior. Structure and function of the central nervous system and theory of brain functions.</td>
</tr>
</tbody>
</table>
### PSC 2515 Energy and Humanity (3)
Explores energy use and its environmental impacts, including climate change. Energy resources, including alternatives to fossil fuels, are discussed. Basic science concepts as well as contemporary technologies are covered.

### PSY 2012 Introduction to Psychological Science (3)
This course is an introduction to psychology for majors and nonmajors. It presents psychological theory and methods in a survey of various areas of psychology including clinical, cognitive, developmental, health, industrial, social and biopsychology.

### PSY 3017 Psychological Science II (3)
PR: PSY 2012
Designed as an in-depth examination of the basic principles and concepts of psychological science. Extensive coverage will be given to the areas of learning, perception, physiological psychology, and cognition.

### PSY 3204 Psychological Statistics (3)
PR: PSY 2012.
Introduction to analyzing psychological data, in the context of behavioral research. Covers basic research design, descriptive statistics, analysis procedures, use of computer analysis packages, interpretation of outputs, and implications for research.

### PSY 3213 Research Methods in Psychology (4)
PR: PSY 3204 or STA 2023 or STA 2122 or QMB 2100, with a grade of C or better.
This course considers the logic of experimental design, concept of control and the analysis of experimentally obtained data. The laboratory section provides experience applying the concepts discussed in lecture. Two lectures plus two-hour lab.

### PSY 3630 Psychology of Human-Animal Interactions (3)
This course will introduce students to the interdisciplinary field of Human-Animal Interactions from a psychological perspective and an overview of current issues in Human-Animal Studies.

### PSY 4205 Experimental Design and Analysis (3)
PR: PSY 3213 with grade of C or better
Detailed coverage of those research designs and statistical techniques having the greatest utility for research problems in psychology. Emphasis on topics from analysis of variance.

### PSY 4215 Discovering Research in Psychology (3)
PR: PSY 3213 (with grade of C+ or better)
This course involves advanced study of approaches to research in psychology and development of various research skills as preparation for conducting independent research.

### PSY 4604 History and Systems of Psychology (3)
PR: PSY 3213 with a grade of C or better
The historical roots of modern psychological theories, investigation of the various schools of psychology such as behaviorism, Gestalt psychology, psychoanalysis, and phenomenological psychology.

### PSY 4913 Directed Study (3)
PR: PSY 3213.
The student plans and conducts an individual research project or program of directed readings under the supervision of a faculty member. S/U only.

### PSY 4931 Selected Topics: Seminar (3)
PR: PSY 3213 with a grade of C or better
Graduate-type seminar designed to provide the advanced undergraduate student with an in-depth understanding of a selected sub-area within psychology.

### PSY 4932 Honors Seminar (3)
PR: PSY 3213 with a grade of C or better
The student, under supervision of a faculty member, will complete a thesis project.

### PSY 4938 Pro Seminar (3)
PR: PSY 3213
This course is intended to provide advanced undergraduates with a “capstone” experience in psychology and provides the opportunity to synthesize and apply learning from other courses as they explore a specific topic, which will vary.

### PSY 4970 Honors Thesis (3)
PR: PSY 3213 with a grade of C or better
The student, under supervision of a faculty member, will complete a thesis project.

### PUP 4002 Public Policy (3)
Examines the formation and implementation of public policy in areas such as the economy, health, etc.

### PUP 4203 Environmental Politics and Policy (3)
Examines the politics of environmental issues, formation and implementation of environmental policy.

### PUP 4323 Women and Politics (3)
An analysis of the impact of gender on power and influence in American society, and women’s changing role in the political process.

COURSE DESCRIPTIONS
(AS OF SEPTEMBER 20, 2021)

UNIVERSITY OF SOUTH FLORIDA 2021-2022 UNDERGRADUATE CATALOG

RED 4333 Content Area Reading (3)
In-depth study of reading comprehension, cognition and learning, metacognition, reading and writing in the content areas. Candidates learn research supported comprehension strategies and procedures applicable to content area reading.

RED 4335 Teaching Reading in Secondary English Curriculum (3)
Analysis of the reading process; introduction to diagnosis of reading abilities; reading and study skill strategies to increase student achievement in reading.

RED 4348 Literacy Development (3)
CR: EDG 3943.
This course for preservice teachers focuses on foundations of reading and learning principles that lead to successful readers, including ESOL and ESE students. Instructional strategies and materials for early literacy development are introduced.

RED 4511 Linking Literacy Assessment to Instruction (3)
PR: RED 4310.
This course will prepare pre-service teachers to use multiple assessment measures to assess and diagnose students' strengths and needs in literacy learning. Based on individual student profiles, teachers will design instruction to enhance literacy development.

RED 4724 Intermediate Literacy Strategies and Assessment I (3)
PR: RED 4312.
The purpose of this course is to create an understanding of developmentally appropriate, research-based theories and practices that support children's literacy learning in the intermediate grade levels.

RED 4943 Practicum in Supporting Students with Reading Difficulties (3)
Students will work one-on-one with a child experiencing difficulties in reading and writing. Students will conduct assessments, plan and deliver lessons that draw on research-based instructional practices, and engage in critical self-reflection.

REE 3043 Real Estate Decision Making (3)
PR: FIN 3403 with a minimum grade of C
Acquaints students with the range of knowledge required to engage in real estate decision-making in the United States. Integrates the institutional framework with which decisions are made, the elements of financial analysis, deal structuring and marketing, and the pricing, financing, and allocation of real property in the real estate markets.

REE 4940 Real Estate Internship (3)
PR: FIN 3403 with a minimum grade of C, REE 3043 with a minimum grade of C
This course has both an academic component (that focuses on professional development skills) and an on-site experiential learning experience with an approved real estate company, greatly increasing students' chances of finding meaningful employment.

REL 2166 Introduction to Religion and Ecology (3)
This course introduces students to the academic study of religion with a focus on the relationship between religion and ecology, and the developing subfield of Religious Studies concerned with this relationship.

REL 2240 Introduction to the New Testament (3)
An introduction to the critical study of the New Testament in the context of Christian beginnings in the first century C.E. This will include readings from the Apocrypha, other Gospels, and letters.

REL 2300 Introduction to World Religions (3)
Introduction to World Religions is designed to give students a broad and general overview of the major religious traditions of the world. Students will be exposed to the history, primary beliefs, and information necessary for a primary understanding of each of the religions studied in the course.

REL 3040 Introduction to Religious Studies (3)
This course introduces students to the academic study of religion. Religious thought and behavior are examined from a variety of methodological perspectives. Restricted to majors and minors. Required for the major and the minor in Religious Studies.

REL 3043 Introduction to Major Religious Texts (3)
The course provides an introduction to the study of some of the foundational texts of selected religious traditions by focusing on reading and interpretative strategies in order to understand the central beliefs and practices presented in these texts.

REL 3063 Religion and Social Justice (3)
This course introduces students to the ethical world-views of major world religions and how they understand the concept of social justice. It explores the intersection between theory and practice with respect to how people live on a daily basis.

REL 3084 Religion: Peace & Conflict (3)
This course explores the relations between religion, peace & conflict as it manifests itself today. Using case studies of multiple religious traditions, we will analyze incidents of violence in response to social, political, and historical circumstances.
REL 3111 The Religious Quest in Contemporary Films (3)
This course uses contemporary films such as Gandhi, Malcolm X, The Long Walk Home, The Chosen, and Grand Canyon to explore the personal and social aspects of religion in modern secular societies, pinpointing issues of racism, sexism, liberation, etc.

REL 3117 Religion and Contemporary American Sports (3)
This course explores the function of sports in America. It covers the history of sports; the status of American sports; and sports as religious events. The course is open to majors and nonmajors and is not repeatable for credit.

REL 3120 Religion in America (3)
To examine the movement from state church to pluralism in American religious institutions, the religious results of non-Protestant immigration; the Jewish factor; the effect of home missions and social concern programs upon American life; political entanglements and the concept of church/state separation.

REL 3131 New Religions in America (3)
This course entitled New Religions in America is designed to give students an overview of the rich religious history of America particularly in regard to the unique cultivation of new religious movements in America spanning from 1850 – the present.

REL 3132 Witchcraft and Paganism in America (3)
A study of contemporary witchcraft and paganism, including theories, methods, history, myths and symbols, beliefs, rituals and practices, believers, recruitment, socialization, and organizations.

REL 3140 Religion, Culture, and Society (3)
Introductory scholarly survey of religion in its complex relationship to culture and society, including definitions and theories of religion, research methods, becoming religious, social organization, and interconnections with other social institutions. Open to non majors.

REL 3145 In Search of the Goddess (3)
This course explores Goddess religion/sacred Feminine, from prehistory, to the pagan Near East and Mediterranean, Western monotheistic religions, pluralistic religions of the East, and revivals of Goddess spirituality in contemporary Europe/N. America.

REL 3146 Women and Religion (3)
Analysis of the status and roles of women as compared to men in the Judeo-Christian tradition. Contemporary issues of feminist theology, and the controversies surrounding them.

REL 3167 Sustainable Development and Religion (3)
In the course students will research one or more of the seventeen (17) UN Sustainable Goals, in conjunction with a related Tampa Bay area problem, while considering the different roles of religion in relation to the challenge posed.

REL 3170 Religion, Ethics and Society Through Film (3)
An ethical analysis of contemporary social issues through contemporary films such as Wall Street and Crimes and Misdemeanors, drawing on religious narrative traditions from Eastern and Western cultures which have contributed to the development of an ethic of human dignity, human rights and human liberation after Auschwitz and Hiroshima.

REL 3191 Life After Death (3)
An exploration of ideas about life after death and its relations to this life in Judaism, Christianity, Islam, Hinduism, and Buddhism.

REL 3192 Agrarianism and the Sacred (3)
Students will be exposed to agrarianism through the lens of Religious Studies in the context of culture, history, foundational beliefs, current forms and expressions, and how agrarian ideals may be put into practice in contemporary culture.

REL 3280 Biblical Archaeology (3)
An in depth examination of the archaeological data relating to the background and content of the Bible, including ancient customs, Biblical sites and cities, Biblical history, and material culture of the Biblical period. Special attention will also be given to excavation methods and interpretation of archaeological evidence.

REL 3303 Comparative Religion: Judaism and Islam (3)
This course is framed within the academic study of religion, and it does not concern itself with contemporary political difference in the Middle East. It treats as Islam the normative statements of the Quran and related traditions, and as Judaism the authoritative statements of the Torah, oral and written.

REL 3308 World Religions (3)
World Religions gives students an overview of the major religions of the world from their origins through the modern period. Special attention is given to the analysis of myths, rituals, history, and other features of the religions.

REL 3335 Gods and Goddesses of India (3)
This course explores the ways Hindus see, speak about, and encounter the Divine through an examination of the multitude of stories about the gods and goddesses and their various physical manifestations in the sacred geography of India.

<tbody>
<tr>
<td>RTV 3001</td>
<td>Introduction to Telecommunications (3)</td>
<td>PR: MMC 2100 and MMC 3602.</td>
<td>A survey of the organization, structure, and function of the broadcasting industry.</td>
</tr>
<tr>
<td>RTV 3301</td>
<td>Broadcast News (3)</td>
<td>PR: MMC 2100 and MMC 3602.</td>
<td>Methods in gathering, writing, and editing newscasts for radio and television.</td>
</tr>
<tr>
<td>RTV 3411</td>
<td>Race, Gender, &amp; Class Issues in the Media (3)</td>
<td></td>
<td>This course is a survey of how those outside mainstream American life, whether by race, ethnicity, gender of socio-economic class are portrayed in and sometimes marginalized by mainstream media. Emphasis on news media with a secondary focus on entertainment.</td>
</tr>
<tr>
<td>RTV 3543</td>
<td>Multi Camera Field Production (3)</td>
<td>PR: RTV 3301 with a minimum grade of C</td>
<td>The Multi Camera Field Production course is designed to blend and emphasize professional-level television production with post-production editing. Programs will be produced as Live or Live to Tape.</td>
</tr>
<tr>
<td>RTV 4304</td>
<td>TV News (3)</td>
<td>PR: RTV 4321</td>
<td>Advanced television reporting, integrating broadcast news writing, ENG production and television performance.</td>
</tr>
<tr>
<td>RTV 4321</td>
<td>Electronic Field Production (3)</td>
<td>PR: RTV 3001 and RTV 3301.</td>
<td>Advanced producing, scripting, lighting, camera, and editing for video and news production. Introduction to computer editing and graphics.</td>
</tr>
<tr>
<td>RTV 4332C</td>
<td>Documentary Production (3)</td>
<td>PR: RTV 4321 with a minimum grade of C</td>
<td>This course offers instruction in the theory and practice of production of non-fiction documentary video. Students produce a final video product after studying the documentary tradition, theory, and history.</td>
</tr>
<tr>
<td>RTV 4500</td>
<td>Telecommunications Programming and Management (3)</td>
<td>PR: RTV 3001.</td>
<td>Program and management concepts, resources, costs, selection, and scheduling. Analysis of programming and management in terms of structures, appeals and strengths.</td>
</tr>
<tr>
<td>RTV 4522C</td>
<td>Drone Videography (3)</td>
<td></td>
<td>This course is designed to teach the basic safety rules and legal regulations associated with the use of drones as well as how to use aerial footage to enhance the art of digital media storytelling.</td>
</tr>
<tr>
<td>RTV 4542</td>
<td>TV Production and Direction (3)</td>
<td>PR: RTV 3001 and RTV 3301</td>
<td>A basic course in the techniques of producing and directing TV programs.</td>
</tr>
<tr>
<td>RTV 4942</td>
<td>TV Practicum (1)</td>
<td>PR: RTV 4542</td>
<td>Practical experience outside the classroom where the student works for academic credit under the supervision of a professional practitioner. Periodic written and oral reports to the faculty member coordinating the study.</td>
</tr>
<tr>
<td>RTV 4942C</td>
<td>TV Practicum: Florida Focus (3)</td>
<td></td>
<td>Practical experience at USF studios where students work for academic credit under faculty supervision. Students report, produce and edit for newscasts. Students participate in studio and control room operations for show that airs on TV. Application only.</td>
</tr>
<tr>

<td>Overseas Study (6)</td>
<td>PR: Two years Russian</td>
<td>Intensive Russian at Moscow Linguistic University with excursions in Moscow and Russia. Students from other institutions eligible.</td>
</tr>
<tr>
<td>RUS 3500</td>
<td>Russian Civilization (3)</td>
<td></td>
<td>A survey of the cultural history of Russia.</td>
</tr>
</tbody>
</table>
### RUS 4241 Russian Language & Culture through Film II (3)
PR: RUS 3240 or equivalent.
Development of conversational skills.

### RUS 4900 Selected Topics (3)
Study of an author, movement or theme.

### RUS 4905 Directed Study (3)

### RUT 3110 Nineteenth Century Russian Literature in English (3)
Masterpieces of 19th Century Russian Literature in English. Works by Pushkin, Gogol, Lermontov, Turgenev, Dostoevsky, Tolstoy, Chekhov.

### RUT 3111 Twentieth-Century Russian Literature in English (3)
Survey of the major authors of 20th Century Russian literature in English. Major works of Babel, Bulgakov, Olesha, Pasternak, Solzhenitsyn, and Zamyatin.

### SCE 2041 Foundations of Science and Science Education (3)
Course employs tools and exploratory assignments to aid students in a discovery style of learning. Testing and experimenting allow students to draw conclusions on how science works. The virtual activities provide an engaging way of exploring concepts.

### SCE 3941 Practicum I: Middle School Science Education (3)
1. The candidate will spend six hours a week in an assigned school, becoming acquainted with the middle grades classroom, and providing supervised one-on-one, small group and whole group instruction and will attend university seminars.

### SCE 3942 Practicum II: Middle School Science Education (3)
Candidates will spend nine hours a week in an assigned school, in a grade level or subject area other than the one completed in Practicum I, providing supervised one-on-one, small group, and whole group instruction, and will attend university seminars.

### SCE 4305 Communication Skills in the Science Classroom (3)
Reading and communication skills important in understanding scientific and science education literature and communicating findings to others.

### SCE 4310 Teaching Elementary School Science (3)
Techniques and materials for teaching science in the elementary school.

### SCE 4313 Science for all Students (3)
Designed to equip students with inquiry- and standards-based techniques and materials for teaching elementary school-aged children science. Includes strategies and resources for teaching English language learners and students with exceptionalities.

### SCE 4320 Teaching Methods in Middle Grade Science I (3)
CR: EDM 3403, SCE 3941 and SCE 3942
The purpose of this course for education majors is to develop pedagogical content knowledge as it pertains to the teaching and learning of science, concentrating on skills and strategies necessary to teach science at the middle school level.

### SCE 4330 Methods of Secondary Science Education (3)
The purpose of this course for science education majors is to develop pedagogical content knowledge as it pertains to the teaching and learning of science in grades 6-12.

### SCE 4863 Science, Technology, Society Interaction (3)
Achieve an historical and philosophical understanding of (1) the nature of the scientific enterprise: interaction of science, technology, and society (STS), (2) how to teach STS including the use of computers and related technologies, and (3) intricacies of sample STS topics.

### SCE 4936 Senior Seminar in Science Education (3)
CR: SCE 4940.
Synthesis of teacher candidate's courses in complete college program.

### SCE 4940 Internship: Science Education (9)
CR: SCE 4936.
One full semester of internship in a public or private school.

### SCE 4941 Internship I: Middle School Science Education (2)
1. Candidates will spend each day of the semester in an assigned school implementing acquired knowledge from Practicum I and II, with increased responsibility for planning instruction and assessing student learning, and will attend internship seminars.

### SCE 4942 Internship II: Middle School Science Education (2)
Internship II is a continuation of Internship I. Candidates will spend each day of the semester co-teaching in the same school, with responsibility for planning instruction and assessing impact on student learning, and will attend internship seminars.
### SCE 4945 Practicum in Secondary Science Education (3)

CR: SCE 4320. This practicum provides students majoring in biology, chemistry or physics education with structured field experiences in science classrooms at the secondary school level. Restricted to majors and non-repeatable for credit.

### SCM 3005 Supply Chain Management (3)

Supply Chain Management is the study of the end-to-end coordination of physical, information, and financial flows across companies from raw material inputs to delivery of products and services to customers and end consumers.

### SCM 3144 Global Sourcing (3)

Global sourcing includes analysis of the sourcing environment and components of the international distribution system emphasizing information flows and the application of quantitative techniques to establish and control strategic sourcing.

### SCM 4120 Global Commerce (3)

A study of logistics in the marketing of goods and services. Includes a description and analysis of the logistics environment as well as components of the physical distribution system with emphasis on information flows and the application of quantitative techniques used in establishing and controlling customer service levels.

### SCM 4210 Logistics and Physical Distribution Management (3)

Provides a comprehensive overview of the fundamentals of global commerce including the logistics of importing and exporting. Focus on regulatory, economic, and infrastructure differences that affect the movement of goods and services across the world.

### SCM 4240 Logistics and Physical Distribution Management (3)

This course introduces students to software tools and decision support models that are frequently used in the design and operation of integrated global supply chains.

### SCM 4912 Undergraduate Research (3)

In this course, students will conduct a project that enables them, individually or in groups, to pose or work from a defined research question, apply methods of inquiry to generate findings, and share the findings with others.

### SCM 4941 Supply Chain Management Internship (3)

The internship course consists of two components: an academic component focused on professional development skills and an on-site experiential learning experience comprised of at least 120 hours of on-site experience. 

### SCM 4950 Supply Chain Management Capstone Project (3)

This Supply Chain Management Capstone course is designed for students to integrate knowledge and skills acquired across the Supply Chain Program and apply them in case analyses and a collaborative capstone project.

### SDS 3341 Career Development for Student Athletes (3)

This course will prepare student athletes for transition to life after college. Students will identify career options based on interests, values and skills, research occupations, make effective decisions & learn job search techniques.

### SDS 4942 Practicum in Career Development for Student-Athletes (2)

This course was designed to ensure undergraduates have practical experience engaging in a mentor relationship with professionals in our community in order to lay a foundation toward a sustainable support system for post-collegiate success.

### SLS 1101 The University Experience (3)

An extended introduction to USF. Topics include purposes of higher education, structure and function of USF, career planning, selecting a major, study skills, managing time, academic advising, computer resources, and decision-making.

### SLS 1107 Foundations for University Success (3)

This course is designed to develop skills required for success in university courses & campus life such as: -effective use of campus resources - community engagement -critical thinking & writing skills -academic & career planning.

### SLS 2122 Foundations of Professional Success (2)

PR: SLS 1107

This lower-level required course is designed to develop the skills required for success in university courses and the workplace. The course seeks to guide students toward self-discovery and enable the mapping of appropriate career and academic paths.

### SLS 2320C Exploring and Mapping Your Career Journey (3)

This is a project-based/experiential learning course providing students with guidance in developing their career journey map and components of dynamic career goal, career action plan, and personal mission statement supported through an ePortfolio.
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SLS 2401</td>
<td>Explore Career Pathways (3)</td>
<td>Students will study vocational choice theories and participate in career decision processes. Development of self-awareness and knowledge of career opportunities and requirements necessary for decision making.</td>
</tr>
<tr>
<td>SLS 2901</td>
<td>Academic Foundations Seminar (3)</td>
<td>This course offers an introduction to students’ first years at USF that is designed to prepare them for a successful college experience. The course provides the necessary knowledge and experiences for students to be successful personally and academically.</td>
</tr>
<tr>
<td>SLS 3113</td>
<td>Critical Thought for Academic Transitions (3)</td>
<td>This course is designed to facilitate transfer students’ academic integration into a research university. Students will gain an understanding of the academic standards and expectations at a research university and discover how to be successful.</td>
</tr>
<tr>
<td>SLS 3275</td>
<td>Student Leadership on Campus (3)</td>
<td>This course promotes leadership and university knowledge among student leadership candidates. Students will learn about communication, customer service, team dynamics, student transition issues, academic support and issues of diversity, among many other topics.</td>
</tr>
<tr>
<td>SLS 3308</td>
<td>Job Search (3)</td>
<td>Students will prepare for a smooth transition to the ever-evolving workplace by becoming aware of current job seeking trends and skills that will promote success in the job search process.</td>
</tr>
<tr>
<td>SLS 3407</td>
<td>Strategies for Veteran Success (3)</td>
<td>This course facilitates the transition from military service to college with the goal of promoting student Veteran retention, graduation and job placement. It seeks to assist military veteran students in their integration into life outside the military.</td>
</tr>
<tr>
<td>SLS 3717</td>
<td>Peer Tutor Training (0)</td>
<td>The purpose of this course is to provide training in theory and strategies for individual and group peer tutoring. This course will analyze such topics through discussion, group work, lecture, supplemental reading, and the exploration of learning patterns.</td>
</tr>
<tr>
<td>SOP 4004</td>
<td>Social Psychology (3)</td>
<td>PR: PSY 3213 with a grade of C or better Survey of methods, empirical findings, and theoretical interpretations in the study of an individual's behavior as it is affected by others.</td>
</tr>
<tr>
<td>SOP 4330</td>
<td>Social Psychology of HIV/AIDS (3)</td>
<td>PR: PSY 2012, PSY 3017, PSY 3213 Students study social psychology theory and research while working at an AIDS service organization. They use the research as a framework for understanding, and developing solutions to, problems confronting the organization’s staff and clients.</td>
</tr>
<tr>
<td>SOP 4450</td>
<td>Psychology of Religion (3)</td>
<td>PR: PSY 2012 with a minimum grade of C, PSY 3204 with a minimum grade of C The purpose of this course is to introduce students to the empirical study of the psychology of religion and spirituality. This course will also focus on the origin of this field of study, including the pioneering work of William James.</td>
</tr>
<tr>
<td>SOP 4702</td>
<td>Psychology of Gender (3)</td>
<td>PR: PSY 2012 and PSY 3204, with a minimum grade of C- CR: PSY 3213, with a minimum grade of C- This course is designed to introduce students to the psychological study of gender, from developmental, biological, social, and cultural perspectives.</td>
</tr>
<tr>
<td>SOP 4723</td>
<td>Cross-Cultural Psychology (3)</td>
<td>PR: PSY 2012 with a minimum grade of C, PSY 3204 with a minimum grade of C Cross-cultural psychology focuses on understanding culture and psychology, emphasizing cross-cultural research methodology and critical thinking. Cross-cultural psychology underscores the connections between culture, emotions, thoughts, and behaviors.</td>
</tr>
<tr>
<td>SOP 4744</td>
<td>Women's Mental Health (3)</td>
<td>PR: PSY 2012 or PSY 3204 or PSY 3213 with a minimum grade of C This course will stimulate students’ critical engagement of research related to the psychology of women. This course will also enable students to understand women’s experiences resulting from biological and social/cultural factors.</td>
</tr>
<tr>
<td>SOP 4751</td>
<td>Psychology Applied to Law (3)</td>
<td>PR: PSY 3213. Course is designed to explore the application of psychological research and theory to the problems faced by the Legal System. Students will be given a broad overview of the relevant topics, problems, and methodologies in the field of Psychology and Law.</td>
</tr>
</tbody>
</table>
### SOP 4777 Psychology of Human Sexuality (3)
- **PR:** PSY 2012, PSY 3204, STA 2122, and a General Biology course.
- *This course is designed to extend students' understanding of psychology to the diverse nature and construct of human sexuality, sexual dysfunction, identity, and culture, focusing upon psychological factors. The course approaches this topic from a multidimensional perspective.*

### SOW 3101 Human Behavior and the Social Environment I (3)
- An integrating human behavior-social environment course emphasizing dynamics of behavior and environmental factors as they relate to social work practice with individuals, and families.

### SOW 3102 Human Behavior and the Social Environment II (3)
- **PR:** SOW 3101, SOW 4341, SOW 4522.
- *An integrating course emphasizing dynamics of behavior and environmental factors as they relate to social work practice with families, groups, organizations and communities.*

### SOW 3203 Introduction to Social Work (3)
- An introductory course tracing the development of social work as a profession including an examination of the knowledge, skill and attitudinal base of the profession and professional roles and functions.

### SOW 3210 The American Social Welfare System (3)
- A general education introductory course which provides students with a framework for understanding the historical development of American social welfare, its value base, and its response to minorities, women, children, the elderly, and the disabled.

### SOW 3401 Research and Statistics For Social Work (3)
- **PR:** SOW 3101, SOW 4343, SOW 4522.
- *The purpose of this course is two-fold: to familiarize the student with research as it is practiced in the profession of Social Work; and to equip the student with those theoretical understandings necessary to be a critical consumer of social work research.*

### SOW 3802 Happiness and Well-Being (3)
- *This course provides a research-experiential approach to understanding happiness and well-being. It provides students the opportunity to explore a deeper understanding of their ability to increase the well-being of others.*

### SOW 4134 Living Latinx: Social Work Practice (3)
- *This course provides content that informs social work practice with Latinx individuals, families, groups, and communities. Special attention will be given to Latinx physical and mental health issues.*

### SOW 4233 Social Welfare Policy and Program Analysis (3)
- **PR:** SOW 3101, SOW 3401, SOW 4341, SOW 4522, SOW 3102, SOW 4343
- *CR: SOW 4510C, SOW 4510L An advanced policy course taking an analytical approach to contemporary social welfare policy issues and current social welfare programs.*

### SOW 4315 Social Work Case Management with Special Populations (3)
- **PR:** SOW 4341
- *This course is designed to develop student knowledge, skills, and values for providing effective case management services in a variety of setting. Students become aware of evidence-based case management practices with at risk populations.*

### SOW 4341 Multi-Methods of Social Work Practice I: Micro-System Intervention (3)
- **CR:** SOW 3101; SOW 4522
- *First practice course emphasizing development of skills and interventive methods with individuals, families and small groups. Course includes both didactic and experiential learning components.*

### SOW 4343 Multi-Methods of Social Work Practice II: Macro-System Intervention (3)
- **PR:** SOW 3101, SOW 4522, SOW 4341
- **CR:** SOW 3401, and SOW 3102
- *Second practice course emphasizing intervention at the community and organizational level. Builds upon theoretical and practical content of SOW 4341. Course includes both didactic and experiential learning components.*

### SOW 4414 Social Work Data Management (2)
- **PR:** SOW 3401
- *The purpose of this course is to introduce students to quantitative tools used to describe/interpret data used in social work practice, research and policy formation. Students learn to plan and conduct analyses guided by understanding of social work.*

### SOW 4510C Integrative Seminar and Field Placement (9)
- **PR:** SOW 3210, SOW 3301, SOW 3101, SOW 3102, SOW 3401, SOW 4341, SOW 4343, SOW 4522
- *The course provides a professionally supervised field practicum (placement) in a community-based agency, which is accompanied by a field seminar to provide a structured environment in which to integrate academic course work with the field placement.*
SOW 4522 Multicultural America in a Global Society (3)
This course is an introduction to the study of diverse cultures, abilities, and norms which comprise our global society. The content centers on the diverse client systems that practitioners will be called upon to interface with in their different roles.

SOW 4602 Social Work Practice in Mental Health and Health Care (3)
PR: SOW 4343
The purpose of this course is to introduce students to social work practice in mental health and health care settings. Students will be introduced to a variety of mental health and health assessments and interventions.

SOW 4910 Directed Research (6)
PR: Completion of four social work courses including SOW 3401
Directed Research is intended to provide students with research experience in areas of specific interest in social work. A contract will be developed between student and instructor specifying nature of work to be completed.

SOW 4930 Variable Topics in Social Work (3)
Variable title courses to expand on the four sequence areas in the Social Work core curriculum. Allows focus on areas relevant to student's educational interest.

SPA 3002 Introduction to Communication Sciences and Disorders (3)
This course involves an introduction to the field of study of Communication Sciences and Disorders. Access will be provided to the most current theories, research and practices through rich examples, videos, expert speakers and anecdotes.

SPA 3004 Introduction to Language Development and Disorders (3)
This course introduces theoretical concepts and research findings concerning the normal developmental process of language learning as a basis for differentiating developmental delay or disorder of language.

SPA 3011 Introduction to Speech Science (3)
PR: SPA 3030, SPA 3112.
Concentrated study of the acoustic, physiological and perceptual aspects of sound as related to normal and pathological speech communication. Introduction to instrumentation and measurement procedures.

SPA 3030 Introduction to Hearing Science (3)
Introduction to the field of hearing including: physics of sound, auditory anatomy and physiology, and psychophysics of hearing.

SPA 3101 Anatomy and Physiology of the Speech and Hearing Mechanism (3)
The neurological and anatomical basis of communication disorders. Comparisons of normal and pathological organic structures and their functional dynamics.

SPA 3112 Applied Phonetics in Communication Disorders (3)
Introduction to phonetic analysis of normal and disordered speech, including training in phonetic transcription of normal and disordered speech using the International Phonetic Alphabet.

SPA 3261 Language Science for Comm. Sciences & Disorders (3)
This course will present a focused introduction to linguistics and psycholinguistics from the perspective of CSD. Students will learn the fundamentals of language structure, basic facts about language processing, and how they relate to CSD.

SPA 3310 Introduction to Disorders of Hearing (3)
PR: SPA 3030
The etiology, pathology, and management of disorders of the outer ear, middle ear, inner ear, retrocochlear, and central auditory systems.

SPA 3470 Culture and Diversity in CSD (3)
An in-depth exploration of diversity issues within CSD. Consideration of groups and cultures of various groups highly represented in the US. Application of concepts to scenarios which affect ASL interpreters, speech pathologists, and audiologists.

SPA 4031 Survey of the Profession of Audiology (3)
This course provides an overview of audiology as a profession. Topics include the history of the profession, clinical practice settings, responsibilities of an audiologist, and clinical, professional, ethical and legal issues related to audiology.

SPA 4050 Introduction to the Clinical Process (3)
PR: SPA 3004 and SPA 3310.
Observation and participation in speech-language pathology and audiology services provided at USF-CSD clinical laboratory. Professional and ethical issues, oral and written communication skills are stressed through clinical and practical projects.

SPA 4052 Case Studies and Observation (3)
PR: SPA 3003, SPA 3102, SPA 3262
This course consists of communication disorders case studies, along with clinical observation will provide students with the link between knowledge and clinical settings.
### COURSE DESCRIPTIONS

(AS OF SEPTEMBER 20, 2021)

<table>
<thead>
<tr>
<th>Course Number</th>
<th>Course Title</th>
<th>Prerequisites</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPA 4104</td>
<td>Neuroanatomy for Speech, Language and Hearing (3)</td>
<td>SPA 3101 (highly recommended).</td>
<td>Students will learn neuroanatomical &amp; neurophysiological principles, structures, and functions that subserve speech, hearing, language and cognition. A case-based approach will enable understanding of behavioral manifestations of neuropathologies.</td>
</tr>
<tr>
<td>SPA 4210</td>
<td>Vocal Disorders (3)</td>
<td>SPA 3011 and SPA 3310.</td>
<td>A comprehensive study of the medical and physical aspects of voice disorders. Differential diagnosis, principles of therapeutic intervention, and procedures for children and adults will be stressed.</td>
</tr>
<tr>
<td>SPA 4222</td>
<td>Fluency Disorders (3)</td>
<td>SPA 4201</td>
<td>A comprehensive study of disfluent speech behavior. Differential diagnosis, principles of therapeutic intervention, and procedures for children and adults will be studied. Major theories and models of the development and origin of stuttering are also presented.</td>
</tr>
<tr>
<td>SPA 4250</td>
<td>Introduction to Speech Disorders (3)</td>
<td>SPA 3101.</td>
<td>This course will provide an overview of the mechanisms involved in speech production, and will review the nature and impact of speech sound disorders, fluency disorders, voice and resonance disorders, and organic speech disorders.</td>
</tr>
<tr>
<td>SPA 4257</td>
<td>Adult Communication Disorders (3)</td>
<td>SPA 4104</td>
<td>This course provides an overview of communication disorders seen in adult populations &amp; prepares students for clinical encounters with this population. The disorders include those involving language, cognitive-communication, &amp; speech &amp; motor control.</td>
</tr>
<tr>
<td>SPA 4321</td>
<td>Introduction to Audiologic Rehabilitation (3)</td>
<td>SPA 3310</td>
<td>Assessment and management of individuals with hearing loss. Topics include: effects of hearing loss; assessment and intervention, including: a) amplification and cochlear implants; b) speechreading and auditory training; c) communication intervention.</td>
</tr>
<tr>
<td>SPA 4510</td>
<td>Intro. to Clinical Methods and Counseling in CSD (3)</td>
<td>SPA 3004, SPA 3310.</td>
<td>This course introduces the student to fundamental skills and knowledge needed prior to beginning clinical work in speech-language pathology/audiology. Professional/ethical issues, principles of assessment/intervention,&amp; interviewing skills are included.</td>
</tr>
<tr>
<td>SPA 4632</td>
<td>Nature and Needs of the Deaf and Hard of Hearing (3)</td>
<td>ASL 3514 with a minimum grade of C-</td>
<td>This course presents an overview of the diverse identities, communication choices, audiological realities, and educational options common to the American Deaf and Hard-of-hearing communities.</td>
</tr>
<tr>
<td>SPA 4901</td>
<td>Research Methods in Communication Sciences and Disorders (3)</td>
<td></td>
<td>This course introduces students to principles of research in CSD &amp; provides an introduction to advanced areas of study in the field. Students are presented with the basic tools of research &amp; will learn about the breadth of research conducted in the field.</td>
</tr>
<tr>
<td>SPA 4906</td>
<td>Independent Study (0)</td>
<td></td>
<td>Indep. Study will allow UG students to work independently under the supervision of Faculty members in the pursuit of content gained independently. The course is repeatable for a total of 10 credits. Majors only.</td>
</tr>
<tr>
<td>SPA 4910</td>
<td>Directed Research (0)</td>
<td></td>
<td>Directed Research will allow the UG student to obtain supervised research experience under the direction of a Faculty member. The course is repeatable for a total of 10 credits. Majors only.</td>
</tr>
<tr>
<td>SPA 4930</td>
<td>Selected Topics (3)</td>
<td></td>
<td>Intensive study of topics in Speech-Language Pathology, Audiology, and/or Aural Rehabilitation conducted under the supervision of a faculty member.</td>
</tr>
<tr>
<td>SPA 4962</td>
<td>Undergraduate Comprehensive Examination (1)</td>
<td>INT 4206, INT 3004</td>
<td>This purpose of this course is to ensure that graduates from ITT are thoroughly prepared for entry into the job market. For majors only and repeatable if necessary. It consists of 2 parts: individual meetings with an advisor and a comprehensive exam.</td>
</tr>
<tr>
<td>SPA 4970</td>
<td>Honors Thesis (0)</td>
<td></td>
<td>The student, under the supervision of a Faculty member will formalize, conduct, analyze and report in writing a research project in the Department of Communication Sciences and Disorders. The course is repeatable for a total of 10 credits. Majors only.</td>
</tr>

<tr>
<td>SPC 2608</td>
<td>Public Speaking (3)</td>
<td></td>
<td>The nature and basic principles of human communication; emphasis on improving speaking and listening skills common to all forms of oral communication through a variety of experiences in public discourse.</td>
</tr>
<tr>
<td>SPC 3212</td>
<td>Communication Theory (3)</td>
<td></td>
<td>The study of source, message, and receiver variables in human communication; communication settings; descriptive and predictive models of communication; communication as a process.</td>
</tr>
<tr>
<td>SPC 3301</td>
<td>Interpersonal Communication (3)</td>
<td></td>
<td>A study of interpersonal communication in informally structured settings with emphasis on the understanding, description, and analysis of human communication.</td>
</tr>
<tr>
<td>SPC 3425</td>
<td>Group Communication (3)</td>
<td></td>
<td>A survey of theory and research in group communication. Group discussions and communication exercises to increase awareness of the dynamics of human communication in small group settings.</td>
</tr>
<tr>
<td>SPC 3544</td>
<td>Persuasion and Media (3)</td>
<td></td>
<td>This course develops critical awareness of the persuasive messages encountered in an information-rich society. Introduces key concepts and theories of persuasion, with emphasis on the role of socio-technical systems and mediated communication.</td>
</tr>
<tr>
<td>SPC 3602</td>
<td>Advanced Public Speaking (3)</td>
<td>PR: SPC 2608</td>
<td>with grade of C- or above Study and application of communication strategies in speaking extemporaneously and from manuscript. The course includes study of selected public addresses as aids to increased understanding of speaking skills.</td>
</tr>
<tr>
<td>SPC 3653</td>
<td>Popular Forms of Public Communication (3)</td>
<td>Analysis of public communication with emphasis on various presentational forms.</td>
<td></td>
</tr>
<tr>
<td>SPC 3680</td>
<td>Rhetorical Analysis (3)</td>
<td></td>
<td>This course introduces students to fundamentals of message analysis. Student examines persuasive strategies and language in oral and written discourse.</td>
</tr>
<tr>
<td>SPC 3710</td>
<td>Communication and Cultural Diversity (3)</td>
<td>Examination of communication and cultural diversity within the United States. Cultural groups include gender, racial and ethnic (e.g., African American, Latino American, Asian American), social class, age and generation, religious (e.g. Jewish) and physical ability.</td>
<td></td>
</tr>
<tr>
<td>SPC 4307</td>
<td>Talk in Relationships (3)</td>
<td></td>
<td>Explores talk as practical action through observation, transcription, and analysis.</td>
</tr>
<tr>
<td>SPC 4431</td>
<td>Family Communication (3)</td>
<td></td>
<td>Examines the processes and functions of communication in family relationships. Examination of scholarly and popular literature on family structure, family systems, family development, and family stories. Analysis of families in fiction and cinema.</td>
</tr>
<tr>
<td>SPC 4701</td>
<td>Intercultural Communication (3)</td>
<td></td>
<td>Explores issues of culture, power, and politics inherent in the ways we practice intercultural communication.</td>
</tr>
<tr>
<td>SPC 4714</td>
<td>Communication, Culture and Community (3)</td>
<td>Examines the relationships among culture, communication, institutions, and public and private life. Students explore the possibilities and problems of contemporary forms of community through service in a volunteer organization.</td>
<td></td>
</tr>
<tr>
<td>SPC 4800</td>
<td>Online Communication (3)</td>
<td></td>
<td>How is communication changing as technologies of mediation are multiplying? In readings and exercises, this class examines online communication as unfolding dynamics of interaction and sites of engagement, allowing students to analyze their own practices.</td>
</tr>
<tr>
<td>SPC 4900</td>
<td>Directed Readings (3)</td>
<td>PR: COM 2000</td>
<td>Individualized reading with professor to complement undergraduate research projects.</td>
</tr>
<tr>
<td>SPC 4903</td>
<td>Honors Readings (3)</td>
<td>PR: COM 2000</td>
<td>with grade of C or better Focused readings directed toward preparation of a proposal for an undergraduate honors thesis.</td>
</tr>

<td>Advanced Spanish Grammar and Composition (3)</td>
<td>SPN 2201</td>
<td>A study of syntax, grammar and writing.</td>
</tr>
<tr>
<td>SPN 3391</td>
<td>Latin American Cinema (3)</td>
<td>SPN 2240</td>
<td>With a minimum grade of C- or better. Interdisciplinary &amp; cross-cultural survey of Latin American Cinema from the 1960's and 1970's to the present. Cover many of the principle countries. Discuss films as cultural, historical, political, &amp; economic products. The course is taught in Spanish.</td>
</tr>
<tr>
<td>SPN 3440</td>
<td>Spanish for Business and International Trade I (3)</td>
<td>SPN 2201</td>
<td>A study of vocabulary and business practices of the Spanish speaking world. Overview of cultural differences within the Spanish speaking world, with emphasis on their impact on business and international trade.</td>
</tr>
</tbody>
</table>
SPN 3441 Spanish for Business and International Trade II (3)
PR: SPN 3440 or equivalent.
Continuation of SPN 3440. A study of vocabulary and business practices of the Spanish speaking world. Overview of cultural differences within the Spanish speaking world, with emphasis on their impact on business and international trade.

SPN 3500 Spanish Civilization (3)
PR: SPN 2201 or equivalent.
The culture and civilization of Spain. For majors and non-majors.

SPN 3514 The Three Cultures of Medieval Spain (3)
In this course students will have the opportunity to explore the history and traditions of three of the world’s leading religions in the context of the Iberian Peninsula and its Jewish, Christian, and Arabic past.

SPN 3520 Spanish-American Civilization (3)
PR: SPN 2201 or equivalent.
Readings and discussions on the culture and civilization of Spanish America. For majors and non-majors.

SPN 3564 Spain Today: Culture and Politics in the Media (3)
This course teaches contemporary culture in Spain through a variety of media and cultural authentic materials. Course primarily discussion-based with short introductions of historical and cultural contexts.

SPN 4301 Expository Writing (3)
PR: SPN 3300 or SPN 2340.
Practical training in contemporary Spanish structure, usage and stylistic devices.

SPN 4410 Advanced Conversation (3)
PR: SPN 2241 or equivalent.
Intensive practice in the formulation and expression of ideas in standard Spanish.

SPN 4470 Advanced Overseas Study (6)
PR: SPN 2270.
Intensive language study in Spain.

SPN 4700 Spanish Linguistics (3)
PR: LIN 3010 or equivalent and SPN 2201 or equivalent.
An introduction to Hispanic linguistics: Phonology, morphology, syntax, and lexicography.

SPS 3003 The Meaning of Madness (3)
We will discuss the effects of the stigma of mental illness on individuals and families; biological, social, and cultural factors that influence mental illness, perceptions of individuals with mental illness, and treatments of mental illness over time and across cultural groups.

SPT 3100 Masterpieces of Hispanic Literature (3)
This course analyzes major literary works from Spain and Latin America. Through a selection of works from the medieval period to the present students will view the intellectual and cultural history of the Spanish speaking world.

SPW 3030 Introduction to Hispanic Literary Studies (3)
PR: SPN 3300 or SPN 2340.
Prose fiction, drama, poetry, and essay; techniques of literary analysis.

SPW 3393 Spanish Culture through Literature and Film (3)
This course teaches modern Spanish culture, history, and thought through a variety of interdisciplinary expressions, such as poetry, narrative, essay, visual arts, and film. The scope of the course spans from the early nineteenth century up to now.

SPW 3512 Religion in Hispanic Literature and Film (3)
This course studies the diverse representations of religions in the Hispanic world through close reading and close viewing of literary and critical texts and films.

SPW 4101 Survey of Spanish Literature II (3)
PR: SPW 3030 or equivalent.
A study of the later periods of Spanish literature.

SPW 4130 Early Latin America Through Literature and Film (3)
PR: SPW 3030 or equivalent.
Introduction to early Latin American literature and culture, from pre-hispanic times to the end of the 19th century through reading, discussion and analysis of texts, movies, music and the arts.

SPW 4131 Survey of Spanish-American Literature II (3)
PR: SPW 3030 or equivalent.
An introduction to the study of Spanish-American literature from the Modernism period to the present. Emphasis on modern writers since Dario.

SPW 4145 Sex and Subversion in Spanish Art, Lit, and Film (3)
This course teaches Spanish culture and thought through a variety of artistic expressions related to the theme of sex and subversion, such as surrealism (art, film, poetry, theatre, essays) and the "new wave" of the 1980s (visual art, film), among others.

<td>Selected Topics (3)</td>
<td></td>
</tr>
<tr>
<td>SSE 4313</td>
<td>Teaching Elementary (K-6) Social Studies (3)</td>
<td>This course is designed to study techniques and strategies employed by K-6 social studies teachers that are effective in motivating elementary school-aged youth to acquire the information, skills, and modes of reasoning unique to the social sciences.</td>
</tr>
<tr>
<td>SSE 4333</td>
<td>Teaching Middle Grades Social Science (3)</td>
<td>This course is designed to study techniques and strategies employed by social sciences teachers that are effective in motivating teenage youth to acquire the information, skills, and modes of reasoning unique to the social sciences. Students are expected to plan and present instructional plan(s) demonstrating use of various methods, techniques, and material that achieve concrete outcomes. Theoretical foundations of social studies are also studied. Fieldwork is required.</td>
</tr>
<tr>
<td>SSE 4334</td>
<td>Teaching Secondary Grades Social Science (3)</td>
<td>PR: SSE 4333. This course is a continuation of SSE 4333 with further development of the instructional techniques and strategies and the information, skills, and modes of reasoning unique to the social sciences with an emphasis on the secondary school environment. The teaching profession, school settings, legal, and classroom management issues are also studied. Fieldwork in a high school is required.</td>
</tr>
<tr>
<td>SSE 4335</td>
<td>Teaching Social Science Themes (3)</td>
<td>PR: SSE 4333 for Undergraduate Students; SSE 5331 for Graduate Students; The course is a laboratory-based, capstone course in which knowledge, skills, and dispositions are demonstrated by students teaching social studies content using the thematic approaches adopted by the National and State accrediting bodies.</td>
</tr>
<tr>
<td>SSE 4380</td>
<td>Global and Multicultural Perspectives in Education (3)</td>
<td>Examination of the major issues surrounding global and multicultural perspectives in education. Available to non-Education majors.</td>
</tr>
<tr>
<td>SSE 4600</td>
<td>Reading and Basic Skills in the Social Studies Class (3)</td>
<td>Reading skills and other basic skills as applied to the social studies are examined. Students plan and present instruction appropriate to the social studies classroom. Fieldwork in middle or senior high schools is required. Restricted to majors.</td>
</tr>
<tr>
<td>SSE 4936</td>
<td>Senior Seminar in Social Science Education (3)</td>
<td>CR: SSE 4940. Synthesis of teacher candidate’s courses and preparation for the professional interview and application process.</td>
</tr>
<tr>
<td>SSE 4940</td>
<td>Internship: Social Science Education (9)</td>
<td>CR: SSE 4936. One full semester of internship in a public or private school. In special programs where the intern experience is distributed over two or more semesters, students will be registered for credit which accumulates from 9 to 12 Semester hours.</td>
</tr>
<tr>
<td>STA 2023</td>
<td>Introductory Statistics I (3)</td>
<td>PR: C (2.0) or better in High School Algebra or Elementary Algebra CPT score of 72 or better. Descriptive and Inferential Statistics; Principles of Probability Theory, Discrete and Continuous Probability Distributions: Binomial Probability Distribution, Poisson Probability Distribution, Uniform Probability Distribution, Normal Dist and more.</td>
</tr>
<tr>
<td>STA 2122</td>
<td>Social Science Statistics (3)</td>
<td>Students are taught the fundamental vocabulary and symbols of statistics as well as commonly used statistical procedures in social sciences. Students conduct analyses, interpret results and make conclusions about research questions.</td>
</tr>
<tr>
<td>STA 3024</td>
<td>Introductory Statistics II (3)</td>
<td>PR: STA 2023. Factorials, ANCOV; multiple curvilinear regression; response surfaces; Latin squares, Split Plots, incomplete designs; distribution free methods.</td>
</tr>
<tr>
<td>STA 3027</td>
<td>Statistics and Probability Connections (3)</td>
<td>PR: MAC 2233 or MAC 2241 or MAC 2281 or MAC 2311. This course will provide prospective teachers with experiences in statistics and probability theory that will help them develop the specialized content knowledge needed to support the teaching of mathematics in middle level education.</td>
</tr>

<td>Basic statistical methods. Estimation, hypothesis testing, regression, ANOVA, and nonparametric methods.</td>
<td></td>
</tr>
<tr>
<td>STA 4322</td>
<td>Introduction to Mathematical Statistics II (3)</td>
<td>MAC 2311, MAC 2312, and MAC 2313 (or MAC 2281, MAC 2282, and MAC 2283), and STA 4321</td>
</tr>
<tr>
<td></td>
<td>This course follows the course STA 4321 &quot;Introduction to Mathematical Statistics I&quot;. STA 4322 is based on the second half of the textbook used in STA 4321. The proposed course is a permanent version of STA 4930 &quot;Advanced Essentials of Statistics&quot;.</td>
<td></td>
</tr>
<tr>
<td>STA 4442</td>
<td>Introduction to Probability (3)</td>
<td>MAC 2313.</td>
</tr>
<tr>
<td></td>
<td>Introduction to probability theory using calculus. Basic ideas of probability and random variables, discrete probability functions, continuous probability densities, joint distributions, transformations of random variables, moments and generating functions of random variables, limit theorems.</td>
<td></td>
</tr>
<tr>
<td>STA 4502</td>
<td>Nonparametric Statistical Methods (3)</td>
<td>STA 4321.</td>
</tr>
<tr>
<td></td>
<td>This course covers the fundamental concepts, and provides examples, of nonparametric statistical methods. Topics to be covered include sample testing, estimation methods, layout models, correlation and regression models, and goodness of fit tests.</td>
<td></td>
</tr>
<tr>
<td>STA 4504</td>
<td>Categorical Data Analysis (3)</td>
<td>STA 4321.</td>
</tr>
<tr>
<td></td>
<td>Fundamental concepts and examples of categorical data analysis. Topics include description and interference using proportions and odds ratios, multi-way contingency tables, logistic regression and other generalized linear models, and log linear models.</td>
<td></td>
</tr>
<tr>
<td>STA 4702</td>
<td>Multivariate Statistical Methods (3)</td>
<td>STA 4321.</td>
</tr>
<tr>
<td></td>
<td>This course covers the fundamental concepts of multivariate analysis. Topics to be covered include Matrix theory and distributions (normal, t, chi-squared, F), inference about multivariate means and inference about covariance structure.</td>
<td></td>
</tr>
<tr>
<td>STA 4852</td>
<td>Applied Time Series (3)</td>
<td>STA 4321 and STA 4442.</td>
</tr>
<tr>
<td></td>
<td>This course covers the fundamental concepts, estimations, and hypothesis testing of discrete time series models. The models will be developed using the autoregressive and moving average processes. Numerous examples will be provided.</td>
<td></td>
</tr>
<tr>
<td>STA 4930</td>
<td>Selected Topics (3)</td>
<td>Rotating topics designed to meet the need and interests of students.</td>
</tr>
<tr>
<td>SUR 2101C</td>
<td>Engineering Land Surveying (3)</td>
<td>Principles of land surveying for engineering practice. Traverses, levels, boundary surveys, route surveys, coordinate geometry, and mapping.</td>
</tr>
<tr>
<td>SYA 3110</td>
<td>Classical Theory (3)</td>
<td>SYG 2000.</td>
</tr>
<tr>
<td></td>
<td>The analysis of the philosophical foundations, central principles, and historical development of Sociological theory. Required for Sociology majors and minors.</td>
<td></td>
</tr>
<tr>
<td>SYA 3300</td>
<td>Research Methods (3)</td>
<td>STA 2122 or equivalent.</td>
</tr>
<tr>
<td></td>
<td>Introduction to the scientific method and its application to social science research. Research design, sampling techniques, and critical evaluation of social research. Required for Sociology majors.</td>
<td></td>
</tr>
<tr>

<td>-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>SYA 4910</td>
<td>Individual Research (3)</td>
<td>PR: Four courses in sociology, including SYA 3300. Content depends on the interest of the student. A contract between the student and the sponsoring faculty member must be signed before class registration.</td>
</tr>
<tr>
<td>SYA 4930</td>
<td>Topics in Sociology (3)</td>
<td>Selected specialized topics in Sociology. Topics such as AIDS in society, drugs in society, problems in education, sociology of childhood, public life, socio-biology. Content will vary by semester and by section. See class schedule for specific contents each semester. This course, in different content areas, may be repeated for credit.</td>
</tr>
<tr>
<td>SYA 4935</td>
<td>Senior Seminar (3)</td>
<td>PR: SYG 2000, SYA 3110, SYA 3300 plus 6 hours of Sociology electives. The opportunity for senior sociology majors to apply sociological theory and methods to topics of relevance in today’s society.</td>
</tr>
<tr>
<td>SYA 4949</td>
<td>Sociological Internship (6)</td>
<td>Supervised placement in community organization or agency for a minimum of 10 hours of volunteer work per week, and a weekly seminar on applying sociological skills and methods in the placement setting.</td>
</tr>
<tr>
<td>SYD 3700</td>
<td>Racial and Ethnic Relations (3)</td>
<td>This course introduces students to a sociological understanding of race and ethnic relations. Students will analyze sociological theories on race and stratification through readings, lectures, discussion, multimedia, and group research projects.</td>
</tr>
<tr>
<td>SYD 4238</td>
<td>Immigrants to America (3)</td>
<td>PR: SYG 2000 or SYG 2010. Examines major sociological debates in the field of immigration with an emphasis on recent immigrants to the United States.</td>
</tr>
<tr>
<td>SYD 4410</td>
<td>Urban Sociology (3)</td>
<td>The social structure of the community in modern industrial societies. Analysis of community change.</td>
</tr>
<tr>
<td>SYD 4411</td>
<td>Urban Life (3)</td>
<td>PR: SYG 2000. This exit course introduces students to the theory and practice of urban and community research. Students will conduct supervised individual and group research on a Tampa Bay neighborhood of their choice.</td>
</tr>
<tr>
<td>SYD 4512</td>
<td>Sustainable Consumption (3)</td>
<td>PR: SYG 2000. 1. This course examines the relationship between the current environmental crisis and the consumer lifestyle shared by most Americans that is spreading globally.</td>
</tr>
<tr>
<td>SYD 4601</td>
<td>Community Building and Social Change (3)</td>
<td>This course will introduce students to the community building paradigm (i.e., how to address collective problems in diverse communities) as well as guide students as they become actively involved in various comprehensive community building initiatives.</td>
</tr>
<tr>
<td>SYG 2000</td>
<td>Introduction to Sociology (3)</td>
<td>This course introduces undergraduate students to the discipline of sociology. During the semester, we will analyze sociological theories, core concepts, and issues through readings, lectures, discussions, films, and hands-on research assignments.</td>
</tr>
<tr>
<td>SYG 3011</td>
<td>Contemporary Social Problems (3)</td>
<td>This course introduces students to a sociological understanding of “contemporary social problems.” Drawing on such concepts as culture, deviance and social institutions, we will analyze varying definitions, causes and solutions to these problems.</td>
</tr>
<tr>
<td>SYG 3235</td>
<td>Latina/Latino Lives (3)</td>
<td>PR: SYG 2000 or SYG 2010. Examines, through films, how sociologists define and study social problems, and investigates the role of the popular media in the construction of social problems. Explores the solutions aimed at social problems in a comparative, international perspective.</td>

</table>
### SYP 4111 Identity and Community (3)
This course is a sociological examination of the meanings of identity in the post-modern era. Topics will include the characteristics of identity at the levels of individuals, institutions, culture, and the processes of identity construction and change.

### SYP 4420 Consumer Culture (3)
**PR:** SYG 2000  
The exploration of how Americans' purchasing behavior connects to larger historical shifts in our economy, including disenchantment, alienation, inequality, and the rise of the credit card society.

### SYP 4510 Sociological Aspects of Deviance (3)
The examination of the social construction of deviance: how deviance is defined, implications of deviance designations. Applications of theories of deviance to questions such as motivations of deviants and implications of criminal justice processing of deviants.

### SYP 4513 Elite Deviance (3)
**PR:** SYG 2000 or SYG 2010  
The course challenges traditional definitions of deviance by examining social harms caused by the very wealthy, corporations, and large organizations such as the federal government.

### SYP 4550 Drugs and Society (3)
Explores the social construction of substance use in the United States. Examines individual users and the popular perspectives on the causes of substance use and abuse such as the medical, psychoanalytic, and sociological models.

### SYP 4650 Sport in Society (3)
An examination of the broad issues concerning sport in both a historical and contemporary perspective. Sport will be viewed in relation to social institutions, economic considerations, mass media, and the sport group as a micro-social system.

### SYP 4651 Gender, Sport, and the Body (3)
**PR:** SYG 2000 or SYG 2010  
Explores ways sport in U.S. culture is organized by and used to recreate gender in social interaction. Examines the recent history of women in sport and questions the relationship between masculinity, sport participation and women's and men's embodiment.

### SYP 4675 Animals & Society (3)
**PR:** SYG 2000.  
Explores the complex role of non-human animals in human society by exploring how we, as humans, socially construct animals.

### SYP 4763 Sociology of Childhood and Youth (3)
**PR:** SYG 2000 or SYG 2010.  
Examines a variety of issues including: child-rearing; invention of adolescence; child abuse; children's schooling; juvenile delinquency; dating; children in the movies; children as consumers; youth culture and rebellion; transition into adulthood.

### TAX 4001 Concepts of Federal Income Taxation (3)
**PR:** ACG 2021 with a minimum grade of C, ACG 2071 with a minimum grade of C  
**CPR:** ACG 3103 with a minimum grade of C  
Major concepts used in taxation of income by federal government including enactment of tax laws, basic tax research, preparation of basic tax returns and exploration of tax policy issues.

### TAX 4011 Federal Tax Accounting II (3)
**PR:** TAX 4001 with a minimum grade of C  

### TAX 4940 IRS VITA Internship (3)
The course consists of two components: an academic component focused on professional development skills and an experiential learning component involving at least 120 hours of practical experience gained through technical training and tax return preparation for low and moderate-income taxpayers through the IRS VITA program.

### THE 2000 Theater and Culture (3)
This course explores the contributions of theater practitioners and audiences to the performance experience, aspects of theater making and an overview of theater history.

### THE 2020 Introduction to Theatre (3)
This course explores the contributions of theater practitioners and audiences to the performance experience, aspects of theater making and an overview of theater history.

### THE 2023 Entry Seminar: Theatre as an Art Form (1)
This is a study of theatre-related career opportunities through lectures, assigned reading, and group projects. This course will aid majors in understanding theatre as an aesthetic art form through discussion and critical evaluation.

### THE 2252 Great Performances on Film (3)
This class traces the evolution of acting styles as evidenced through 100 years of cinema, and explores how movies and actors have mirrored or influenced cultural, political, and social change.

<tbody>
<tr>
<td>THE 2305</td>
<td>Script Analysis (3)</td>
<td></td>
<td>This course teaches theatre students the techniques of close reading of dramatic texts.</td>
</tr>
<tr>
<td>THE 3110</td>
<td>Theatre History I (3)</td>
<td></td>
<td>The study of theatrical production in its cultural context, including theatre architecture, scenography, acting and directing from Greek antiquity to the Elizabethan era. Normally fifteen plays will be read.</td>
</tr>
<tr>
<td>THE 3111</td>
<td>Theatre History II (3)</td>
<td></td>
<td>A study of theatrical production in its cultural context including theatre architecture, scenography, acting and directing from Shakespeare to the contemporary stage. Normally fifteen plays will be read.</td>
</tr>
<tr>
<td>THE 4264</td>
<td>History of Costume (3)</td>
<td></td>
<td>A survey of clothing and dress from Ancient Egypt to the 20th Century with an emphasis on cultural and social influences. (A requirement in the design track/costume.)</td>
</tr>
<tr>
<td>THE 4283</td>
<td>Architecture And Decoration (3)</td>
<td></td>
<td>A survey of architecture and furniture from ancient Egypt to the 20th Century. (A requirement in the design track/scenic.)</td>
</tr>
<tr>
<td>THE 4330</td>
<td>Shakespeare for the Theatre (3)</td>
<td>ENC 1102</td>
<td>Study of select Shakespeare plays through current and past performance. Examination of texts, filmed rehearsals, scholarly sources, and commercial movies. Performance required in face to face sections.</td>
</tr>
<tr>
<td>THE 4401</td>
<td>American Drama (3)</td>
<td>ENC 1102</td>
<td>THE 4401 examines seminal American plays and high quality film adaptations derived from them. Each play is examined as a script for performance and as an object in an aesthetic, social and historic context.</td>
</tr>
<tr>
<td>THE 4434</td>
<td>Caribbean Theatre (3)</td>
<td></td>
<td>A study of plays and popular theatrical forms of the Caribbean including carnival and calypso. The student will investigate the social and political forces that shape the culture of the Caribbean.</td>
</tr>
<tr>
<td>THE 4480</td>
<td>Drama-Special Topics (3)</td>
<td>THE 3110 or THE 3111</td>
<td>A study of a significant playwright or grouping of playwrights, e.g. Moliere, Brecht, recent American dramatists.</td>
</tr>
<tr>
<td>THE 4562</td>
<td>Contemporary Performance Theory (3)</td>
<td>THE 3110 or THE 3111 and one from the following: 4320, 4330, 4360, 4401, 4434, 4435, 4442, 4480</td>
<td>A seminar for advanced students focusing on theatrical and dramatic theory in relation to actual stage practice.</td>
</tr>
<tr>
<td>THE 4574</td>
<td>Sport as Performance (3)</td>
<td></td>
<td>Students will use contemporary theory to critique and analyze the interconnected elements of athletic and stage performance, including the athlete/artist, stadium/stage and audience/spectator. Spanning topics from the body to the arena, team mascots, professional wrestling and social media, the course will inform and expand our knowledge in both disciplines.</td>
</tr>
<tr>
<td>THE 4593</td>
<td>Honors Seminar (2)</td>
<td></td>
<td>Readings in the literature, history and theory of the stage in preparation for Theatre Honors Practicum. Past topics have included New German Theatre, Popular Theatre, New American Theatre, Jacobean Theatre.</td>
</tr>
<tr>
<td>THE 4594</td>
<td>Honors Practicum (3)</td>
<td>THE 4593</td>
<td>Honors Practicum grows out of the Honors Seminar and engages students in workshops or production with guest artists. Past artists have included the Free Theatre of Munich, the San Francisco Mime Troupe, playwrights Eric Overmeyer, Jeff Jones and Gary Hill.</td>
</tr>
<tr>
<td>THE 4595</td>
<td>Honors Thesis (3)</td>
<td>THE 4594</td>
<td>A practical or written thesis related to the seminar and practicum and approved by the departmental honors committee.</td>
</tr>
<tr>
<td>TPA 2200</td>
<td>Introduction to Technical Theatre I (3)</td>
<td>TPA 2290L</td>
<td>An introductory course in technical production including coursework in the areas of scenic construction, theatre production/organization, and sound. Required for Theatre majors. Requires sequential semester enrollment with TPA 2211 and TPA 2291L. Open to non-majors.</td>

COURSE DESCRIPTIONS
(AS OF SEPTEMBER 20, 2021)

TPA 3231 Costume Construction (3)
PR: TPA 3208
A practical course in the drafting of patterns for costuming the actor. Materials, skills, and techniques for construction of costumes and costume accessories will be treated. Included topics are millinery, footwear, jewelry, masks, armor, courtesy; both period and modern.

TPA 3231C Technical Theatre: Costume Construction (3)
PR: TPA 2200 with a minimum grade of C
Intermediate Costume construction techniques. Materials, skills, tools and methods for construction of clothing and garments for entertainment, fashion, and character design will be demonstrated and practiced.

TPA 3251 Drafting and CAD II (3)
PR: TPA 3208
Continuation of TPA 3208. The course will include lectures, demonstrations, field trip(s), individual student presentations, and studio activities. The course work will provide an opportunity to develop your skills and techniques in the visual presentation of various design and technical draftings. Open to non-majors.

TPA 3265 Sound For The Stage (3)
PR: TPA 2200 and TPA 2290LTTPA 2211 - Introduction to Technical Theatre II
Basic study of audio components, fundamental properties of sound, multiple channel recording, editing, reproduction and reinforcement. Methods and techniques used in theatre to create sound effects.

TPA 3289C Technical Theatre I: Scenic Technology (3)
PR: TPA 2200 with a minimum grade of C
Intermediate Scenic Construction techniques and technology are introduced. Topics introduced include stage carpentry, intermediate construction tools and machines, as well as tromp l'oeil painting.

TPA 3296 Design Practicum (2)
PR: TPA 3007C
This is a studio/laboratory course in the practical aspects of production. The course is intended to provide realized production experience to the advanced theatre design student in such areas as costume, lighting, and scenic design; stage properties design; technical direction; and theatrical production craft/skill areas. The student will be individually mentored by a faculty member through the process of developing and realizing a production design/craft/skill.

TPA 3601 Stage Management (2)
CPR: TPA 2200 and TPA 2290L
A practical course in the working organizational function of the stage manager in theatre, dance, opera, and other live performance situations.

TPA 4011 Design Studio I (3)
PR: TPA 3008 and TPA 3208 plus two of TPA 3231, TPA 3221, or TPA 3251
TPA 4011 will include studio design project activities in the areas of costume, lighting, and scenic design. The course work will stress the nature of collaborative work and the various stages and processes involved with the development of a design from the first meeting to the final paper/model design.

TPA 4011C Design Studio: Scenic Design (3)
PR: TPA 3007C with a minimum grade of C
CR: TPA 3208
CPR: TPA 2200 with a minimum grade of C

TPA 4013 Lighting Design (3)
PR: TPA 3008 and TPA 3208
A lighting design course concerned with graphic presentations, color theory, design concepts, and practical experience with computer lighting systems, stressing collaborative work and the various stages and processes in lighting design development.

TPA 4013C Design Studio: Lighting Design (3)
PR: TPA 3007C with a minimum grade of C
CR: TPA 2200
CPR: TPA 3208 with a minimum grade of C
A lighting design course concerned with graphic presentations, color theory, design concepts, and practical experience with computer lighting systems, stressing collaborative work and the various stages and processes in lighting design development.

COURSE DESCRIPTIONS
(AS OF SEPTEMBER 20, 2021)

TPP 3155 Acting II (3)
PR: TPP 2110 and THE 2305
Identify and investigate the fundamental elements of acting as applied to scene exploration, rehearsal, and presentation.

TPP 3230 Laboratory Workshop In Performance (3)
PR: TPP 2110
The content of the course will be governed by student demand and instructor interest.

TPP 3251C Acting the Song (3)
PR: TPP 2110 with a minimum grade of C and Audition
This course will enable the student to approach music and lyrics from the actor's point of view. Lyrics are explored as monologues and music is explored as a way to support the emotional life of the character.

TPP 3252C Musical Theater Scene Study (3)
PR: TPP 3155, TPP 3251C both with a minimum grade of C and audition
This course teaches acting for the musical theatre. It addresses why songs occur, how to transition from dialogue to song, and the use of underscoring. It explores these techniques in distinct genres from the Golden Age of Musical Theater to the present.

TPP 3580 Special Skills In Movement (3)
PR: TPP 2110
Stage combat, circus and acrobatic techniques, and other special techniques of movement.

TPP 3790 Voice for Actors (3)
PR: TPP 2110
A concentrated laboratory on freeing the breathing function, developing body and oral resonance, and strengthening muscles used on the formation of speech sounds.

TPP 4140 Styles of Acting (3)
PR: TPP 3155
Examination of the actor's craft and skills needed to fulfill the demands of classical theatre forms.

TPP 4180 Acting III (3)
PR: TPP 3155
An acting workshop focusing on application of character development and rehearsal techniques over a sustained period leading toward a project showing at semester's end.

TPP 4193 Studio Theatre Performance II (1)
PR: TPP 2190.
A practical laboratory involving the rehearsal and performance of a major production. Activities may include acting, directing, stage management, and the activities of the performance production crews. Placement by audition. If cast in production student must accept role. Required of all Theatre majors. May be repeated. Open to non-majors with CI.

TPP 4221 Audition Workshop for Actors (3)
PR: TPP 3155
Preparation for professional audition; discussion of professional objectives.

TPP 4310 Directing I (3)
PR: THE 2305
An elective sequence in directing. A workshop course in which the student first encounters the basic tasks of the director by preparing and directing one or two scenes and then progresses to more complex scene work in a variety of styles and finally proceeds to the short play or theatre pieces.

TPP 4600 Writing For The Theatre (3)
PR: TPP 3110 or THE 3111.
An elective sequence in writing, in which the student first encounters the problems unique to dramatic language and situation, then progresses to complexities of character, plot, and stage dynamics. Normally the aim would be to complete several performance-worthy self-contained scenes.

TPP 4920 Special Topics in Performance (3)
PR: TPP 2500, TPP 3790 and TPP 3155
A workshop in advanced vocal and movement techniques.

TPP 4923 Music Theatre Workshop (3)
PR: TPP 2110
Exploration of Musical Theatre materials and performance techniques for the performer. Individual and ensemble work.

TSL 4080 ESOL 1 - Curriculum and Pedagogy of ESOL (3)
This course is designed to prepare pre-professional (pre-service) teachers to provide linguistically and culturally appropriate instruction, learning opportunities and assessment for English Language Learners (ELLs) in grades K-12.

TSL 4081 ESOL 2 - Literacy Development in English Language Learners (3)
PR: TSL 4080 or FLE 4317.
This course is designed to provide students with a critical understanding of instructional delivery which caters to the linguistic and literacy needs of minority/heritage communities. Providing students with a sociocultural-critical theoretical framework.

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>TSL 4240</td>
<td>Applied Linguistics in Teaching Diverse Students (3)</td>
<td>3</td>
<td>TSL 4080 and TSL 4081</td>
<td>Instructional applications of teacher's knowledge about language (phonology, morphology, syntax, pragmatics, discourse) and language acquisition in linguistically diverse classrooms.</td>
</tr>
<tr>
<td>TSL 4251</td>
<td>ESOL 3 - Applying Linguistics to ESOL Teaching and Testing (3)</td>
<td>3</td>
<td>TSL 4080 and TSL 4081</td>
<td>This course provides an overview of the components of language, linking them to methods and techniques of providing comprehensible instruction to English Language Learners (ELLs) and supports the development of professional literacy skills.</td>
</tr>
<tr>
<td>TSL 4324</td>
<td>ESOL Competencies and Strategies (3)</td>
<td>3</td>
<td>TSL 4240</td>
<td>Designed to enable participants to meet the special limitations and cultural educational needs of LEP students in content area classes. Designed to provide a theoretical and practical foundation for ESOL competencies and strategies.</td>
</tr>
<tr>
<td>TSL 4344</td>
<td>Foundations of Teaching ESOL in Mainstream Classes (3)</td>
<td>3</td>
<td>TSL 4240</td>
<td>Candidates apply knowledge of theories, policies, and methods of ESOL teaching to content area instruction in English immersion programs. Candidates complete 15 hours of field experience tutoring English learners.</td>
</tr>
<tr>
<td>TSL 4349</td>
<td>Teaching Multilingual Students (3)</td>
<td>3</td>
<td>TSL 4240 and TSL 4344</td>
<td>This course is the final TSL course in the ESOL Endorsement program in Elementary Education. Candidates will plan differentiated instruction for English learners at all levels of bilingual language proficiencies.</td>
</tr>
<tr>
<td>TSL 4362</td>
<td>Methodology of Teaching English Overseas (3)</td>
<td>3</td>
<td>TSL 4240</td>
<td>Designed to introduce and prepare the enrollee in the various facets of teaching English as a foreign language in the overseas setting, including a focus on English as an international language.</td>
</tr>
<tr>
<td>TSL 4941</td>
<td>ESOL Practicum (1)</td>
<td>1</td>
<td>FLE 4317 and FLE 4316</td>
<td>Students will apply knowledge and skills in the areas of ESOL methods, culture, curriculum, assessment, applied linguistics and second language acquisition to teaching English language learners. Restricted to education majors. Not repeatable.</td>
</tr>
<tr>
<td>TSL 4942</td>
<td>TESOL Practicum (3)</td>
<td>3</td>
<td>TSL 4240 and TSL 4344</td>
<td>This course is designed to provide candidates with guided practice in planning and delivering instruction in a linguistically diverse classroom.</td>
</tr>
<tr>
<td>TTE 4003</td>
<td>Transportation and Society (3)</td>
<td>3</td>
<td>TSL 4080 and TSL 4081</td>
<td>This course provides a multidisciplinary introduction to transportation and its impacts on society. It explores how transportation interacts with the economy, the environment and the social and political nature of society.</td>
</tr>
<tr>
<td>TTE 4004</td>
<td>Transportation Engineering I (3)</td>
<td>3</td>
<td>EGN 3321</td>
<td>Principles of surface transportation system development, design, and operations; administration, modal characteristics, capacities, and functional classifications; vehicle kinematics, human factors and minimum design standards; traffic flow theory and queuing, capacity and signalization; transportation planning and economics.</td>
</tr>
<tr>
<td>TTE 4005</td>
<td>Transportation Engineering II (3)</td>
<td>3</td>
<td>TTE 4004</td>
<td>Techniques for the geometric route design of surface transportation systems; horizontal and vertical alignments. Spiral curves, superelevations and earthwork analysis; drainage, soils, and a rigid and flexible pavement design; right-of-way acquisition and Environmental Impacts; site layout &amp; design, and operation of alternate models including bus, air, rail, water, and pipeline facilities and terminals.</td>
</tr>
<tr>
<td>URP 4050</td>
<td>City Planning and Community Development (3)</td>
<td>3</td>
<td>TSL 4240</td>
<td>An introduction to the development, role, and components of city planning, and the political and actual policies of government in attempting to regulate or control urbanization.</td>
</tr>
<tr>
<td>URP 4052</td>
<td>Urban and Regional Planning (3)</td>
<td>3</td>
<td>TSL 4240</td>
<td>Examination of current urban planning and policy issues and debates, such as metropolitan organization and governance, economic development and growth management, edge cities, planning for environmental sustainability.</td>
</tr>
<tr>
<td>URS 3002</td>
<td>Introduction to Urban Studies (3)</td>
<td>3</td>
<td>TSL 4240</td>
<td>An interdisciplinary introduction to the process of urbanization and the diverse communities it has created. Urban areas in the United States, as well as global cities, will be examined.</td>
</tr>
<tr>
<td>URS 4930</td>
<td>Special Topics in Urban Studies (3)</td>
<td>3</td>
<td>TSL 4240</td>
<td>Selected issues and topics in Urban Studies with course content based on student demand and instructor's interest. May be repeated as topics vary.</td>
</tr>
</tbody>
</table>
VIC 3001 Visual Literacy (3)
In this course, learners will journey from looking to seeing in order to identify, critique and discern meaning in visual communication within a cultural, ethical, aesthetic, intellectual and technological context.

VIC 3400C Visual Design for Globalized Media (3)
The course explores the relationship between images and messages in global media and the primary role that visual design plays in globalized media presentations.

VIC 3943 Visual Communication Internship (3)
Practical experience outside the classroom where the student works for academic credit under the supervision of a professional practitioner. Periodic written and oral reports to the faculty member coordinating the study.

VIC 4311 InfoGraphics Design (3)
This course is designed to use principles to construct and create visual representation of news information. Advanced techniques with Adobe illustrator and Photoshop to design signage, logos, charts and tables, new graphics and other creative projects will be used.

WOH 2022 Global History since 1750 (3)
This course offers an introduction to the major themes and events in modern global history from 1750 to the present.

WOH 2030 World History since 1815 (3)
This course will examine the major events and developments of world history since 1815, with particular attention to the political, cultural economic and technological dynamics that have shaped global history and the interaction among peoples since 1815.

WOH 3209 Terrorism in World History (3)
This course examines the history of terrorism from the first century A.D. to the present and explores the historical context and consequences of terrorist movements in their historical milieu.

WOH 3245 History of Sports from National to Global Contexts (3)
This class will analyze the development of modern sports (soccer, baseball, basketball, netball, tennis) in the Americas. Students will discuss the meaning of sports in modern culture, from the end of the nineteenth century to globalization.

WOH 3293 Islam in World History (3)
This course examines the origins, spread, and development of Islam within the context of the main global historical processes and events of the past 1500 years.

WOH 3423 Epidemics and Pandemics in World History (3)
This course examines epidemics and pandemics in world history, from antiquity to the present, with a focus on the political, economic, social, cultural, and medical consequences of various infectious diseases.

WST 2250 Female Experience in America (3)
This course explores the lives and experiences of women and girls in America from 1870 to the present, examining how issues of gender, race, class, ethnicity, and sexuality shaped both their experiences and our historical understanding of their lives.

WST 2600 Human Sexual Behavior (3)
The dynamics of human sexuality: biological, constitutional, cultural, and psychological aspects. The range of sexual behavior across groups. Sources of beliefs and attitudes about sex, including sex roles and especially human sexuality.

WST 3006 Careers & Professionalism in WGS (3)
Focus on professional, career, and personal strategies and skills within a feminist and social justice framework, with special attention on balancing ethics/career and on sex, gender, race, and orientation in the contemporary workplace.

WST 3015 Introduction to Women’s Studies (3)
This course introduces the interdisciplinary field of Women’s Studies through a critical examination of the way gender, race, class and sexuality are socially constructed and demonstrates how activism is inherent in Women’s Studies discourse.

WST 3311 Issues in Feminism (3)
Survey of major issues relevant to the female experience: marriage and the family, sexuality, work, creativity.

WST 3324 Women, Environment and Gender (3)
PR: BSC 1005 or BSC 2010, any Introductory science course from biology, chemistry, physics, public health or WST 4320. Investigation of intersection of women’s studies, gender and environment with focus on women’s health. Exploration of hypothesis formulation and testing, current issues.

WST 3334 Queer Film & Television (3)
Examines how queerness is figured within film and television to produce sexual identities, represent non-heteronormative sexualities, and both reify and challenge norms of gender and sexuality.
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Course Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>WST 3370</td>
<td>Women and Social Action (3)</td>
<td>Course focuses on ordinary women working collectively in diverse social settings to empower themselves and others to challenge gender stereotypes; to reduce harassment, poverty, violence and homelessness; to enhance healthcare and family life and to confront barriers in education, the media and the criminal justice system.</td>
</tr>
<tr>
<td>WST 3380</td>
<td>Sexualities Studies (3)</td>
<td>Overview of the interdisciplinary field of sexuality studies, covering theories of sexualities, social control and regulation, and how sexualities intersect with other axes of identities such as race, gender, class, age, and ability.</td>
</tr>
<tr>
<td>WST 3412</td>
<td>Women in the Developing World (3)</td>
<td>Survey of status of women in Asia, Africa, Latin and Caribbean America, compared to that in USA, Canada, West Europe, Marxist-Leninist countries. (May also be taken for credit in Government and International Affairs.)</td>
</tr>
<tr>
<td>WST 3602</td>
<td>Introduction to LGBTQ Cultures (3)</td>
<td>Explores the experiences of people who identify as lesbian, gay, bisexual, transgender, and/or queer (LGBTQ).</td>
</tr>
<tr>
<td>WST 4002</td>
<td>Feminist Research Methods (3)</td>
<td>PR: WST 3015. The survey, design, and practice of qualitative and quantitative methods in feminist research. Restricted to majors; non-majors by permission of instructor.</td>
</tr>
<tr>
<td>WST 4106</td>
<td>Global and Transnational Feminism (3)</td>
<td>Women, gender, and feminism in transnational perspective, focusing on various theories and movements engendered in diverse contemporary geopolitical contexts. Development, globalization, reproductive politics, and women's health will be examined.</td>
</tr>
<tr>
<td>WST 4110</td>
<td>Women and Social Justice (3)</td>
<td>PR: WST 3015. This course examines the complexities of transnational social justice for women by investigating health, violence, reproduction and work within the context of international human rights law, nationalist policies, and global capitalism.</td>
</tr>
<tr>
<td>WST 4262</td>
<td>Literature by Women of Color in the Diaspora (3)</td>
<td>An introduction to contemporary women writers of color in the U.S.: Native Americans, African Americans, Asian Americans, and Chicanas/U.S. Latinas. Readings will include literature and contextual articles on historical and cultural issues.</td>
</tr>
<tr>
<td>WST 4310</td>
<td>History of Feminism in the U.S. (3)</td>
<td>A study of feminist critiques of American women's experiences and status, and their implications for women's lives, by 19th- and 20th-century theorists, and how adequately these various critiques address the intersections of gender, class, ethnicity, and race.</td>
</tr>
<tr>
<td>WST 4320</td>
<td>Politics and Issues in Women's Health (3)</td>
<td>This course will focus on celebrating women's health and wholeness: mental, physical, emotional, spiritual, social, economic, and understanding the potential negative effects of institutional and interpersonal oppression on health and wellness.</td>
</tr>
<tr>
<td>WST 4336</td>
<td>Feminist Theories of Media &amp; Popular Culture (3)</td>
<td>This course surveys key topics, people, concepts, theories, and issues under the general topic of feminist theories of the media and popular culture using critical frameworks that account for power, access, representation, and difference.</td>
</tr>
<tr>
<td>WST 4350</td>
<td>Women and Science (3)</td>
<td>An examination of selected issues related to women and the natural and physical sciences including: historical participation of women in science, current status of women in science, and feminist critiques of science as a discipline.</td>
</tr>
<tr>
<td>WST 4522</td>
<td>Classics in Feminist Theory (3)</td>
<td>Intellectual and political history of queer theory; theories of sexuality, gender, sociality, and subjectivity; emphasis on sexual variation across cultures.</td>
</tr>
<tr>
<td>WST 4561</td>
<td>Contemporary Feminist Theory (3)</td>
<td>PR: one upper division Women's Studies course. An exposure to and an exploration of a wide range of current feminist theories and debates, as well as an examination of the possible political and practical implications for various theoretical positions.</td>
</tr>
<tr>
<td>WST 4645</td>
<td>Queer Theory (3)</td>
<td>To provide advanced students with interdisciplinary research experience in areas of specific interest.</td>
</tr>
<tr>
<td>WST 4900</td>
<td>Directed Readings (3)</td>
<td>Directed Readings (3) To provide advanced students with interdisciplinary research experience in areas of specific interest.</td>

</tr>
<tr>
<td>WST 4935</td>
<td>Capstone/Senior Project (3)</td>
<td>PR: 24 credit hours in Women's Studies. Recognizing the interplay between personal connections and intellectual experience, this capstone course is designed to focus on topical areas related to women's studies and facilitate linking student learning experience to future plans.</td>
</tr>
<tr>
<td>WST 4940</td>
<td>Internship in Women's &amp; Gender Studies (3)</td>
<td>PR: 12 credits of Women's Studies courses. Supervised work-and-learning experience in women's and gender studies under the direction of a University faculty member/administrator and an employee of a sponsor organization. Restricted to majors only. Repeatable once for a total of 6 credit hours.</td>
</tr>
<tr>
<td>ZOO 3205C</td>
<td>Advanced Invertebrate Zoology (4)</td>
<td>PR: BSC 2010, BSC 2010L, BSC 2011, BSC 2011L, CHM 2045, CHM 2046, plus completion of one of the following Biology core courses: PCB 3023 or PCB 3043 or PCB 3063 or PCB 3712. Phylogeny, taxonomy, development, physiology, macro-, microanatomy and natural history of marine/freshwater dwelling invertebrate phyla (including protists and excluding parasites and insects) covered in integrated manner. Extensive lab work/Some fieldwork.</td>
</tr>
<tr>
<td>ZOO 3407</td>
<td>Biology of Sharks and Rays (3)</td>
<td>PR: BSC 2010, BSC 2010L, BSC 2011, BSC 2011L, CHM 2045, CHM 2046 OR CALCULUS (MAC 2241, MAC 2281, MAC 2311) OR STA 2023. The course explores the diversity, taxonomy, anatomy, behavior, ecology, physiology, reproductive biology, growth, life history, and habitat use of sharks/rays, providing students with an in-depth view of the biology of sharks and their relatives.</td>
</tr>
<tr>
<td>ZOO 3407L</td>
<td>Biology of Sharks and Rays Laboratory (1)</td>
<td>PR: BSC 2010, BSC 2010L, BSC 2011, BSC 2011L, CHM 2045, CHM 2046 OR CALCULUS (MAC 2241, MAC 2281, MAC 2311) OR STA 2023. The course explores the diversity, taxonomy, anatomy, behavior, ecology, physiology, reproductive biology, growth, life history, and habitat use of sharks/rays, providing students with an in-depth view of the biology of sharks and their relatives.</td>
</tr>
<tr>
<td>ZOO 4233</td>
<td>Parasitology (3)</td>
<td>PR: BSC 2011, BSC 2011L and CHM 2210 and MAC 1105 or higher-level MAC course or STA 2023.</td>
</tr>
<tr>
<td>ZOO 4307</td>
<td>Vertebrate Zoology (3)</td>
<td>PR: BSC 2011 with a minimum grade of C-, PCB 3023 or PCB 3043 or PCB 3063 or PCB 3712 and CHM 2211. This course examines the organismal biology of vertebrate animals, their anatomy, physiology, ecology, evolution, and behavior, how vertebrates interact with their environments, and how the many diverse groups of vertebrates have evolved.</td>
</tr>
<tr>
<td>ZOO 4307L</td>
<td>Vertebrate Zoology Laboratory (1)</td>
<td>PR: BSC 2011L with a minimum grade of C-. This course examines the organismal biology of vertebrates in field and lab, their anatomy, physiology, ecology, evolution, and behavior, how they interact with the environment, and how the diverse groups of vertebrates have evolved.</td>
</tr>
<tr>
<td>ZOO 4377</td>
<td>Functional Morphology (3)</td>
<td>PR: ZOO 3713C. This course explores the relationship between vertebrate form and function; basic concepts of biomechanics; responses of vertebrate form to ecological and evolutionary constraints.</td>
</tr>
<tr>
<td>ZOO 4454</td>
<td>Fish Biology (3)</td>
<td>PR: ZOO 3713C or PCB 3712 or BSC 2094C or ZOO 2303.</td>
</tr>
<tr>
<td>ZOO 4454L</td>
<td>Fish Biology Lab (1)</td>
<td>PR: ZOO 4454. This is a lab course in fish biology designed to familiarize undergraduate students with the anatomy, ecology, behavior, and classification of fishes.</td>
</tr>
</tbody>
</table>
ZOO 4485 Marine Mammal Biology (3)
PR: BSC 2010 with a minimum grade of C, BSC 2010L with a minimum grade of C, BSC 2011 with a minimum grade of C, CHM 2045 with a minimum grade of C, CHM 2045L with a minimum grade of C, CHM 2046 with a minimum grade of C, CHM 2046L with a minimum grade of C, BSC 3312 with a minimum grade of C
This course will focus on the biology, ecology and behavior of marine mammals through the central concept of adaptation to marine environments. Topics to be covered include taxonomy, anatomy, physiology, behavior, conservation, and management.

ZOO 4512 Sociobiology (3)
An analysis of animal and human behavior such as sex, territoriality, and aggression in the context of evolution.

ZOO 4513 Animal Behavior (3)
PR: PCB 3023 or PCB 3043 or PCB 3063 & CHM 2210 & MAC 1105 or higher-level MAC course or STA 2023
CPR: CHM 2211.
An introduction to comparative animal behavior, with analysis of types of animal behavior, their function and evolutionary origin. Lecture only.

ZOO 4694 Developmental Biology (3)
PR: PCB 3023 with a minimum grade of C, PCB 3063 with a minimum grade of C, CHM 2046 with a minimum grade of C or Chemistry with a minimum score of 5
This course will use a problem solving approach to provide fundamental knowledge of scientific concepts and principles involved in the mechanisms underlying patterns of embryonic development for majors/nonmajors.

ZOO 4753 Human Histology & Molecular Pathology of Disease (3)
PR: PCB 3023, PCB 3063, CHM 2210
The study of cellular and molecular mechanisms underlying various disease states of the human body present in the context of traditional pathology.

ZOO 4753L Human Histology & Molecular Pathology of Disease Laboratory (1)
CR: ZOO 4753
Laboratory associated with Human Histology and Molecular Pathology of Disease.
